

THE NORTHVILLE RECORD.

SUPPLEMENT.

FRIDAY, AUGUST 14, 1896.

Suburban News

South Lyon is after a boom in the shape of a man who can grind wheat and another who will electrically illuminate the town.

An exchange works off the following: Only a week ago one of our citizens bought his dog, a fine breed, well behaved, set her to chew tobacco. Now the dog comes into the house by the back door, never goes to church, is careless at his meals, gets burrs in his tail, goes with a lower grade of dogs; and it is feared that he is beginning to take no interest in politics.

An exchange tells a story of a poor school teacher who, having an infinite dread of contagious diseases, sent a little girl home because she said her mother was sick and had symptoms most alarming. The next day the child presented herself at school with her finger in her mouth and little bones it swinging by the string and said: "We got a baby at our house, but mamma told me to tell you it wasn't catching."

F. A. Bennett, of Saline, had a good cow so badly cut on a wire fence Tuesday of last week that he had to have her killed.—Ann Arbor Argus. Why he had her badly cut by the fence, in the first place, we do not understand. He could have had her cut with a butcherknife, ax, or a corn harvester, just as well, since he was going to have her cut at all. Of course after he had had her badly cut, he had to have her killed. To think that a man would go and have his property destroyed without some provocation, makes one lose faith in the humanity of man.—Adrian Press

The Press is right. It is a grave offence.

Three years ago Justice Gibson of Ann Arbor was a barefooted, hopy, and son of soil, and under Cleve land's first administration times were so prosperous that in 1853, Gibson bought a gold watch, and paid for it in 1857, when the period of Cleveland depression set in, the hours ruled by that watch, and the wheels kept turning and turning, and things "fugited" with daily regularity. One day Farmer Gibson missed his watch, and all efforts to get on to time failed. Last week a kid found the time piece in a field in the farm, and he had not been watching for it either. The watch had been planted, plowed under, har rowed and sowed, but was pulled out of the ground in good health, and a smiling face which both hands covered at 10 to 1, to keep the dirt out of its eyes. There was a Pingree button and half a bushel of potatoes in the case and the corn for three or four rods around the place where the boy found

the watch was of vigorous growth, owing to the moisture furnished by the main spring.—Adrian Press.

Ypsilanti has an automatic telephone system. All that Ypsilanti people now have to do is to ring the bell and the telephone yells back the rest. "What number, please—they are talking—will call you up later." After fifteen minutes the owner of the phone has a right to a second appeal, for of course no one ever heard of a "call up later" being completed with, and the same conversation ensues except the automatic machine varies the monotony by repeating the parrot phrases: "Line is busy now," "can't get them," "they won't answer," etc. The telephone girl used to do all this business herself but now modern invention steps in and the automatic telephone takes her place while the man who pays for the phone continues to repeat the barking word backwards.

A Correction.

Relative to the article in The Record some weeks ago in reference to the deaths of Mr. and Mrs. Peer of South Lyon who were killed by the cars at Novi, we are requested to say that Miss Peer was the first and only wife, and not the second as stated; Mr. Peer was not deaf, and the "adopted son" was a man of forty, Mr. Mulligan, who had lived with them and worked the farm for fourteen years. This correction, in substance, however, appeared in the Novi locals the week following the account of the accident.

STATE OF MICHIGAN,

COUNTY OF WAYNE, ss.

At a session of the Probate Court for said County of Wayne, held at the Probate Office in the City of Detroit, on the twenty-seventh day of July in the year one thousand eight hundred and ninety-six. Will Allen, an employe of the Globe Co., has completed in a very artistic manner, a huge banner for the McKinley club.

A barn belonging to Mr. Hughes on the base line west of the village was struck by lightning and destroyed Tuesday night.

The McKinley club will hold a meeting in Ambler's hall next week Tuesday evening, August 18, at 8 o'clock. All interested are invited.

Mr. and Mrs. Milton J. Withee of Detroit, formerly of this place, are the proud possessors of a spang new eleven pound boy, born last week.

A late government report shows that where in 1890 U. S. mail clerks made one error for each 1,923 pieces of matter handled, in 1895 only one error is made to 7,126 pieces.

The rare attraction of a night blooming cereus with two handsome blossoms was witnessed by a large number of Northville people at the home of Mrs. Frank Brown last Friday night.

The contractors at work on the new government buildings are somewhat handicapped in their work by the fact that Uncle Sam will not allow anyone to work more than eight hours per day.

C. A. Dowler & M.

If our citizens want a band and weekly band concert during the remainder of the season the same can be arranged for providing contributions enough to meet expenses are forthcoming.

During Saturday a storm in front of Joe Hake's place, near George Hall's a few miles northwest of the village, was struck by lightning and the effect of the shock shattered a number of the front windows of the house.

We notice that a number of our exchanges are using a fac simile of the silver dollar in advertisements and elsewhere in their papers contrary to the U. S. law, rendering the publisher not only liable to a fine but to the possibility of having his publication shut out of the mails.

As long as there is such a vast quantity of water in the reservoir and while it is not possible for people to seriously waste it in such rainy seasons as this, the Record suggests that for convenience of the takers, the water board remove for the present all restrictions except those prescribed in the ordinance.

About 1,000 disappointed persons tormented themselves by sitting for two hours on the hard, narrow seats at the "Uncle Tom's Cabin" tent show last night. Excepting the big advertisements, the good street parade and the fine band which the company had, the entertainment was a miserable travesty.

The Northville Record devotes a column or two each week to what it is pleased to style "Suburban News," being items of interest from minor points more or less contiguous to Northville, such as Flint, Lansing, Ann Arbor, Kalamazoo, and even Holly. For certain the Northvilleites, led by the Record, take the cake and the fin it's baked in—Holly Independent.

The Independent should be thankful that a town with the notoriety which Holly has gained the past few weeks is even allowed to continue as one of Northville's suburbs.

Messrs. Lanning & Smith will have till Nov. 13 to complete the new government buildings here. They will put to work just as many men as can possibly be used. Mr. Boeve laid the mason work for the dam; Jake Kimmel has the contract for doing the mason work on the buildings; J. Nixon the painting; the hardware and plumbing will probably be divided between the local hardware firms; the Dubuar Lumber Co. furnishes the lumber.

Thus the whole appropriation is not only to be expended in Northville but the entire result of expenditures is also to remain in the village. The people of this place are not likely to forget Congressman Spalding's work in behalf of the Northville fish station.

The McKinley club will take up and continue the work of the Northville Financial Club, the latter club having ceased to exist since the former was organized.

R. H. Tandy is grafting peaches these days from the Thompson orchard, in considerable quantities and next week, as will be seen by his visit, will be ready to deliver some very beautiful Early Crawfords.

In the case against Police Sergeant Yeager of Detroit, charged with attempted assault, the complainant is Patrolman Wilber B. Lake, a former well known Northville boy. It appears that this is not Yeager's first offense.

The Record appreciates the kindness of its many friends who have from time to time left beautiful bouquets and samples of delicious fruit at the office during the year, and while the large number of such courtesies received make it impossible to give each in name distinct mention, the occasions are cherished to memory.

Geo. Stanley, for some time past one of the Park hotel clerks here, has leased the Noyes hotel formerly occupied by W. W. Brown and will occupy the same at once. The hotel has been overhauled and newly papered and painted upon the inside adding much to its appearance. Fred Slaught of Detroit takes Mr. Stanley's place at the Park hotel.

Monday afternoon's storm was a very scary one for people generally through this section and many persons sought refuge in cellars and other places of more or less apparent safety. The clouds certainly presented a very ugly appearance and with record back of them for damage done, before unheard of in the history of this country, the occasion was one sufficient to even make the bravest turn just a trifle pale.

On the castings stored in the F&PM elevator which caught fire Sunday morning was accumulated a freight bill of about \$90. It was a shipment originally made by the Globe company to the Pacific coast. After the car was just started the consignee failed and the Globe company ordered the car stopped enroute but it was a case where the slow freight could tell telegraphic efforts and the car finally reached its destination, but the transportation company instead of holding the freight for orders returned it to the Globe company who, incurred charges and they promptly refused to accept it back at such an expense.

A small supply of the new silver certificates arrived at the Savings bank here Saturday. Because of their newness they make an especially pretty appearance and they were quickly gathered up. Two goes blunder are noticeable upon them however: In the constitution the word "tranquillity" is erroneously spelled with but one "n" and Miss Columbia is represented as being left handed. Uncle Sam will be called upon to pass over at his own civil service examinations if he doesn't look out. The bad spelling might be excused but when Uncle Sam allows his best girl to do her haggling with her right arm and hold out the emblematic left to point to the constitution, as per portrait on the new certificate, the old man should be called down.

Slightly after the storm bridge No. 11 of Green Bay was pulled up. When nearly abreast of the bridge, it commenced to sheer in the dock and the tugboat, the eagle, was jerked as if by a giant. Captain David Salter and Lt. The Peerless have shown themselves possessed of good sense by coming to a settlement instead of fighting long enough to let the lawyers get all the property involved.

The "New Woman" is becoming more and more aggressive in the matter of crowding men out of their hitherto exclusive employments. Two ladies of this vicinity have lately proven themselves perfectly competent to feel a grain thicker in a manner that would put an "old hand" to the bush.

These ladies are not open to an engagement as they are already spoken for.

W. W. Brown has vacated the Novi

appalling

front, also evidently due to the import

of taking the papers. Judging

from the following bit of colloquy

heard down town a few days ago

White and visiting other relatives.

Small irreproachable, in exultant tone

told me!" (Motions name of young

lady.) Young man complacently
