TWO PLEASANT SOCIAL EVENTS

Mrs. Frank Thompson entertained about twenty ladies from Farmington and Detroit Saturday afternoon at a miscellaneous shower in honor of her friend, Miss Gladys Perry of Detroit, who will become the bride of Carl Woodmansee of this place some time next month. Miss Perry was the recipient of many nice presents. The color scheme was pink and white. After various games, refreshments were served.

On Saturday evening Mrs. Thompson's home was again the scene of a gathering of twenty or more young people in a miscellaneous shower given by the employees of the Bell Telephone office of this place in honor of Miss Flora Woodmansee, who will soon become a bride. Miss Woodmansee has been an efficient employee of the Bell company the past two years, or more, and her going away is regretted not only by the company, but the patrons of the line. She was generously remembered with gifts. The pink and white color scheme was again carried out. The evening was pleasantly passed in playing games, after which a dainty lunch was served.

The time to buy your Fall or Winter Hat will be Saturday, Oct. 7, at Mrs. Belle McCully's Millinery opening.

LECTURE COURSE FOR NORTHVILLE

The Ladies' Library association, at the solicitation of a citizens' committee consisting of fifteen prominent business men, including Supt. Laflue of the Northville schools, has undertaken once more the presentation of a lecture course, the first number of which is to be put on the last of October.

One of the advantages and fineness of a lecture course in a town that makes any pretense to up-to-dateness is hardly seems necessary to dwell. The reason why we should have this high class form of entertainment are legion. The in-

tellectual uplift to our people, young and old in the development of a higher standard of taste along entertainment lines, the educational value to all taking advantage of the opportunity for culture not always otherwise available for many of our citizens, the stimulation to the general intelligence of our community and the progressiveness of its leaders are only a few of the arguments for such a movement.

The course selected is that class should be accorded the hearty support of all who are interested in the advancement of their home town as they should be.

There are to be four numbers, and the tickets are to be sold at a price extremely small compared with the quality of the attractions.

THEIR SIXTEENTH WED'G ANNIVERSARY

Mr. and Mrs. James Sessions Occurred Sunday.

Last Sunday, Sept. 24, marked the sixteenth wedding anniversary of our well known citizens, Mr. and Mrs. James Sessions. They were married in 1844, and ten years ago their

golden wedding was celebrated at their home in this village. This year on account of Mr. Sessions' poor health, no public celebration was held, but some friends remembered them on the occasion. They have had three children, of whom their son, Chas. A. is the only survivor. All who know them will unite in congratulating them on this auspicious anniversary.

RECIPROCITY MEETS DEFEAT IN CANADA

RETURNS FROM CANADIAN ELECTIONS SHOW 31 LIBERALS AND 31 CONSERVATIVE MEMBERS CHOSEN.

EIGHT CABINET MEMBERS OVERWHELMED IN LANDSLIDE.

Early Retirement of Laurier Is Expected and Reciprocity Is Not Likely to Come Up Again for Many Years.

The Laurier government and reciprocity are beaten, decisively. The opposition has completely turned the tables on Laurier, whose majority in the house of commons at dissolution was 43. The combined opposition majority will be 50. The figures in the twelfth parliament will probably be 132 Conservatives and Nationalists and 89 Liberals.

The Nationalists cut a poor figure, electing only two. R. L. Berden, the next prime minister will therefore have a big majority of his own kind of straight Conservatives, back of him, and all speculation about the activities of the Nationalists in the next parliament goes for naught. The Liberals lost practically all along the line.

Ottawa went wild. The Conservatives won both Ottawa seats from the Liberals. After having been out in the cold for 15 years they are in a delirium of joy. Cabinet making will be the favorite Canadian pastime for weeks to come.

No one is more surprised than the Tories themselves. The defeat ends Sir Wilfrid Laurier's career. The consensus of opinion is that he will not assume the leadership of the opposition, but will retire to private life. He has said that when the time came for him to retire from parliament he would like to have a place on the Ottawa improvement commission.

It is expected that Sir Wilfrid Laurier the premier, will tender to the governor-general, Earl Grey, his resignation from office within the next two weeks, although not required to do so until defeated by an adverse vote in the house.

The first business of the new government will be to put the supply bill through the house as the public service of the country require an immediate vote of money. It is not unlikely that the session will be short and may be terminated before the Christmas holidays, and that another session will be called early next year.

Taft Sorry, But Smiles.

For me, declared President Taft just before he left Baltimore for Paris, the defeat of reciprocity in Canada is a great disappointment. I had hoped that it would be put through to prove the correctness of my judgment that it would be a good thing for both countries. It is a good thing to make a bargain and if Canada agrees we can still go on doing business at the old stand.

T, A & J Road to Be Built at Last.

The state railroad commission has authorized the Toledo Ann Arbor & Jackson street car company to incorporate with a capital of \$700,000. The incorporation papers were filed with the secretary of state.

The incorporation of this company, which was formed recently at Montezuma, is taking over of the property of the old Toledo Ann Arbor & Jackson electric line, which was organized in 1900, and which carried about 20 miles of electric line out of Toledo the following year, and then ceased operations. The assets and property of the old line, and the remaining amount will be used in further construction of the road.

The First Mail Carried by Aeroplane.

The first United States mail ever transported by aeroplane was carried from the aviation field on Nassau boulevard, Long Island, to Garden City, a distance of five miles, by Earl L. Orvington in a Blériot machine. His flight, for this purpose, was the leading feature of the international meet's opening day.

Orvington took only one mail bag held between his knees and when he was over Garden City he dropped it on the signal of a man who waves a flag as prearranged.

The forty-fourth annual reunion of the Eighth Michigan cavalry was held in Jackson.

Mrs. Emma Poesche, who had taught German in the families of several presidents and among members of the diplomatic corps is dead, aged 84.

For the first time in its history the ashes of a cremated person were placed in Westminster abbey, in London. The ashes were those of Rev. Robinson Duckworth, canon and sub-dean of Westminster, and select preacher at Cambridge, and they were placed in St. Faith's chapel.

The St. Mark's Episcopal church, Grand Rapids, will celebrate its seventy-fifth anniversary, the first week in October.

Kansas may properly be designated the Sunflower state, but it is believed that even it has been outdone this year by upper Michigan. It is not questioned that the south-western commonwealth has produced a sunflower plant three times the height of the grower. That is an upper Michigan record registered this season. Mrs. George Giesler has in blossom in her yard at Sault Ste. Marie a huge sunflower plant, the stalk of which towers 15 feet 3 inches.

DEFENDS TARIFF BOARD

Taft Stoutly Defends Board's Work in Speech at St. Louis.

That an expert board was essential to the proper framing of a tariff, that public opinion fully recognized that fact and demanded such a board, and that the present tariff board had fully vindicated its existence were the main points of President Taft's principal speech in St. Louis, Mo.

Incidentally the president stoutly defended his vetoes of tariff bills he considered hastily and incompletely drawn. This defense he based not only upon his judgment and conscience, but upon solid legal ground, quoting the constitution to show that he acted fully within his rights.

Before a smaller audience, President Taft again attacked the policy of recall for the judiciary, urging that impeachment was a much more safe and certain method of discipline. He also severely criticized American methods of trial by jury and court procedure.

BANKER WALSH TO BE PAROLED.

Official Announcement to Be Made by Department of Justice.

John R. Walsh, the former Chicago banker, who is serving a term in the federal prison in Leavenworth, Kan., will be released on parole some time next week.

The official announcement of the coming parole of Walsh was made by the department of justice at Washington.

With five parole definitely settled on by the department of justice there are a few details still remaining to be fixed up before the order that will release the aged banker from Leavenworth is issued formally.

Get-Rich-Quick Offices Raided.

The raiding of the office of Jared Flagg, Jr., in New York, and the arrest and imprisonment of Flagg, Jr., United States Treasurer, Daniel X. Morgan and six other men who are alleged to be connected with the Flagg 52 per cent a year investment scheme, has caused a serious jolt to a number of Detroit men prominent in business and financial circles. They were investors in the Flagg enterprises and now fear that their names will be connected with the get-rich-quick scheme in some way that will prove undesirable. It is estimated that the Detroit capital involved in the business totals over \$100,000.

FIGHT FOR STATE COAL RIGHTS ON

Saginaw Company and G. F. Whitney Are Bidders.

CONTEST IS A LIVELY ONE

Precedent for Future Policy of State is Involved in Transaction Relating to Mineral Lands in Saginaw.

Lansing.—There is about to be a lively contest between the Consolidated Coal company of Saginaw and G. F. Whitney of the same city for mineral rights in state lands in Saginaw county, underneath which there is said to be valuable deposits of coal. According to Secretary-Cartoon of the public domain commission, Whitney and the corporation have both entered application to purchase from the commission the mineral rights in some 750 city lots within the city of Saginaw, and other plots just outside the city, which have come into the possession of the state by reason of the non-payment of taxes.

It has been suggested that the state sell these rights at public auction. Whatever action is taken will be more important than the disposal of these lands, by reason of the fact that this is the first time there has been application made for the purchase of this right, and the decision of the commission will establish a precedent for the future policy of the state.

Secretary-Cartoon says Whitney alleges the coal company is mining coal at present under some state lands and further asserts that the company is endeavoring to secure a monopoly on the fuel supply in that section, and declares these lands are worth \$3,000 an acre because of the coal deposits.

To Name State Recruiter.

Instructions were received at the state military department from the war department for the establishment in the state militia of a system of recruiting to be put in force if the troops are called into active service. It requires the state to designate a recruiting officer who is to secure recruits for such organization when the federal government calls for the troops, companies and batteries. The officer is directed to secure the necessary blanks and inform himself relative to methods of recruiting in order that he may take up his duties promptly in case of active duty.

Notice is also given that Livingston has been designated as the place of mobilization for Michigan troops if they are called out, this plan to be subject to approval by the state military board.

Sparking of the order, Col. J. N. Cox, adjutant general, said: "It is simply part of the plan of the war department to perfect the organization in every possible way. Other details of a similar nature have been worked out, and the necessary orders issued and this is, but another step, as I understand it, in the completion of a scheme for placing all available troops in the field promptly if need arises."

Money in Catalpa Trees.

A number of years ago J. B. Colestock set out a grove of catalpa trees on his farm in Hamlin township, and they have now reached a point in growth where they are going to be a source of considerable profit to him. He has already contracted a carload of felled posts for shipment to parties in Indiana and all of these are to be cut from his catalpa grove. Mr. Colestock has made a very good success from a rather small beginning, and owners are thinking seriously of taking a hand at raising catalpa trees on a more extensive scale.

Apples Rot on Ground.

Never before were the farmers of Grant and vicinity at such disadvantage in the apple line as at the present time. Local buyers are only taking first-class stock for shipment, and the late winds have covered the ground beneath the trees with a grade of fruit that will not permit of shipment for market purposes, and yet the fruit is superior to that taken in here in previous years at the canning factories. It is a lamentable fact that the lying idle of the local canners this season has taken thousands of dollars from the farmers.

Accepts Kent Judgeship.

Attorney Roger I. Wykes of Grand Rapids announces that he will accept the newly-created circuit judgeship, having received the appointment from Governor Osborn.

Will Force Good Roads.

Backed by the Jackson Chamber of Commerce, an extensive campaign looking toward the adoption of the good roads system is on in that county. The entire county has been organized and petitions are being circulated in every township and incorporated village. The petitions will be placed before the board of supervisors at the meeting in October, thus forcing that body to submit the question to the people at the spring election.

Asks Pay for Injured.

That the accident insurance companies and the lawyers who hunt up personal injury damage suits are both leeches on the body politic, and that the state ought to be in a hurry to establish an employers' liability and workmen's compensation act was the gist of an address delivered by R. L. Drake, Detroit, before the state convention of the Federation of Labor at Battle Creek.

Mr. Drake is secretary of the commission appointed by the governor to investigate industrial accidents in the state and report to the next legislature its recommendations for a new law. It was plain to see what kind of a law Drake thinks ought to be passed—one that will compel settlement with all injured workmen without having any law suits, settlements that will compensate for injuries received. It is plain to see he wants the state to go into the accident insurance business and run it at cost for both employer and employee.

"The employer invariably thinks that if he could take the money that now goes to the liability insurance companies and give it to the injured, a great wrong would be righted," averred the speaker.

"When a workman receives an injury, owing to the fact that if he elects to sue he invariably sacrifices his position and jeopardizes his chances for a livelihood when he recovers. If he takes without contest what the insurance company elects to give him, he must take such a small amount that aside probably from his doctor's bills, and the burden of his accident is borne by himself and family."

"The time is not far distant when the workman will no longer produce all of the world's wealth and bear all of its burden unaided."

"There is a great economic waste, as evidenced by the enormous profits yearly accruing to the accident insurance companies which burden the worker by the employer, and the profits acquired by the lawyer who makes a specialty of personal injury cases. There is not much to choose between the two. They are both leeches on the industrial world and get the cream, while the contending parties must be satisfied with skim milk."

"If it is necessary for the employers of the state to devote annually large sums of money to protect themselves against their liability because of industrial accidents, let us at least see that a just proportion of it is turned into the channels of justice, so that in the end it will reach the deserving, those men, who are injured in the performance of their daily labor."

Convicts' Store Proves Success.

The convicts of Jackson prison will own their own store beginning October 1. The idea of a cooperative store within the prison walls was created by Warden Simpson shortly after he assumed charge of affairs at Jackson prison. It had always been customary for inmates to make their purchases down town, which necessitated a great deal of trouble, besides the payment of a large price for their goods. Mr. Simpson advanced \$1,000 and a cooperative store was started. All kinds of goods that would be found in any first class grocery store were placed in stock and sold to the inmates at practically cost, there being added but a small margin of profit to make good the money borrowed. The new store proved immensely popular with the inmates, and it has enjoyed a thrifty trade.

The bills payable but not yet matured amount to \$616.55, according to the statement compiled by Clerk Neesley, and there is \$505.50 in the bank, leaving a balance of \$130.50, besides paying the borrowed capital and paying all other expenses. The stock of the store is worth about \$2,000 and the store has made over \$3,000 in the seven months it has been in existence. Following the inventory which will take place October 1, a further reduction in the price of goods will be made, so that they will be sold at practically wholesale prices.

May Adopt New System.

Information is in the hands of the special commission studying the taxation problem in this state, which shows that the corporations of Michigan are not paying their proportion of taxes, if their valuation is determined by using the income they earn on the stocks and bonds issued. Statistics are said to be in the hands of the commission which will show that only a small percentage of the tangible and intangible value of these companies is placed on the tax rolls when compared with the valuation placed on real estate for taxation purposes. This information will furnish an important feature of the recommendation by the commission that the state abandon the present taxation system and divide state and local taxes, general property bearing the local tax and corporations paying the state tax, added by an excise tax on liquor and an increased inheritance tax.

East Indians at U. of M.

Ann Arbor and the university seem to be getting their full share of East Indians this year, the latest recruit being Dr. J. N. Najumdar of Calcutta, formerly the secretary of the Calcutta Homeopathic society.

Other East Indians to enter the homeopathic department are: N. M. E. Amen, Calcutta; Salsendra Nath Kumari, Doctor Damahaiter, A. Mustamkile and Styendra M. Sen, all graduates from the University of Calcutta.

FRENCH BATTLESHIP IS BLOWN UP

FIRE DESTROYS SPLENDID BATTLESHIP WITHIN TWENTY MINUTES OF DISCOVERY.

MAGAZINES LET GO WHEN FIRE IN HOLD REACHES THEM.

Harbor Is Filled With Uniformed Bodies as Grave Men Die at Their Posts; Loss of Life Is Placed at 235

In the most terrible disaster in years, 235 French sailors perished in a series of explosions which sank the battleship *Liberte* in the harbor at Toulon. Forty others were badly wounded, half of them probably fatally.

Fire, originating from a short circuit, ignited the ammunition hold, causing three heavy and two lesser detonations, which broke the vessel in two. Many of the victims are sailors from other warships, who were helping fight the fire.

The dead perished at their posts, martyrs to discipline and duty. These figures were contained in official dispatches sent from Toulon to the marine office in Paris several hours after the disaster, and followed a preliminary investigation.

The bay was filled with uniformed sailors, dead and dying some of whom were picked up by other ships, while many others sank to their death.

Torn asunder by three explosions, caused when a fire reached the ammunition magazine, the great man-of-war split in pieces and sank in the harbor. The force of the explosion was so great that huge fissures were opened in the steel armor and framework of the warship. A piece of armor plate was hurled against the cruiser *Republique* with great force, damaging her plates. Scores of bodies were hurled high into the air, and huge fragments of framework, armor, bursting shells and the suffocating smoke from the exploded magazines.

On the first explosion the men rushed from their quarters and a hundred or more sought safety in plunging overboard. But the great body of men, officers and crew remained on the ship and were hurled high into the air or into the water as the culminating explosion tore the ship into fragments.

An official statement of the casualties in the loss of the *Liberte* places the dead at 235 and the injured at 85, with one man missing.

UNION MAYOR DEFEATED

P. H. McCarty Is Beaten in San Francisco by James Rolph, Open Shop Man.

James Rolph, "open shop" candidate of San Francisco, was elected mayor at the primary election by an overwhelming majority, with a total vote of about 75,000. According to early returns Rolph has secured 55,500, while Mayor McCarty's vote is less than 20,000.

It was charged against McCarty's administration that he has gone to extremes in his liberal views, and that San Francisco is too much of an "open town" from the point of view of amusement and entertainment. Decried as San Franciscans love their night life features, their cafes, dance halls and tenderloin freedom it is held by many that McCarty has overdone the matter in making San Francisco "The Paris of America." Another argument advanced against McCarty—and this is doubtless the chief one—is that the rule of the unions has become so autocratic that capital has become timid.

Germany Accept French Proposals.

The German minister of foreign affairs, Herr von Kiderlen-Waechter, received the French ambassador to Germany, M. Cambon at the foreign office in Berlin and in formal terms that Germany accepted the latest French proposals concerning Morocco. This ends the dispute which at one time threatened to end in war.

All Big Copper Mines to Merge.

A number of influential copper magnates of England and America are making an inspection tour of the mines in Arizona, and it is stated on excellent authority that a merger is in progress of the various copper companies of the country.

Stolypin's Assassin Hanged.

Dmitry Bogroff, the assassin of Premier Stolypin, was hanged in the courtyard at Kiev. He was found guilty by court-martial and condemned to death. Only witnesses of the local government witnessed the hanging.

Plan to Divide Tobacco Trust.

Plans for the reorganization of the American Tobacco Co., which are to be submitted shortly to the United States circuit court, are said to provide for the formation of three new companies out of the disintegrated parts of the present company.

Almost ranking officer of his grade, Colonel George Ruhlen, assistant quartermaster general of the army, was placed on the retired list on account of age.

Viscount Uchida, the retiring Japanese ambassador, accompanied by his wife, left Washington Thursday afternoon for Seattle, where they will embark next Tuesday for Japan. Viscount Uchida will be home minister of foreign affairs in the new Japanese cabinet of Marquis Saionji. The affairs of the embassy here will be in the hands of First Secretary Hantbara.

STATE NEWS IN BRIEF

Saginaw.—Delegates to the annual session of the League of Michigan Municipalities are about equally divided on commission form of government. President William Wals, in an address, treated the subject matter from an impartial point of view, but said that Port Huron and Pontiac would bear watching, since the adoption of that form of government. He also said that if more push had been shown at the meeting of the mayors at Detroit last February to consider the Halley home rule act, it would have passed.

In his address on taxation City Assessor H. A. Savage of Saginaw urged a separation of local and state taxes and said that a state board of taxation should assess all counties equally. Joseph F. Cully, city attorney of Menominee, made a strong plea for state legislation giving cities control of water power. He urged consideration of this measure and said it is a resource of priceless value to a community.

Port Huron.—The fact that one of the workmen employed on the excavation of a large sewer in this city remained behind for a few moments to get something he had forgotten, perhaps saved Burt Gordon from being buried alive. Gordon was digging away in the big ditch when the sides suddenly caved in, covering him up completely. Yeager, his helper, was fast leaving the spot when he heard the heavy thud of the sand. With some difficulty he succeeded in releasing Gordon from his perilous position.

Cadillac.—Mrs. Silver Andrews, aged thirty-two years, until two months ago a resident of Boyne Falls, left her home and the city while her husband was at work in a distant part of the city. When he arrived home he found his four little children crying because their mother had gone away. A note told the husband that because he had told her in an angry moment to get out that she had taken him at his word and search for her would be in vain, as she was going too far away.

Kalamazoo.—Kalamazoo officers are trying to decide on the best way to arrest Pedro Curry, a fiend, asking them to arrest Curry shot himself to death. Chicago officers sent a warrant to Kalamazoo officers, asking them to arrest Curry, on a charge of forgery. Chief of Police Allen has asked the Chicago police to take the body of the negro to that city.

Saginaw.—The sugar beet harvest is on. Announcement from the Peré Marquette freight office says that the first beets were loaded on the S. T. & N. Division. The crop is for two of the Hay City factories. Harvesting throughout this section will start in earnest next week.

Saginaw.—Jacob Frank and Leslie Burnmeister were injured when Frank's team of horses ran away and collided with a telephone pole. Frank has a compound fracture of both legs. He is at St. Mary's hospital. Burnmeister is suffering from concussion of the brain.

Vassar.—The safe in Leonard Ordner's elevator office at Richville was blown open by burglars with nitroglycerin. The thieves secured but \$1.60.

Escanaba.—In a row at Garden George Gimmick was severely stabbed in the breast. He is lying at his home in a serious condition but may survive. The sheriff left for Garden with a warrant for a man named Paul who is charged with the crime.

Grand Rapids.—Prosecutor Brown and Corcoran, Hilker and Leroy conferred over the mysterious death of Market Superintendent William R. McLeod. The fact that death was caused by arsenic was accepted, but no tangible evidence could be introduced to establish a motive for either murder or suicide.

Holland.—Two boys, Albert Martin and Willie Oosterhout, made the gruesome discovery of a box containing the body of a newly-born baby-girl while playing on the banks of Tannery creek. The body was wrapped in pieces of cloth and finger marks on its throat indicated that the child was choked to death. A towel in the box bearing the initials "R. N." gave the officers a clue and within a few hours a confession was secured from Frances Riemersma, a domestic, that she was its mother. In her story, according to the police, she implicated only herself. Miss Riemersma is nineteen years old and lives in Holland township. She claims that the child was born dead.

Saginaw.—When the doors of the Auditorium were thrown open to the public the fourth annual industrial exposition and land show given under the direction of the Wholesale and Manufacturers' association was on full blast. The armory contained the Michigan land show, which is in charge of W. A. Benton of Roscommon. The annex contains the machinery exhibit, which is larger than ever. This year the exposition will depict the actual manufacture of the products, which it is believed will appeal to outsiders.

SHEEP RAISING IN AMERICA

SHEEP raising is one of the chief activities of the American rural domain, and it is one that has shown a constantly expanding scope year after year, seemingly without much regard to the good years and bad which are so visibly reflected in many of the other occupations of the farming community. It is interesting to note that sheep are associated with man in the earliest records of the human race. They were first used only for milk, and later the skins were used for clothing. Up to about a century and a half ago wool was the primary consideration in sheep raising, but about the time mentioned an Englishman began the first systematic and intelligent improvement of mutton sheep and it is a question whether this is not now the most important branch of the industry both at home and abroad.

The mutton sheep was rather slow in invading America. The wool-producing Merino (which came originally from Spain) was monarch of all he sur-

of fertility, but the same amount of corn converted into mutton is claimed not to be taken from the land more than \$50 worth of fertility, whereas if sold in the form of wool it will not take from the land more than \$2 or \$3 worth of fertility. With mutton as the primary consideration, however, sheep raising will return a satisfactory profit year after year without very much regard to the price of wool.

In later years the western territory known as the range became the great breeding ground for sheep, and as far back as a dozen years ago this locality produced about one-half of the total number of sheep in the United States. As our readers know the crowding of the cattle out of many sections of the range by the sheep has been attended by much bitterness and controversy. There are three principal species of range sheep. The old Mexican sheep are the direct descendants of the original Spanish Merinos, brought over two hundred years ago by the Spaniards in Old Mexico. They have long legs; a long, thin body, and the wool is fine and thin. They are hardy, excellent travelers and will keep in good condition on the poorest and driest of ranges. Often they outsell all other sheep, for the meat has an excellent flavor and the hide is thin, firm and soft. These original Mexican sheep have been largely graded with Merino rams in New Mexico and southern Colorado. The New Mexico sheep, as they are denominated, are small-bodied sheep, and although they never grow very large they get very fat. They bring good prices, for the same reasons that obtain in the case of the Mexican sheep above mentioned. Merinos are also to be found on the range in great numbers, many of them having been bred from Merinos brought from the east. The lambs are short-legged and not as good travelers as the southern sheep, but they need not be, for Wyoming, Idaho, etc., have, on the average, better ranges than are to be found in New Mexico, and it is in these northern states that the Merinos hold sway.

Almost all range sheep are affected with scab, though it is frequently so held in check as to be scarcely noticeable. As a remedy it is the general practice to "dip" all range sheep, and this operation, as carried on extensively on a large sheep ranch is decidedly picturesque. Oftentimes it is deemed necessary to give the same sheep several dippings at intervals of ten days, and occasionally this dipping is done in zero weather. On the large ranches there are specially constructed dipping vats with runways for the sheep as they approach and leave the vats, etc. Various ingredients are used in the preparation of the dips, among the most popular being lime, sulphur and tobacco.

As is well known, the American market has become the most discriminating in the world on beef products, and is rapidly coming to demand a corresponding superiority in mutton. Consequently farmers and ranchers realize the necessity of selecting the best sheep. The value of improved blood in sheep has come to be realized.

A difficulty in mutton production has always been the scarcity of stock sheep, particularly sires, having sufficient merit to fill the standard of excellence. The ideal sire, it may be added, should be impressive, resolute and of noble bearing—distinctly the head of the flock in every sense of the word. This requires, of course, good constitutional and vital powers.

It has likewise come to be regarded as essential, as above pointed out, that a mutton sheep should have a good fleece as well as a good carcass. This combination has been proved both practical and profitable, and it is no longer regarded necessary to grow one sheep for a fleece, another for a carcass and another for a lamb. An intelligent, up-to-date flockmaster combines them all in one class. Some of the best mutton sheep are producing, is profitable fleeces as those kept exclusively for wool and their lambs are decidedly superior. As is well known, one of the first essentials in a good fleece is completeness, or density, this quality not only insuring a better yield of wool, but also affording better protection against storm. This indicates a hardier animal and one better able to withstand exposure. It is desirable to have a close, even, dense fleece, with no breaks, cover all parts of the body, including the head, limbs and under parts, and the tendency in later day breeding is toward carrying the fleece more completely over the head, face, limbs and under parts.

The far-sighted sheep raiser is also coming to guard against neglect or undue exposure of his flock, periods of sickness, or indeed anything that will impair the vitality of the animals, for it has come to be pretty well understood that such influences diminish both the length and strength of fiber and fineness, whereas, length and strength of fiber are essential qualities in a good fleece. Well-fed sheep always produce the best wool and the greatest quantity of it, and expert opinion is to the effect that a fleece almost invariably begins to decline in value after a sheep has passed the age of four years. The best grade of wool is invariably found on the rear part of the shoulder, and wrinkles or folds of the skin about the neck or other parts of the body are detrimental, inasmuch as the wool that grows within these folds is unlike other parts of the fleece and there is a consequent lack of uniformity.

The proper feeding of sheep is one of the chief responsibilities connected with the industry. In some localities the "self-feeder" is extensively employed, but in other localities it is not in much favor. Properly cured alfalfa has come up wonderfully in popularity as a food for sheep and many sheep feeders have purchased extensive areas of alfalfa for use in this connection. Many of the large feeders in such states as Nebraska, Colorado and Minnesota have no shelter for their flocks, but it is generally conceded now that properly constructed sheds are an advantage, although, of course, involving considerable outlay in the case of large feeding yards. Some of the most progressive sheep men now recommend feeding three times a day, although others still cling to the old idea that it is not necessary to feed more than twice a day. Along with all these other requisites for success in sheep raising there is the necessity for the good shepherd of judgment and experience. Even on the range where sheep are supposed to be able to shift for themselves there is a tendency to employ a better class of men as sheep herders.

"I don't know about this picture, 'Bobby,'" said the visitor, as he ran over specimens of the youngster's camera work. "I am afraid a dog with a propeller instead of a tail is something of a fake."

"That ain't a propeller," said Bobby. "That's his tail. He kept waggin' it while his picture was being taken."—*Harper's Weekly.*

MAY WAR OVER TRIPOLI

Italy and Turkey on the Verge of a Conflict.

War between Italy and Turkey may be declared. Tripoli, a semi-barbaric nation of 2,000,000 people, situated just across the Mediterranean sea south of Italy, is the bone of contention.

Both Italy and Turkey are mobilizing their troops and rushing warships to the scene.

There are 50,000 Italians in Tripoli and the declaration of war may be the signal for their slaughter. Turkey is prepared to drive them out at the point of the bayonet.

Italy has an army of 325,000 men. This force might be raised to 1,200,000 by draft. Opposed, Turkey has an army of 700,000, 350,000 of which are reserves, and probably could draft to 2,000,000.

A Confirmed Statement

Evidence Northville Readers will Appreciate.

Doan's Kidney Pills have done splendid work in this locality. Have merited the unstinted praise they have received. Here's evidence of their value that none can doubt. It's testimony from this locality twice told and well confirmed. Such endorsements are unique in the annals of medicine. Should convince the most skeptical Northville reader.

Mrs. Henry Garfield, of Northville, Mich., says: "Doan's Kidney Pills are certainly an excellent remedy and I do not hesitate to recommend them to anyone afflicted with backache and kidney complaint. For a long time I suffered from pains in the small of my back and I had no energy or ambition. I tried various remedies, but received no permanent benefit from them. Finally I read of Doan's Kidney Pills and, deciding to give them a trial, I procured a supply at Murdock Bros. Drug Store. In a short time after I commenced using them, I was entirely relieved."

The above statement was given on November 26, 1906 and was confirmed by Mrs. Garfield on March 6, 1909. She also said that her cure had been permanent.

FOLEY KIDNEY PILLS

They work directly on the KIDNEYS, BLADDER and URINARY PASSAGES, and their beneficial effect is felt from the start. For BACKACHE, KIDNEY and BLADDER TROUBLE, RHEUMATISM, CONGESTION of the KIDNEYS, INFLAMMATION of the BLADDER and annoying URINARY IRREGULARITIES they exercise a permanent benefit. "ONCE IN ACTION—QUICK IN RESULTS"

John H. Leader, 248 Lake Ave. Battle Creek, Mich., says: "For three years I was afflicted with a disease of the kidneys which doctors called sugar diabetes. I doctored continually, but all to no effect. Finally I stopped doctoring and started taking Foley Kidney Pills which I saw recommended so highly. A few weeks' treatment of these pills relieved me of all my trouble and cured me of sugar diabetes and I feel better than I have been for three years, and can once more attend to my business affairs personally. I recommend Foley Kidney Pills to all my friends for I believe they are the best kidney and bladder medicine ever made."

One of the best and brightest things we can give is kind words. They have well to do in the right places in Northville. Use them everywhere, but especially around the fireside. They will melt a hardened heart or cheer a crushed spirit like kind words. Let us not be so careful now we use them, for they are the greatest blessing earth can give.

We are forcibly reminded that "the melancholy days are come" by the amount of golden leaves piled indiscriminately about. If "father's pride and mother's joy" will direct half the energy he displays in a game of "chess" to raking up the afore-said leaves and burning or otherwise destroying them it will take about twenty-four hours to make the lawns about town present a marked difference in their appearance.

DEATH OF

HORACE WIXOM

Horace Wixom, who has been ill the past few months, died Friday at his home on the Base Line of a complication of diseases. The deceased was sixty six years of age and had spent the greater part of his life in the old Wixom Hotel of which his father was proprietor for many years, on the Grand River road between Farmington and Novi. He is survived by one sister, Mrs. Ada Wood. The funeral was held Sunday afternoon from the Baptist church at Farmington, Rev. J. J. Murdock of this place, officiating.

Noiseless Furniture.

Irritating noises can be avoided by taking some old felt hats, cutting out from these disks about the size of a quarter and securely fastening them to the bottoms of the legs of all chairs, tables and other movable articles not provided with casters. This also prevents the scratching of polished floors.

Don't Expect Kindness.

There are six sorts of people, at whose hands you need not expect much kindness. The narrow minded think of nobody but themselves, the lazy are too indolgent the busy have no time to think the rich disregard appeals for kindness, the poor have neither spirit nor ability, and the good natured fool is not capable of serving you.—Home Notes.
