Prohibitionists Have Blocked Out Much Hard Work.

Mr. Crozier Says Local Option Is a Delusion and a Snare.

GRAND RAPIDS, Mich . May 17 .- (Specint.) - "The time has come," said one of the speakers at the convention, yes-"when the Probibition party must either go ahead very fast or must go backward. There is no standing still." No truer words were spoken in Grand Rapids yesterday. The Prohibitionists have come to the end of their campaign of sentiment. Whatever succosses they make in the future must be made by hard, aggressive political work. pleases about Republican duplicity in passing the present if mor laws; but the fnot remains that the laws were passed by men who were ardent for the utmost

by men who were ardent for the utmost temperance legislation they could get, and many of them would have left the Republican party had the temperance legislation falled.

Thus it happens that in the "dry" counties, where the Prohibitionists are attengest, the Republicans have taken the resilion of the friends of temperance. Local option by counties may prove to be a debusion and a snare, as Mr. Crez of east it is, but so long as it seems to be the most practical thing in temperance, the Prohibition party will have up-hill work in adding to their ranks. Mr. Power's plan of veiting up a tout in every "dry" county polding matings seven days in the wock is probably the best thing that could be devised to win adherents; but, as the proposor sud, this would cost money and hard work, and, if it is to be done, Presidictionists must go down deeper into their pockets than they have ever done before.

and hard work, and, if it is to be done. Proafbitionists must go down deeper into their pockets than thoy have evoid done before.

Another trouble with the prohibition people is the threatened split between the years and old mee. This came to the front over and over again yesterday. The old men were successful to be one of the delagate, at large; and the years meeting won a violery in the election of Albert Dodgo, of Powler life, as charman of the state central committee, but it is doubtful if he could have been elected had G. P. Waring, of Ridgeway, consented to the use of his name. The young men can write. There is plen'y of time for them to receive the hourer, was the common expression. But in a putty that has never won a political victory, there are no honors. The only question should be, Who is the best man for the place of it is workers and not figure-honds that are needed.

The defeat of Mr. Crezier, for one of the defeates at large 1000 19 the Etaluan delegation is who stain in the bitterest and most singing things about the Republican party. All the other speakers yesterday were tame when compared with Mr. Crezier. He soized the question by the right end, too, when he said that the recent decision of the United States supreme court had made prohibition a national question and had given the party a distinct standing before the whole people. Prof Dickle, Mr., Lin, hrap and R. v. John Russell, however, will give the delegation plenty of speakers

a recognized place and standing among mon of intelligence, breeding and public spirit. For soveral years, at least, he has banished wine from his own table, and it may be that he has never used it in entertaining. There can be no danger that he will prove anything but a true and lovat header to the party.

Of the mon-general of the convention, the less said the botter. The local committee was not only inefficient, but was even insuling to the newspaper men who wanted only a chance to work. The convention was held in a cramped and suffy theater instead of in Hartimen hill, which is the finest convention building to the state; and there was too much singing and side tilk.

THE CONVENTION'S WORK. Significant Planks in the Prohibition

GRAND RAPIDS, May 17 .- (Special.) -The afternoon session of the Pronibition convention opened with prayer and singing, and after the usual reports, the work of naming delegates at large began. D. P. Sagendorph had settled upon Prof. Dickie as first dolegate-atlarge, but Frank B. Cressey got in ahead with a speech eulogiving Rev. John Russell as the father of the Prohi-John Russelt as the father of the Prohibition party, that has just attained his majority—21 years old. Bo Mr. Russelt was made first delegate and Prof. Dickle second. Then Mr. Mary T. Lathrop was selected for the third place. The struggle for fourth delegate was among Chailes Mosher, Rev. Myron H. Haynes, A. O. Crozler, Alfred Wise. On the second ballet, Crozler, who had led praviously, received 169 votes and Wise 170. Wise was declared elected.

ALTER a protracted discussion, the Mothodist conference refused to make the use of tobacco a disqualification for the office of bishop. It would lead to a great many complications. Por If it is wrong, it is wrong for laymen as holl as eleigh, and if it is right, it is right for the clergy as well as the laymen. Nevertheless, inasmuch as cloud-liness is next to godliness, something ought to be done with the invotorate chewers who make puddles on the floor of the pows during services.

UNLESS the correspondence of the Buffalo I'vening Nows is whelly bogus, Mr. Brain absolutely and unequive-cally withdrays from the area; this year, and notainates Characty Driew as his choice for successor. Tuc New York delegation to Chicago will east its vote for him and his prospects today are undoubtedly brighter than those of any other candidate. For the Blune men control the situation and if Diriy is his heir he will succeed in both senses of the word. His 19-ignation of the presidency of the New York Central railt and will remove the taint of monopoly from him; as a brilliant and megnotic man he will prove Mr. BLAINI' equal, with much more stability of temper and sound judgment than Li aivi.

Michigan Prohibition Convention Or the 500 delegates entitled to seats at the Michigan Prohibition convention less than half were there. Dend cia tion of the local option plan before it has had a fair trial does not commend the party to reasonable mon for us f nnoss or wisdom. It is acceptive probable that the doune to be toward local option was what kept so many delegates away. The scheme to do the party work in the "dry" counties is better for prohibition than it is for the party. To it will undoubtedly increase the probebitton sent.ment in those countres and not increase the prohibition sote. A good many Prohibitionists satisfied with its operation in the rown county will not care to risk losing the lenefits of it by at .king its continuation on the states adopting state problemen. They will fear that grasping at the shadow they will lose the substance

The electric tension also increases under the influence of emotions—such, for example, as the effect of misse, witch mg nents the crop-nition. This extremellary oresture howevers not unique. Dr. Loque-mentioned the case of a woman who during in aurora borealis was suddenly charged with electricity, which mani-fested strelf when she pas-ed her finger over the face of her brother; she re mained electric for two months.

A Part of Life.

Cath if ie Cole in N. O. Picayune. My dear sir and my dear madame when your little child comes to your side, her sweet eyes big with wonder relating to you some trifling happening. don't be bored or uninterested. Do not send her away unanswered. Got down on your krees, as it were, and try to be awast and innocent and eager and pure as sue is. Try not to outgrow the song of birds, the laughter of children, the wonder of growing trees, the tears that we sned over dead babies and rainy days and tales that end sadly. Try not to cutgrow the home games and the home news, and the great little events of your neighborhood. Do not be a cynic where fondness, and tenderness, and trust, and love are concerned. Do not laugh at ausling gris and lats who try to write poetry. Do not sneer at the church falts or the tribulations of the gentle little president of the sewing society. These things are just as much song of birds, the laughter of children, society. These things are just as much life as going to Eurone—as being elected to congress—as writing a great book.

Col. Ingersoll's Originality. New York Sun.

Col. Ingersoll's eulogy upon Roscoe Conk ing shows that he has lost none of his originality. One of the gains of tha address is the sentence: "He had the pride of a prince and the fortune of a peasant." Another is the distinction between pride and vanity. The orator admitted that Conkling was proud, but declared that he was not vain. He continued: "Vanity rests upon the opinion of others—pride on our own. The source of vanity is from without-of pride, from within Vanity without—of pride, from within. Vanity is a vane that-turns, a willow that bends with every breeze—pride is the oak that defies the storm. One is cloud: the other sets. One is weakness—the other strength."

This is worthy a place among the ulterances of the philosophers. The filstinction is logically, clearly and pietures out of away. turesquely drawn.

Those is a general complaint that the storage pattery electric lights now used in the city hall are too dim. Manager Fuller explains that some of the officers in the building stated that the lights were too bright without shades, and they have ordered a large quantity for all desk ights in the building, which will be placed upon their unival, and the lights will be run at their former brilliancy, thereby satisfying any occupants that have complained. The intensity of the lights is regulated entirely in the building and can be adjusted to any degree of candle power desirable, although it is rather difficult to suit such a large variety of eyes without some complaints.

LOCAL NOTICES.

High and Low Tension Electricity.

The distinction between high and low tension electricity is relitive only, but the line of natural distinction is drawn at the pressure where an electric content becomes dangeness to life. A committee of the British house of commons, after careful study of the subject, decided that the limit of safe electrical pressure was reached at from 250 to 300 volts pressure, that a current under a pressure of above 300 volts was always dangeous to life, and at 300 volts criain death if taken through the body. High tension electricity at or above 500 volts pressure, is also difficult to confine to its proper conductor, and for this reason is the cause of m. ny fires. Acting upon the maxim that safety should be the first consideration, Lifson bres his system of olectric lighting upon a maximum current pressure of 230 volts, with a pressure of 110 volts only at the lumps at small motors, and of 220 volts at large motors, thus securing perfect safety to life and profetcal safety for a fires. The Lid son illuminating company are alone in offering this class of a fic electric lighting and electric power to the record the remion current, liable to bre us through without without with their offering the classes of a fic electric lighting and electric pare of their or cut through without withing to the lamps or notors and of danger life or cause lires.
