A NARROW ESCAPE.

Yerkes Bros. Teamster Caught in the Machinery.

Last Friday forenoon, Will Luteman, Yerkes Bros. teamster, Lou Gildemeister, their head miller, and Hi Johnson, another employee, went up on one of the upper floors of the flouring mills to fix some of the machinery and while at work, Luteman's clothing caught in the gearing and commenced to wind up with startling rapidity. Johnson grabbed hold of him, endeavoring to keep him back, but the clothing was evidently of the warranted-to-never-rip kind and instead of tearing, it kept dragging Luteman nearer and nearer the fatal revolving shafts. At the onset Gildemeister had started for the basement to shut down the mill, but it seemed almost impossible for him to reach it in time. Down the stairs he plunged, three or four steps at a time, pale, excited and gasping, yet with a remarkable presence of mind, grasped the lever, gave it a quick turn and the machinery began to slowly stop. It was just in the nick of time for the unfortunate Luteman for, notwithstanding his resistance, coupled with that of his companions, he had been dragged down to the shafting, half around it once, and a few seconds more must have been ground to pieces. When extricated from his perilous condition, Luteman was a sight. There was not a stitch of clothing left upon him, excepting under clothing, and the calf of his left leg, and his left arm, below the shoulder, were lacerated in a terrible manner. He was quickly conveyed to W. H. Yerkes' residence near by and Dr. Blanchard summoned. The injuries will prove more painful than serious and after a week or so Luteman will be about again with only a few scars to remind him of the time when he beat the grim angel of death by less than ten seconds.

PETER GILLISPIE.

The Well Known Northville Miller Is Dead.

Peter Gillispie died at his home, Cady street, in this village about nine o'clock Saturday morning. The funeral occurred from the home, Sunday afternoon, Rev. J. M. Belding officiating, and the remains were taken to Detroit Monday morning and interred in the family lot in Elmwood. Mr. Gillispie was born in Scotland, May 9, 1825. He moved from Canada to this place some seventeen years ago and, together with a Mr. Cole, bought the Argo flouring mills of Wood & Sons, afterwards buying out Cole's interest and assuming full control of the business. Mr. Gillispie had planned a trip to Scotland and was to have sailed May 25th for England, then to meet an only brother, John Gillispie of Melbourne, who sailed from that port May 11 to arrive in England June 26, when together they were to have visited their native country. Several weeks ago, Peter met with an accident in the mill which had since confined him to his bed, postponing his trip indefinitely and the disappointment at not being able to meet his brother as arranged, more than any other thing caused his death. Not until the brother sets foot upon English soil, June 26, will he learn the sad news of his brother's death here. Mr. Gillispie had been married twice. By his first wife he leaves a married daughter in Sioux City and a son in Cincinnati; by his second wife his daughter Josephine and Peter of this place. Mr. Gillispie was somewhat austere but withal an honest, upright, citizen and business man.

TERRIBLY SLUGGED.

That's What the Ypsilanti Ball Club Received Tuesday.

The "Ypsie Atlantic" came over here Tuesday with the same avowed purpose which the cyclone had in mind when it struck that city some weeks ago. They returned home Tuesday night in much the same condition that Ypsie found itself after the cyclone's visit. The Northville club picked them up, turned them around, pounded them lengthways and crossways, up and down, forwards, backwards, every way and anyway, until the half dozen coons, who accompanied the club over, actually turned pale with grief. The "broad oceaners" could not hit the sphere with any degree of success and when they did, there was always a Northville man right under it. German struck out ten men, one right after the other. The score was Northville 18, Ypsie 6.

HE WAS A STRANGER.

But Everybody in Northville Knows Him Now.

Rev. James Mansfield Belding was born in Amsterdam, N. Y., the most beautiful city along the historic valley of the Mohawk. His grand father, Major General Benedict Arnold, was of close kin to the well known and once ardent Revolutionary Arnold, bearing like name and title, and was for half a century one of the most prominent men in central New York, serving in both congress and the state senate. His father, the late Judge Samuel Belding of New York, was for many years judge and surrogate of Montgomery county, and a personal friend of such men as Roscoe Conkling, Turlow Weed, Gov. Fenton, Judge John K. Porter, Hon. Wm. N. Seward and Hon. Webster Wagner. Judge Belding died in 1872, leaving a widow, three sons and two daughters, since then two sons have died. The subject of this sketch, James M. Belding, was the youngest of nine children. His early education was received in the graded school and academy of his native place. He began newspaper work at the age of nineteen, being connected at different times with the following New York daily papers: Albany Journal, Albany Press, Schenectady Union, Utica Republican, Amsterdam Democrat and Fonda Democrat. He was sent by the Albany Journal in 1880 to report the National Republican convention that nominated James A. Garfield. He has done work on one or two Chicago papers, including the Inter Ocean. While in Chicago he was connected for several years with the Y. M. C. A. and chaplain of the Chicago House of Correction.

[REV. JAMES M. BELDING.]

where for three years he addressed on Sundays an audience of six or eight hundred men. In 1881 he entered the McCormick Theological University where he applied himself to a special course of study, at the same time acting as an assistant to Rev. A. E. Kittridge, D. D. then pastor of the Third Presbyterian church. This church was the second largest church of that denomination in this country, having a membership of over two thousand. Dr. Talmage's, of course, ranking first, numbering 4,447. In the Third church, Mr. Belding had charge of the young people's meeting which had an attendance of about four hundred. In 1882 he entered the McCormick Theological Seminary, Chicago, graduating in 1884. He was ordained by the Chicago Presbytery and installed pastor of the Pullman church, October 18, 1886. During his ministry there of nineteen months he received 111 into the church. Failing health compelled him to resign in the spring of 1888 and the following winter he went to St. Louis and effected the organization of the West Presbyterian church, one of the most aggressive and wide awake churches of that city. He resigned again at the close of the year and upon invitation from the Platt, Nev., Presbytery he went to Marysville in 1891 with full authority to settle a church difficulty of several years standing. Mr. Belding expected to remain but a few weeks, but found it necessary to divide the church and organize a new corporation. He secured lots and built a beautiful church and parsonage, making the property of the society the most attractive in the hustling little city. He remained two and a half years when illness again compelled him to resign, and after spending the fall among the mountains of the south, he joined his mother in Detroit where she has been an invalid with her daughter, Mrs. Frank Bruce of Pine Street.

Upon the resignation of Rev. W. T. Jaquess, Mr. Belding was invited to supply the pulpit of the Presbyterian church here and preferring a stated

Highest of all in Leavening Power — Latest U. S. Gov't Report.

Royal Baking Powder

ABSOLUTELY PURE

field to acting as city supply, as some of the Detroit pastors urged upon him, he has been with us spending Sunday and the greater portion of the week here. He is thinking of moving into the parsonage and bringing his mother here. Mr. Belding is daily growing in popularity with not only his church congregation here, but the people of the village generally. He is an enthusiastic worker and doubtless will make a wide record for our church, if the people back him in his efforts. He is ambitious for his church. When he hits he strikes hard. He has strong convictions on most questions and possesses the courage to stand by them. He says he has little use for half-hearted, tight-fisted Christians and thoroughly believes in the gospel he preaches of cheer, charity, love and beneficence. He contributes regularly to several papers. The Saturday evening issue of the Amsterdam, N. Y., Democrat always contains a column or more of interesting historical reminiscences from his pen. With the 24th number of the present series of the Democrat appeared the city of the author, which we present to the Record readers today through the kindness of that paper. Mr. Belding is unmarried and, we judge, about 35 years of age.

THEY WILL CELEBRATE

At Plymouth July 4th. in First Class Style.

Our sister village of Plymouth is now busily engaged in making preparations for a big 4th of July celebration, and promises to do herself proud. One of the drawing cards will be the races at the fair grounds. The fire works in the evening will be on a huge scale, and all in all Plymouth will just let herself loose.

A Card.

Having disposed of our stock of groceries to Mr. E. G. Morrison who has opened up a business in C. J. Ball's store across the street, we wish to thank the public for their past liberal patronage and commend our customers to the kind courteous attention of Mr. Morrison who, we assure them, will use them well and make inducements which will merit their trade.

STARK BROTHERS.

ANNOUNCEMENT.

Having purchased the Merchant Tailoring business of J. Geo. Webster, I shall continue the same in the old location in the rear of the Northville State Savings bank and will be pleased to wait upon all who call on me.

Soliciting a liberal share of your patronage, we make prices to meet all competition and satisfaction guaranteed. Yours respectfully,

FRANK J. HOAR.

BUSINESS FLASHES.

FOR SALE—Farm of 30 acres adjoining the village of Salem. Well drained and well cultivated. 25 acres in hay. Good barns. Apply to Margaret Frederick, Salem. 411

FOR SALE—My desirable residence on Main street at a very reasonable price. Apply to Mrs. G. Downer. 411

FOR RENT—Pleasant rooms. Apply to Mrs. Dexter White. 411

FOR RENT—Bicycle, by day or hour. Combination. Apply to Richard 411

FOR SALE—Hay, \$9.00 per ton at the barn, 3 miles west of Northville. C. P. Angell. 421

FOR SALE—Fine 40-acre farm in Novi township five miles north west of Northville. Good buildings, fruit, etc. For price, terms, etc. apply to F. S. Neal. 421

FOR SALE—My desirable residence on Dunlap street, large lot, very cheap and on easy terms. Inquire Wm. Wilkins, Northville. 371

FOR SALE—Beautiful farm, 2 1/2 acres, good buildings, etc. For stock, grain and fruit there is no better farm in country. Two miles from village. Might take desirable residence property in Detroit in part payment. For further information apply or write this office. 381

FOR SALE—Two new houses and lots in Northville. Inquire Record office. 351

FOR SALE—House and lot in Belknap. Apply to John Sewell. 341

FOR SALE OR EXCHANGE—In best site in village. Building lots, single or whole tract. Nearly 3 acres, 1/2 acre. A. McKay. 311

FOR SALE—Young Scotch Collie dog. Good watcher and valuable breed. \$5. Apply to L. Chartr. 430

NEW GOODS.

We have just received 25 more new style Picture Mouldings, making us 148 styles of Picture and 30 of Room Moulding.

THE FINEST

And most varied stock you ever looked at. White and Gold, White and Gold burnish, Cream and Gold, Green and Gold, Terra Cotta and Gold, Blue and Gold, Amber and Gold, Olive and Silver, Cream and Silver, Glits and Gold burnishes, Silver, Oak, Ash, Chestnuts.

We buy at jobbers prices. Discount our bills and what is better give our customers the benefit.

For low prices, quality of goods, fine workmanship on frames and mats, harmonious framing, we invite inspection and defy competition.

BROWN & CO.,

And everything you want in the Grocery line.

Rollin H. Purdy,

Successor to B. A. Wheeler.

THE RECORD.

F. S. Neal, Publisher.

PORTVILLE, MICHIGAN

It is not believed that the composition of Mexico will rise in insurrection because a proofreader was bunched with a lot of editors sent to jail recently by the president of the republic.

BROKEN down foreign counts come to this country and get rich young wives for the asking. Foreign singers, piano players and actors come over here and take back with them independent fortunes in a few months. No wonder foreigners despise Americans.

AMERICANS will note with a sigh of resignation that Mahan's life of Farragut is being mentioned by the English press as "the biography of the great Confederate admiral." The blunder is so delightfully English that the New York dailies ought to endorse it at once.

The prince of Wales is said to present the extraordinary spectacle of a man in danger of succumbing to old age while his mother is still in her prime. He has crowded about ten years into every one of his life, and he has, it is said, had fun enough to console him for missing a job on the throne.

ANNOUNCEMENT is made that a Tacoma gentleman has gone East for the purpose of having hands grafted upon a pair of stumps that are all that remain of his arms. The person making the announcement should also go. Perhaps a conscience could be grafted into his system at the same institution.

ANOTHER hatchet has been dug up in the Borden murder mystery at Fall River, Mass. "If there was anything the tragedy did not seem to need to round it out, was more hatchets. There are now about as many as the defendant has fingers and toes, and if she used them all, only killed two people there must be a merciful strain in her composition.

WHEN a contractor balances an iron girder so delicately that a chance touch knocks it over, and the crash kills a pedestrian, it would almost seem time for a rebuke. Possibly the corner's jury may rise in its might and declare censure. This is believed to be the limit of punishment set by precedent for contractors careless to a homicidal degree.

A PHILADELPHIA paper inquires with some degree of interest, "Can you regulate the liar?" Particular reference is had by it to the warmly imaginative novelist in charge of circulation statistics. Out here the scheme is not simply to regulate the person in question. It goes even so far as to embody the hope of reforming him. But the Philadelphia liar may be more set in his ways.

CURRENT events have furnished at least two fruitful themes for press comment the past few days, and for pulpit treatment Sunday—the Geary act decision and the opening of the world's fair on Sunday. Each of these questions has a patriotic side and a boycott side, and to the credit of the newspapers it should be added that they have supported the patriotic side in both cases by a large majority.

AN amendment has been added to the code of ethics governing the medical profession. A Denver physician sued the estate of an ex-patient for a fee, and the fact was then brought out that he had been engaged to the patient. The court opined in effect that the administration of pills and potions under the circumstances was clearly a labor of love. A doctor of mercenary instincts should in cases similar, hire a fellow practitioner and whack up on the fee.

THERE is certainly room for improvement in the outfit of life-boats when a life-saving crew going to rescue others are themselves overturned and drowned. A recent catastrophe was due, it is said, to the breaking of an oar. Isn't it possible to make an oar that will not break, or a life-boat that will not capsize when an oar does break, or some device by which the crew can save themselves when the life-boat capsize? American ingenuity ought to be equal to such a task.

THE ease with which electric cars are stopped as compared with those run by steam makes residences along electric car lines more desirable. It is not unlikely that railways with electricity as motive power will within a few years radiate for several miles from every large city to country places, where beauty of scenery and good society make residences desirable. To make their home neighborhood more attractive is therefore often the best investment land owners near a city can propose.

THE folding bed is becoming more or less a vampire. Scarcely a month goes by that the newspapers do not report a case of one of them shutting up like the spring-lock lid to a cedar chest and smothering its occupants. The machinery about these automatic affairs ought to be so adjusted as to make their closing impossible, except as they are made to close by human agencies. In other words, their natural condition should be open, their unnatural, shut, and then no more such accidents would be reported.

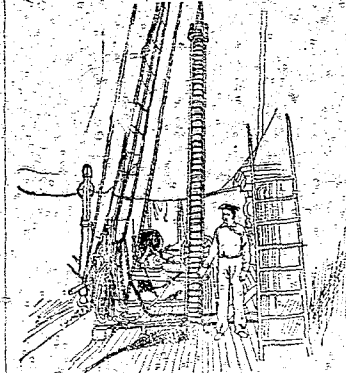

DEEP SEA ANCHORING

HOLDING A VESSEL IN THREE MILES OF WATER.

A Sudden Jerk on Such an Anchor Would Have Wrecked It Not For a Last Invention—Appliances for Locating Rapid Currents.

HERE ARE PHASES of deep-sea investigation that cannot well be studied unless the vessel is at anchor. The best way, for instance, to observe the speed of currents is when the vessel is stationary. Sometimes vessels detailed for scientific work have to anchor at great depths, and it was a long time after oceanic research began before entirely satisfactory appliances were invented for anchoring in the ocean far from land. Now vessels are able to anchor at depths of 12,000 feet or even more.

It was ten years ago that the first Gulf stream current observations were made from a vessel at anchor. Lieut. J. C. Brown, Jr., in command of the schooner Drift, was instructed to anchor in the current. The vessel was supplied with 3,200 feet of galvanized wire rope three-quarters of an inch in diameter. As the schooner did not have a steam windlass her wire rope, four-fifths of a mile in length, was coiled on deck and was veered and hauled in by hand. Her deepest anchorage was only a little over 2,000 feet, and the currents were observed by floating cans attached to a log line.

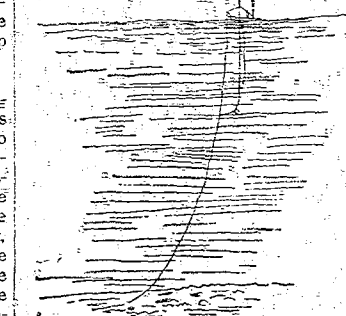

THE RUBBER ACCUMULATOR

One of the best appliances for deep sea anchoring that has been practically tested is that which has been used during the recent Pillsbury investigations of the Gulf Stream on the United States Coast and Geodetic Survey steamer George S. Blake. In Pillsbury's monograph on the Gulf Stream and the methods and results of his researches, he expresses his opinion that the best anchor for the deep sea is what is known as the Cape Ann anchor. It has a very long shank, fairly large palms, and a long, wooden stock, which must be of hard wood, for at great depths the pressure of water would make short work of an anchor stock made of soft wood. Any anchor will answer in coral rock bottom, for the anchor will nip only at a crack or coral head, and any old condemned anchor of ordinary type is as effective as a costly new anchor. In soft bottoms, however, the Cape Ann anchor is the best. The weight used is generally 400 to 500 pounds.

It will be seen in the second illustration that great pains are taken to prevent any part of the vessel from receiving undue share of the strain, which is in fact distributed along the whole length of the ship. From the reel in one of the rear bunks the rope runs up to the middle of the foremast and then through the rubber accumulator out to the end of the anchoring boom, a stout spar thirty feet long from which the rope drops into the sea.

The rope, which hangs almost vertically, is used to measure the depth and swiftness of currents. To it is attached the current metre and a 200-pound weight to keep the line as vertical as possible.

Of course, with a vessel pitching in the open sea, it was necessary to invent some means of preventing the great strain that would result, unless

THE VESSEL AT ANCHOR

in some way or other the tension upon the rope was diminished. As a result of many experiments, what is known as a rubber accumulator was introduced for the purpose of relieving the anchor rope and the vessel from the sudden jerking strain due to the pitching.

The accumulator, which is seen in our illustration, is an arrangement of rubber springs devised by Lieut. Commander Sigbee for use in dredging, and afterwards changed in some respects to meet the new requirements in anchoring. It consists of seventy rubber disks or buffers on a middle rod so arranged that by compression they act as a spring. The rubber buffers are cylindrical in shape, two and one-quarter inches in thickness, and are separated from one another by brass disks or washers one-eighth of an inch in thickness. The diameter of the washers is over two inches larger than the rubbers, and this gives the latter a bearing surface as they expand in diameter when under strain. These seventy rubbers admit of an effective compression of about five feet, which is found to be sufficient to relieve the strain.

It was found on the Blake that a wire rope, a half to three-quarters of an inch thick, is the best for vessels of her size. This wire rope is wound on a reel which is placed below deck.

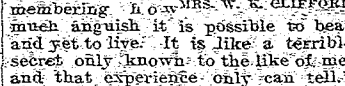

It is necessary to give the rope considerable play, and a good deal more is paid out than the distance from the surface to the bottom. The proportion of the length of anchoring rope to the depth varies with the character of the bottom, the strength of the current, and the depth of water. It was found on the Blake that in water less than 3,000 feet deep a length of rope two to three times the depth was required. In 12,500 feet of water, 18,000 feet, or over three miles of rope, was used.

MRS. W. K. CLIFFORD.

The English Novelist's Passionate Sympathy Over the Poor.

The dominant quality in the work of Mrs. W. K. Clifford, the English novelist, is a passionate sympathy with human beings. This sympathy is the secret of its charm and power. She does not go about trying to discover the reason of things; she does not use her characters as puppets to illustrate some pet physiological or psychological theory; she takes men and women as they are, takes the women whose stories she tells in the volume entitled "Love Letters of a Worldly Woman," she loves the world, not its pomp and vanities, but the round world itself and the people who belong to it.

The capacity of humanity for joy and sorrow, the tragic possibilities of life, strike her with ever renewed pathos. "I have looked so sad," said people, "twice in the crisis of her fate," "feeling for them a tenderness, a yearning, a compassion I cannot describe," remembering how Mrs. W. K. Clifford, before her marriage, was Miss Lane, who, like her, was a noble man in Barbadoes, owning much property there and being speaker of its House of Assembly. Her early youth was chiefly spent in the country with her maternal grandmother. During the holidays, she would come up to the other home in London, peopled with brothers and sisters. At a very early age she appeared in print with contributions to the columns of country newspapers. From these she progressed through various minor magazines to the Quiver, for which, in her early girlhood, she wrote several serial stories. One of these, years later, after her husband's death, Mrs. Clifford, at the publisher's request, expanded into a one-volume novel and published it anonymously. In 1875 Miss Lane married William Kingdon Clifford, a man not only of the highest mathematical genius, but one whose beautiful nature and extraordinary fascination were a proverb among his countless friends.

MRS. W. K. CLIFFORD

THE POWER OF TELESCOPES. The Largest Bring the Moon Nearer to Us Than Boston Is. The following careful statement by Prof. E. S. Holden on the power of the eye and the telescope, as they are contrasted in actual experience, is of special and permanent interest. If the brightness of a star seen with the eye alone is one, with a 2-inch telescope it is 100 times as bright, with a 4-inch telescope it is 400 times as bright, with a 6-inch telescope it is 900 times as bright, with a 10-inch telescope it is 1,600 times as bright, with a 12-inch telescope it is 2,500 times as bright, with a 16-inch telescope it is 4,000 times as bright, with a 20-inch telescope it is 6,400 times as bright, with a 24-inch telescope it is 9,000 times as bright, with a 30-inch telescope it is 12,000 times as bright, with a 36-inch telescope it is 16,000 times as bright, with a 40-inch telescope it is 20,000 times as bright, with a 48-inch telescope it is 28,000 times as bright, with a 56-inch telescope it is 36,000 times as bright, with a 60-inch telescope it is 40,000 times as bright, with a 72-inch telescope it is 57,000 times as bright, with a 84-inch telescope it is 80,000 times as bright, with a 96-inch telescope it is 100,000 times as bright, with a 108-inch telescope it is 129,000 times as bright, with a 120-inch telescope it is 160,000 times as bright, with a 144-inch telescope it is 256,000 times as bright, with a 168-inch telescope it is 400,000 times as bright, with a 192-inch telescope it is 640,000 times as bright, with a 216-inch telescope it is 900,000 times as bright, with a 240-inch telescope it is 1,296,000 times as bright, with a 264-inch telescope it is 1,742,400 times as bright, with a 288-inch telescope it is 2,304,000 times as bright, with a 312-inch telescope it is 2,985,600 times as bright, with a 336-inch telescope it is 3,781,440 times as bright, with a 360-inch telescope it is 4,683,600 times as bright, with a 384-inch telescope it is 5,692,800 times as bright, with a 408-inch telescope it is 6,819,360 times as bright, with a 432-inch telescope it is 8,064,000 times as bright, with a 456-inch telescope it is 9,436,800 times as bright, with a 480-inch telescope it is 10,937,600 times as bright, with a 504-inch telescope it is 12,578,400 times as bright, with a 528-inch telescope it is 14,358,400 times as bright, with a 552-inch telescope it is 16,278,400 times as bright, with a 576-inch telescope it is 18,338,400 times as bright, with a 600-inch telescope it is 20,538,400 times as bright, with a 624-inch telescope it is 22,878,400 times as bright, with a 648-inch telescope it is 25,358,400 times as bright, with a 672-inch telescope it is 27,978,400 times as bright, with a 696-inch telescope it is 30,738,400 times as bright, with a 720-inch telescope it is 33,638,400 times as bright, with a 744-inch telescope it is 36,678,400 times as bright, with a 768-inch telescope it is 39,858,400 times as bright, with a 792-inch telescope it is 43,178,400 times as bright, with a 816-inch telescope it is 46,638,400 times as bright, with a 840-inch telescope it is 50,238,400 times as bright, with a 864-inch telescope it is 53,978,400 times as bright, with a 888-inch telescope it is 57,858,400 times as bright, with a 912-inch telescope it is 61,878,400 times as bright, with a 936-inch telescope it is 66,038,400 times as bright, with a 960-inch telescope it is 70,338,400 times as bright, with a 984-inch telescope it is 74,778,400 times as bright, with a 1008-inch telescope it is 79,358,400 times as bright, with a 1032-inch telescope it is 84,078,400 times as bright, with a 1056-inch telescope it is 88,938,400 times as bright, with a 1080-inch telescope it is 93,938,400 times as bright, with a 1104-inch telescope it is 99,078,400 times as bright, with a 1128-inch telescope it is 104,358,400 times as bright, with a 1152-inch telescope it is 109,778,400 times as bright, with a 1176-inch telescope it is 115,338,400 times as bright, with a 1200-inch telescope it is 121,038,400 times as bright, with a 1224-inch telescope it is 126,878,400 times as bright, with a 1248-inch telescope it is 132,858,400 times as bright, with a 1272-inch telescope it is 138,978,400 times as bright, with a 1296-inch telescope it is 145,238,400 times as bright, with a 1320-inch telescope it is 151,638,400 times as bright, with a 1344-inch telescope it is 158,178,400 times as bright, with a 1368-inch telescope it is 164,858,400 times as bright, with a 1392-inch telescope it is 171,678,400 times as bright, with a 1416-inch telescope it is 178,638,400 times as bright, with a 1440-inch telescope it is 185,738,400 times as bright, with a 1464-inch telescope it is 192,978,400 times as bright, with a 1488-inch telescope it is 200,358,400 times as bright, with a telescope it is 4,705,578,400 times as bright, with a 6456-inch telescope it is 4,741,938,400 times as bright, with a 6480-inch telescope it is 4,778,438,400 times as bright, with a 6504-inch telescope it is 4,815,078,400 times as bright, with a 6528-inch telescope it is 4,851,858,400 times as bright, with a 6552-inch telescope it is 4,888,778,400 times as bright, with a 6576-inch telescope it is 4,925,838,400 times as bright, with a 6600-inch telescope it is 4,963,038,400 times as bright, with a 6624-inch telescope it is 5,000,378,400 times as bright, with a 6648-inch telescope it is 5,037,858,400 times as bright, with a 6672-inch telescope it is 5,075,478,400 times as bright, with a 6696-inch telescope it is 5,113,238,400 times as bright, with a 6720-inch telescope it is 5,151,138,400 times as bright, with a 6744-inch telescope it is 5,189,278,400 times as bright, with a 6768-inch telescope it is 5,227,578,400 times as bright, with a 6792-inch telescope it is 5,266,038,400 times as bright, with a 6816-inch telescope it is 5,304,638,400 times as bright, with a 6840-inch telescope it is 5,343,378,400 times as bright, with a 6864-inch telescope it is 5,382,278,400 times as bright, with a 6888-inch telescope it is 5,421,338,400 times as bright, with a 6912-inch telescope it is 5,460,578,400 times as bright, with a 6936-inch telescope it is 5,500,038,400 times as bright, with a 6960-inch telescope it is 5,539,638,400 times as bright, with a 6984-inch telescope it is 5,579,378,400 times as bright, with a 7008-inch telescope it is 5,619,278,400 times as bright, with a 7032-inch telescope it is 5,659,338,400 times as bright, with a 7056-inch telescope it is 5

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the kidneys, liver and bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name Syrup of Figs, and being well informed, you will not accept any substitute if offered.

"August Flower"

"For two years I suffered terribly with stomach trouble, and was for all that time under treatment by a physician. He finally, after trying everything, said my stomach was worn out, and that I would have to cease eating solid food. On the recommendation of a friend I procured a bottle of August Flower. It seemed to do me good at once. I gained strength and flesh rapidly. I feel now like a new man, and consider that August Flower has cured me." Jas. E. Dederick, Saugerties, N.Y.

Entirely VEGETABLE AND A SURE CURE FOR

COSTIVENESS

Biliousness, Dyspepsia, Indigestion, Diseases of the Kidneys, Torpid Liver, Rheumatism, Dizziness, Sick Headache, Loss of Appetite, Jaundice, Eruptions and Skin Diseases.

Price 25c. per bottle. Sold by all Druggists.

DEALERS: JOHNSON & LORR, Props., Burlington, Vt.

SWIFT SPECIFIC CO., ATLANTA, GA.

Life had no charms.

For three years I was troubled with malaria, which caused my appetite to fail, and I was greatly reduced in flesh, and life lost its charms. I tried many curative remedies, but to no effect. I could get no relief. I then tried Dr. Kilmer's Swamp Root, and in a few days I was a new man, and life had its charms again.

Dr. Kilmer's Swamp Root Pills ARE THE BEST. 42 Pills, 25 cents.

PRIVATE THEATRICALS.

He was the villain standing there, darkly handsome and debonair. And she made him begone with a lofty air. But that was part of the play.

The heroine she had a gown from France. Her tearful beauty did much enhance. But I think she gave him one swift sweet glance. And that was not in the play.

He roughly seized her delicate wrist. And grimly eyed her and fiercely bled. "You are mine, and my prey I have, never missed." But that was part of the play.

Her voice rang out like a clear-toned bell. And his leath'ry advances she did repel. But he kissed her after the curtain fell. And that was not in the play. —Judge.

Love in Lodgings.

BY FLORENCE WARDEN.

CHAPTER VIII.

Distant Thunder.

A walk by the seashore may be exhilarating when you are happy, but it is eminently depressing when you are miserable. So poor Cameron found as, dejected and angry, he kicked the pebbles of the beach before him and debated with himself whether he should leave his ungrateful brothers and the exacting Colonel Frere in the lurch, and use part of what was left of the latter's three guineas to pay his fare back to town. He could not quite make up his mind to this, yet he felt that he could not go back to sea-view. It was not only that he had failed in the task he had set himself, that he had exposed himself to the wrathful sarcasm of the colonel and to the "chaff" of his brothers, but he had been made ridiculous in the eyes of the pretty girl next door. She had laughed at him. Cameron felt that he hated her for it, hated her for her sake all the more, for she was a girl who, through their eyes, he saw through them, loathed them.

And so, he walked on, scarcely looking up, until he heard a crunching of the pebbles behind him and a girl's voice saying gently:

"I'm so sorry, so very, very sorry. I didn't mean to laugh, but—"

He turned very red and somewhat confused. For it was the girl that had caused him to forswear the whole sex. There she was in her pretty white frock, and the sun was glaring down with such strength into her gray eyes that she could only bluish and look sideways from under her shabby hat at the disconsolate creature before her. He tried to laugh, with tightened lips and his head held very high.

"Of course," said he, "you couldn't help it. It was so very funny, I know. Ha, ha!"

This attempt at merriment was not a very successful one. Annie glanced at him appealing, and then turned a pair of distressed eyes out to sea. Then she sighed.

"It's of no use denying it," she said with resignation. "It was funny, and I had to laugh. You see, I can cook myself."

Cameron groaned and cast upon her the same look of veneration with which he would have regarded a philosopher or inventor of world-wide fame.

"Then," said he, "I am not fit to speak to you. The distance between us is too great!"

"Oh, nonsense," said she, "it's easy enough."

"Don't say that," he returned earnestly. "When you have failed ignominiously over a thing, it's more soothing to think that thing was difficult."

"But it isn't indeed. It only wants plenty of patience, and then the very smallest possible quantity of brains will do."

"That's it! It was the very smallest quantity of brains that was wanting!"

"I don't mean that, you know. But you brought your great, ponderous masculine intellect to bear on a matter which only wanted a light hand and a very little care. It was like trying to crack an egg with the blow of a bludgeon. Why, I never learnt to cook at all. It seemed to come by nature."

"I wish you would take charge of my 'great, ponderous masculine intellect' for a little while, and lend me in exchange this brain of yours which acquires things by nature!"

"Well, I will do the nearest thing I can to that," answered she, smiling and reddening very prettily. "I will come in this evening, if you like, and show you how to cook the dinner."

Cameron could have gone down on his knees among the pebbles of the beach.

"I should like to die now," said he. "I shall never have a happier moment if I live a hundred years!"

"Yes, you will. Nobody has exhausted life's joys who hasn't tasted my Indian fritters."

Cameron looked at her with ever-increasing adoration. They were walking back slowly in the direction of the houses. The tide was low, and the afternoon sun made the little pools that lay among the seaweed-covered rocks sparkle and glow with red light. What could he do to keep her out there a little longer, in the sun and sea-breeze, away from the kitchen and the colonel? He stopped short, as if with the sudden shock of an idea.

"When I go back," said he, "the colonel will insist on seeing me, and will tell me he's going away!"

"The colonel?" echoed she, somewhat puzzled.

He remembered that all the circumstances of the case could not possibly be known to her, so he begged her to be kind enough to walk a little further with him and to give him her advice, delighted to pour his confidences into such pretty ears.

"So you told the colonel that you were the landlord?" asked she, when he had finished his story.

"No," he answered, with some

pride in his own astuteness; "of course I didn't want to disgrace our name. I told him the landlady was away, and that her name was Hutchinson."

"Oh, I see; you didn't mind disgracing the name of the poor Hutchinsons?"

"Well, you know, they are not in the same position, are they?"

"No, indeed. They are looked upon as thieves—you and your family are martyrs."

"You are severe. I didn't mean that at all. I wanted to tell you that I've been thinking over what you said last night, and instead of blaming you for taking their part, I've come round to your opinion. But where's the harm of suggesting they should keep a lodging-house? It is just what they would do."

"How do you know?"

"Well, I—I—Well, isn't it just what people of that class always do?"

"People of what class?"

"The Hutchinsons."

"Oh, I didn't know that that was the name of a class. I thought it was the name of two unfortunate gentlemen who—"

"Gentlemen?"

"I don't think that is saying too much for them, I don't really."

"You are a splendid advocate. I wish when I am spoken ill of I could get you to take up my cause. Oh!"

This last exclamation was one of dismay. They had, by the lady's wish, now turned their steps homeward, and being now close to sea-view, they saw Colonel Frere and his daughter coming out of the house. But at the sight of Cameron the colonel's face darkened with a frown, and turning abruptly, he re-entered the house, followed slowly by his daughter, who glanced back at the approaching victim with more amusement than anger in her face.

"He's lying in wait for me! I don't go in!" moaned the unhappy Cameron.

But his fair companion tried to nerve him for the fray.

"What is the use of putting it off?" she asked gently. "You must go in at some time or other."

"Not while there's the sea to throw myself into. Or, at least, I shall wait till he's gone to bed."

He tried to pass the house, but the young girl laid her hand upon the gate. Cameron looked at her inquiringly.

"You are not—I mean, are you going in?" he asked humbly.

"Yes," she answered smiling. "I am going to enter upon my new duties as cookdom. You can go up to Colonel Frere and apologize, if you like, for past deficiencies, and say that—that—what shall we say? That Miss Hutchinson has come back."

"Oh, no, I can't let you take her name. Supposing the old thing herself were to come down! By-the-by, won't you tell me what your name is, your surname I mean. Your Christian name I've heard," he added softly.

They were standing inside the gate, in view, it happened, of the bedroom of the colonel's daughter.

"My name is—Annie May," said the girl, looking down.

And she walked straight up the steps into the house, where the grinning Lizer was waiting with the door open. As the young lady passed her, however, the stolid maid suddenly exchanged the broad smile for a respectfully funeral expression, which her features wore until both the newcomers were out of sight.

Annie May added one more obligation to those Cameron already owed her by offering to go upstairs and explain matters to the colonel, pledging herself to be answerable for the cooking during the remainder of his stay. But the colonel was in his own room when she got upstairs, so it was to his daughter that her explanation was given. Temple and Cameron were on the stairs, anxiously awaiting the result of her mission; to their astonishment they soon caught the sound of stifled explosions of girlish laughter.

"They're making fun of us," said Temple fiercely.

"Let 'em," said Cameron, with resignation. "I'm getting used to it!"

However, when Annie May came downstairs a few minutes later she was almost unnaturally solemn. Colonel and Miss Frere had decided to stay, she said, and she, in the character of Miss Hutchinson, had undertaken that they should have nothing to complain of further.

She kept her word. Every morning and every afternoon she would come through the gate in the garden wall, where Cameron was always waiting to escort her indoors. Then she would put on a huge cooking apron, which the deposed chef thought the prettiest garment he had ever seen, and roast and bake, and boil, and make pastry in the most adorable way imaginable. Cameron, while watching her pretty arms dipping into the flour barrel, straightway forgave every old gentleman he had ever heard of as marrying his cook. If they had any of Annie May's ways in cooking, which was perhaps doubtful, the temptation might well be irresistible.

This new regime had been in force more than a fortnight, and everything was going on like clockwork, when as Annie May came in one day for her afternoon work, she saw by Cameron's face that something had gone wrong. Now, under the smooth surface of everyday trivialities, the events of a little heart history had been moving rapidly. From admiring, Cameron had gone on to loving by the easy stages with which a passionate young man takes that alluring journey. As he grew silent, shy, incoherent, she of course, became cooler, more matter-of-fact, more distant; until these two young creatures, who had at first chattered gaily over every course, wrangled about the fish, and made it

up with the dessert, ended by being as stiff and ceremonious toward each other as state functionaries at court.

So that at first, though she knew some mishap had occurred, Annie May asked no question. She would not have him think how easy it was to her to read his face. It was from Temple, therefore, that she heard the news. He was standing in the kitchen with a letter in his hand when she entered it.

"Oh, Miss May," he cried, as soon as he saw her, "isn't it a crusher?"

"What is it? Nothing very dreadful, I hope?"

"Hasn't Cameron told you? It's something dreadful beyond belief. We wrote a letter to the governor a fortnight ago, and he's taken all this time to answer it. And now he has answered it, he writes in a furious rage with us for daring to have an opinion of our own. He says that he is our father, and unless we are prepared to take his view of the case and to follow his lead, we shall none of us benefit by another penny piece of his money, which is rather funny when one remembers what a strong view he took of the obligations of his father to him!"

"But the worst of it is," beamed in Hildred, who had been assisting at the conference, "that he, and our mother are coming here to-morrow, and we are at a loss what to do about the colonel."

"The governor will be in an awful rage when he finds out what we've done!" put in Cameron. "If he does not turn us all out for good when he finds we're letting apartments, it will be months before he will let any of us have another sixpence."

"And if he insults the colonel, as we are afraid he will," said poor Temple dismally, "it will all be up with my chance of ever exchanging a word with Linda again. Just when she'd begun to be so awfully nice to me, too!"

"You must get rid of him," said Annie decidedly.

"But he won't go!" cried the three young men in chorus.

The politest of notes had been sent to him, requesting him to oblige them by leaving, as they had had an offer from a gentleman who wished to take the whole house and come in at once. But he had sent them the politest of notes back, saying that he was very comfortable, that he had taken these rooms for the week, and that he must have a week's notice, dating from the following Tuesday, as Tuesday was the day on which he came, before he would move.

Annie shook her head and looked grave.

What was to be done?

CHAPTER IX.

The First Crash.

"What is to be done?" repeated Temple, who finding the fair prospects of his love outgrowing gloomy, was the most tragically distressed of the brothers.

"The first thing to be done," said Annie decidedly, as she slipped over her sleeves a pair of huge white linen cuffs, "is to cook the colonel's dinner, and to give him something specially nice, to put him in a good humor. Then perhaps he will listen to reason, and take himself off with a good grace."

"A much better way than that," put in Cameron emphatically, "would be for me to cook the dinner and do my worst, and make him dash out of the house in disgust; then, you know, we could lock the front door, and put his things outside and refuse to let him in again."

"I won't have Colonel Frere insulted," cried Temple hotly. "I'd rather go and tell him everything."

"Do, do," said Annie earnestly. "I'm sure it is always the best way."

But this challenge, Temple felt that his courage was unequal to the task. He staggered, he grew red, he made excuses; and finally he disappeared with a meek demeanor, followed by Hildred; and the cook and her faithful assistant were left alone.

[TO BE CONTINUED.]

British Justice.

The severity of British justice was well illustrated at Northampton recently, where a trial for murder was in progress. The jury having been permitted to take a lunch in their room, one of their number took this opportunity to step out, and post a letter. The judge, hearing of this, promptly gave the offending juror a strong lecture and fined him \$250. He dismissed the jury and a new one was impaneled.

Had Heard the West.

Cumso—You look sad. Have you heard some bad news?

Fangle—Yes.

"What was it? Did your tailor tell you he wouldn't trust you any longer?"

"No; that wasn't it. My wife came in and told me that the manager of the largest dry goods store in town said my credit was good for anything in the store."

Tough Wood Made of Paper.

Paper tough as wood is said to be made by mixing chloride of zinc with the pulp in the course of manufacture. It has been found that the greater the degree of the concentration of the zinc solution the greater will be the toughness of the paper. It can be used for making gas pipes, boxes, combs, for roofing and even, it is added, for making boats.

Gaining Experience Early.

Mrs. Dumpsey—Thomas, you must tell Willie not to spend all the time looking at the circus posters. It takes him all day to do an errand.

Mr. Dumpsey—Let him study 'em, Maria, and after he has seen the circus he will know more about the doings of life than he could learn in ten years any other way.—Texas Sittings.

THE NEWER NORTHWEST.

Sheridan the Capital—Its Resources Varied and Its Growth Rapid.

The city of Sheridan is very near the geographical center of Sheridan county, Wyoming. It is at the confluence of the Big and Little Goose creeks and 14 miles east of the Big Horn mountains. Within a radius of 25 miles of Sheridan there are fully 500,000 acres of good irrigable land, water enough in the Big Horn mountains and streams heading therefrom to irrigate all this ground; 275,000 acres now under irrigation and ready for the plow. There are 700 miles of main ditches and 1,000 miles of lateral ditches completed.

If this 500,000 acres of land was all sown to wheat it would produce 20,000,000 of bushels annually; no such thing as drought or general failure from any cause. Coal in great abundance; an 11 foot vein near Sheridan can be dumped into the streets of the city at an expense not exceeding 90 cents per ton.

The beautiful valleys of Big and Little Goose, Prairie Dog, Cat creek, Dutch creek, Soldier creek, the three valleys of Wolf creek, Tongue river, Five Mile Pass creek, and many other beautiful valleys are all tributary to Sheridan, and are now occupied by thrifty, prosperous farmers.

Fourteen miles west of Sheridan, in the Big Horn mountains, there is timber enough to supply Nebraska, and Wyoming—building material of every kind. Forty miles west of Sheridan are the New Bald Mountain gold mines, showing wonderful prospects. Large investments are now being made there. Ten miles further west is the Big Horn basin, in which lie 1,500,000 acres of irrigable land, capable of producing 60,000,000 bushels of wheat annually. Sheridan, by its natural location, is the only distributing point for this whole region of country.

The falls of Big Goose creek, 14 miles from Sheridan, will furnish, by means of an electric wire, over 2,000 horse power to the town. By means of this power many manufacturing enterprises can be cheaply run, besides running an electric light plant and furnishing heat for the town at a price lower than that of coal at \$1 per ton.

Sheridan is the division point of the Burlington & Missouri road, and the county seat of Sheridan county. Repair shops are to be built here. The railroad company owns 160 acres of land, purchased exclusively for shops and side tracks. The main line of the road branches at Sheridan; one line going west to Yellowstone Park, the other line northwest to Helena and Great Falls, Mont. Sheridan is 300 miles northwest of Cheyenne, 300 miles southeast of Helena, and 750 miles west and north of Omaha. Elevation above the sea 3,750 feet. The climate is mild and lacks the severity found in places of higher altitude. As a health resort it is unequaled on the eastern slope of the Rockies.

Situated opposite the law pass between Big Horn and Wolf mountains, Sheridan is the gateway for the trade of Montana, Idaho, Oregon and Washington. It is on the most direct route between Chicago, Omaha and Denver to the northwest and the Yellowstone park.

A TRAINED BEETLE.

His Bagship Knew His Owner and Would Answer Her Call.

Something over a year since a young lady of my acquaintance had an experience with a beetle, which, I think, showed a very marked degree of intelligence in the insect, and, as such instances are somewhat rare, I venture to send you an account of it.

This beetle was a specimen of *Pelidnota punctata* Linn., which was given to her in September, says Science.

At first she kept it in a small box, feeding it with grass, leaves and small pieces of fruit, such as peaches, pears, etc. Occasionally she would give it a drop of water to sip, it would sometimes bite a little out of a leaf, would eat the fruit and would take water eagerly.

From the first she could take the insect in her fingers several times a day and stroke or caress it, also putting it to her lips and talking to it all the while she handled it. When she put it to her lips it would brush its antennae over them with a gentle, caressing motion.

When she left her room she would shut her "buggie" up in its box. One day, about two weeks after she received it, she was called out suddenly and neglected this precaution. She was absent a considerable length of time, and when she returned the insect was not in its box nor anywhere to be seen. Fearing that she might injure it, she stood still and called: "Buggie, buggie," when it came crawling from its retreat toward her.

After this she would frequently leave it free in the room when she went out, and when she returned if the insect was not in sight, she would call it, and it would crawl or fly to her. As this was continued, it would move more and more frequently to her instead of crawling, until at last it flew to her nearly every time it was called. When it came in this way, she would put it to her lips or to her nose, and the insect would appear to be pleased, moving its antennae gently over her lips, or taking the end of her nose gently between them and touching it with a patting motion.

She kept it in her room this way at the hotel where she was spending the summer, until about November 1. She then returned to her home, some 300 miles further South, taking the insect with her. Here she at first kept it in her chamber, but the nights being sometimes very cool, it would become torpid and not get lively again till afternoon. Thinking it too cool for "buggie" there, she removed it to the kitchen.

As it appeared more or less dormant, she put it on a cloth above the hot-water boiler. Here it revived somewhat, but was not very lively, nor did it eat very much.

About the middle of December it fell to the floor accidentally, by which fall it was evidently injured, as after that time it would eat nothing and no longer recognized the young lady.

NEWSY NOTES.

A man at Griffin, Ga., who believes some day that confederate money will be redeemed and will be worth dollar for dollar, has \$1,000,000 in confederate bills stored away.

D. O. Hall of Sparta, Pa., is the owner of one of the finest coin collections in the state. Among his specimens, which number over 6,000, there are claimed to be coins of each of the Caesars.

Warren county, Tennessee, lies almost exactly in the geographical center of the state, and its boundary is almost a complete circle. McMinnville, the county seat, is very close to the geographical center of the county, and roads to the court house are like radii.

Japanese books begin at what we call the end. The lines are vertical instead of horizontal, the first being on the right-hand edge of the page, and are read downwards from the top. The place for the "foot notes" is at the top of the page, and that for the reader's marker at the bottom.

Some folks at Elizabeth, N. J., were interested the other day to see a white crow flying in a flock of his black brethren. As seen from below the wings and belly of the bird appeared pure white, and he maintained his flight with the black crows apparently upon terms of perfect equality.

One of the most famous smiths of old England was St. Dunstan, archbishop of Canterbury. Mayfield, in Sussex is the site of an ancient archiepiscopal palace, and here, according to some, took place the terrific encounter between St. Dunstan and the devil. At any rate, the devil, hammer and tongs which are alleged to have belonged to the saint are still preserved at Mayfield palace.

ITEMS OF INTEREST.

Accomas county, Virginia, ships nearly 1,000,000 barrels of sweet potatoes annually.

Mohammedanism is largely on the increase in the British West African colony of Sierra Leone.

A Scotch newspaper published births, marriages and deaths under the title "Yells, Bells and Knells."

The Amazon Indians use a blow pipe with which they throw an arrow 200 yards with wonderful precision.

About a million kangaroo skins are imported into this country every year. They are mostly used in manufacture of shoes.

The price of private telephones in London is very soon to be reduced from £20 to £10 a year, subject to the condition of a five years' contract.

Shiloh's Consumption Cure is sold on a guarantee. It cures Incipient Consumption. It is the Best Cough Cure. 25c. 50c. and \$1.00.

OFFICE IN OPERA HOUSE BLOCK.

THURSDAY, JUNE 1, 1893.

PURELY PERSONAL.

A List of Those Who Come and Those Who Go.

Rev. W. T. Jaquess of Detroit was in town Saturday.

C. T. Rogers of Elgin, Ill., is here visiting his son C. E.

H. F. Jackson was in Flint a few days this week.

Chas. Filkins and wife spent Sunday with Ypsilanti friends.

A. E. Tower visited his sister and other Clyde friends Sunday.

A. W. Ely and wife of Detroit were visitors in our village over Sunday.

A. B. McCullough has resumed his old position in John Hirsch's carriage factory.

Charlie Johnson and daughter of Detroit, visited his parents here over Sunday.

Dr. Turner of Farmington was over Saturday and purchased a carriage horse for Mrs. Turner.

Miss Mae Hazen of Ypsilanti was a guest of Northville friends and relatives this week.

J. N. Emery and wife of Detroit were among Northville relatives a few days this week.

J. H. Taylor has secured a good position with the Lansing Lumber Co. and will move there in the near future.

Miss L. Ruffledge of Bay City spent several days with Northville relatives this week returning home Tuesday evening.

W. J. Kingswell left for Detroit Monday where he has a position which is more attractive because of higher wages.

Don P. Yerkes left Monday for Detroit where he joined the D. A. C. ball club enroute for Chicago to play with the Windy City Athletic association in that city May 30. Don will also take in the fair.

FOR MEN.

[Edited weekly by one of them.]

Be prompt to come at three o'clock. Singing practice at half past two.

What better thing can a man do with his life than to help his fellow men?

We wait to welcome you dear reader to our meeting. Find time to come. Numbers inspire.

"Personal work" is the great need just now. Brother have you endeavored to get some one to come with you?

The man who inspects the car wheel is as necessary to the safety of the traveler as the president of the road.

W. I. Ely has generously donated a number of copies of Gospel Hymns for our use. The men will put in an equal number.

He who receives but does not give is like the Dead Sea. All the fresh floods of the Jordan cannot sweeten its dead salt depths.

On May 14 the attendance was about thirty. J. W. Dolph talked on "White harvest fields," and J. G. Webster on "Duty." Good talks. May 20 there was a bible reading and last Sunday M. P. Porter of Ann Arbor gave a talk on the "Ideal Young Man in Society."

Council Proceedings.

A special meeting of the common council was held at the council room Thursday evening May 25, 1893 at call of the President.

Present, Chas. L. Dubuar, in chair. Trustees Swift, Burgess, Rayson, Clark and Wheeler.

Minutes read, corrected and as corrected approved.

Oaths of office of Street Commissioner Blackwood and Health Officer White read and placed on file.

On motion, bill of Chas. Booth of \$4.00 for services on Board of Review, was allowed.

Trustee Burgess moved a reconsideration of the above bill which was on motion carried.

Moved and supported that the bill of Chas. Booth be laid on the table. Motion prevailed.

Bill of Globe Furn. Co. of \$1.50 for gaskets for fire hose allowed and ordered paid.

Moved and supported that the Clerk be instructed to draw on Treasurer for all bills presented and duly audited by the sidewalk or highway committees. Carried.

Moved and supported that the sidewalk committee be instructed to notify all persons whose sidewalks were in need of repairs to make the necessary repairs at once. Carried.

On motion Mr. I. N. Blackwood was duly elected superintendent of the cemetery.

On motion D. B. Northrop, Eli K. Simonds and Chas. Booth were elected special assessors.

Moved and supported that W. W. Blair, Marvia Bovee and J. K. Lowden be elected as board of building inspectors. Carried.

Moved and supported that a sidewalk be ordered built in front of Mrs. Geo. Knapp's residence on High street and sidewalk committee instructed to give notice that the same must be built in thirty (30) days. Carried.

Moved and supported that the time for completion of the work on council room according to plans and specifications be fixed on August 1st, 1893. Carried.

Moved and supported that the contractor be required to give a bond in the sum of two thousand (\$2,000) dollars with two good and sufficient sureties, to be approved by the council. Carried.

Moved and supported that the Clerk be authorized to issue certificates of membership to "bona fide" members of the fire department. Carried.

Moved and supported that the sidewalk committee be instructed to employ Engineer Woodard to fix sidewalk at grade on north side of Main street. Carried.

Moved and supported that the street committee be directed to repair and rebuild all crosswalks in need of the same. Carried.

Moved and supported that the street committee be instructed to make necessary repairs to Grace ave. and Lake street. Carried.

Council Adjourned.
CHAS. R. STEVENS, Clerk.

PHYSICIANS OUTDONE.

My wife has been suffering with female trouble of the severest kind for over three years. I have paid twenty five dollars during the last three months, and she has had no relief. She had doctored continually with the best of physicians. I bought three bottles each of Dullam's Great German Female Uterine Tonic and Dullam's Great German Blood, Liver, Stomach and Kidney Cure, and can say today that she is entirely cured.

W. H. Drowley,
Sworn to before me on this 23d day of June, 1893.
John C. Dullam,
Flint, Mich. Notary Public, Genesee Co.

Losr—Bicycle tool bag cover, wrench & oiler. Finder please leave at this office.

The clay pigeon shoot between Novi and Northville here Friday afternoon resulted in a Novi victory. The score was 104 to 96.

The Christian Endeavors will give a "Springtime" social at Miss Lottie Lake's, 9 Duham street, tomorrow, Friday evening. Everyone invited.

Tom Les, drayman for the Condensers people, was thrown from the wagon Friday and suffered a dislocation of the right shoulder.

The Haurahan folks have just completed a very elegant and large refrigerator for Fred M. Warner, Farmington's popular merchant and cheese manufacturer.

L. W. Simmons is building a new residence on Wing street. When finished it will present a very handsome appearance and will be occupied by Mr. and Mrs. Simmons.

The Plymouth Wind Mill air gun factory has shut down for sixty days. The Pickney works shut down in March. Now Plymouth has no more gun factories than have us.

Somebody, possessed of more poison than brains, has been feeding the former article to a dozen or fifteen Northville dogs. It may lower the dog-tax a little but its a pesky mean trick.

Memorial day was appropriately observed here; and the graves of comrades handsomely decorated with flowers. Allen M. Harmon, G. A. R. post, assisted by the S. of V's and the W. R. C.

That was an elegant memorial address which Rev. J. M. Belding delivered at the Methodist church Sunday evening. The crowd was so large that numbers were unable to even gain admittance.

A letter just received from our old friend, Milo Reed, of Denver, says: "Enclosed find one dollar, our dues for the Record one year more. We take much pleasure in reading the news of our former town and home."

Milo W. Reed.

Dr. Thos. Morrison a highly respected Wayne citizen died last week and was buried Saturday. He was a relative of Dr. and Mrs. Swift of this village. Mr. and Mrs. Swift and Mr. and Mrs. J. A. Dubuar attended the funeral.

When in Detroit the Wayne hotel, opposite the Mich. Central depot, will afford you splendid facilities for an elegant breakfast, dinner or supper. The accommodations at this popular house are unsurpassed by any hotel in the state.

The Ngott Sisters of Detroit sing in Methodist church, Plymouth, Sunday night and on the following evening they give one of their popular entertainments at the village hall. They are fine singers and readers as was proven by the fine program so well rendered here some weeks ago.

Through some error at the "ready print" office our package of papers was over a hundred short last week and the shortage was not discovered until too late to get an additional supply. This will account for a number of our subscribers only receiving a four instead of an eight page paper last week.

G. A. Fleischer, formerly of Northville, has removed his cigar mfg to more commodious rooms in Wayne and now employs 12 hands and can hardly keep up with the demand for his goods. His traveling salesman, Mr. Geo. Cleaver called on our merchants last week. It takes all of Mr. Fleischer's time to attend to the manufacture of his celebrated brand.

The musical and literary entertainment at the opera house Friday night by Detroit talent was the finest of the kind given here for a long time. Mr. Peters and Mr. Marvin are singers of no small merit and their selections were well executed. Master Sherman McFedries singing was simply grand. The instrumental selections by Mr. Gilbert were extremely good. The most pleasant feature of the evening undoubtedly was the reading by Mrs. J. Perry Courtwright. She is unquestionably the best reader who has yet appeared before a Northville public, not even excepting Miss Garrison. Mrs. Courtwright is one of the "gold media girls" of Mrs. Noble's school and ranks high in Detroit's educational circles.

The Ladies aid of the Presbyterian church will meet tomorrow with Mrs. W. G. Yerkes.

Of course, the Northville Record is a good paper. Real is a hustler, and his paper shows it. So Lyon Picket.

Novi's Newest sensation is goss along the highway. Our correspondent gives a thrilling account of it this week.

We will send the Record to any address until January 1st 1894 for fifty cents. Send in your names. We want a hundred new ones before July 1st.

Pulpit topics at the Presbyterian church next Sunday are, morning: "Be ye separate" afternoon: "The secret of success", the last sermon on Joseph.

F. D. Butler has purchased a new dray team which adds to both the looks and quality of his dray business.

Mr. Butler has also purchased the barn and lot formerly owned by Mr. Jackson.

The Prohibition Club will meet next Monday evening at the W. C. T. U. hall. Every member is requested to be present as business of importance is to be transacted. By order of the president.

The Carleton Gazette advocates the appointment of ladies as postmasters "as they are so adept in handling the mails." Another recommendation would be that all males not well supplied with stamps would be quickly dropped.

W. E. Morrison of Detroit has purchased Stark Bros. grocery stock and rented C. J. Ball's store where he will open up with a large line of exclusive groceries. Stark Bros. will use their store exclusive for shoes at present.

An interesting feature of the Tuesday's ball game was the excitement of John Wilcox running up and down the catchers path; the perspiring of Messrs. Teichner and Blanchard; the yelling of Will Nichols and the kicking over of the grand stand by Steve Safford.

J. Geo. Webster, for some time past merchant-tailor here, has sold his business to Frank Hoar, a Northville boy, formerly with Clark & Son, Detroit. Mr. Webster will again take charge of his old position in the tailoring department of the extensive W. P. Schink & Co's clothing store at Chelsea. We are sorry to lose Mr. and Mrs. Webster from our midst.

The best troupe and the best play of the season was that by the Labadie-Rowell company at the opera house here Monday night, in Gaiety and Pythias. The house was packed and every one was more than pleased. Damon by Francis Labadie. Pythias by Mr. Highty and Calanthis by Miss Rowell were especially fine, and loudly encored.

Trills will Peter Gillispie leave all of his property to his youngest son, Peter, with the exception of one dollar to each of his other children. Should Peter die before reaching the age of 21, without a living issue, the property is to be equally divided among all the other children. Peter is about thirteen years of age and the estate is said to be worth from \$17,000 to \$25,000.

Charles Johnson of Detroit has bought out Geo. E. Waterman's interest in the hardware firm of Waterman and Carpenter and taken possession today. Mr. Waterman was forced to make the change on account of ill health, and expects to soon leave for the bracing atmosphere of the west. By his genial manner and kindly business ways Mr. Waterman has won a host of friends in and about Northville who will much regret to lose him from both our business and social life.

The prospects now are that President Cleveland will appoint Hon. John Strong of South Rockwood collector of customs for the port of Detroit. The president will have to look Michigan over most awfully close if he finds a better man for the place. The writer has been personally acquainted with Mr. Strong for a number of years. He is a staunch democrat, an upright, honest citizen and a credit to his town, county and state. Would that the woods and the democrat party was full of just such men.

Yerkes Bros. are paying the highest market price, cash, for all the wheat that farmers can deliver at their Northville Mills. Still they can use more. Farmers, bring in your wheat.

COME IN and get a first-class shave or hair cut at the Bank Tonsorial Parlors. PETER CONNELL, Proprietor.

Around the Country

John Tibbain of Northville, passed through this village last Sunday. Livonia Cor. Plymouth Mail. Can he do that?

The Millford Times objects to a lot of nice young men of that village going out in the woods on a Sunday and getting in ready-for-the-gold-cure shape.

J. A. Attridge, veterinary surgeon of Northville, is making for himself quite a reputation. He has had remarkable success with several serious cases in this vicinity. Farmington Enterprise.

Phil Calkins opened up his store again last week with several tons of fresh merchandise. Holly Advertiser.

That's right, Phil would have opened up that store on time if he had had to use seven tons of dynamite.

Flushing is the latest place where coal has been found. At a depth of 44 feet a vein 7 feet thick was unearthed. Millford Times.

And the work will doubtless be all in vain.

When the boys "skip school" in Pontiac the trustee officer gobbles them up and places them in the city. Good idea. We have skipped schools and know how it goes. So Lyon Picket.

The city bastle?

Tell a woman that she looks fresh and she will smile all over. Tell a man the same thing and if he doesn't believe it it is either because he has corns or dandruff. Dundee Reporter.

We used to live at Dundee and know just where Bro. Carr got that item from.

Garvey Noble, Dexter's first Postmaster, is still alive. He can remember back to the time when the mail was transported on the back of the now extinct hairy elephant, once common in North America. Adrian Press.

There's a real live circus in Adrian this week and the Press man is not responsible for anything he says.

The robins in the city are having a big fight with the mischievous squirrels, who are trying to rob their nests of those eggs. The writer saw one of those fights the other day. Ann Arbor Courier.

And then by his own confession the Courier editor witnessed a robbery and fight and never raised a hand to stop it. Who'd a thought it?

Holly has had her first tornado and we trust that she may never have another. We would much prefer that they would miss us. Advertiser.

Since that little zephyr occurred up at Holly Tuesday it is said that Editor Slooem has taken out two tornado, three cyclone and four hurricane policies, added several thousand dollars on his life and joined the church.

Orin Torry while cutting hay on Saturday, with a cutting box, accidentally cut off the end of the 4th finger on his left hand. Oxford Cor. Orin Review.

Glut to know it was an accident. We had supposed, when Orin got his fingers all mixed with hay and jammed them around the inside of a cutting box till he amputated a left hand or a right leg, that he did it purposely.

A family of young robins have moved into Geo. Stehwagen's farm residence, west of this town, and from the time they are rearing in frequent numbers of worms dropped into their mouths by loving parents, it will not be long before they are grown into feathered songsters of our forests. Wayne Review.

Either the Review man is getting a trifle sentimental or he don't know that it will not be long before they are grown into feathered songsters of his pet-front-door-yard cherry trees.

Mrs. E. A. D. Whitney, Fisher street, Peoria, Ill., says: "For the last twenty years I suffered from nervous prostration, neuralgia, and heart failure at times, and I was rarely ever free from pains and ills caused by weak nerves until I tried the Wonderful Food for the Nerves, Oxoid. Its effects have been marvellous. I have not had a return of nervous headache since I began using it, but am perfectly well. I recommend Oxoid to all those suffering from nervous weakness. It has been a blessing to me, and many of my friends have also been restored to health by it."

To verify this statement, Mrs. Hartwick of this place wrote to Mrs. Whitney, and the following is her reply, which letter is now in Mrs. Hartwick's possession: Peoria, Ill., April 25, '93.

Mrs. L. E. Hartwick, Northville, Mich. "Excuse my long delay in answering your letter. My testimonial to the Oxoid Company was genuine and I have as yet had no reason to change my mind. I have had no recurrence of my ailments and am able to work every day about my house. My healthful condition is without doubt the result of the use of Oxoid."

Respectfully yours, Mrs. E. A. D. Whitney. Oxoid is for sale by L. E. Hartwick, Northville, Mich.

THEY ALL SAY SO.

Isaiah told Jeremiah that Benjamin said he heard Frank say that John often asserted without any fear of contradiction that the R. & F. Wayne's Perfectos and Record Taker 50 cigars are the finest and most aromatic cigars ever sold in Northville and many more smokers most emphatically pronounced them so. Try one & T. M. Fleischer.

Womans Rights!
"Come and see our stove since Allen the stove man, fixed it."

Every woman in Michigan has a right to have a wholesome to use, and she can have it by sending word to the stove man. He also repairs sewing machines, clothes wringers, pumps, tin soldering, caldron kettles—in fact anything that can be repaired by man.

Repairing Gasoline Stoves a Specialty G. P. ALLEN, Box 3. Northville, Mich.

C. L. Dubuar Lumber Co.

Our lumber yard has been stocked and we are now prepared to furnish everything in the line of Pine and Hemlock lumber. If you want:

STATE OF MICHIGAN, S. S.
I, L. A. Babbitt, cashier of the above named bank, do solemnly swear that the above statement is true to the best of my knowledge and belief.
Subscribed and sworn to before me this twelfth day of May 1893.
CLEMENT C. YERKES, Notary Public.

Cashier—Attest:
L. W. SIMMONS, Directors:
L. M. SAWYER,
FRANK N. CLARK.

This bank opened for business Dec. 21, 1892.

Rich on human and horses, and all animals cured in 30 minutes by Woolford's Sanitary Lotion. This never fails. Sold by C. R. Stevens, Druggist Northville, Mich.

A WONDERFUL STATEMENT.
Proprietors of Dullam's Great German Remedies. Gentlemen—I have for the past two years been troubled with a serious and very severe Liver and Stomach difficulty. Have had advice and medicine from our very best physicians, and only to be temporarily relieved. Some of my friends persuaded me to try your Great German Remedy for the Blood, Stomach, and Kidneys and to my surprise after using three bottles I feel like a new man. If you desire you can use my name in any of your references in any of the Grand Rapids, Michigan papers, or any other papers in the States, to convince the afflicted that it is the best Blood, Liver and Kidney medicine on earth. I feel like a new man. I have lived here over 40 years.
J. M. Livingston, Grand Rapids, Mich.
For sale by C. R. Stevens, Druggist 2

The Rose Out of Reach.

BY ADDIE A. GRAY, LEE.
In a garden fair sweet roses glow,
In a tangled mass they nod and blow;
And the buds unfold,
Of pink and gold,
Of softest cream and passionate red,
And a white rose hangs far overhead.

It grows roses crimson and cream,
Roses that blush and roses that dream,
But the delicate catenated Camellia,
Close my arm entwines,
And in vain I strive to reach the height
Of a rose I covet, snowy-white.

Oh, fairest rose that hangs so high,
That never upon my breast shall lie,
Or its perfume shed,
Though I held instead
Roses of yellow, scarlet, and pink,
To give them all for the white, I think.

But there above me it smiles and blows,
Without a shadow, the stainless rose,
For my heart's desire,
I reach the roses and let those fall
I had gathered first—and lose them all.

My hands are empty, the day is done,
The white rose shattered, but never won,
Oh! my wayward heart,
You have learned the part
That life has given to all hearts, each—
Gather the roses within your reach.

"Paints Like a Man."
Of Mrs. Alice Bartley Barnard's work it has been said that she "paints like a man." That is to say, she needs no concessions from her critics by reason of her sex. Mrs. Barnard is the daughter of ex-Governor Bartley of Ohio, and a niece of Gen. Sherman.

During the Grant administration she was a social favorite in Washington, and she has since studied one year in Brussels and the celebrated Camille and from years in Paris under the best still life masters of the day. All her productions yet put on exhibition are still life, and she has made no attempt to follow the lead of Rosa Bonheur. Her father was not only possessed of great artistic talent, but was witty and intellectual, quite up to the standard of her family, the Shermans. She was the sister of the General and the Senator. Mrs. Barnard has been rising in Colorado, but will soon open a studio in New York, where her best productions are now on view.

Emancipated by Miss Anthony.

Miss Susan B. Anthony was lately appointed by Gov. Flower as one of the managers of the New York State Industrial Schools for Girls. Miss Anthony has been visiting the school. She found that seventeen of the girls stood over wash tubs and ironing tables every day of the week, washing and ironing after the old fashion of our grandmothers. She succeeded in convincing the authorities that it would be a great saving of time and labor for a few of the girls to take the clothes over to the boys' laundry, where all the modern machinery is, and wash out the clothes with ease and swiftness. Miss Anthony writes to Mrs. Stanton: "Such delighted girls you never saw, so think they were to be emancipated from those wash tubs. What took them six days to do will now be done in two, and they have leisure to do other things. We are establishing a cooking school, dressmaking and millinery, so as to fit each girl to earn a living when she goes out of the institution."

Smoking Her Out.

A company of Harvard students were starting for Springfield for the football game last fall and meant to have a car to themselves. At the last moment, however, just as the train was starting, in hastened an old woman.

One of the young fellows, thinking to get rid of her easily, remarked: "My good woman, this is a smoking-car, don't you know?"

"Well, well," answered the woman. "Never mind, I'll make it do," and she took a seat.

As the train started, the word was passed round "Smoke her out." All the windows were closed accordingly, and every student produced a pipe, and soon the car was filled with a dense cloud of tobacco smoke. So foul became the air that at last one of the boys began to feel sick. As he took his pipe from his mouth and leaned back into his seat, the old woman leaped toward him.

"If ye are done, sir," she said in a wheedling tone, "would you kindly give me a draw? I came away in such haste I forgot mine."

He had Evidence.

The man had been to see a prestidigitator and when he came home he was telling his wife about it.

"One of his acts," he said, "was to cut a woman's head off right on the stage in front of us all."

"Pshaw," she protested, "he didn't cut her head off."

"Yea, he did, too. I saw him, and he carried it over to a pedestal, and it began talking."

"How do you know it was a woman?"

"Didn't I see her?"

"It might have been a man or a boy dressed like a woman."

"No it wasn't either, I tell you. It was a woman. Didn't I say it kept on talking after its head was cut off?"

Practicing the Fire Drill.

At one of the houses in Mayfair a novel and not altogether purposeless form of entertainment or experiment was devised. The hostess having a new fire escape determined to have a midnight instruction drill in the use of it, with one of the inspectors on hand to see it carried out. Accordingly at midnight the ladies alarm was given out, and the ladies and visitors of the household maneuvered the escape and all alighted on the pavement in safety. Remembering the recent experiences of Mrs. Jackson and Mrs. Astor such practice is worth the attention of other householders, and perhaps the mid-

night drill is the more effective, as most fires occur at that time. Lady Maple has such drills carried out periodically at her city and country houses, and the fire drill at Holloway College has become a matter of celebrity.

Fried Shad Roe.

Wash the roe without breaking it, wipe it on a soft towel and put it over the fire in a frying-pan containing enough smoking-hot fat to prevent burning; over the pan lay a large tin cover or plate, so as to prevent the scattering of the fat caused by the bursting of the grains of roe, but loosely enough to permit the steam to escape freely. Fry the roe, may be brown; fry it until all the little grains are brown and free from uncooked blood. Season the roe highly with salt and pepper, and when it is done serve it with a dish of new potatoes sautees and cucumbers.

Lemon Pudding.

Grate a pound of dry bread. Beat together five ounces of granulated sugar, three ounces of butter and the yolks of three eggs; into this grate the kind of two lemons and beat the juice of one, also a teaspoonful of vanilla. Pour over the crumbs one quart of milk and beat in the other ingredients. Beat up the whites of your eggs very stiff with half a cupful of pulverized sugar and a little vanilla; take the pudding out of the oven, put on the meringue and return to the oven until it is a light brown—which will be in about three minutes.

Clash of Colors.

Women never beheld more hideous combinations than some of those that the milliners show them now. Seen in juxtaposition to its next magenta neighbor in a collection, a grisly green hat will look a torturing atrocity; a pink-toned hat cries horror to a yellow one, and an all-red drops a note of discordant gray between. Last year a group of big-hatted girls was a lovely sight on a spring morning; harmonious as a garden bed of flowers; but the signs of these times are saddening, if girls wear all the hats the milliners are offering them.

Veget Made Without Yeast.

Boil half a pint of hops for half an hour in four quarts of water, then strain and allow to cool. When lukewarm add one teaspoonful of salt and a half a cup of brown sugar. Mix half a cup of flour, smooth with some of the liquor and pour into the mixture. Let this stand two days, then add one pound of potatoes, peeled and mashed; stir well; let stand another day, strain and bottle. Leave the corks loose at first, and allow it to stand at least ten days before using. It usually takes one half a cup of good yeast for four leaves of bread.

Cucumbers and Young Onions.

Wash a bunch of young onions; cut away the roots and withered tops, and either slice them or cut them about two inches long, keep them "crisp" by sprinkling them with salted cold water until they are wanted for the table. Peel and slice two cucumbers and keep them fresh in cold, salted water. Just before serving dry the onions and cucumbers on a clean, soft towel; dress them with three table-spoonful of oil mixed with one of vinegar, an even spoonful of salt and a salt spoonful of black pepper and serve them with fried bread and potatoes.

Because She Lied About Age.

In our own country concealment of age is regarded as a harmless fiction; and the practice is supposed to be rather prevalent among women who are more than 25 and under 75. In Austria a more serious view is taken of this offense. By a recent decree of their courts of law a marriage was annulled on the husband showing that the bride had concealed the exact number of years that had passed over her head. She pretended to be 18 years younger than she really was.

Chicken Jelly, Without Water.

Cut a chicken (a hen is better) as for a fricassee. Put it in a double boiler with an even teaspoonful of celery seed, cover closely and let it cook for five hours. Strain it through an ordinary strainer and leave it to stiffen. Remove all the fat, melt the jelly, add salt to taste, and strain it through two thicknesses of cheese cloth.

Notes from Abroad.

Swedish girls at an early age begin to make and accumulate linen garments. By the time they are of marriageable age they have an extensive outfit of such articles.

The Empress of Russia's court dress, which is valued at \$2,000, has only been worn on one occasion, and that was the coronation of the present Emperor. It is covered with magnificent embroidery in real silver.

The Empress of Japan only appears in public clothed in the garments of her native country about once a year. On other occasions she wears the most becoming things that Parisian artists can make for her.

Miss Emily Fairclough is engaged in an endeavor to raise the funds for the erection of a large building, consisting of single rooms and one common large room, where reduced gentlemen would be able to live cheaply on a club principle.

Mme. Sarah Bernhardt has a great dread of fire. She has recently commissioned a Lyons manufacturer to make for her some fire proof materials to be used for her stage dresses. The material is made fire proof by some chemical substance.

Mme. Patti, it is said, will sign her name for autograph collectors only at the very top of the page. Once she signed right in the middle of a page, and soon afterward the leaf was further embellished with the words, "I promise to pay at sight the sum of \$1,000."

Miss Rhoda Broughton, the novelist, is "above the middle height and graceful in figure. Her mouth and chin indicate firmness and resolution. In repose her expression is a sad one, but as she speaks the frankness in the gray eyes, set well apart, at once dispels the idea and the pleasant musical laugh betrays the vein of fun and wit which runs through her books."

Some time ago Princess Beatrice propounded this question: "If you were not to be yourself, what Englishman or Englishwoman would you rather be?" Among the little slips of paper containing the answers of those present there were two which bore simply the name "Tennyson." The Queen wrote one, and her faithful friend, Lady Elphinstone, the other.

THE EAGLE AND THE WREN.

An eagle in the Western sky,
With wings outstretched far,
Rose in the deep blue depths on high,
And sparkled like a star.

Far in the ether end of town
An evanescent little thing—
A smaller bird of less renown—
Thought it too had a wing.

Thought it could mount the aerial blue,
And upward reaching far,
Thought as the other bird to do—
To sparkle like a star.

Poor foolish thing! It could not climb
The deep blue depths of air,
And finding earth's healthier clime
Forever settled there.—M. C. Shannon.

"RABBIT SPRINGS BILL."

Truth is stranger than fiction, and many on the golden coast will remember the strange character known to all who traversed the California deserts, a decade ago as "Rabbit Springs Bill, the Storyteller."

I first heard of him while receiving directions for keeping the "trail" to Death Valley, Nevada. A tall, lank son of Texas, was marking out the route in the sands with the stock of his cattle whip. He had explained the route from San Bernardino up through the Cajon Pass, down across the desert valley of the Mojave to old Camp Cady, then northeast to Ivanpah, then long weary miles northwest to Bird's Spring's, and from there, stranger, "ye won't get no water fer about forty-five miles, not till ye get to Rabbit Springs, where, old Story-teller" Bill will make ye put up a "dobe" dollar fer every gallon ye get, an' by the time ye do get that, if ye ever do, I'll 'low ye'll want every drop ye can put up the dust fer."

"Ye see it's fifty miles an' more after ye leave Bill's place till ye get to nother spring, an' that's on the edge of Death Valley, an' yer got to cross that so yer want ter keep yer eye peeled or yer'll go over the range sure."

After assuring my friend that I had no desire to die, and would therefore keep my eye peeled and not lose the trail, I asked why they called the owner of Rabbit Springs, "Story Telling Bill." "Well, yer see, stranger, he came into our train down at Cimarron when we were a freightin' over the old Santa Fe trail and axed for a job skimming mules. Any one could a seed he was a tender-foot, and Pete, the one with the busted jaw, 'lowed it was some woman back east what had gone back on him; and I 'lowed it was some stealin' scamp what had made him hit the breezy a-leagle; the sheriff, an' after a while I 'lowed Pete was right, fer Bill never had nothin' to say to no man, an' were as dumb as an old coffee cooler. Way, once I axed him to holler up, an' when he'd swallowed his pizen I axed, perlie like, 'Say, Bill, old son, what yer name back east?' and he just turned white like an' walked off an' would never hear an' when I called again, when yer find him, yer'll know why they call him the story teller."

Days had dragged their weary length, along. To the south the snow crests of the Sierra Madre ranged marked dimly the dividing line between the orange groves of the Hay of America and the sands of the Sahara of our Republic. To the south of Cajon Pass was paradise; to the north to the Nevada line was purgatory; while beyond and around was inferno. As far as the eye could see was a weary waste of superheated, dazzling, blinding sands, dotted with cacti of every imaginable size and shape. The only signs of life were the innumerable lizards that darted across our path in every direction, and the snakes, tarantulas and scorpions that made existence a burden to man and beast. Blinding, whirling dust storms scurried here and there as if bound to search out every intruder on their domain and annihilate them. Luridizing mirages, beautiful visions of lakes, swamps, and trees threatened to destroy reason itself. The sun beat down with an indescribable intensity. The weary horses staggered along as if the next step would be their last. There was no trail, no road, no path. The only way was to wind in and out of the cactus, keeping for that peak in the distance that had been described as the one guarding Rabbit Springs.

It seemed impossible that we could ever reach this grateful shadow, but it was dead to stop, for once stopped now that cask and canteen were empty, no power on earth would ever start the team again. On! On! How long I know not! There were voices ringing dimly in my ears.

"Pretty close call, pard. If it hadn't been for my Injin I guess you'd a put your bones with the rest on 'em out in these sands."

"How's the hosses?" Oh, they're all right. The Injin will take some water down the canyon to them and bring them up after dark. Now you keep still and take this." His "this" was water; cool water from a mountain spring. No, not water, but nectar, champagne, food, life, electricity—everything that restores life, hope, and ambition.

I was at Rabbit Springs, and the story-teller was doing his best for his uninvited guest. His telescope had found the weary traveler far out on the plain, and he had sent his only companion, a Chenoweths Indian, on mule-back to my relief; and he had arrived just in time with his precious canteens of water to save the horses from death.

As Bill told it, "You see, stranger, I seed you coming, and told the Injin to skip and bring you in. You see your hosses were plum played out, and you were lying down in the bottom of the buckboard a-whispering to yourself, and your tongue that swollen that you couldn't swallow, so the Injin just poured some water on your head and wrists, and tied head and wrists up in wet cloths, and

brought you up here on my mule. Hot? Yes, rather—about 115 in the shade, according to this, and its one of the thermometers them geological survey fellers gave me, and asked me to write to 'em down at Washington how hot it was here every day. But what in thunder do they want to know down there for how hot it is up here? It ain't so very hot to-day, though. Way, I've seen it go to 125 in the shade, and that Injin just lie here by the rocks and pant like a lizard.

"Say, stranger, can you tell a story? Don't want no women story, neither; don't want no one to talk about women around this ranch; want something about hunting and fighting; unless you've been around and seen some of the big folks of the world; some of the rulers, and millionaires, and kings, and big bugs; and things of that kind." The statement that I had seen a president or two, a few live dukes and princes, a choice assortment of millionaires and big bugs, and things of that kind, and that a varied assortment of stories about them was at his disposal later on, sent Bill into ecstasies of delight, and he fairly flew around getting supper and doing all in his power to make his guest comfortable. His home was part way up the barren range of low mountains that bound Death Valley on the southeast. His hut was made of boards taken from deserted wagons, and every plank was a dumb witness of tragedy and death in the cruel desert below. Around the planks were piled rock and cactus, making as odd and picturesque a structure as ever existed in the West. The hut was for use only as a shelter in the daytime, for his bed was laid on the smooth surface of a rock, where the snakes and scorpions would find it difficult to disturb his dreams.

All around lay a desert as cruel and merciless as the depths of Sahara, stretching east to the Colorado river, to the south to California, to the north to the center of Nevada, and on the other side of the slope lay the borax-covered Valley of Death. Above, in the scant rains and snows of the winter season fell into the great lava hollow of the range; and found their way to the surface through a tiny crack by the side of the hut. A piece of iron pipe conducted the precious fluid into a wooden tank, buried in the ground. And this tank was protected from robbery by an immense padlock which Bill carefully locked and unlocked every time a drop was taken out, and every caustic fluid was carefully measured.

For two days and two nights we rested in the shadow of the great rock in a weary land. For two days we slept in the hut, and for two nights we lay awake out under the cool, moonlight sky and told stories.

Whenever a story struck Bill's fancy he relit his pipe, and with a short "tell that again," he listened, committing the tale to memory. His aim in life was to get a good story to tell for each day in the year. As soon as his guests departed he would spend days in writing out the stories they told him, and his hut was piled with manuscript that would have delighted the heart of Kipling or Hagard. For certain saints' days, the Fourth of July and holidays he had his favorite story to be told on that day. The collection then numbered 262 that were accepted for certain days, and many others on the hook awaiting final accepting or rejecting. It was a weird, strange collection, where the name of woman was black-listed, excepting a few where she was pictured as a demon instead of the ministering angel; a collection of fierce tales of war, of hunting, of detection, of crime, of missing enormous wealth, of anecdotes of famous men, and the histories of nearly all of those who were pathfinders in the great West. These stories were repeated by Bill in a monotonous monotone, without life, imitation, or gesture, as a schoolboy would read; yet told as they were in such surroundings, they had an irresistible fascination.

The last night he told the story of his life, and then abruptly got up and disappeared in the darkness. The Indian alone was there to go a few miles and place me on the trail the next morning, and just as I started handed me a written bill, as follows:

"Stranger to Rabbit Springs Bill, De.
To 10 ten cent kist of water..... \$10
To 10 ten cent kist of water..... \$10
To 10 ten cent kist of water..... \$10
To 10 ten cent kist of water..... \$10
Total..... \$40
Received payment..... \$40

and the Indian remarked, "No pay, Bill him heap shoot." I paid. Only recently a friend of mine said that his party had occasion to explore the east edge of Death Valley and went up to Bill's hut. It lay in ruins, and near by were some of the bones of a human skeleton, and in the corner of the ruins, where some traveler had built a fire, were the fragments of a bundle of manuscript, and another tragedy had been witnessed by the crumbling boards that had once sheltered the storyteller of Rabbit Springs.—Inter Ocean.

A Shrewd Woman.

McHarian—What is the matter with McGinnis? He is going around with his head tied up.

Westside—He is crazy about dogs. He offered a \$40 reward for the return of a 75 cent dog, and his wife, who has common sense, soothed his grief with a flatiron.—Texas Siftings.

An Honor to Nevada.

The far and "frontier" West does not appear to be peopled exclusively by tough citizens. At Winnemucca, Nev., a jury was formed last week of men whose average age was 27, who were all total abstainers from drink, none smoked cigarettes and none had ever chewed tobacco.

There are a few people left

who still follow antiquated methods of raising bread, biscuit, cake and pastry with home-made mixtures of what they suppose to be cream of tartar and soda, compounded haphazard,

but there are very few

The best housekeepers use the Royal Baking Powder instead. Its scientific composition insures uniform results. By its use alone can the finest flavored, most wholesome food be produced. To any housekeeper who has not used the Royal Baking Powder we would like to send our Cook Book, free. Mark your request "For instruction."

Royal Baking Powder Company,

I SAYINGS OF SAGES.

Small books are read most.

The real giant is the man who overcomes himself.

Doing good will make you richer than digging gold.

Many people pray most for the things they need least.

It is easier to run with the crowd than to walk by yourself.

Every time a stingy man looks at a dollar it shrinks his heart.

A paper has been started in Atlanta called the Snapping Turtle.

He who would be strong in mind must have facts for his diet.

It takes a fool a life time to find out what others see at a glance.

It is hard to feel at home with people who never make mistakes.

No man can keep right who does not decide that he will always do right.

The man who is ruled by his feelings will always travel in a zig-zag course.

We are not to blame for the first mistake we make, but we are for the second.

Noah was about the only man that ever run a cold water campaign successfully.

THE WAY SHE LOOKS troubles the woman who is delicate, run-down, or overworked. She's hollow-cheeked, dull-eyed, thin, and pale, and it worries her.

Now, the way to look well is to be well. And the way to be well, if you're any such woman, is to faithfully use Dr. Pierce's Favorite Prescription. That is the only medicine that's guaranteed to build up woman's strength and to cure woman's ailments.

In every "female complaint," irregularity, or weakness, and in every exhausted condition of the female system—if it ever fails to benefit or cure, you have your money back.

There is only one medicine for Catarrh worthy the name. Dozens are advertised, but only the proprietors of Dr. Sage's Catarrh Remedy say this: "If we can't cure you, we'll pay you—\$500 in cash!"

A SILVER QUARTER Sent safely with your address, to Geo. H. Hefford, General Passenger Agent Chicago, Milwaukee & St. Paul Ry., Chicago, Ill., will fetch to you by mail, without delay, a portfolio containing a highly colored, correct lithographic view of the

World's Fair Grounds.

and Buildings (done by the famous artist, Charles Graham,) together with numerous other beautiful lithographic and half-tone views of unsurpassed lake and river scenery in Wisconsin, Iowa, Minnesota, and Michigan. The "Quarter,"—otherwise twenty-five cents in silver or U. S. postage stamps—just covers the cost of the portfolio. We pay for sending it to you.

The supply is limited; therefore, send address at once, or not later than July 16, 1893.

Hustling Correspondents.

NOVI.

Mr. Briendge of Allen, Mich., will supply the Baptist pulpit next Sunday.

Mrs. John Decker of Walled Lake was the guest of Mrs. D. A. Fuller last Thursday.

Jay Leavenworth is about to commence a new house near the site of the one which he lost by fire a few weeks ago.

Mr. and Mrs. W. A. Whipple drove to Ypsilanti last week to visit their daughter Mabel, who is at school there. They report a very pleasant ride.

Mr. and Mrs. Jas. Lawther of Gaines, Genesee county, old residents of Novi, spent a few days last week with their brother and sister, Mr. and Mrs. C. Harmon.

The pupils at the West Novi school, (Miss Lulu Bogart, teacher) whose average standing for the first month of the spring term was 95 per cent or over were, Blanche Dunham, Willie Kilworth, Ralph Mosher, and Howard Kilworth.

A large congregation assembled last Sunday at the Baptist church, only to be disappointed so far as hearing a sermon was concerned. The ministerial committee expected that Rev. C. D. Gregory would be in the neighborhood and supposed they would be able to secure his services. He was not present so only Sunday school services were held.

And now Novi has a ghost story to add to the already long list of sensations. One moonlight evening last week, as an estimable lady of this township was driving alone about two miles west of this village, she was suddenly confronted by a white figure standing by the fence a short distance from the road. Her first impulse was to retreat, but she concluded finally to go on. She drove slowly, keeping her eyes on the figure which, while she was watching, quickly disappeared without warning, as suddenly as it appeared. The apparition is described to have looked as though completely enveloped in a sheet, head and all, the robe being slightly confined at the waist. The lady utterly repudiates the idea advanced by some of her friends that her imagination was responsible for the appearance. She says she certainly saw such an object as she describes, with perfect distinctness. Her horse, which has plenty of life, seemed to notice nothing unusual. It goes without saying that the lady is not a timid person naturally, or she would not have been driving a spirited horse alone in the evening. Now is the chance for some one to "lay the ghost."

Mrs. Thompson is the guest of her brother, C. M. Wright.

Frank Ballanger left for Chicago last week. His sister will remain here until his return.

Rev. Miller will deliver a memorial service in the M. E. church next Sabbath afternoon.

Mrs. D. S. Magill was in Northville Monday on business and while there some of the Northvillian's poisoned her favorite dog, "Grover."

Decoration day was observed here by the Northville G. A. R. post coming up and decorating the graves of their comrades. Our school assisted in the exercises.

We thought we would have a singing school here, but we didn't. Mr. Caleb Smith came and gave a concert

last Tuesday evening and after the singing twenty names were handed in as secured for scholars. The next night only about half of the number put in an appearance and consequently Mr. Smith left Novi in disgust. "Only this and nothing more."

The Masons of Novi, who attended the "doings" in Detroit last Tuesday night, were intending to return on the so-called, midnight train, but failed to put in an appearance until five o'clock the next morning. Their excuse was, car off the track, but they all report a good time while waiting.

Editor Northville Record:

Your worthy correspondent at Novi has brought to light some interesting events that have occurred in that so-called "Sensational Town" that are not very pleasing facts to one of her native born citizens.

Permit me to mention a few items of interest that, as a descendant of a pioneer townsmen, I am justly proud. This noted town has furnished her quota of prominent men who have helped to advance local and State interests, both in politics and commerce.

The names of Yerkes, Bassett, Woodman, Gage, and many others figure as senators, judges, legislators and teachers. It would be difficult to find a community where education and intelligence are more widely diffused.

The little red school house in District No. 5 claims the honor of sending out many of these enterprising and capable citizens. A brief history will prove this. Since the organization of the district it has sent out from the doors of the unpretentious school edifice, which by the way has seen over 50 years of service and likely to be used 50 years more, over 50 teachers, all of whom have been earnest, successful educators. Of this large number some but deserve special mention—notably Miss Della Gutrican, who has been in the field 24 years, and for the last 16 years in the Plymouth high school, also Bert E. Richardson, fast gaining an enviable reputation as teacher, now finishing his third year as principal of Blissfield high school, and her, Miss Agnes Gage, who is just of age and now teaching her 12th term. As an illustration of what an ambitious girl may do I would add that to accomplish this she has driven over 3,000 miles, took care of her own horse, built her own fires (in most cases) two winters drove 10 and 8 miles daily. Mr. David Gage has taught almost continuously for 37 years. It is a notable fact that his father, Stephen L. Gage, was the first teacher in District No. 5, where himself and daughter have since taught several terms.

I might truthfully mention many other things for which Novi is famous. Having shared in its prosperity I cannot miss an opportunity to bring it to the front, where it ranks.

Millford, Mich., March 26, '92.

MEAD'S HILLS.

Miss Lautenslager called on friends in Livonia last Sabbath.

Miss Eliza Lang is visiting at her uncle's, P. Conley's.

Rich Benton took his best girl for a drive with his fine new turn out on Sunday.

Our milkman now dispenses the lacteal fluid morning and evening to the village people.

The children of Mr. Watts have so far recovered from the chicken-pox as to be able to attend school again.

Frank Johnson's shepherd dog was one of the victims of the poison which was furnished by the Northvillian's last week.

Considerable anxiety was manifested Friday evening at the store when at roll call it was discovered that one who had never failed to respond before was absent.

The graves of the Fallen Heroes in our cemetery were not forgotten on decoration day, a detachment from the G. A. R. post at Northville officiated.

PLYMOUTH.

Nellie L. Peck has been granted a divorce from Fred T. Peck, for non-support.

Yerkes Bros. are now offering the highest cash price for wheat. They want 10,000 bushel. Farmers now is your time.

Buy Dullam's Great German 25 cent Cough Cure at C. R. Stevens.

SALE.

On Wednesday, May 24, born to Mr. and Mrs. Wilkie, a daughter.

Rev. Shannon preached an able memorial sermon on Sabbath morning. Very encouraging reports of the Owasos state convention was given by the delegates at the Congregational prayer service.

S. D. Chapin spent Sunday and Monday at Orchard Lake, where his wife is caring for her parents, who are still quite ill.

The Epworth League of the North Salem M. E. church held a social at the residence of Mr. Clark on the base line Friday evening. There was a fair turn out.

The Mission band of the Congregational church intend having the steeple and exterior of the church painted, the expense to be out of the funds of the band.

The Salem cornet band gave a very enjoyable concert in Haywood's hall last Thursday. Ladies of the village served refreshments and about sixty were present.

The young people of the Lapham M. E. church will hold a conundrum social at the residence of Harvey Packard tomorrow evening. Come one, come all, and have a good time.

L. M. Larkins manifested his appreciation of his late wife by going to Howell decoration day and placing some choice flowers upon her grave and causing a suitable stone to be erected at its head.

An almost general painting is in progress, J. E. Bullock and Wm. Rider in the village are renewing their residences and Bert Rich one mile south and Frank Rider one mile north are doing likewise with theirs.

The Baptist held a missionary concert in their church Sunday morning, when beautiful and appropriate exercises were gone through with. The pastor preached in the evening and followed with a baptismal service.

Miss Edie Savory, oldest daughter of Mr. and Mrs. Isaac Savory, was united in the holy bonds of wedlock to Mr. John Rerwick last week Wednesday by Rev. Calkins of South Lyon. The ceremony took place at the residence of the bride's parents, and was witnessed by a large concourse of friends. The couple were the recipients of many beautiful presents. They will reside on the old Alex. Packard farm.

Frank, youngest son of Mr. and Mrs. John Haywood, was united in marriage to Miss Tillie Harbin, adopted daughter of Rev. and Mrs. W. H. Shannon, a week ago today, at the Congregational parsonage, Rev. Shannon officiating, after which they left to spend a few days with friends at Belding. A reception will be tendered them on their return this evening by their many young friends who propose to show their appreciation of the couple by presenting them with a handsome dinner set.

The annual G. A. R. memorial service was held in the Baptist church Sabbath afternoon. The edifice was tastefully decorated with the national flag and a profusion of flowers and plants. Members of the G. A. R. and S. V. were present from South Lyon, Salem, Plymouth and Northville. Rev. S. Shannon and Shier of Salem and Rev. Riddick of So. Lyon participated in the service, and the Salem male quartette rendered appropriate music. Rev. D. H. Conrad, pastor of the church, preached an appropriate and earnest sermon. About 400 were present.

Railroad time cards will be found on the inside pages.

THAYER'S CORNERS.

The immediate predecessor of Hon. Wm. E. Quinby of the Free Press, as minister to the Hague, Hon. Samuel R. Thayer of Minneapolis, is the cousin of H. B. Thayer of this place. Minister Thayer has been a resident of Minneapolis for the past twenty-five years and is the personal and political friend to Senator Cushman K. Davis.

A large concourse of people were in attendance at the Thayer cemetery on Tuesday morning to assist the detail from the Northville G. A. R. post in decorating comrades' graves at that place. The Salem cornet band furnished instrumental, and singers from Salem the vocal music for the occasion. Mrs. J. D. Haywood read an appropriate selection, Comrades Hamilton and Webster and Rev. W. H. Shannon made remarks and together the day was suitably observed.

GUARANTEED CURE.

We authorize our advertised druggist to sell Dr. King's New Discovery for Consumption, Coughs, Colds upon this condition. If you are afflicted with a Cough Cold or any Lung, Throat or Chest trouble, and will use this remedy as directed, giving it a fair trial, and experience no benefit, you may return the bottle and have your money refunded. We could not make this offer did we not know that Dr. King's New Discovery could be relied on. It never disappoints. Trial bottles free at A. M. Randolph's Drug Store. Large size 50c.

B. FREYDL.
(Over Teichner's store.)

English Spavin Liniment removes all Hard, Soft or Coloured Lumps and Blemishes from horses, Blood Spavins, Carbs, Splints, Sweney, Ring-Bone, Stiff, Sprains, all Swollen Throats, Coughs, etc. Save \$50 by use of one bottle. Warranted the most wonderful Blemish Cure ever known. Sold by C. R. Stevens, Druggist, Northville, Mich.

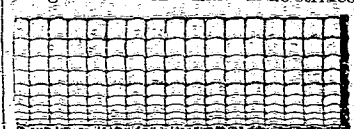

VERY MUCH SURPRISED.

I have been afflicted with neuralgia for nearly two years; have tried physicians and all known remedies, but found no permanent relief until I tried a bottle of Dullam's Great German Liniment and it gave me instant and permanent relief. 25 cents per bottle. A. B. Snell.
Hamilton, Mich. April 11, 1899.

Signs of Spring.

Will be doubly welcome after this long hard winter.

Here is one that is infallible: A little girl in red dress runs down the lane—Big ugly ox in adjoining lot charges down the hill. If he strikes

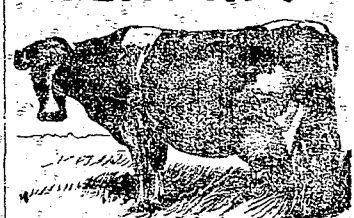

The Fence

and takes a double-back somersault, be sure that "Spring" is high-coiled in the Fence made by the PAGE WOVEN WIRE Co., and sold by the rod or mile, by
