\$1.00 per year, in advance.

INDUSTRIAL NORTHVILLE.

THE CRACKER JACK VILLAGE OF MICHIGAN AND ITS INDUSTRIES.

Brief Sketch Of Our Busy Town—The Switzerland of Michigan.

A Few Side Remarks About Its Representative Business Houses Tersely Told.

Beautifully located among the hills surrounded by magnificent scenery with unequalled natural advantages and good railroad facilities, Northville is undoubtedly to be an ideal residence town and business center of Southeastern Michigan. Northville has never had a boom but even during periods of depression like this which is now passing away, it has grown steadily, until now she will not yield the palm to any village in the county. Today she can rightly boast of being one of the prettiest and healthiest little towns in the country. It is also probably true that the numbers more moderately well-to-do people in her population of 2,000 souls and has more handsome homes than any town in southern Michigan of like size. Northville pre-eminently enjoys the advantages deriving from broad thoroughfares and handsomely graded walks. With good soil, pure air here, water, the finest of drives, and no mosquitoes why should Northville not be happy? Probably no town in the state can boast of a population so thoroughly alive to the importance of good government as Northville. Her public schools are famous, the discipline good and the progress made by the scholars gratifying to the extreme. In the matter of public worship Northville has three churches: Baptist, Methodist and Presbyterian. As a place of residence Northville cannot be excelled, with its conveniences and comforts abounding that are attractive and durable. Hotels are 30c and boarding comparatively cheap, and surrounded by a rich agricultural country. Socially it contains all the elements of an old and well-established community.

Northville's Claims to Distinction.

Northville's claims to distinction among the towns of Southern Michigan are numerous. It is clean, well drained, lighted from center to circumference by electricity and is well governed. These statements are not made merely to round out a sentence. Her streets and walks are presentable every day in the year. She has a good fire department and an alarm service, water works, public drinking fountain, good banking facilities, fine hotel, a brass band, opera house, town clock and a crack base ball team. These leading claims which Northville offers have been touched upon but lightly. Below we take pleasure in briefly describing our manufacturing and business houses. This sketch is not intended to cover all the business interests of the town.

ELY DOWELL & CO. CO.

One of the industrial establishments of Northville which contributes to the general prosperity of the town is the Ely Dowell Manufacturing Co. The company's plant is located on Plymouth avenue in the eastern part of the town along the line of the F.R.P.M. R.R. They manufacture grooved dowel pins of every description. Their factory is equipped with the latest machinery known to the trade including some special machinery. The dowels are made from sound, fine timber, and are guaranteed to be thoroughly kiln dried. They use the Bayard & Smith hot blast dry kiln. The company is also prepared to do all kinds of wood turning at reasonable prices. The officers of the company are: Wm. J. Ely, president; W. V. Ely, vice and treasurer.

J. A. DURUAN MFG. CO.

This enterprise dates its inception here in 1883, and since it was established it has always commanded the attention of the public. It is one of our oldest manufacturing concerns and gives employment to from 50 to 60 men. The pay rolls of the concern constitute a very large item in the aggregate of the wage earners of our town, and is an important factor in the annual trade interests of the place. They pay out annually over \$10,000. The line of manufacture is made up of door and window screens, wheel-

HUBLER MERCANTILE COMPANY
Have Secured the Contract to Play

at the State Fair.

The Northville Globe band, twenty pieces, has again secured the contract for furnishing the music at the state fair, Sept. 9 to 15. It may be said without fear of contradiction that the Globe band is one of the very best in the state. This band won laurels at the state fair held in Detroit last year where their concerts were among the free of charge. The boys will always find themselves in demand for the leading attractions of each day, winning for themselves unqualified praise from both the fair association and its patrons. The boys are all neatly and neatly uniformed, well drilled, and up to date with their music, and that of Grand Rapids next month they will do honor to themselves and Northville goes without the saying. F. S. Neal has assumed temporary management.

V. O. WHIPPLE & SON.

Among the leading business houses of our progressive village should be mentioned that of V. O. Whipple & Son, manufacturers and dealers in harness, collars, whips, robes, blankets, trunks, grips, telescopes and field goods. It is one of the handsomest and best stocked harness stores in the country and would do credit to any city in the state.

The sales of this concern in good years have reached a record figure of a million of dollars, and it is confidently predicted that by the beginning of the next century the sales will have reached a volume of double this amount.

In enumerating the manufacturing interests of Northville let us first give them a place without adding to it what promises to be one of the best enterprises which Northville people have undertaken—that is the American Bell Foundry Co. This is far as yet untried affair, but carries in its management from the outset who has been thoroughly conversant with the best method of manufacturing bells for a quarter of a century. The equipment of their plant is entirely new and the wheels and shafts designed especially for the business. There is not to this country equal for the production of first class work. They will manufacture all sizes of bells suitable for the church, the school, the chapel, and the church.

The Columbia Refrigerator Co. has just passed its second year of practical working. The growth of the business notwithstanding the pressure of the times, has been very encouraging indeed, and with the improvements which have been recently added to the

line, it is not too much to say that this industry is an established factor in the prosperity of Northville. The company has control of the original Hungarian pastries for all the states east of the Mississippi river, excepting Illinois and Wisconsin. The flavor which this line of goods has received among the dealers both North and South, is very encouraging to the managers of this enterprise, and we predict that the sales for 1895 will be double the amount sold in 1893.

HOLMES, DANCER & CO.

INDUSTL. NORTHVILLE

(Continued from Page 1.)

W. G. YERKES.

Among our active energetic business men is W. G. Yerkes. His "come hardware" store is the largest of that class of the community, when in search of heavy or shelf hardware, tinware, stoves, ranges, paint cans, etc. The store is commodious and well arranged and admirably equipped for the transference of business and disposal of stock. He does tin roofing and spouting, and all work is guaranteed and every effort is made to please and satisfy the most particular. Mr. Yerkes also handles coal which he is selling at prices that defy competition. His Stanton hard coal and Jackson lump coal is the best and brightest burning coal in the market. Mr. Yerkes is successor to Knapp & Yerkes.

NORTHVILLE CITY LAUNDRY.

A well conducted laundry where good work is done is a matter of importance to everyone. A propos of the above is the Northville City Laundry, where is done in the most perfect manner laundering of every style. The facilities of the establishment are the very best, prices reasonable and well fixed. In connection with this laundry are the only bath rooms in the village, three in number, heated by steam and equipped in first-class style. There is also a cleaning and dying establishment in connection where clothes are cleaned, dyed and pressed at reasonable prices.

MERRITT & COMPANY.

A review of the leading merchants of Northville would be incomplete that failed to give due prominence to the fine store of Merritt & Co., which is eligibly located on Main street. To say the store was complete in every respect would not be sufficient; it ranks one of the highest of its class in this section and compares favorably with many stores found in our cities. The store is very prettily fitted up and appropriately furnished, the side cases, show cases, counters, and other furniture being handsome, and the general effect attractive and interesting. Here may be found a comprehensive stock of jewels and trinkets of all kinds and make; finger-rings, diamonds, gems, precious stones, etc. They also have a surprisingly large stock of art supplies, musical merchandise, tools and stationery. In the rear is the repair department, where all complicated watch repairing and regulating, electro-plating and engraving is done. Mr. E. A. Merritt has been in the jewelry business 14 years and has worked in all the large cities of the U. S. He is a graduate of the Horaological Institute of Chicago, and the Wiggin Engraving School of Chicago. He is a thoroughly practical and skillful artisan.

Next week we will make some alterations in our store, and previous to that we desire to clean up all odd lines in every department.

The new lines will be
Open on or before
September 1st

W. M. NEVISON.

William Nevison keeps a fine line of saddle and harness goods, whips, robes, blankets, Mafers, collars, etc. He has a repair shop in connection where all kinds of repair work is done neatly and cheap and satisfactorily manner. All work is uniformly guaranteed and warranted. Mr. Nevison also takes orders for engraving pictures in crayon and steel colors. Orders left at his shop will receive prompt attention.

A. H. KOHLER.

Somewhat conspicuously among our grocery and provision houses is that of A. H. Kohler, located opposite the F.A.P.M. depot. This store is stocked with a full line of fresh fancy and staple groceries, canned and bottled goods, provisions, salt and smoked meats, which he receives direct from first hands and is selling at lower prices. His store is popular with all classes in the community. The leading feature of this house is its fine groceries for family trade.

B. FREYD, I.

Dress neatly. There's a world in the make-up. And, that is the reason Northville is noted for fine looking men. Northville has a good tailor. Just think of B. Freyd! He would do credit to any city in Michigan. Did you ever see a poor fitting suit made at his establishment? Guess not. He always carries a varied stock both in ready and price, to satisfy the taste and means of all classes. If you want a suit that will fit your form perfectly, at a reasonable price, call on Mr. Freyd, and you will be thoroughly satisfied. He makes a specialty of custom work.

L. W. HUTTON & SON.

An establishment of the highest standing in the community, and closely connected with the progress of trade in Northville, L. W. Hutton & Son are entitled to more than ordinary mention in a work of this kind. The house is recognized as occupying the highest position in our commercial circles and maintaining it by the superior character of its goods and the signal intelligence of its management. The store is completely stocked with all kinds of imported and domestic staple and fancy groceries, teas, coffee, spices, pickles, calashes, sausages and other condiments, canned goods, etc., and indeed everything in the grocery and provision line that can possibly be desired in the best regulated family. They are careful, shrewd buyers, ever on the alert for bargains, and buy in great quantities from first-handers, consequently their patrons realize the benefit of the cash discount. As a gatherer of course their prices are always low. They charge all lines for the benefit of seller and customer—buy and sell for cash—and the capital trading goods keeps their stock fresh, and new at all times. The above statements are unquestionable, and it will convince the doubtful that some facts are facts even in print. L. W. Hutton is one of our oldest and respected business men. W. H. Hutton has been identified with our trade circles for 18 years and is a popular, and hustling young business man.

A. W. REED.

Prominent among the leading business houses of Northville, none are more deserving of special mention than A. W. Reed. His store is admirably arranged for the display of stock and successful conduct of the business. Here can be found a well selected stock of dry goods, full line of carpets, wall paper, window shades and curtain fixtures, and a choice stock of ladies and gentlemen's wear.

A. M. RANDOLPH.

The subject of this sketch was born in Monroe county, N. Y. in 1830, and moved to Northville with his parents when a mere child. His education was received in the select and common schools of an early day. Mr. Randolph is oldest merchant in Northville having been behind the counter 47 years. Twenty-two years ago he established his present business and to-day he is one of the oldest pharmacists in the country. He is esteemed in business and social circles, for his honorable and fair dealing in all transactions, and for his congeniality.

NORTHVILLE STATE SAVINGS BANK.

The banking rooms of this institution are spacious, eligibly located and afford ample accommodation for the public. It is organized under the general banking laws of Michigan and has one of the safest and best secured vaults in the county. A general banking business is transacted. This bank is one of the leading factors in the prosperity of our workingmen and others, enabling them to lay by a small sum each week, thereby laying the foundation for a competency and future welfare. The officers are: J. M. Swift, president; W. P. Yerkes, vice president; L. A. Babbitt, cashier.

B. A. WHEELER.

Standing prominent and conspicuous among the leading grocery and provision establishments of Northville is that conducted by B. A. Wheeler. His stock consists of the choicest and purest assortment of fancy and staple groceries, provisions, canned and bottled goods, etc. at prices that can not be duplicated. Here may also be found the choicest foreign and domestic fruits in the market. A line of choice confectionery, and the best brands of cigars and tobacco is carried. Mr. Wheeler has been established in business here for the past 20 years, and one fact has always been noticed, that every article sent out by him is always precisely as represented.

INDUSTRIAL NORTHVILLE

(Continued from Page 1.)

W. G. VERKES

Among our active energetic business men is W. G. Verkes. His general hardware store is the resort of a large class of the community, when in search of heavy or shell hardware, hardware, stoves, ranges, paints, oils, etc. The store is commodious and well arranged and admirably equipped in the transaction of business and dispense of stock.

He does no roofing and shingling, and all work is guaranteed, and every effort is made

to please and satisfy the most particular. Mr. Verkes also handles coal which he is selling at prices that defy competition. His Scranton hard coal and Jackson lump coal is the best and brightest burning coal in the market. Mr. Verkes is successor to Knapp.

W. H. KOHLER

Sandhof's exceptionally unique grocery

and provision houses is that of W. H. Kohler

located opposite the P&PM depot. His

store is stocked with a full line of fresh fancy

and staple groceries, canned and bottled

goods, provisions, salt and smoked meats,

which he receives direct from first hands and is selling at lowest prices. His store is popular with all classes in the community. The leading feature of this house is its fine groceries for family trade.

W. M. NEVISON

William Nevison is a fine, honest, sturdy and hardy good worker, roper, blacksmith, mason, etc. He has a repair shop in connection where he finds time to do his work in done neatly and cheaply and in a workmanlike manner. All work is uniformly guaranteed and warranted. Mr. Nevison

and wife are the owners of charming pictures in

crayon and water colors. Orders left at his

shop will receive prompt attention.

B. H. KOHLER

Sandhof's exceptionally unique grocery

and provision houses is that of W. H. Kohler

located opposite the P&PM depot. His

store is stocked with a full line of fresh fancy

and staple groceries, canned and bottled

goods, provisions, salt and smoked meats,

which he receives direct from first hands and

is selling at lowest prices. His store is pop-

ular with all classes in the community. The

leading feature of this house is its fine gro-

ceries for family trade.

B. FREDY

Dress neatly. There's a world in the

make-up. And that is the reason North-

ville is noted for fine looking women.

Northville City Laundry, where is done in

the most perfect manner laundrying of

all styles. The facilities of the establish-

ment are the very best, prices reasonable and

work perfect. In connection with this laun-

dry are the only clean rooms in the village,

there is number heated by steam and equip-

ped in first-class style. There is also

cleaning and dying establishment, in connec-

tion where clothes are cleaned, dyed and

pressed at reasonable prices.

L. W. HUTTON & SON

An establishment of the highest stand-

ard in the community, and closely connected

with the progress of trade in Northville. L.

W. Hutton & Son are entitled to more than

ordinary mention in a work of this kind.

The house is recognized as occupying the

highest position in our commercial circles,

and maintaining it by the superior character

of its goods and the signal intelligence of its

management.

The store is completely

stocked with all kinds of imported and

domestic staple and fancy groceries, tea,

coffee, sugar, flour, cereals, sardines and

oceanic condiments, canned goods, etc., and

indeed everything in the grocery and provi-

the past successful years of the association.

For premium lists and other

information address Secy. Holloway.

Secy. Null, John, July we are coming

WITH WOLVERINES.

BRIEF ITEMS ABOUT MICHIGAN PEOPLE AND THINGS.

The Michigan Crop Report for August
Sick Cervus Almost Escape from the
State Prison at Jackson—Minor Strike
at Impenetrable and Negrasco.

Crop Report for August.
The Michigan crop report for the
last month contains the following:
Wheat is estimated to yield in the
southern counties 16.33 bushels per acre,
and in the northern 11.18 bushels per acre.
One year ago the estimates were
for the southern counties 16.57 bushels per acre
and for the northern counties 15.07 bushels per acre,
the average for the state being 15.17 bushels per acre.
The number of bushels of wheat reported marketed in July is
45,800, as compared with 51,752 in
July, last, and the amount marketed
in the twelve months, August 1, is
1,120,000 bushels, as compared with
1,150,000 bushels in the same months
last year. Oats are estimated to yield
22.4 bushels in the southern counties, 21 in the
central, and 17.7 in the northern, the
average for the state being 19.16 bushels per acre.
The average condition of corn
is 79 per cent, comparison being
with 78 per cent of average years,
and potatoes in the state are estimated
to yield 17 per cent of an average crop.
The estimated yield of hay per acre
is only four-tenths of the yield in aver-
age years, and the condition of mead-
ows and pastures is only 1 percent
below the average years. Crop
values this year is nearly an entire
increase the estimate showing con-
dition but 17 per cent of an average.
Apples promise scarcely more than
one-fourth of an average.

Miss Priscilla's sentence to escape.

A deep and plot to escape from

Jackson State prison has been foiled,

and one man, after almost two weeks' freedom, is again behind the bars

without charge of aiding convicts to

escape. Those directly interested in

the plot are Stone-Wall J. DeFrance,

one of the stinkiest scoundrels ever

captured, and Frank L. Hayes, a

young Detroit drug clerk who adored

his friend. The man arrested

for the charge of aiding them is John

W. Higgins, who was released from

prison August 1, after an inter-ten-

year sentence for burglary. Hayes

was physician's assistant and DeFrance

induced him to give him the French

name de France to induce a tempo-

rary illness. The scheme worked and

DeFrance was sent to the hospital.

By some accident the officials became

suspicious and on investigation found

several saws and other tools with

which Higgins confesses they intended

sawing the bars of a hospital window

and escape. Higgins incited the

two to do the work.

Strikes Threaten British Arrest.

Fred H. Britton, the newspaper cor-

respondent who was forced to leave

Spain recently by strong-arm men,

has turned up in France and fear

of the strikers of the coal miners

has been arrested again recently. They

were released on bail and were then

escorted through the streets by their

followers with drawn band.

Spirituos Firemen.

The Ishpeming and Negrasco strik-

ers decided to put the mine owners to

the test. It was decided that if hands

would go in a body to the mines and

assent to the strike, the miners were

asked to consent with the agents

that they were given a just recompence

at the various mine offices. The min-

ers' decision of the mine managers

was to the effect that they would not

treat with the miners but would talk

to their own men. The strikers re-

plied that they would remain off if

the miners was not recognized.

Samuel S. Walker.

The State Association of Spiritualists

has elected the following officers:

President, J. V. Monihan; Grand Ban-

ds; vice-president, Mrs. Eddie E.

Sheets; Grand Lodge secretary, J. H.

Clemens; Lansing treasurer, Dr. J. C.

Bahrhoff; Grand Rapids trustee, John

Burchfield; Jackson, J. A. Martin;

Lansing, and E. D. Dent; Muskegon

Vice-president, and Dr. A. Wed-

son, of Lansing, were delegates to the

national convention at Wash-

ington, and President Moulton to the

international convention at London.

Sad Tragedy at Yale.

After one week of married life, Wil-

son Downey, and his wife took a dose

of laudanum in their room at Yale and

were found unconscious in each other's arms. Downey recovered in a short time

and was at once hurried off to his

home in Sanilac county by relatives.

The woman died. She had been mar-

ried before and had two children by

her first husband, who was Lyman

Tower, of Oakland county. The oppo-

sition of Downey's parents to his mar-

riage led the couple to take the poison.

Mysterious Tragedy at Charlevoix.

Bennie Lanaway, of East Jordan, was

found on Friday night at Charlevoix,

bleeding profusely from a bullet cut in

the right breast and also in the head,

apparently made with a razor. Lanaway

refuses to say who cut him or where

the affray occurred. Lanaway was the

victim of a similar affair a short time

ago where he likewise declined to give

the name of his assailant. His wounds

are severe.

Hackley Park May be Sold.

It is reported that a movement is on

foot to consolidate the Hackley Park

association and the Lake Harbor hotel

association, at Muskegon. Mr. Hack-

ley says that, unless a change is

made in the organization, there will

be no movement at the park next year.

The receipts this year amounted to

\$20,000. The advertising was \$500, and

the program cost about \$1,000.

Henry Robertson, night operator at

the G. & I. railroad at Muskegon, was

killed in the office and \$100 of the

company's money taken by a masked

robber.

The Peach Man's Sausages.

A new variety of the deli's peach

has made its appearance in the

markets about Muskegon, and many

growers fear it will rival the yellow

peach in popularity.

The sensational trial of five of the

leading citizens of Clinton, who were

charged with disturbing the peace

while celebrating a friend's weddin-

g, was adjourned.

The trial of the Negroes, including

the former color, so pronounced

in the press, was adjourned.

The Hennings' peach mill was

destroyed in fire at Sebewaing. It

had not been run for three years and

had been run for three years and

FARM AND GARDEN.

MATTERS OF INTEREST TO AGRICULTURISTS.

Some Up-to-Date Ideas About Cultivation of the Soil and Fields Thereof—Horticultural Varieties and Flora.

BLOW WE GIVE an article from the *New-York C. Garden* in the *Ohio Farmer*. It is of great interest; as scientists have asserted that moles live only on animal food. Is this mole be right? The mole is a public enemy. The article is as follows:

I read the article of Mr. Grant, in regard to moles, in a late issue of the *Ohio Farmer*, and am pretty certain that any farmer who has been growing corn, potatoes or sweet potatoes for a number of years cannot agree with him. From my own experience (and that of other farmers with whom I have conversed on the subject), I have found that where a mole-run is found in a sweet potato field or in a potato hill, the potatoes have departed. Sometimes I have found them partly eaten, the surface left fresh.

In regard to corn, it is considered to be of little use to plant where it has been taken by moles unless cultivation can commence immediately, and farmers frequently practice cultivation when they find the insects at work, before the corn is up, culturing deeply.

Some sixteen or seventeen years ago,

I had a field of corn badly injured by moles in places nearly all gone, and in other places a pretty good stand. I knew it was of no use to put corn in the same places as it could not then commence plowing, and if I waited much longer the plants would do little good, so I set about to drop two grains of corn on each of the missing hills, and a couple of men and myself covered it by drawing dirt over the hill with a hoe; the result was a good field of corn. I did not notice the mole took the corn, but wherever the run went through the hill the corn was missing and where there was no mole run the corn grew all right.

I once read in an agricultural paper of a man in New York, I believe, buying moles at five cents apiece to put into his ground to loosen the earth and I presume to catch grubs. I never heard the result of his experiment; his theory was the same as that of Mr. Grant. I expect when he undertook to put his theory into practice he changed his mind.

Some years ago I was hunting in corn from the shock; there was over a foot of snow with a hard crust on it. I took a hoe to loosen the butts of corn stalks; in the center of the last shock I found some half dozen rats still in the hicks with no corn thereon; I thought a rat had been at work, but the earth had not been worked up among the stalks, so I concluded it had been a rabbit. As I was cutting the stalk I saw what I took to be a rat among the blades, although I moved rather too slowly for one. I gave it a clip with the hoe, when, lo and behold, there was a mole. That settled the matter, not only with the mole, but with me, that moles do eat corn. I went to the barn, unloaded my corn and put my team away, thinking about the stock. York and whose mother never bothered vegetation, but who bought up all he could, and thought that in the spring when the insidious mole was excavating in the agricultural papers I would give my experience.

But hold on—the fact isn't proven. You don't know that the mole did eat the corn; it's only circumstantial evidence. A rat might eat the corn and the mole just happened in fact, the mischief was done, and it's getting late in the day, and turning much colder, and it was quite a distance from the barn, a deep snow with a heavy crust to tramp through, I was satisfied myself, but that didn't prove it.

I sharpened my knife and waded back, cut the mole open and found its stomach filled with finely ground corn. A neighbor told me that he had made a strong decoction of Mayapple root and soaked corn in it and put in their runs in the cornfield and thus killed them. He said the year before a man who had corn on his farm complained about a mole taking the corn in one particular place, that he tried the remedy at his suggestion and the next day, or so after putting the corn in the run, he plowed out the dead mole. I have never tried it myself, however.

Growing Cranberries. Last week we had something to say about cranberries and the soil on which they could be best grown. The soil best adapted to the growing of this fruit is a mixture of sand and peat. One way to obtain this desired soil is to haul onto the ground designed for cranberries large quantities of muck. After this has decomposed, cover it with fine sand from the beach. In a few years the two will become incorporated, making a fine, black, sandy soil. On ground previously fitted for the growing of cranberries the soil rarely becomes dry, except on the surface. Stagnant water is to be avoided, as it usually proves fatal. Running brooks in such a meadow are of value, but they must be under full control. The ground must be in such shape that it can be drained from one to two feet below the surface. The streams are to be used for winter flooding and summer irrigation. Some people advise planting vines upon uplands, but such locations are not advisable. True, the vines will sometimes live and bear, but it is an unusual state of affairs and should not be encouraged; for instance, writers on cranberry growing say that vines upon dry lands are short-lived, blossoms are blighted, and the fruit is dwarfed or barded; worm eaten, the ravages of the fruit worm being greatest upon dry soils.

According to the opinions of some growers, soil heavily impregnated with oxide of iron should not be selected. Nearly all of our readers will readily recognize such soil by the "iron rust" that collects in the little stagnant pools. The main objection to such soil is that it freezes in a different manner from most other soils, the ice and frost earth forming long crystals, and these latter have a tendency to draw out of the ground the little roots

of the cranberry. It is true that such lands can be used, but they will need to be kept flooded in winter, and if by any reason the water becomes drawn off, a disaster may follow.

The same objection is urged against the soil, as it will leave out the water during the freezing and thawing process if not covered by water or sand. One or two inches of sand over the muck will prevent this. Coarse or broken mucks are also to be avoided, as they neither retain moisture, nor act as a capillary sponge to draw up water in dry seasons. Such soil can be used only with irrigation.

Preparing a Swamp. It is best to dig a drainage ditch about two feet deep lengthwise of the swamp and wide enough to take all the storm water that comes. The next move is to remove the muck, which may be sometimes more easily done by burning off the old grass. After this has been removed, the branch drains may be dug. The distance apart of these drains will depend much upon the condition of the soil, but some place them at five rods apart; this comes from the plowing and sanding. As to the depth of sand, everything will depend on the conditions. The depth must vary according to the depth of the muck, and condition of the bottom, most sand being required on those meadows that have the deepest muck, for the reason that a layer of one or two inches of sand on a bed of dead soft muck would settle down and be lost in the black mass underneath. Where the muck is six or eight feet deep the sand may be put on to the depth of five or six inches, but when only a foot or two in depth, two or three inches of sand will be sufficient. Summer, when the streams are dry, is the proper season for preparing cranberry swamps.

More on this subject will appear in a subsequent issue.

Raising Turnips.

The turnip is a native grower of Asia, growing in a wild and uncultivated state in the woods. But centuries ago it attracted the attention of the farmer, who appropriated, improved, and cultivated, and used, for food, for both man and beast, and today it bears but slight resemblance to the original stock. In every part of the world, and in both cold and temperate climates, it is extensively cultivated and used for feeding sheep and cattle, and also for the table; and I am thoroughly convinced that if farmers would give it more attention, and grow it more extensively than heretofore, it would prove to be quite a valuable crop.

When the soil and season are favorable the yield per acre is immense. From \$90 to \$900 bushels have been grown on a single acre, and at 20 or even 15 cents per bushel, they pay better than corn, wheat or tobacco. The Swedish or rutabagas are considered the best for stock. To insure a crop for the approaching fall or winter the soil should be partially prepared in March or April. The soil should be fresh and rich as possible, and thoroughly broken and harrowed both ways and left until the season for sowing the seed. From the 1st to the 1st of July is the best time to sow. Then the soil should be broken the second time, and harrowed, and seed sown, provided there is sufficient moisture to bring them up. Last season I sowed on the 15th of July, and for three successive weeks the weather was extremely hot and dry, and the crop a complete failure. The better way is to wait for maturity, if it delays the sowing, for the seed are very tender and easily affected by drought. The quicker and more rapid the growth the larger the yield, and favored the turnip, as much depends on the soil and season.

Drifts, and sometimes sand, for sowing, but always preferably sown broadcast by hand, and if they come too thick, which they often do, I thin out with the hoe. Early turnips are desired for marketing; they stand well even in March or April, and in the garden, where they can be cultivated, which largely aids a quick growth.

There is another advantage in raising turnips that is generally overlooked by farmers; they are an excellent exterminal of the weeds, and leave the soil in excellent condition for any other crop. Heavy, tough soils are not adapted to their growth, but are little trouble to keep during the winter, as they are not seriously injured by a slight frost.—Journal of Agriculture.

Salt for Stock. With less scientific jargon than usual in journals devoted to the medical and veterinary professions, Prof. Aitken of Edinburgh, one of the new editors of the *Veterinarian*, writes a useful article at that periodical on "The Importance of Salt as an Article of Diet." He draws attention to the fact that in the blood of animals there is six or seven times as much sodium as potassium, and that the blood is remarkable among animal tissue in the constancy of its composition. It is therefore necessary to the proper maintenance of good health that a certain definite amount of sodium chloride (common salt) should be assimilated by the animal. An excess of potassium salts, however, is found in certain food substances, and this renders the presence of salt all the more necessary as an article of diet. A too abundant supply of potassium eliminates the salt in the blood to pass as urine. Consequently, the tissues of the body are called upon to yield up to the blood the amount of sodium chloride which it requires to maintain the composition of the blood at its normal condition. The craving of an animal for salt is most interesting, when the diet consists largely of food very rich in potassium salts, such as the cereal grains—wheat, barley, and oats—potatoes, peas, and beans. On the other hand, when there is an excess of salt there is a craving for water to wash it out in the excretions through the kidneys and the skin. Animals that are given much salt, and are allowed to quench their thirst freely, not only pass more urine than ordinarily, but also sweat more freely than on more equitable diets. Too much salt throws too much work on the kidneys, and serious complications may follow an injudicious quantity supplied.

Treatment of Fruit Soil.—There are differences of opinion as to the method of treating the soil in a fruit bearing orchard; but there should be no question but that the young orchard should have the most careful culture. Weeds and grass should not be allowed to grow, as they rob the ground of sustenance which should be absorbed only by the young and tender roots of the trees.—Ex.

The addition of salt to the ordinary diet of animals does not increase the digestibility of substances contained but it increases their appetites, tends to promote repair of tissue by its reaching diffusion through the body, while it stimulates the rapid "using up" of its waste products. Experiments made by Boussingault showed that salt increases muscular vigor and activity among even, and improves their general appearance and condition. Where muscular strength is the object of feeding, a regular supply of salt improves health and vigor; that is, that horses fed on salt increased their appetites, gained weight, and improved their general condition. It should be given in the diet of the horse, as it is the muscular strength is the object of feeding, a regular supply of salt improves health and vigor; that is, that horses fed on salt increased their appetites, gained weight, and improved their general condition. It should be given in the diet of the horse, as it is the muscular strength is the object of feeding, a regular supply of salt improves health and vigor; that is, that horses fed on salt increased their appetites, gained weight, and improved their general condition. Seven small lots of Men's Suits, somewhat broken up in sizes, and the price will also be broken. It means just HALF OFF the regular price.

T. G. Richardson, THE CASH OUTFITTER.

INDUSTL. NORTHLVILLE

(Continued from Page 4)

GEO. C. HUESTON

A pushing dealer in the drug business is Geo. C. Hueston whose well known establishment is located at 6 Main street. His stock is complete in all lines of drugs, medicines, etc. He pays particular attention to compounding physicians' prescriptions and furnishing receipts, and his drug store has become the Mecca for the sick and suffering of our town. Mr. Hueston is a thoroughly practical pharmacist of 20 years experience.

C. A. SESSIONS

The leading clothing side business in Northville is that conducted by the above named gentleman. He keeps a choice and desirable stock of coats and shoes for men, women, boys, misses and children, including some of the most prominent and popular makes, and all the fashionable novelties in blue and white, as well as the heavier grades in those lines more adapted to hard usage than to display and elegance. In short, the stock is varied both in quality and price. He handles the "Rodgers Blue Coat" made to order, also has the exclusive salaried for "Troy's Tailor Shop, Made Work," "Brown Bros. Blue Tailor," shoes. Is another prominent article which handles a specialty is made of fine repair work.

F. A. MILLER

The dealer in meats holds an important position in all well regulated communities as it is through him that one of the essentials of life is obtained. One so engaged in Northville is F. A. Miller. His premises are fitted up with modern trade requisites, including a large refrigerator. Here will be found the choicest cuts of beef, veal, mutton, pork, ham, bacon, sausage, bologna, salt and smoked meats; also poultry and oysters in season. He manufactures his own sausages, and guarantees all meats to be first-class. He kills and dresses home grown stock and patients may feel assured of getting fresh, sweet meat at all times. Mr. Miller is a practical business man and his straightforward, frank method has gained him friends and numerous numbering legions.

J. D. GORTON

Prominent among the leading merchants of Northville is M. D. Gorton & Co., the one price cash druggist, bather and men's outfitter. Here can be found all the novelties as well as the staples contingent to the business astutely displayed and at prices that are right. The stock is complete and all garments are cut after the latest patterns. They are agents for the Royal Tailors of Chicago and carry a full line of their samples, and also have the exclusive sale of the "Fifth Western Mill's" all wool goods. They handle a complete line of furnishing goods, consisting of fine white and fully embroidered silk, underwear, neckwear, gloves, stockings, etc. The popularity of the house is to an extent due to the fact that the stock is always new and fresh and of the latest style.

Highest of all in Leavening Power.—Latest U.S. Govt Report

MISS EVA BOVEE

Northville's oldest and most attractive store devoted to the sale of millinery and fancy goods is that of Miss Eva Bovee. The latest styles in millinery and manufacturing goods a specialty. Miss Bovee pays particular attention to ladies' furnishing and fancy goods of which she carries the largest stock in town, including hose, und-wear, lace, trimming and embroidery material. Excellent goods and fair prices have made this store popular, and during the period Miss Bovee has become a by-word for elegance and good taste.

JACOB MILLER & CO.

A reliable house in the meat trade in Northville is that conducted by the above named firm. The market is handsomely fitted up with all requisite business facilities, lighted by electricity and presented a highly appetizing appearance. All meat handled is killed and prepared on the premises, which fact enables the house to guarantee meat well selected and completely cooked. The policy pursued by this firm of handling only good meats, quoted at the lowest prices, has had the tendency of gaining for them much popularity. No pains is spared to satisfy the most critical customer.

H. W. DOBBELLY & CO.

The above named firm, although just started in the jewelry business, here as success to Wm. H. Ambler, have demonstrated the fact, by the artistic and satisfactory method in which they have executed all work entrusted to them, that they are thorough and proficient jewellers. Their stock, which is the largest in town, embraces all manner of fine watches, clocks, jewelry, solid silver, gold plated ware, rings, diamonds and spectacles from which choices to suit all cases of weak or defective eyes may be secured. The prices of this house compare favorably with those quoted in large cities, and it is an undisputed fact that they can save local buyers from ten to twenty-five per cent on all goods, in the jewelry line. The store is spacious, commodious, and well arranged and presents a metropolitan appearance. The side cases, shop cases and other articles of equipment are handsome and in good taste. In the rear is the machine shop department, where wedding and engagement rings, medals, etc., are manufactured to order. This branch of the business is something new in Northville. This firm is the only manufacturing jewellers in the country outside of Detroit. There is also a repair department where all manner of repairing and engraving is done in a skillful workmanlike way. On the west side of the store is a complete line of stationery, albums, school books, tablets, etc. They endeavor to handle a complete stock of school books and school supplies and students will always find here exactly the books they require. All kinds of musical instruments are carried in stock. There is also a news depot and newspaper and magazine subscription agency. The members of the firm are active, hustling, young men and a welcome acquisition to our trade circles.

P. B. HARDING

Dietarian claim—and facts prove conclusively—that no article of food builds up the human system so thoroughly as meat. This fact informs the question where can the best meats be obtained? P. B. Harding, dealer in fresh and salt meats, established his business at 57 Center street about three years ago and handles the highest grades of meats at as low prices as can be found elsewhere in town. Mr. Harding is one of our hustling young business men and during the time he has been in business here has proven himself to be a careful and conscientious merchant, watching of the interests of his patrons, providing only the best and most wholesome meats. He employs efficient assistants, and gives his own close personal attention to every detail of his business, thus he is enabled to insure prompt and polite attention to every caller.

MURDOCK BROS.

[Successors to C. R. Stevens.] Perhaps the best known drug house in this section is the establishment formerly owned by C. R. Stevens, and now conducted by W. V. and T. E. Murdock, formerly of Springfield. This stock, carried, embraces a fine assortment of pure drugs, medicines, patent and proprietary, paints, oils, etc. As a matter of course many specialties are handled and particular attention is paid to the compounding of physicians' prescriptions and family recipes. Mr. T. E. Murdock is a thorough and practical pharmacist, a graduate of the Med. University school of pharmacy. A night bell will be a new addition to the equipment of the store, and prescriptions will be compounded at all hours. A line of sporting goods is also handled, including fishing tackle. As you enter the store the first thing that meets the eye is a handsome soda fountain, the finest in town, always in operation, and the very latest flavors are used to tickle the palates of thirsty people. The Murdock Bros. are hustling, young business men and will be a great acquisition to our business circles.

S. W. KNAPP

A well conducted and deservedly popular store is that conducted by S. W. Knapp, dealer in groceries and provisions and the principal substances needed in every household. A practical experience in this business has given Mr. Knapp a thorough knowledge of its intricate details, enabling him to purchase his supplies at reduced prices. Consequently his prices are always at rock-bottom. He also handles a line of Yankee notions, books and stationery.

HOLMES, DANCER & CO.

The leading position now occupied by Northville in all departments of business, is due to the untiring energy, industry and capacity of her merchants and manufacturers. In this connection it is a pleasure to make prominent mention of enterprising and popular firms. Among them are Holmes, Dancer & Co., dealers in dry goods, cloths, carpets, shoes and furnishings. This business was established here in May of the present year, and is one of the Holmes syndicate stores. The Holmes Attractive Co. is one of the largest of its kind, and is considered the handsomest buyer in the state. J. W. Dancer, the manager of the firm, is the only member of the firm residing in Northville. All goods of this firm are bought in eastern markets, direct from first hands, consequently the stock is always fresh and prices the very lowest.

P. B. HARDING

Dietarian claim—and facts prove conclusively—that no article of food builds up the human system so thoroughly as meat. This fact informs the question where can the best meats be obtained? P. B. Harding, dealer in fresh and salt meats, established his business at 57 Center street about three years ago and handles the highest grades of meats at as low prices as can be found elsewhere in town. Mr. Harding is one of our hustling young business men and during the time he has been in business here has proven himself to be a careful and conscientious merchant, watching of the interests of his patrons, providing only the best and most wholesome meats. He employs efficient assistants, and gives his own close personal attention to every detail of his business, thus he is enabled to insure prompt and polite attention to every caller.

Yours without a struggle.

L. W. Hutton & Son.,
76 Main St.

this section. Their stock is large and patrons may feel assured of receiving full value for every dollar they may pay out. They are our fashionable clothiers, hatters and furnishers, and all who desire to dress correctly will be especially pleased with the nature of the service they offer. Their garments are unequalled for fit, finish and workmanship and are fully equal to the best custom made goods. No matter what kind of suit you want, you can get it here. In fact everything usually found in a well regulated furnishing store can be procured here. The high standing of the house is as well known as it is unnecessary to refer to it here in words of praise or commendation, but suffice to say that it is second to none in Northville or vicinity.

nothing lessened to please customers and it is his aim to give satisfaction at all times.

CARPENTER & JOHNSON

One of the most active firms engaged in the hardware business in this section is Carpenter & Johnson. By steady application to business and by their satisfactory methods they have steadily increased their business until today they have the most complete and popular establishment in Northville for vicinity. This stock embraces a full line of stoves and ranges, light and heavy hardware, fixtures, etc. They do all manner of plumbing and gas pipe fitting, and make a specialty of spouting, the roofing, guttering and estimates on the same are cheerfully given. No job is too large and none too small to get the best attention. They do all kinds of turnage work and are agents for the celebrated Moore Farmland. The store is popular with all classes of the community, and the goods dealt in, as well as the work executed, are uniformly warranted and guaranteed.

R. H. PURDY

There are few lines of business that enterprise and energetic methods, will not produce the best results, and this is particularly true of the grocery trade in which there is so much competition that only the men of enterprise can gain and hold a large patronage by keeping only the finest goods and selling them at prices that defy legitimate competition. Such a house is that conducted by R. H. Purdy. Mr. Purdy is our leader in the grocery business. He carries a full and carefully selected stock of everything in staple and fancy groceries and table luxuries, which you can get at money saving prices. In the rear of the store is a well lighted annex, where is carried the largest and most complete of crockery and queensware in town, including fancy China and Havilandware, embracing many beautiful specimens of the delicate times, which are now so fashionable; also lamps of novel and attractive designs for business and domestic purposes. There is

nothing else to be had.

YOU CAN DEPEND ON IT

that Foley's Colic and Diarrhoea Cure is an instant relief for colic, summer complaint, cholera morbus, diarrhoea, bilious colic, painters' colic and all bowel complaints. 25c and 50c. C. R. Stevens.

GLAD TIDINGS TO ASTHMA SUFFERERS.

Lawson Elbridge, of Barrington, Ill., states he was cured of chronic asthma of long standing by Foley's Honey and Tar. It gives positive relief in all cases of asthma, so that this disease, when not completely cured, is robbed of all its terrors by this great remedy. No sufferer should be without it. 50c. Take no substitute. C. R. Stevens.

MEADS MILLS

Will Barber is engaged at the Northville refrigerator factory.

Mr. and Mrs. Frank Moore Sunday, a sister of H. S. Burdick's.

J. Sowles visited his son who lives in the southern part of the state.

Work will be resumed on the reservoir this week, we are informed.

Many of the farmers in this neighbor hood had their grain threshed last week.

Mrs. Clara Benton and Eddie Hughes were visiting in Detroit last week.

Mr. Bryant and Mrs. Eva Johnson spent Wednesday at C. A. Fisher's, Plymouth.

Mr. and Mrs. O. C. Johnson and Mr. Widener, a sister of Mrs. J., were called at P. H. Johnson's Tuesday.

We would like to inquire through the columns of "The Record" if there is a society in this town for the prevention of cruelty to animals, and if not, why not? We think there are some poor animals that would "rise up and call such a society blessed," could they be protected by it.

SALEM

Born to Mr. and Mrs. Will Player a daughter on Friday August ninth. Mother and babe doing nicely.

While our young team were enjoying the glory of their triumphs over the Dixie and Northville teams, the Cherry Hill boys had the unmitigated gall to come over here and embarrass our boys by beating them by a score of 7 to 2 in favor of the Hill boys. What wicked boys!

The annual picnic of the Salem Sabbath-school union will be held in J. H. Murray's grove on Thursday next at 10:30 a.m. The exercises will consist of two regulations from each of the schools, sandwiched with music by the Salem band and vocal selections under the direction of the Stambro Brothers.

The Evangelical Lutheran Society of Salem, after making extensive improvements on their church building—the former Congregational church—will dedicate it on Sunday August 18th, with the usual ceremonies. A sermon in English will be given in the afternoon and other exercises will be held in German. A picnic dinner will be served at noon free to all. The public is invited.

Well authenticated rumors are afloat to the effect that before the next issue of "The Record" makes its appearance, a highly respected and well-to-do lady two miles north of here and an eminent ruler of the clergyman of this village will be bound together by hymn-singing band. The Record man will interpose no objection and promise from henceforth to hold his peace with reference to this transaction. He tendered profound congratulations and bespeaks for the happy pair many years of usefulness and happiness.

The union social at B. T. Walker's last Friday evening was an eminent success. The lawn was brilliantly illuminated with Chinese lanterns. A stand was erected from which the band discourse some fine music and several young ladies gave some fine recitations. The company was so fascinated with the spirit of the occasion that the small hours were almost in sight when the last of the guests departed. All noted that as entertainers Mr. and Mrs. Walker are at the head.
