

The Northville Record

SAMUEL H. LITTLE, Editor.

SATURDAY, AUGUST 3, 1872.

CONGRESSIONAL.

We are, as it is well known, neutral in Politics but we think the time has come when good citizens of both (or, we might say under the present unusual alliance in party contest) and all parties are anxious that men fresh from the people, men who know their wants and interests, and have "back bone" enough to act for them, men who are free from corrupt rings and governmental patronage unpledged, upright and honest, should be chosen to represent our congressional Districts. We have no war to wage with Detroit, or worthy representative men anywhere, but we sincerely believe that some man of ability and integrity, one who is free from the shackles of preference and place already placed upon them, should be selected for the First Congressional District which is now composed of Wayne County only.

The people are heartily sick of rings, and corrupt bargains among their political leaders, and we believe would rally to the support of any man whom they believe to be honest and capable, one who cannot be bought or corrupted. Such men

have in the country, men who will do valiant service for the people and the interests of the whole nation. This time has come when reform is demanded in legislative circles, and we believe, more confidence will be inspired in such men, than can be in men more intimately connected with the great centers where political bargains are concocted. We hope we are not amenable to censure if we most respectfully ask our citizens to put before the convention, soon to meet to make nominations for Congress, the name of some one of our townsmen, and urgently maintain their claims. This is not only best for the interests of the district, but good sound policy in viewing their election.

We have in this place, a gentleman long and correctly connected with the republican party, and one who, in representing us in the legislature, faithfully and manfully discharged the duties devolving upon him who would be the man for the place. He is fully competent to meet all the requirement of so responsible a position and would, we doubt not, reflect honor upon the party supporting him. His private life has been beyond reproach, living and acting in a manner becoming a christian and a gentleman. Surely such a candidate for unsolicited, public honors could not but answer every claim for the peoples' good.

We sincerely trust that the claims of this section of our District will receive due consideration in the coming Congressional Convention to be held in Detroit the coming week.

A WORD OF ADVICE TO OUR CITIZENS.

Having business often in Detroit, we have noticed many times people returning home with arms full of goods, all of whom thought, that they had made their purchases cheaper than the same articles could be purchased at home. We then as we do now questioned it very much. Why should it be so, can any of our readers give any satisfactory reason why goods cannot be sold as cheap in Northville as in any village or city in the State?

Rents and all other expenses connected with the mercantile trade, certainly are very much cheaper here than in a city. In the first place one will admit that there are times when the people are justified, or it seems to be necessary for them to go away from home to make purchases, and that time is when they cannot find just what they want, or cannot be pleased with the selections at home.

But nine times out of a dozen, we sincerely believe that goods can be purchased as cheap at home as elsewhere; and if that is the case, we cannot but think that the people should give the largest share of their patronage to our village. Our merchants here are keeping a full line of all kinds of staple goods, all of which, we believe can be purchased for Cash, cheap as can be found elsewhere. If a fine shawl or a silk dress pattern or a fine tapestry ingrain or brussels carpet is wanted, without any doubt Detroit is the place to buy them.

As nearly all our interests are here, we naturally feel a welfare for all those who are interested in the Mercantile trade here; and while we do not intend to dictate to others where they should trade, we cannot disguise the

fact, that we believe it to be the best way always to give the lion share of our patronage to our own merchants providing purchases can be made as cheap with them as elsewhere.

We are very much pleased indeed to see the improvements which are being made in our Village Cemetery. The new arch over the gate and new steps over the fence are pretty, and as a portion of the fence running North and South upon the west side is torn down, we conclude that a new one is to be built. We have thought for some time, that something should be done there, as it was very much needed, and we believe that every resident of our village will unite with us in thanking the village board of trustees for ordering these improvements to be made.

Law Office.—Our young friend, formerly of our village, H. G. Swift, has opened a law office in Detroit. Mr. Swift has prepared himself for his profession by taking a thorough academic course, spending some time in the law of the best law offices in Detroit, and graduating with the Degree of LL. B. from Michigan University, after a full course of the same, with a standing second to none of his class. His card bears his name and address, and he is well known throughout the State. He is a first class man, and we select him for him a successful career.

State News.

Monday, July 15th. A man named Wm. St. John, living at Point Edward and employed in the locomotive shops of the Grand Trunk Railroad at that place, was under the turn-table where the engines are turned about, and started to get out as the engine was running off the table, when he was struck and his body nearly severed. He lived only a few minutes. He was a married man and had only been in this country, a few months.

Saturday night the barn of L. Loomis, of Sylvan, five miles northwest of Chelsea was burned, together with a threshing machine. It is supposed to have been struck by lightning.

An Allegan druggist recently made a mistake in putting up a prescription, by which a little child of Ira Davison lost its life.

The First Michigan Infantry will hold its annual reunion at Jackson, August 26, and the reunion of the Twenty Michigan Infantry will take place at Lapeer, Aug. 27th.

The first native of China who has been naturalized in Michigan, is a resident of Lansing. His name is Lee, but he takes the name of USA P. Foster.

On the 22d inst. a serious accident occurred on the Michigan Central, about three miles east of Charlotte. The express train ran over an ox, which threw the engine from the track, and the engineer, D. B. Mehl, in attempting to jump off, was caught between the brake wheel and rail, crushing his head and killing him instantly. He was a resident of Battle Creek, and leaves a wife.

It is proposed to hold the annual convention of the Michigan Bakers, at Kalamazoo, Aug. 24th at the same time as that of the State Fair, or the third week in September.

Mr. Neigler of the township of Constantine, St. Joseph County, had several head of cattle poisoned by eating Paris green prepared for the destruction of potato-bugs.

John Morris, Agent at the State Prison, has made arrangements for a course of lectures to be delivered to the convicts. President Angell and Professors B. F. Cook and Moses Coit Tyler are among the speakers.

The Flint & Pere Marquette Railway Company are building a new trestle work over the Walled swamp hole, about three miles this side of Holly.

The house of Robert Darrow, four miles from Mason, caught fire from a kitchen stove pipe on the 26th and was entirely destroyed. The furniture was burned up with the house, and also \$750 in money.

Over 50,000 pounds of wool have been marketed at Ann Arbor the present season.

A rattlesnake was killed in Leonidas township, St. Joseph County, last week, 3 1/2 feet in length and with 21 rattles.

A man named Worth Ballard, at White Lake, was killed in his bed by lightning Sunday night 21st.

Motor Orders Office.—The following postoffices in Michigan were made money order offices on the 15th of July: Blissfield, Brodhead, Brighton, Calumet, Capac, Cheboygan, Clinton, Clinton, Dexter, East Tawas, Hartford, Howell, Hubberston, Maple Rapids, New Baltimore, Oscoda, Spring Lake, and Wayne.

What is the difference between the entrance to a barn and a loofer in a printing office? One is a barn door and the other is a barn door.

Love for the Dead.

"The love that survives the tomb," says Irving, "is one of the noblest attributes of the soul. It has its woes likewise its delights; and when the overwhelming burst of grief is calmed into the gentle tear of recollection, then the sudden anguish and anguish agone, overthe present ruins of all that we most loved are softened away into pensive meditation on all that was in the day of its loveliness. Who would root such a sorrow from the heart, though it may sometimes throw a passing cloud over the bright hour of gayety, or spread a deeper sadness over the hour of gloom; yet who would exchange it even for the song of pleasure or the burst of revelry?" No, there is a voice from the tomb sweeter than song, there is a remembrance of the dead to which we turn even from the charm of the living."

Special Circular for 1872

We have a large stock of
BUILDERS HARDWARE,
HOUSEKEEPERS HARDWARE,
STOVES AND TINWARE,
NALES, GLASS,
BLACKSMITHS GOODS.

BLOSSOMING COAL,
HUBS, SPOKES,
BENT STUFFS,

Farming Implements,

GRINDSTONES, etc. The goods were
bought before the recent advances
in metals and are offered at less than

PRESENT VALUE,

The condition of the Iron Market makes it absolutely certain that all goods made of iron or steel must bear a high price. Goods

will make a profit in the market.

However this may be, we mean that our prices shall always be as

LOW AS THE LOWEST,

To suppose holding the search will
find for it's advantage to get our customers in nail, glass, or all kinds of

HOUSE AND BARN TRIMMINGS.

Call early so that we may fill orders from our present stock.

F. R. BEAL & CO.

NOTICE.

We are Agents for the
D. G. SASH.

LINEN, BRACKETS,
HOLD UPS, ETC.

NEWSPAPER DECISIONS

1. Any person who writes a paper receives from the post office a letter to indicate to whom it is addressed or whether he has received or not payment for the paper.
2. If a person orders his paper discontinued, he must pay all expenses of the publisher by certified mail and if no payment is made and collection is refused, the publisher may consider the paper as discontinued.

3. The court has decided that returns to the newspaper and periodicals from the post office removing and leaving them enclosed for a refund make evidence of fraud and false.

VILLAGE and VICINITY.

We notice farmers are beginning to sell their wool.

The weather has been favorable for farmers to secure their grain.

Messrs Jackson & Norton have improved the appearance and convenience of their store by a new awning.

Old papers for sale at this office at one dollar per 100. Just the thing for pantry shelves. Now is your time.

A twin child of Rev. B. S. Taylor of Mt. Clemens was buried here this afternoon.

The family of Mr. V. O. Whipple are in sorrow occasioned by the death of their only child Wednesday. The funeral took place Tuesday 1. M.

Farmington is having a census this from mail, dogs, and swallows. Numbers have been found.

A dog belonging to Wm. L. Hart showed symptoms of rabies yesterday.

Mr. Polson, of South Lyon, quite an oil fair, died last evening and was buried on the 21st.

Our village is having a great deal of trouble with its dogs and swallows. Numbers have been found.

There are quite a number of houses in town of the old style, and the village which will be built up. We hope to see a great deal of improvement.

Avon has a new school building recently built, and the school term has commenced.

The Methodist church is nearly ready for service. It is a fine building, and the congregation is large.

Mr. G. W. W. was here at present a short time ago, and was in town for a week visiting his son, John Waterman, who is married to Mrs. Waterman. W. W. was here once during a visit to the young gentleman and Miss H. Waterman.

The water in our village is very bad, and it is impossible to run the road through water, (say a few hours, and dry). The sand is so bad that it is impossible to get through. We have, however, cleared a pond so that it can be crossed.

The Methodist church is nearly ready for service. It is a fine building, and the congregation is large.

Carpenters and masons are in great demand here this season. It is very busy. No man need be out of employment. No man can say truly, that there is no work for him.

There has not been a time since we became a residence of this village when there has been more building and when more improvements have been made here than this season. We are heartily glad to see this change, as it speaks well for our village.

Within five months, the Rev. Mr. Brock buried his wife, a widow, half to three women, married one of them was used for her last journey, by one of the others, got divorced, and married another, and left him for the branch of promiscuity tried by an ecclesiastical tribunal and suspended from conference, then went and joined the Campbellite church, and he and his third wife were both baptised. It is monstrous, — say so, and that this happened in Indiana.

Thursday July 19th while Mr. John Maines, of about thirty-five years, living about three miles from Dexter, was reaping wheat, and while passing under a tree, the reel struck the road. He was on an express train, and while rearing for them to fall, hit him a severe blow on the head, causing him to fall in front of the knapsack which strapped his arm in such a manner as to necessitate amputation and also inflicting a terrible wound on his neck by the gun. Medical aid could not save his life. He died Saturday, leaving a wife and two children and a large community to mourn his loss.

THANKS.—Mrs. S. J. Pierce, proprietor of Pierce's Bazaar, 84 Main St. Lockport, N. Y., has forwarded us copies of the Morning Times and Daily Union published at that place. We feel considerably gratified to have a friend, and shall endeavor to reciprocate the favor.

Visiting Here.—We were favored with a call Friday from Miss F. L. Clark of Mt. Morris, Livingston Co., and Miss E. Clark of Ann Arbor, two young ladies, and intimate friends of Ella Thompson, who are now visiting with the family of Mrs. Van Boshkirk. They are to remain some time, and during the mean time will visit Grand Lake and other points of interest.

IMPROVEMENTS.—W. P. Hungerford is making some improvements in the way of building. The wing on the east side of the house has been moved to the north of the main part and will be used for a kitchen, while in its place will be erected a structure of the same height as upright portion, with a space of 6 feet between, for a hall. This will be finished with one of the best dwellings in town. Mr. Jas. K. Lander, has the job and employs on the work several of our best carpenters.

FATAL ACCIDENT.

A citizen of Livonia found dead on the road.

Mr. Harvey Durfee, an old and respected citizen of Livonia, was found

dead on the road, his body covered with a heavy coat.

of Mr. Alexander and Edwin Fuller, at 10 o'clock Friday morning.

The particular place where we can learn of the cause, Mr. Durfee, as well as the most of his neighbors, has been in the habit of driving each morning to the Kater's Mill Factory, (Gull River) with Mr. using a horse capable of holding his weight, and the horses generally forming a team. The first morning that was

of Mr. Durfee's firm, was up in the morning, and the road was bad.

A horse being made, he was

driven to the Kater's Mill.

He had just started on his

way, when he was overtaken by

the horses of Mr. Alexander and

Edwin Fuller, who were

driven to the Kater's Mill.

THE FAT MAN'S STORY.

BY O. J. HOPKINS.

The old fellow had a glazed carpet-bag. He seized by the button-hole a man whom he called George, and anchored him only a length or two to the sidewalk. "I can't sleep but here," Then they pulled and twisted and folded about the lamp post, until the gentleman, with the glazed carpet bag, puffing and wheezing in an in-

describable manner, had spoken, as near as I can recollect, to the following effect:

"Yes, George, I just got home from New York; came by Sound steamer, and I haven't slept much. I can tell you what's the matter! Well, I'll tell you.

In the first place, George do I look like a man that would take advantage of a fellow with one leg? "Don't I have trouble enough getting my two hundred and seventy pounds along on two legs? Of course I do."

"Well now, George, I am just the same toward married people, or people going to be married, as I would be to that one-legged soldier over there on the other side of the street grinding 'The Batt-

ery of Freedom,' and wish he would move the war into the next street. "No sir, I might have been a married man myself once, but I am not, for rea-

sons best known to a lady, I have never been married."

"All thirty years ago, and I was going to tell you about last night, I've noticed, by the way, George, that young people will get married on any provocation whatever, and I don't object to it, mind, unless they sit up all night and court afterward, and rob me of my sleep. But what shall I say about that couple just right on the Sound? I turned in about ten o'clock. They hadn't even the excuse of being married. They were just courting, and it was the most tiresome piece of business you ever heard of—that fellow, that did it, saying the same thing over and over. They were seated on the grass, plump against my state room door. Well, George, it was awful. I came near getting asleep about eleven o'clock, and I really believe if he had only changed the back of his story, if he had only grunted in a few lies, just for variety, I might have slept through them. Now, imagine, if you can, George, the sort of talk I'm going to rehearse to you striking in endless repetition against the thin, tall, well of your state room, just where your bare feet necessarily touch it, for your terribly always too short. The piece of boardings with the sound, and—and the entiment, George, and that tingles your feet and so it tuples all the way up to your ears. Now, you know yourself, George, that's no way to take your courting. 'Oh, how I did love Caroline,' said for the twentieth time, the wretched of a fellow just outside my state room. 'Oh, how I did love Caroline—it was her deep chest tones that we're so gratifying to my toe-nails—'and howCaroline said she loved me! Thinking of her perfidy! I never knew anything so perpendicular as her perfidy!—What an ass he was, George, to be sure!—She was very beautiful, Mary, he went on, Mary being, I hope, the only other person who shared with me the wretchedness of his telling to these things—'Caroline was very beautiful, Mary. She looked just like you. She was a good girl, but so perfidious! I want you to be as she was to me. I want you to take her place in my heart. I want you to be just like her. We were engaged for a year,' said he, in one of his hideous rounds, and then I insisted, says he, still aggravating my feet through the thin paneling, and then I insisted that Caroline should not only cut the acquaintance of that spruce young Ransom, the leather-dealer, but also write him a letter and tell him he'd better find him to be a villain, and wanted nothing more to do with him. She asked me why I didn't write the letter to Mr. Ransom myself if I wanted it written. I told her, of course, that Mr. Ransom was no friend of mine, as he was of hers, and I thought it was her duty to write the letter, and, just because I insisted, she went off and married that fool of a young Ransom himself. Oh, she was so perfidious!"

"Well, George, I coughed, but the story went on. I upset a chair, but the story of Caroline's perfidy never stopped, except to repeat. She was so beautiful—just like you, Mary, and I want you to be just like her to me. Mary! Well, I upset the other chair, and blistered all my toes kicking against the partition, all for no use. Finally, about midnight, I could stand it no longer. I arose and janned down my lattice window. The words 'Caroline's perfidy' came in with a breath of salt air through the opening as I stuck out my head and saw two shadowy forms seated on the guard rail against my

more than once. I've kicked over two chairs, and blistered one—I don't know but two—of my toes, to give you warning. Now I wish you would move away from here, and take your perdy with you, and let me sleep. They were there, derestruck, just as I was. They were rising to my bed but her. Then they pulled and twisted and folded about the lamp post, until the gentleman, with the glazed carpet bag, puffing and wheezing in an in-

Encouragement.

There was once a schoolboy named Robert, who passed for a very dull one among his companions, and was ridiculed and called "blunderers" etc.

It happened one day that some members of the School Committee were examining the pupils in drawing. With downcast eyes Robert timidly held up his spectacles amid the half-suppressed laughter of his comrades.

"Don't be ashamed, my boy," said one whom we will call Mr. Curtis. "I made worse looking trees and horses when I began to draw. Go on, you'll conquer—will even surpass me, I'm thinking." He then drew a sketch and gave it to the boy, saying: "There, see what can be done by perseverance."

This little incident gave Robert a start in life. Those words were for him as solid capital well invested.

Several years after, Mr. Curtis was examining some architectural drawings which a friend had shown him. He commented in the highest terms both the designs and their style of execution.

"The architect considers himself indebted to you for his success," said his friend.

"Me?" exclaimed Mr. Curtis, "I don't understand."

"Do you remember encouraging a boy at the Hillside school, and giving him this sketch?" replied the other, producing the small drawing before mentioned.

"I had entirely forgotten it."

"That boy," continued the informant,

"is the originator and exponent of

"the relaxing power of Johnson's Analytical Liniment is truly wonderful. Cucumbers are already numerous where bent and stiffened limbs have been liberated and strengthened. It when used for this purpose the part should be washed and rubbed thoroughly Apply the liniment cold, and rub it in with the hand."

A crowd of "Horse Men" and others daily throng the stores in country towns—*Sisterhood, Fraternal Condition Doctors.* They understand that horses cannot be kept in good condition without them, and with them can be on a much less quantity of grain.

The Elmwood Collar is just the thing for hot weather. The folded edges and perforated field prevent its breaking down under all circumstances. You can wear it over your coat. Ask your druggist for the Elmwood.

CHERRY TREES should never be highly pruned. Singular as it may seem, better results have been obtained by growing cherry trees in grass than by cutting them as highly as pears. Experienced fruit growers in Delaware, who once began a system of liberal pruning and treatment of cherry trees, found after an experience of a few years, that the bark would burst, gnm would ouze out, and many portions of the tree show an unhealthy condition. The growers immediately discontinued high pruning, and I wed the bark down to grass. The trees recovered their health, and have borne beautifully ever since the system of grass culture began. It is the only fruit tree of all varieties, which we can safely recommend to be treated in this way. A Delaware friend says his row of cherry trees, growing in grass along the fence, are the picture of health and luxuriance, while in previous years, with orchard culture, he could not make them equal to *Indians.*

PARAFFIN, PLASTER AND VARNISHES are an article of commerce obscured by the distillation of petroleum. In form it resembles spermaceti, and is a clear, rock-like mass, rather, fat, at the degrees, and nearly transparent when applied to many substances. It is often recommended preserving fruits and flowers by dipping them in paraffin and withdraw them quickly, &c., & then at the instant's sets, and gives all the art of this treated. In order to be serviceable the flowers should be freshly gathered, perfectly dry and free from dust, or dirt, &c. The paraffin should be softer than fat, soft, & to dignify it, and the flowers should be dipped in it separately, holding them by the stalks, and moving them about in order to cover off the surface which are likely to get injured within the petals. The petals of plant or flower which are not preserved to be preserved should be removed with scissars previous to dipping them in the paraffin. Fruits should be dipped in it, & held by the stem. *Industrial Monthly.*

THE Apple-Tree Borer Remedy.

Having seen a great many remedies and a great many plans for destroying the apple-tree borer, and none of them very satisfactory, suppose I give a case from actual knowledge of my own. My neighbor put out an orchard of fifty trees. They were four years old from the graft, and as they had not been very well pruned in the nursery, pruning was done at the time of transplanting. The trees started all right in the spring, but alas!

I remove the hen-wanting to sit to one of these boxes covering her while morning, so she can't see the field, and when she is nicely settled on the aged sprouts a little sulphur wings her feathers, and then covers the foot of the root with a board, liberating her every other day to feed, &c. This is often enough to let the hen off, and if she should chance to be forgotten it will not her no harm to wait another day. The advantages of my plan are these: it is cheap, little trouble, & systematic, any branch coming off and going on like clock work, and they really seem to enjoy it.

WATER CLOSET is an article of commerce obscured by the distillation of petroleum. In form it resembles spermaceti, and is a clear, rock-like mass, rather, fat, at the degrees, and nearly transparent when applied to many substances. It is often recommended

PARAFFIN, PLASTER AND VARNISHES are an article of commerce obscured by the distillation of petroleum. In form it resembles spermaceti, and is a clear, rock-like mass, rather, fat, at the degrees, and nearly transparent when applied to many substances. It is often recommended
