The Northville Record

SAMUEL H. LITTLE, Editor.

SATURDAY, JUNE 8th, 1872.

To Subscribers.

Subscribers should bear in mind that the present volume of the Record expires July 5th, after which date it is to be issued as a weekly. Those who have not renewed already should do so without delay.

Life for Something.

When we glance at the record of past events, we notice that not unfrequently marked and noble results have stood intimately connected with personal effort. If it is a fact that in "union there is strength," and that the great body of society blending together exert the mighty influence which moves the world, and that to human appearance the individual is absorbed in the mass, it is equally true that history abounds with instances where solitary individual influence has affected to a considerable extent the condition of nations.

Shakspeare says:

All the world's a stage;
And all the men and women merely players;
They have their exits and their entrances;
And one man in his time plays many parts,

Some have acted nobly in the great drama of human life, and departing have left behind them.

"Footprints on the sand of time." They have erected for themselves monuments far more enduring than those of perishable marble, and which will remain unabashed long after the Pyramids of Egypt shall have crumbled to the dust. But alas! what a vast majority simply breathe and labor and perish like an ephemera. Live for a worthy purpose; have some definite aim in life. There is something noble in the thought. Catch the inspiration of the great and good of earth, many of whom have passed away leaving their works to tell of their true greatness! Follow the example of Him who "healeth the broken in heart and bindeth up their wounds," and who went about doing good. The age in which we live demands our earnest labor. We are living in an age of deep and thrilling interest, in a time when great and terrible events are continually agitating the public mind. The Omnipotent God is shaking the world to its very center, that all false institutions may totter and fall. Error in high places has received its death shock, and now lies writhing in pain, while Truth is asserting her power and rallying her champions to her standard to crush the wrong and battle for the right.

Opportunity for benevolent labor are almost boundless. The cry of the distressed and needy from all quarters is falling upon our ears in cadence most imploring. The command, "Go work to-day in my vineyard," is now thundered from heaven and echoed through the earth.

Say, in this all important time, I will seek out the distressed and administer the balm of pity. I will answer the Macedonian cry for help which is now echoed through the land. I will labor in every good enterprise with a ready hand and a willing mind, realizing that all my works are written in the archives of heaven; not with the pen of iron or the point of a diamond, but with the finger of Omnipotence. I will enter upon my benevolent labors inspired by the thought that,

"We are living, we are dwelling,
In a grand and awful time.
It is an age of ages, telling,
To be living is sublime."

The Edmonds' Impeachment.

The Court of Impeachment, which adjourned on the 24th ult., acquitted Commissioner Edmonds on all the charges. For want of a two-thirds majority on any of the counts of the impeachment, he is allowed to hold his office.

In the eyes of the Senate and the people he stands practically convicted of having published an anonymous attack upon an enemy; of unlawfully withholding public lands from sale; of employing disolute men in his office, and allowing them corruptedly to deal in public lands. On these articles a majority of the Court of Impeachment voted against him.

On all other articles a majority voted for acquittal being 23 to 4 on article second, charging private purchase of lands; 15 to 12 on article third, charging sale of land already licensed and occupied; 19 to 18 on article fifth, charging corrupt sale of script to defraud the Primary School Fund; 26 to 1 on article seventh, charging corrupt practice of entry of lands in script; 14 to 12 on article eighth, charging the circulation of an obscene publication; 19 to 8 on article ninth, charging the mailing of the same against the United States laws; 36 to 1 on article eleventh, charging adultery.

As the editor of this paper has for so long a time been incapacitated from attending to the duties of his office, his expenses have necessarily accumulated, and to defray these we hope that those indebted for the Record will favor him by leaving the amount due with those in the office.

Our Courts of Justice.

The Court of Impeachment comes to us from England, where it became necessary to have some higher and more independent tribunal for the trial of political offenders than the common law courts of the country. The House of Lords being composed of men who were as a rule immensely wealthy, and were incapable of being bribed either by money or political influence, as they were life members and their membership was hereditary, was the safest bar before which a political offender could be tried.

It was established in this country on almost the same basis. It is the only court in which a public officer who has violated the trust reposed in him by the people can be tried with safety, for the truth must be spoken—there are very few of our judges or juries who are incorruptible.

We have so many of what we call professional jurors that our courts are becoming more and more corrupt. These professional jurors hang around our court rooms, and whenever there is a vacancy their eye catches those of the officers of the court, and they go forward and are sworn in with about as much respect for the oath which they take as the ordinary shaver has for the laws of the country. They have an understanding with one of the other parties in the case, and they generally manage to bring in a verdict accordingly.

How much more difficult, therefore, would it be to try a political offender.

Editor.

The first bank was established at Venice near the expiration of the tenth century.

The art of printing was invented about 1440. Lawrence Kotter, of Haarlem, in Holland, first practiced this art with wooden types, but the invention of movable metal types, which of course were far superior to wooden, must be attributed to the combined ingenuity of Guttenburg, Scheffer, and Faust, three citizens of Mentz, in Germany. William Caxton is undoubtedly entitled to the honor of introducing the art in England.

Musical characters as now used were invented as early as 1339. A defective species of notes were used prior to this date.

Steam was first applied to navigation by Robert Fulton in 1807. The first steamboat was built by him in New York city, and launched upon the Hudson river, making its first trip as far as Albany. This nolle scheme was at first treated as visionary to the highest degree, and even after its success was fully established, its worthy projector was suffered to live in extreme poverty, and to die without receiving any tokens of gratitude from his countrymen.

The electric Telegraph was invented by Professor S. F. B. M. in 1847. The first public line was put into operation between Washington and Baltimore in the year 1844. The first message which passed the wires, "What hath God wrought!" was sent by Miss Anna Ellsworth, a native of Hartford, Conn.

The telescope was invented about the year 1600, by a spectacle maker named Galileo, in Padua, Italy. Galileo, a philosopher of Tuscany, improved the instrument and directed it to the heavens, for the purpose of making astronomical discoveries.

Vaccination was first practiced by Dr. Edward Jenner, of Berkley, England, in the year 1796.

The Egyptians are supposed to have discovered the principles of geometry. It is believed that the discovery resulted from the frequent laying out and measurement of their landed possessions, the boundaries of which were annually obliterated by the overflow of the Nile.

Sir Isaac Newton discovered the laws of attraction of gravitation. His celebrated theory was suggested by the fall of an apple as he sat in the orchard.

The use of gas for lighting streets was introduced in London in 1844; in the United States, at Baltimore, in 1841.

The Philadelphia Convention.

The National Republican Convention met at Philadelphia on Tuesday, Gen. Grant was unanimously elected as the nominee of the Convention for the Presidency. No nomination has as yet been made for the Vice-Presidency, so far as heard from. Michigan supports Colfax.

Mrs. ALICE M. BAKER takes pleasure in announcing to her former customers that she has

Inventions and Discoveries.

There are various opinions concerning the origin of letters. Memnon, the Egyptian, is by some supposed to have been the author of the Phoenician introduced letters into Greece about 1450 B.C. His alphabet consisted of only sixteen letters. The ancient order of writing was from right to left; afterwards the lines were read alternately from right to left, and from left to right; finally, the present method was adopted, being considered most natural and convenient.

The ancients first wrote upon palm leaves next upon the inside bark of trees; afterwards on tables covered with wax; at a later period upon a sort of paper made of the bark of papyrus, an Egyptian plant; at last parchment and vellum were invented and used until about the year 1000, when paper made of cotton came into use; that made of linen was not known until 1820. White paper was first made in England 1699.

Knitting stockings was invented in Spain about 1550.

Spectacles were invented by Spino, a monk of Pisa, in 1286.

The origin of newspapers may be traced to Italy, in the sixteenth century. The first newspaper published in England, July 28th, 1588, was called the English Mercury. The first paper of North America was printed at Boston, April 24th, 1704, and was called the Boston News Letter.

The first bank was established at

Venice near the expiration of the tenth century.

The art of printing was invented about 1440. NEWSPAPER DECISIONS.

- Any person who takes a paper regularly from the post office—whether directed to his name or not—will be considered as having given his consent to the payment.
- If he does not take his paper discontinued, he must pay all arrears, or the publisher may cause to send it until payment is made, and collect a sum equal to the amount which the paper is taken from him or not.
- The courts have decided that referring to the paper as "a newspaper" from the time of removing and saving them placed it, is prima facie evidence of intentional fraud.

Plenty of rain.

Local items are scarce in this week's issue.

Most of our farmers have finished planting corn.

What crops are in the ground are growing splendidly.

The fishing parties are jubilant, and expect to be the last to work for a short time to come.

Now is the time to send in job work, which will be nearly executed on short notice.

We learn that our Methodist friends are about erecting a parsonage. Mr. F. R. Peal has the contract for building it.

Our citizens are becoming thoroughly waked up on the matter of building board sidewalks, and the work is progressing finely.

Our Union School closes in two or three weeks for a long vacation. Our teachers have all worked faithfully and well and need rest and recreation.

Are our people to celebrate hero on July 4th? Is now a query in the minds of many. Have our Northville folks any patriotic feelings? If so, now is the time to work.

We learn that the Presbyterian church is to be put under repair. The services in the meantime, no undertaking are to be held either in the Baptist church, or the Young Men's Hall.

The pulpit at the Presbyterian church, Sabbath before last, was occupied by Dr. Stephen Marion, President of the Middle Memorial Institute at Charlotte, N. C. From 1846 to 1856 he was connected with the mission of the Presbyterian Board in Paris.

Mrs. Phillips gave an entertainment here on the 28th ult., which consisted of dramatic readings and recitation. We learn that her audience was a thin one from some cause unknown to us.

Our young friend, Mr. Jades Vraedurgh, who is preparing himself for the ministry, has favored the Baptist society with preaching for two Sabbaths past, and will probably fill the vacancy occasioned by the absence of the regular pastor for several weeks to come.

Rev. C. H. Richardson, who has been suffering for a week or two past from a disease of the throat, is recovering. The church for which he is pastor have granted him a vacation of several weeks, during which time, accompanied by his wife, he intends to go to Illinois, in hopes of more fully regaining his health and recuperating his wasted energies.

Quite a singular occurrence took place a few days since on our public street. The daughter of Sheriff Congdon was violently thrown from a buggy by the sudden starting of the horse, which turned about in such a manner as to upset the vehicle. She was thrown to the ground with such force that observers supposed she must have received some very sad and perhaps fatal injuries; but all were joyfully surprised when she arose from her perilous looking position, unharmed.

R. R. SASH U. —Wednesday night about 8 o'clock a freight train ran off the track on the H. W. & M. road, three miles above Holly, resulting in a general demolition of several freight cars and an engine. Trains were consequently prevented from running till 12 o'clock A. M. Thursday.

NEW ARRANGEMENT.—Next week the train, of late going South at 12 o'clock and returning at 6 P. M., is to be drawn off and such arrangements effected as to admit of returning in the evening, as usual, on a freight train connecting at Wayne with the Dexter accommodation.

FATAL RAILROAD ACCIDENT.—On Wednesday night about 12 o'clock a passenger train on the D. L. & I. Railroad broke in two on a down grade between South Lyon and Plymouth. The forward part of the train lost speed, it was "telescoped" by the other part, and a general smash-up took place. Frank Ellsworth, conductor, and a brakeman, also unknown, are missing, supposed to be killed and buried under the cars. No others injured.

Items at large.

Congress is to adjourn on Monday next.

The Amnesty bill passed Congress on the 22nd ult.

The eight hour strike in New York has succeeded, and is extending to other cities.

The first eruption of Mt. Vesuvius took place A. D. 79. Pompeii and Herculaneum, and several smaller cities, were buried beneath the ashes which were thrown out by this first and terrible eruption.

Hon. Charles Francis Adams, the American member of the Geneva Tribunal of Arbitration left Paris for Geneva, on the 21st ult.

The Missouri State Senate met on the 20th ult. as a Court of Impeachment, to investigate the charges against Judge Lucas, one of the Circuit Judges of the State.

The Hon. Daniel E. Sickles, United States Minister to Spain, arrived at Madrid on the evening of the 20th on his return from America.

Henry Miller, a convict in the Michigan Penitentiary has been informed of the death of his father and his own inheritance of nearly a million dollars, which he may proceed to enjoy in August.

Bad cooking on the part of a wife is held by a Texas Judge to be good ground for divorce.

Chicago is going to build a hotel which will cost \$20,000,000. It is to be ten stories high, and will occupy four blocks. Rates from \$1 to \$10 per day.

Hon. John Saidfield Macdonald, late Premier of Ontario, died at his residence in Cornwall on Saturday last.

Perera-Rosa is in the field with a grand quartette—Perera-Rosa, Starkey, Wachtel, and Miss Phillips.

The tunnel drift has reached a point about 650 feet from the Detroit shore and about 100 feet from the Windsor shore.

There are now nine candidates in the field for the Presidency, and the Democratic National Convention to be held yet. The American voter will certainly have plenty of choice.

"Departing prosperity," or whisky, is what is the matter with the town of Charlotte. Signs—Fewer loafers and less fights on its streets. Give us a little of that.

Two gentlemen, one named Woodcock and the other Fuller, walking together, happened to see an owl. Said Fuller, "That bird is very much like a Woodcock." "You are very far wrong," said Woodcock, "for it is Fuller in the head, Fuller in the eye, and Fuller all over."

The first Presidential election took place in 1788. Ten States only took part in the election, neither North Carolina nor Rhode Island being then in the Union. John Adams was elected Vice-President. In 1796 occurred the first Presidential election contested between parties—the Federalists and Republicans, as the Democrats were then called.

We learn that the Presbyterian church is to be put under repair. The services in the meantime, no undertaking are to be held either in the Baptist church, or the Young Men's Hall.

Mrs. Phillips gave an entertainment here on the 28th ult., which consisted of dramatic readings and recitation.

We learn that her audience was a thin one from some cause unknown to us.

Our young friend, Mr. Jades Vraedurgh, who is preparing himself for the ministry, has favored the Baptist society with preaching for two Sabbaths past, and will probably fill the vacancy occasioned by the absence of the regular pastor for several weeks to come.

Special Circular for 1872

Something New

We have added a large stock of BUILDERS HARDWARE, HOUSEKEEPERS' HARDWARE, STOVES AND IRONWARE, NAILS, GLASS, BLACKSMITH'S GOODS, FLOSSBURG COAL, HUHS, SPOKES, BENT STUFFS,

Farming Implements, GRINDSTONES, etc. The goods were bought to save the recent heavy advances in metals and are offered at less than

PRESENT VALUE,

The condition of the Iron Market makes it absolutely certain that all goods made of iron or steel must bear a high price for some time to come, and it is expected, by those best informed, that still further advances will be made in most lines of Hardware.

However this may be, we mean that our prices shall always be as

LOW as the Lowest,

Those who are building this season will find it to their advantage to get our estimate of the death of his father and his own inheritance of nearly a million dollars, which he may proceed to enjoy in August.

Call early so that we may fill orders from our present stock.
