TWAS A GREAT SHOW.

That's the verdict of the Band Benefit of Monday and Tuesday.

In spite of the rain, a very well dressed and enthusiastic audience filled the opera house on the first presentation of "Chick" Monday night. Northville may well be proud of amateur talent which so creditably put on a play of this order. It is conceded to be the best thing of the sort the town has known, and far we have ahead of the traveling troupes we have had. The manager, Mr. MacLuray, deserves great praise. The gallery was caught with the Irish character sketches of John Gargery in rather questionable taste and the cornet duet with Miss Josie at the piano was well received as usual. Mr. MacLuray in the double role of Stone and the Honest Cook was very finished as to acting and appearance and won admiration. He could hardly be considered as an amateur. The girls deserved the Hunch-back and Robert at the jail was worthily any professional and a credit to any larger stage.

Mr. Ben Fithian as Jerry brought down the house as usual, especially by the handbag (a dog in a shawl strap) which came in the last scene.

The ladies in the cast were charming as ever, and prettily costumed throughout the play.

Mrs. Alexandre in the title-role won great applause by her inimitable acting and sweet appearance, especially in her encounters with Irish Jerry, and delighted her audience whenever she caught 'the hen'?

A barn on one of Phillip Digley's farms four miles south of Plymouth was destroyed by fire yesterday. The high wind carried sparks from a place where some logs were being burned nearly one-fourth of a mile distance, causing the conflagration.

Northville is agitating the subject as to whether or not they shall celebrate there the 4th. Last year we had a glorious time at Holly, and Northville insisted by sending us a large delegation. On account of our last year's experience we will not celebrate here, consequently if Northville insists we will all be here at Holly. Advice?

Henry Fry as West the hunter was very good. But his hunting death in the first act however put an end to the bright stage prospects before him.

E. B. Thompson is always good anywhere you put him and as the stern Horatio Shadrack in this play he more than met the expectations of all. Bert Jenkins took the part of Sinclair's son, and the lover of West's daughter (especially the latter) in a very able manner. Bert seems to take to those love scenes and matrimony in this line during the several acts was frequently commented upon. Mr. and Mrs. Abner had some minor parts which they handled all right.

As O'Neill the outcast, W. H. Marion was especially good. Hutton had appeared in almost every amateur theatrical put on the boards here for years past. In this character he appeared at his best. An amateur play here without Hutton would be like Uncle Tom's Cabin, except as Uncle Tom.

The parts were all well taken, and there was absolutely no hitch from start to finish. The climaxes were well sustained and very telling, which is beyond the usual amateur performance. The play was repeated the second night to a good house.

No to us.

What do you think? Milford, a little town up near Wixom, is talkin' water works. Well, well—did you ever hear the like?

In one way and another Milford ground out four weddings last week. The fifth one was postponed by the non-arrival of the bridegroom.

The Brewster Mfg. Co. at Holly have already over 1,200 bicycles in their factory and anticipate this will not be sufficient by half for their trade this season.

C. S. Miller had the tag, collar and all, stolen off his dog a day or two since.—Ann Arbor Courier.

Nothing left but the tail, as it were. A sad tale.

Judge Kinnis of Monroe sentenced a liquor law violator to pay a \$50 fine or remain 10 days in jail. The saloon man thought he couldn't earn \$50 and board and lodging, any easier or quicker than ten days of jail life. Thus justice was appeased, strange as it may

seem. Fifty dollars or ten days is a funny looking fine.

The Trenton Visitor tells of a young lady of that town who has just celebrated her 16th birthday for the eighth time.

Rev. G. H. Wallace pastor of Plymouth's Presbyterian church since 1888 has resigned his pastorate. The resignation has been accepted.

Marvin Armstrong, a well known Plymouth boy, and also well and favorably known in Northville, died Monday. The funeral was held yesterday.

The Trenton council has passed resolutions prohibiting the wearing of flowers on the streets. The Edison council must be hard up for something to pass.

A young man named George Smith was arrested at Pleasanton last week for peddling without a license. He was selling valuable gold colored spectacles for 50c which he had found.

Many people like to be fooled. A Waller Lake lady recently answered an advertisement enclosing ten cents for "one hundred useful articles." She got a hundred pieces.

When a tramp is forced up at Northville, they burn sulphur in his room and dislodge him with aspersions; then they give him a public bath, in the depot public bath pond. Tramps have been known to actually offer to work rather than visit Northville twice.

"Cale," the spy, was the topic at the Presbyterian church at Northville last Sunday. Perhaps that refers to the same Cale who was roaming about these parts.—Fowlerville Review.

On account of our last year's experience we will not celebrate here, consequently if Northville insists we will all be here at Holly. Advice?

The new "South Lyon" saw null at Fowlerville has a "knoto" while and when Fowlerville people heard it for the first time they thought it was the last trumpet and even the newspaper men commenced to say their prayers and repeat of their sins.

The Michigan flag usually goes correct in its news items, spoke last week of a widow with five grown children as "Miss." We believe Bro. Osborn picked the Record up on that same word about a year ago; only in that case the Record didn't know any better—the professor does.

The South Lyon Excelsior truly says: "When a man is loaded on anything like the gold bricks or three card monte racket, the conclusion tht he can not be a reader of the newspaper, and a man with money to throw away who does not read the newspaper is deserving of very little sympathy."

About the funniest thing on record comes from Monroe. A little over a year ago Mary Babijewa, a widow of 45 sued Will Roman, aged 55 of the same place for breach of promise. The court room brought out many sweet love scenes enacted during some fifteen years of previous courtship and in the end the widdy got an award of \$2,000 damage. Since then the courtship has progressed to such an extent that the young couple were married last week.

A thunder storm would be a gentle shower as compared to the storm which broke forth at Charlie Reid's last Saturday afternoon, when two stick chaps drove up and commenced to unload enough lightning rods to cover the city hall. Charlie and his wife and the boy were on hand, and as fast as the rods were unloaded the rods fired them back on the wagon. Flying rods in front and the dog in the rear was too much, even for a lightning rod agent, and Charlie and his wife won the battle, and the agents drove off with the load.—Farmington Enterprise.

A big postage stamp counterfeiting scheme has been discovered in Chicago, and it is believed that thousands of counterfeit stamps have been within a few months disposed of throughout the country, the same being made in Canada, and disposed of mainly by way of Buffalo. One or more of the skillful engravers have been arrested. One feature about the stamps was that they were of a better quality than those made by Uncle Samuel himself. This probably led to the disclosure of the counterfeit.

All Public Schools Must now Fly One, According to the New Law.

The Ingalls flag bill before the present legislature, has become a law. The bill as introduced by Senator Jones was given immediate effect and reads as follows:

SECTION 1.—The people of the state of Michigan enact, that the board of education or the board of school trustees in the several cities, townships, villages, and school districts of this state shall purchase of United States flag, of a size not less than four feet two inches by eight feet, made of good flag-bunting, a flag staff, and the necessary appliances therefor, and shall display said flag upon or near the public school building during school hours, and at such other times, as the said boards may deem proper, and that the necessary funds to defray the expenses to be incurred herein shall be assessed and collected in the same manner as money for public school purposes are assessed and collected by law.

William H. Preston, a well known Northville citizen, died at his home 40 Plymouth avenue Saturday morning, at the advanced age of eighty-five years and four months. The funeral, conducted by the Northville Masonic Lodge, was held Sunday at the Baptist church, Rev. Mr. Arnold officiating. The Masonic service at the grave read by the worshipful master, M. A. Porter was very impressive.

Wm. Preston was born in Providence, R. I., Dec. 12, 1809. He came to Michigan about forty years ago settling in St. Clair county remaining there until twelve years ago when he moved into Wayne county. He had lived in Northville nearly six years. Mr. Preston had been a worthy member of the Baptist church for over sixty-five years. He was highly respected, and thought a great deal of by everyone. He leaves a widow, and one brother, the latter residing in Rhode Island.

The burning of Nikola Tesla's papers and new electrical apparatus is a great loss to the world. The money cost of the apparatus destroyed is not above \$10,000 to \$15,000, but the young scientist's remark that he would not have sold it for \$1,000,000 sets upon its value as possessed as understood by the only man who can replace it. Fortunately, Nikola Tesla is young and in good health. The world may hope that he will live to improve on the discoveries he has made in electrical science, a subject which he doubtless understands better than any other living man. Tesla is younger than Edison and it is to be hoped he has many years of useful work for the world in his future.

There is an inclination in England to leave unilled the ancient office of "Examiner of all space plays" made vacant by the death of Mr. Pigott. The office is understood to have been greatly dissatisfied with the course of the late Incumbent of the post in allowing the woman with past to get such a firm hold on the British state. She is fearful that the precedent established by the no other scrupulous Mr. Pigott will be imitated by his successors, and therefore her majesty fails to see how any good can result from play censors who are willing to overlook the misdeeds of ladies with antecedents. So she intends to let the post, like that of the poet laureate, remain open.

Mr. Deas proposes to change the name of the American Railway Union to the American Industrial Union. The old name was too closely identified with the Chicago strike to ever be useful as a factor in industrial affairs. Societies change their names for the same reason that men do, to get away from the past.

DAIRY AND POULTRY.

INTERESTING CHAPTERS FOR OUR RURAL READERS.

F. S. NEAL, Publisher.

There are only three varieties of geese which can be called domesticated. In time we have several varieties, but the majority are so inferior to the three leading breeds—Emden, Toulouse and Indian—they cannot be called profitable breeds. We have the small common goose, which has been reduced in size by in-breeding, which obtain in Ireland notwithstanding the law and our large police force. Then we have the Canadian and the old gray Poland, which I think is also a good breed.

I remember seeing a lot of these Poland geese over thirty years ago with their long necks and light bodies. At that length of time I could not well say what variety they resembled, but as far as memory serves me, I think they were like gray Chinese geese.

There is also a Norfolk goose of considerable merit, being a good, hardy breed and sure breeders.

The Emden goose is by far the most beautiful of the species. It is a very large variety, pure white in color, and very handsome. In a large flock on the grass or stubbles they look extremely well. The Emden gander should have a long, swan-like neck; long, straight head; deep orange bill and light blue eyes. His breast should be full and broad, without any keel; shoulders very broad; back long and straight; rump deep and broad, and legs very strong.

A first-class specimen will weigh up to thirty pounds, and sometimes more. The goose is similar to the gander, so much so that frequent mistakes are made in selecting them. I have noticed prizes awarded to a goose at the best shows which was exhibited as a gander. The goose rarely passes 22 pounds.

The Emden does not look as large as it really is; it is a very tight-feathered breed. Some have compared it to the same fowl in this respect and likened the Toulouse to the Cochon.

The comparison, however, is not a good one. It is not as hard and bare of feather as the game fowl, but it might well be compared to the Dorcas. The hard, close feathering is what makes Emdens less popular than they deserve. At shows, with most judges, the Toulouse wins in almost every case, for the simple reason we have very few good Emden judges. I was pleased to see an Emden winning the special at Stratford, but here the judge was a noted Emden breeder.

The Emdens are fairly prolific, laying about fifteen eggs each if fairly fed and make good setters and mothers. They are indeed most satisfactory in the latter respect. Great laying in geese is not to my mind any recommendation. I prefer a goose that will lay a good sitting—say 12 to 15 eggs—and sit down and hatch them as soon as they can be trusted to rambble far from home.

Geese of this class give very little trouble, compared with the birds brought up by hens, which lay about the farm-yard all summer. It is true there is a remedy for these so-called farmyard-pets, which I will give when I come to the breeding of Toulouse.

The Poulets are an early maturing variety and as such have largely recommended as harvest geese. Their flesh is excellent and without any coarseness. They are frequently crossed with Toulouse, which produces excellent results. This cross makes very light birds of a light gray color.

The ganders grow particularly large, the cross between an Emden goose and a Chinese gander is very highly spoken of. Large flocks of moderate size white birds are obtained in this way.

I need not say much on breeding Emdens. A garden and two or three geese make a breeding pen. I prefer to mate only two geese with a gander. The gander, as before stated, should be as long in the neck and typical of the type as possible. I would advise the first four eggs laid by each goose to be put under hens, and the geese will be able to sit 16 each. They should have nests provided in a shed where they should be put to lay from the first. I don't believe in changing a goose from the nest she has laid in, because she won't take to a new nest as a rule.

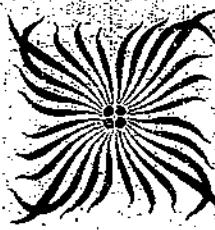

SLEEPING COWS.

There is a general belief that sloping cows greatly increase their flow of milk, and that the resulting yield is correspondingly poorer in butterfat and to prove, or disprove this, the experiment station at Guelph, Ont., has for the past two years been experimenting along this line, and to their surprise there is practically nothing in the belief. The cows, when fed the grain in form of slop, would, if fed once a day, give slightly more milk and a slightly lower, but not uniform, percentage of fat, about 0.4 to 1.0 per cent; but in every instance where slop was fed twice a day, there was a marked falling off in milk yield. These tests were conducted in periods of 20 days each, so as to get the full effect of the feed, and in the general averages the day grain fed cows came out ahead. As to the variation of fat content of the milk, the sum total of all the averages showed that there was no more loss in the end than the variations found in the fat content of cows fed dry feeds, and the sum total of two years experiments is against the idea that slop food increases the milk. Sloping is to be deuced from the tests it is that cows gave less milk if the sloping was very marked, and the percentages of fat yielded were actually inconsequential so far as change was concerned in either case. The conclusions are that the best "slop" that can be fed to a cow is a good ration of corn, silage, roots or cracked grain fodders, and the drink that a cow has best is the form of good water, governed by the inclination of the animal to drink.

BY THE FULL BENCH.

SUPREME COURT WILL HEAR INCOME TAX PETITION.

Justice Jackson Expected No Decision Yet Reached as to the Scope of the Argument. M. Cases Are Disputed.

Washington, April 24.—The United States Supreme Court, through Chief Justice Fuller, has made the following order in regard to the petitions for rehearing of the income-tax cases:

The consideration of the two petitions (the income-tax petitions) for rehearing is deferred until Monday, May 1, when a full bench is expected and in that event two counsel for each side will be heard at that time.

Although the order does not explicitly so state, it means that argument will be heard, not on the merits of the income-tax question itself, but on the question whether or not there will be a rehearing of the suits heretofore decided. The argument, it's expected, will include the extent to which the rehearing shall go, whether it shall be confined merely to the point on which the court was evenly divided, the constitutionality of the income-tax law as a whole, or whether the whole question shall be revisited and new arguments made on the question of whether or not rents are exempt from taxation, as to which there was a clear majority of the court against this feature of the tax.

The announcement by the court is further corroborated by reports of improvement on the health of Justice Jackson as it was made after assurances that unless his case would return to the courts he would be compelled to return to his seat on the bench by the date named in the order.

It cannot be stated with certainty how Justice Jackson stands on the income-tax case, but it is commonly believed that he is in favor of the law and that much depends on him in view of the question of establishing the constitutionality of the principle beyond any question of a doubt. The rehearing announcement has the treasury officials with regarding satisfaction, and important negotiations of the original decision are expected while the court consents to reopen the matter.

The restoration of Justice Jackson to the bench is regarded as but a short of automation. At the "Bridger Club" dinner in this city last night three hearty cheers were delivered to Justice Jackson. "We are glad," said one, "that all that is in man's power to do has been done."

FLORIDA SOONS INSULTED.

Secretary of State Crawford Said They Were Owned by the South. A "Collateral" between April 23.—A storm burst in the lower Mississippi valley, which J. L. Crawford, Secretary of State, says will probably cause more damage than the recent severe storm in the St. Louis river basin, and the paper wrote to Mr. Crawford, inquiring of the situation of Florida. He was pleased and law anxious looking. His reply: "I have been in touch with your paper and have always been glad to help you. I am sorry to say that the people reached the capital, and the gathering was well along when the sun set. Fortunately a telegram came to me from the minister and presented to the house."

Florida, April 23.—A "Collateral" between April 23.—A storm burst in the lower Mississippi valley, which J. L. Judge from a Widow. New York, April 23.—John Cross, 18 years old, who disappeared from his home Saturday and returned yesterday afternoon, committed suicide by throwing himself from the tenth story window of his father's house. The girl, dressed with her parents' furniture, after a schoolgirl friend clung to her, at the latter's bidding, and later in the evening John started to a part of the way home with her. After that she saw no more of John until yesterday afternoon. The police had meanwhile been asked to search for her. When she returned home, she told a story of abductions. Her parents received her severely and threatened to send her to a reformatory. This morning she threw herself from the window of her room and was instantly killed.

Reception to Archbishop Kenrick. St. Louis, Mo., April 23.—A reception was rendered to the venerable Archbishop Kenrick yesterday by the students at the Christian Brothers' college. Four hundred students received the aged prelate. He was accompanied by Archibishop Ryan of Philadelphia and Coadjutor Archbishop Kain of St. Louis. An address of welcome was made by William Gilmore of the class of 1865, which was responded to by Coadjutor Archbishop Kain owing to Archbishop Kenrick's feeble condition.

Would Investigate Summaries.

St. Louis, Mo., April 24.—Yesterday the northern Methodists' meeting voted a resolution was introduced by the Rev. T. H. Haggerty and passed, recommending the Missouri legislature to adopt laws that shall give full police authority to investigate Catholic numeraries and other institutions which are not open to public action. The co-operation of all Protestant bodies was asked and the subject will be taken up next Monday by the Evangelical alliance.

Tax in Line for Silver.

Austin, Tex., April 24.—About 100 members of the Texas legislature met in caucus last night and decided that a vigorous silver campaign should be inaugurated in every section of the state at once in order that when nominations are made for the state next two years hence, the lines should be drawn as between silver and gold-bugs—Democrats, and that the silver Democrats should have the preference.

Nyack Post Office Robbed. Nyack, N. Y., April 24.—The Nyack postoffice was entered by burglars last night and robbed of nearly \$1,000 in money and postage stamps. The safe was blown open.

Congressman Bill Improves. Washington, April 24.—Mr. Pitt of Illinois and Gen. Cogswell of Massachusetts, the sick congressmen, are both reported slightly better this morning.

FEARS OF AN OUTBREAK.

Lasting Phase of the Trouble on the Winnebago Reservation.

Omaha, Neb., April 24.—The trouble in the Winnebago reservation came yesterday in the Federal court, and a trial on its merits today. United States District Attorney Sawyer has returned from a visit to the Indians. He found the temper of the majority among the tribes of the Omahas and Winnebagos to be uncontrollable in favor of reviving the formalities of iron, iron and steel. Mr. Sawyer declared in his court from the spirit of unrest is great a serious outbreak is liable to follow any further delay in settling the tribal questions.

Chief Beck, the Indian agent, has authority to commission every Indian on the reservation a collector if necessary. He claims he will enforce the government regulations if it takes every Indian on the reservation. The present against Capt. Beck said to be forced by members and friends of the Journey Land company has widened the gap between the Indians and the white settlers leaving from the Flour of Land company, and this between the whites, because they would be the first victims of an outbreak should one occur. One result of this is that many of the whites of the settlers are leaving the farm-houses and going to Pender and other towns in fear of possible outbreaks of the present conflict, especially as the settlers are armed.

TROUBLE AMONG MINERS.

Convention at Pittsburg Devised to Hold Oct. 10-12. Oct. 24.—The miners' convention adjourned yesterday after being in session all day. It was expected that the operators would agree to a conference, but in this the miners were disappointed. The attendance was much larger than Saturday, and the miners, which have been working at the 65-cent rate, were well represented. All the delegates from the river brought with them considerable money, which was divided among the strike strikers. A resolution to hold out for the 90-cent rate was introduced and according to the press committee was carried unanimously. The convention then adjourned. It was suggested before the delegates that the action of the convention was probably a mistake when the delegates replied: "We waited all day for a conference with the operators and they thought they could not meet us. We will now give them a chance to make good their claim of starting their mines at the 65-cent rate. There are more men working at the 65-cent rate than is generally supposed. We might just as well start up 100 more as in working."

Henry Thompson says he will begin operating the Nottingham mine, on the Wheeling division of the Baltimore & Ohio railroads, and has fifty men ready to go to work. As the situation now stands, it is probable will be ten days throughout the district and plenty of work for deputy assessors.

BILLS GO UP A STEP.

Short Session at Springfield of Senate and House.

Springfield, Ill., April 24.—Among the bills advanced yesterday was Mr. Chapman's bill to prohibit the introduction of contested election cases, which was called in out of its order in the house by Mr. Lowenthal of Cook, who then adjourned to hear reading. Among those advanced in the senate was Senator Little's, requiring eight hours of the day in regard to court papers which provides that the Supreme court shall receive cases brought to it by appeal or writ of error in questions of law only and no assignment of error shall be allowed which shall call in question the determination of the inferior or appellate court on controverted questions, in fact or cause, excepting those enumerated in the laws.

The house advanced in second reading all the house bills in first reading and then proceeded to senate bills in first reading. All on the calendar, thirty-eight in number, were read and referred to the appropriate committees. Among the senate bills thus advanced were the following: Dr. Peary's bill to prevent the wrongful taking of news dispatches from the telegraph or telephone wires; bill authorizing steamship districts to issue bonds; the money-due pool selling bill; bill fixing the compensation of members of the general assembly at \$100 for each regular session. The house adjourned to 8 o'clock this morning.

Arkansas State Financial Advice.

New York, April 24.—Secretary Green is in New York, it is said, for financial advice. He spent most of his time yesterday with two experts, ex-Secretary of the Treasury Bejamin H. Brewster and J. W. Doane of Chicago, receiver and executive director of the Union Pacific railroad. To callers, morning and afternoon, word was sent that all were too busy to see anybody. Mr. Green intended to keep the knowledge of his visit to New York from the public. He did not put his name on the hotel register and remained in his room most of the time during his stay here.

Big Sugar Plant to Be Rebuilt.

Baltimore, Md., April 24.—Rebuilding of the Baltimore Sugar Refining company's plant will be completed this summer. The works were destroyed by fire two years ago, just as the new plant was about to be put into operation. President Spence denies that the company is controlled by the trust. The new refinery will have a daily capacity 25 per cent greater than the plant that was burned, which is intended to turn out 1,500 barrels a day.

To Draft Reforms for Armenia.

Constantinople, April 24.—The committee appointed at the instance of the representatives of the powers to draft a scheme of reform for Armenia, includes Han Bey, a Turkish official, who will be president of the commission; two under secretaries of state, a magistrate, and one Greek and one Armenian official.

A Reverend Bewester.

Bridgeport, Conn., April 24.—John Ford, a Roman Catholic underwriter, has brought suit for \$14,000 damages against Rev. D. J. O'Brien, alleging that he influenced his parishioners to deal with an opposition firm.

tion all the teachers in the Northville
schools, with the exception of Miss
Clarkson, who will resign on account
of ill health, have re-engaged for
another year. But one vacancy is
therefore to be filled.

A recent issue of a woman's paper
contained this item—the writer ex-
plains knowing what she was talking
about. "Before marriage, a man will
hold a 120 pound girl in his lap without
complaint, and a year or two later
she will be at the weight of a 160 pound
baby."

Mother will sell on the premises

four miles west of Novi on the gravel

road, 1/2 section on Naturally, a lot of

Harley and Durham milk cows, some

blended sheep, farm implements, etc.

Sale commences at one o'clock. See
large bills for complete list.

In the item of last week regarding

the sale of milk tickets, etc. It is only

justice to our loyal dealers, Messrs.

Hughes and Rogers, that we say they

are exceptionally careful in their

handling of milk tickets where

there is sickness in the homes. Such

tickets received instead of being put

with the regular tickets are invariably

destroyed at once. Our milk men are

very cautious in this respect.

Spring Cleaning

Is such a trial that man says "Let the old enriched, and thus softens the nerves house take care of itself." But the courageous wife fears bound to her health, and all the body's functions.

I take Hood's Sarsaparilla every morning, and it is the only medicine I use throughout the day and night. The consequence of her feverish anxiety over extra work is depreciation of the blood, the source of all life and strength, manifested in that weak, tired, nervous condition too prevalent at this season and very dangerous if allowed to continue. What every man and woman needs in the spring is Hood's Pills and they are the best I ever tried." Mrs. F. D. Atkinson, S. Woodstock, Ct. Get Hood's because

All wool shawls in black and mottled grounds, which can now be purchased at half their former price, make comfortable and desirable house wear.

It is not too much to say that the best dressed women in Europe are the Parisians, for with them it is not merely a matter of what they wear but

of how they wear it.

What our churches need more than anything else, is ministers who are not afraid or too proud to mingle with the common people and who are not afraid to preach the gospel truth even if the bicyclist notices that horses are

afraid of his bicycle, he or she should dismount and use every means to prevent any accidents. Some cyclists think they own the earth, and some people with a horse and wagon think they own it.

The party at H. Hughes on the eveing of the 18th was well attended and the participants had an enjoyable time. Music was furnished by Volney Gunning and John Tuham.

The railroad bridge just north of here has been undergoing repairs this week, and some of the machinery used was such that some of the most tractious horses did not like the looks of causing their owners to go over the hills to the village among the hills.

The courts have decided that persons riding bicycles have the same rights in the highways that are enjoyed by persons using other means of conveyance, and no more. In passing the same rules govern both, and both are held equally responsible for misconduct upon the public highways. Bicycles should use great care in approaching and passing teams and where due precaution against frightening horses is not exercised, and runaways and smash-ups result, the party at fault is liable to prosecution. A man driving a team or single horse has no right to harass a rider of a bicycle by refusing him passing room. If there is plenty of passing room the bicyclist should do the turning out, if the bicyclist notices that horses are

tomorrow (Saturday) evening at 7:30. F. E. Quigley will give a public test in separating cream from raw milk with a hand separator at his home.

Every dairy man who manufactures butter should call and see this separator work. The machine to be used is one that was put to a very thorough test at the Agricultural college this week, and the skimmed milk showed, by the Brixcoek test, less than one-tenth of one per cent fat left in the milk. Everybody is invited to witness the test by Quigley.
