ROWN HANDS. BY Wm. RAYNE F. MALL. Full many a pair has been written, And the eyes have been to the prize...

"IT MIGHT HAVE BEEN."

I was terribly lonesome. What could I do with myself? It is only about three weeks that the responsibility of my individuality hangs heavier upon me; my business engrosses me for the most part; for I had been more successful in money matters than in any other interest...

one grape in my mouth and one in his. I thought I was doing him a favor; he knew he was doing me a favor. As the grapes disappeared began to howl like a demon. "Ain't too hot enough?" he said. "No, no, not half enough yet."

He looked at me from head to foot, mentally gauging the extent of my idleness; and then answered scornfully. "Mamma named mamma; don't you know that?"

He was evidently off right; but what sort of a favor I had done him in charge of the laundry, and what sort of a favor I had done him in charge of the laundry, and what sort of a favor I had done him in charge of the laundry...

ender eyes upraised, the whole wealth of her pale golden hair falling in one curling, misty cascade down to her waist, the innocence of angelic radiance from her, and veiling her golden form with a gentle grace, so wonderfully pure, so tenderly touching...

AN EXTRAORDINARY case was brought before the (Lancashire) Magistrate on March 12. Two boys, Gerald Maurice Brown and George Henry Seagrave, pupils in a boarding school at Lincoln, quarreled at a trivial matter, and Brown, by way of settling the difficulty, sent Seagrave a formal challenge to fight a duel.

Alfred and Alexandrona.

A LONDON correspondent writes: "The Duke and Duchess of Edinburgh have been noted with an income something like \$200,000 a year. They are to have at least two magnificent residences in England—one, Clarence House, in town and another, not far from the city, which they will have two establishments at St. Petersburg, when they choose to visit their native clime of the Duchesse de York."

A Serious Piece of Amusement.

SEVERAL afternoon two young men named Walker Scott and George Grief were target-shooting with revolvers on a common near the north end of Prospect street, when an old man named Sotiksy, a Pole, came along. The young men had their hats on, and they were laughing and joking all the time, and the old man started off on a run, screaming at every jump, and did not stop until he reached his home on Russell street. He was so thoroughly frightened that he hid away like an idiot, and so exhausted that he could not get up. It is said that the occurrence has deprived him of his reason, and that he covers in a dark corner, and shrieks and screams like one fearing some great peril. The young men became frightened when they saw that their fun resulted in, and gave a boy named Charles Harper two shillings to take the old man's clothes home. This boy was sitting on a fence about five rods from the parties while they were demanding Sotiksy's clothes, and he says they were laughing and joking all the time, and that he readily understood them to be in fun; but the affair may be something more serious to them. The old man's friends were consulting with the police yesterday, and warrants had not been issued they will be to-day. Grief is employed at the Junction, and Scott is said to be a brakeman on a freight train on the Great Western Road.—Detroit Free Press.

Situations Wanted.

THE GLENS Green gives the following advice to young men in reference to leaving the country for the city: "Be a member of any of the large cities without a good lighting upon advertisements of 'situations wanted.' In the country newspapers such an advertisement is rarely seen. In the Chicago Tribune, for instance, how frequently do we see advertisements like this: 'Situations wanted by a young man able and willing to work at anything honest and that will keep him from want?'

It will be a relief to a large portion of the community to learn that the bodies of the Siamese Twins are not to be exhibited publicly. The sons have claimed the remains, and deny that there has ever been any intention in the family to make a speculation by exhibiting them.

A Duel Between Boys.

AN EXTRAORDINARY case was brought before the (Lancashire) Magistrate on March 12. Two boys, Gerald Maurice Brown and George Henry Seagrave, pupils in a boarding school at Lincoln, quarreled at a trivial matter, and Brown, by way of settling the difficulty, sent Seagrave a formal challenge to fight a duel.

A Race for Life.

IN the winter of 1863-4 a couple of Canadian voyagers, by the names of Nicholas and Jules Semineau, were caught in a terrible snow-storm while taking up their traps on the head of the Big Horn River, in the Rocky Mountains. There were here any hope of escape until the snow should become compact enough to bear their weight upon snow-shoes.

wanted, while nothing of the kind appears in the country for a season. There is in our young men a lesson in this. In the country you are needed; in the city you are not wanted. The land is full of employment, and living and wages are good. The cities do not invite you to come; the country does. Why, then do our young men cling to the cities? It is no infrequent occurrence to find men, both able and willing to work, wandering in want through the streets of our cities, with pauperism at hand and beggary before them, when they know that a day's travel would take them to where employment is waiting them, with all the abundance that farm and garden can afford. And still they cling to the bustling street, and find food and sleep in damp and noxious quarters, when they might have both in places of health and comfort. The facts are ominous of evil. They proclaim to the young men of the country who have their fortunes and livelihood to make, to shun the cities and betake themselves to the country, where employment never fails, where advertisements for situations are unnecessary, and where comfort and contentment are the equivalent of labor.

Up the canon through which the river flowed the wild sucked and roared terribly. The icy face of the stream was soon cleared of snow, which drifted into the lateral canons, passing them completely. In order to pass away the time, the young men busied themselves in making skates from the horns of an antelope, or of skating they had learned while boys, on the broad bosom of the St. Lawrence. Their meat running short, Nicholas concluded to have a run on his skates up the river, with the hope of killing an elk, which was numerous on the pine-covered slopes of the mountains. Little in hand, he started in high spirits, gliding by rocky cape and frowning promontory, made by the sharp bends and curves of the river. Where the activities were gentler, forests of the yellow pine, cedar and juniper lifted their dark green heads, now burdened with a weight of snow. The quick gaze of Nicholas searched in every shadow for the mighty antlers of the elk, or the blue coat of the black-tailed deer, the best of animals in the mountains.

He was not long ere he spied a herd of the latter, of which he had the good luck to kill two. The saddles of these he secured together, strapped them around his shoulders and started on his return home, distant about four miles. He started leisurely along, humming a light French air, when suddenly his ears were struck by an unearthly cry, which he at once recognized as the roar of the mountain lion, and he could distinguish, also, that the cries proceeded from more than one. He quickened his pace. His skates rang hard against the soiled ice. The cries became clearer, and he instinctively felt that he was pursued. Fear lent him wings. He dropped a saddle, hoping thereby to steady the hanger of the lions. He found presently, however, that they made no halt. It was the young man they raged after, and caught but his blood would appease them. He now cast aside his remaining saddle and his rifle, and leaped forward upon his skates, with all the power he possessed. Yet the beasts gained rapidly upon him. He could hear their mighty bounds. At times he fancied he could feel their hot breath. He gazed over his shoulders, and their glance revealed the "horns" of a mountain lion wide open, and their blood-thirsty cries were as frequent as the "baying" of a blood-hound. He was now compelled to double on his course, the weight and impetus of the lions carrying them beyond him. Happily, Nicholas preserved his presence of mind, and by his skill as a skater, combined with wonderful activity, he eluded the efforts made by the lions to seize him, and drew slowly toward home. Presently he saw the smoke curling from under the rocky shelf, and as he shot past his ears were greeted by the welcome crack of a rifle, and one of the lions tumbled over dead almost at his feet. The voyager again turned toward the rock. Jules had reloaded. His piercing eye stretched the remaining lion upon the ice, and Nicholas was saved. It was some months, however, ere he fully recovered from the superhuman efforts made by him in his race for life.

The next summer he served as a guide, and it was while discharging the latter that he related to the writer his thrilling adventure.—Edward B. Reeson, in "What You'll Do?"
