

THE NORTHVILLE RECORD.

VOL. XLVI. NO. 29.

THE RECORD: NORTHVILLE, MICH., FRIDAY, FEBRUARY 11, 1916.

\$1.00 PER YEAR, IN ADVANCE.

"DOGGONE A DOCTOR'S LIFE ANYWAY!"

—Donahy in Cleveland Plain Dealer.

FARMERS' INSTITUTE HERE NEXT MONDAY

As previously mentioned, Northville is to have a one day Farmers' Institute such as are being held throughout the state with much pleasure and profit to all concerned. The meeting will be held in the Baptist Church, beginning at 9:30 o'clock, and a very interesting program has been arranged for the forenoon, afternoon and evening sessions. A State Speaker, C. H. Bally of Detroit will be present and many important subjects are to be discussed by him and by prominent farmers and business men of this vicinity. Vocal and instrumental music, recitations, and a debating high school students are other features. The complete program appears elsewhere in this issue.

ANNUAL BALL OF EASTERN STARS

Arrangements for the annual Eastern Star ball which is to take place on February 22 are practically completed. Nothing can be added to the high standard of excellence which was adopted as the aim of the committee in charge. It is intended to make this party a marked event in Northville's social history, and preparations are being made for the most largely attended ball yet held under the auspices of the local order. The committee has carefully planned for the successful care of the guests in every respect. The usual chicken sandwiches will be one of the good features arranged for by the refreshment committee. Decorations will be appropriate for the anniversary of Washington's birthday. Any have guests to be invited it is requested that the names be sent to the committee.

F. D. EATHERLY DIED LAST WEEK

Florence D. Eatherly, one of Northville's most highly esteemed summer residents for many years past, died Thursday, February 3 at his winter home at 45 Martin Place, Detroit, after a long illness. Mr. Eatherly, who was in his eighty-second year, was one of the old guard of Detroit pioneers, and was among those instrumental in the city's development and upbuilding. Mr. Eatherly began his career as an apprentice carpenter with Hugh Moffat, at the time one of the principal contractors and builders of Detroit. He continued in the Moffat employ when Mr. Moffat engaged in the lumber and timber land business, and was taken into partnership under the name of Moffat & Eatherly in 1876. The firm operated a large saw and planing mill at the foot of Chene street. Mr. Moffat's death in 1884 resulted in his partner buying the interests, and continuing the business alone. He sold out to the Delta Lumber company in 1895. In addition to his business affairs at that time, he acted as administrator of the Moffat estate.

He sold out to the Delta Lumber company in 1895. In addition to his business affairs at that time, he acted as administrator of the Moffat estate. He sold out to the Delta Lumber company in 1895. In addition to his business affairs at that time, he acted as administrator of the Moffat estate.

chiefly occupied Mr. Eatherly's attention in the declining years of his life, but he maintained an interest in city affairs, and did not relinquish his prominent connection with different commercial and financial enterprises with which he had been identified in Detroit. He was president of the Union National bank until it was merged with the Dime Savings bank, serving as director with the last named institution thereafter. Although he was not inclined to political activities, he served as police commissioner under the late Governor Black, when the latter was mayor of Detroit.

Mr. Eatherly was born at Coldingham, county of Berwick, Scotland, November 22, 1834. He came to Detroit with his parents and an active brother at the age of 16 years. He was married to Mrs. Kate Moss, November 19, 1870, and his widow is his only survivor.

For many years Mr. Eatherly was president of St. Andrew's society, and he was also a prominent Mason and Knight Templar, having completed the circle of both the York and Scottish rites. He belonged to the Old Guard of Detroit commandery No. 1, Knights Templar. His church affiliation was with the Central Presbyterian Church, from which funeral services were held at 2:30 o'clock, Monday afternoon, with interment in Elmwood cemetery.

"TOWN TOPICS" AT THE SAR- RICK THEATRE, DETROIT

The latest New York Winter Garden production, "Town Topics," the only production of a musical nature to boast of two runs on Broadway, is to visit the Garrick theatre, Detroit, about next week. It comes direct from this famous musical extravaganza resort, the Winter Garden, with the entire original cast. Also the famous Creole band. The company consists of 125 people, which includes a dancing chorus of the Winter Garden variety and the very same company and chorus which played at the Century theatre, New York. The Messrs. Schubert have spared no expense in staging and costuming this attraction, and it is declared to be the last word in entertainment which is the trademark of Winter Garden shows.

GREAT CHANCE, LADIES.

The Oakland County Centennial association, formed for the proper celebration of "Old Oakland's" one hundredth birthday next August, is apparently determined to make leap-year mean business this time. The association offers to the first young lady who shall propose and be accepted, and who will be publicly married at the celebration in question the entire furnishings for a house, besides the cost of the wedding fee and the license. Get busy, girls.

ORPHEUM PLAYERS'

FIRST APPEARANCE.

The Orpheum Players' company of Detroit gave the entertaining play, "The Tramp and the Lady," Monday evening, the first of the series to be given by them in the Alceum theatre. The members of this company are all thoroughly experienced in stage work and all carried their parts in a finished manner. Their return date on February 21 will bring the presentation of the famous story, "The Tramp and the Lady," which should insure a good audience.

DETROIT LOSES IN AUTO TAX FIGHT

COURTS SAY THE LAW IS CON-
STITUTIONAL AND CITY WILL
TAKE CASE TO SUPREME COURT

The circuit court at Detroit has upheld the constitutionality of the automobile tax law.

The decision of the court, handed down by Judges Mandel, Wittey and Perkins, Tuesday will be appealed to the supreme court by Harry A. Dugan, corporation counsel.

Local opposition of the city was defeated adversely. The corporation counsel relied most strongly on the claim that the law diverted primary school money from their proper purpose. He contended the new law compelled companies paying a specific tax to pay taxes on their motor cars for high way purposes, rather than for the primary school fund, as the constitution directs.

The court holds that this claim is untenable, asserting that there is no presumption that the revenues will be diverted from the educational fund. Attorney General Grant Fellows appeared for the state and argued to uphold the law and riddled all the contentions made by Detroit representatives.

Detroit people did not contend the law wasn't a good one, their only grievance seemed to be that it might work hardship on Detroit taxpayers.

FANCY POULTRY WINS PRIZES.

A letter received by the Record from a former resident, John Parmenter, now of Royal Oak brings the information that he has been awarded ten first premiums and two seconds on 12 birds exhibited at the recent Pontiac poultry show and at the big round-up show in Detroit the same twelve birds won 10 first, one second, and one third. Mr. Parmenter shows his birds at London, Canada, every week. Ed Fuller of this place was also a prize-winner at the big show in Detroit, with his white Plymouth Rocks, taking 3rd on cockbird, 2nd on hen and fifth on pullets.

SOME DEGREES OF DISAGREE- MENT.

Who shall decide when thermometers disagree? Anent the statement from a Northville citizen, as published in the Record last week, that the temperature went five degrees higher on January 27, 1916 than on July 5, 1915, the U. S. Fisheries station submits the following from its official records:

July 5, 1915. 6 a. m. noon 6 p. m.
52 65 65
Jan. 27, 1916. 45 62 55

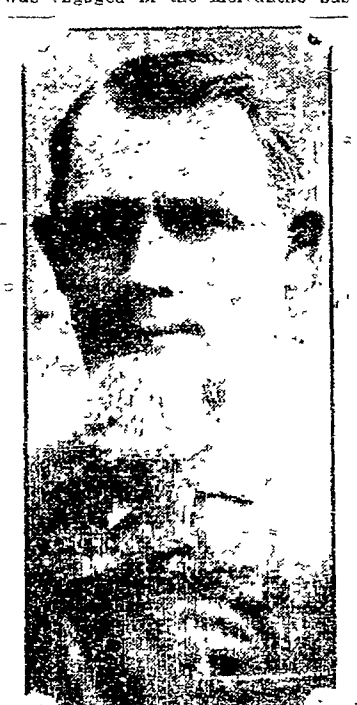

This shows that—up at the U. S. F. S. anyway—it was, respectively, seven, six and two degrees warmer in July at the hours mentioned than in January, on the dates in question. But then—Great Scott! who wants July and January to be so near alike as that, even? The present administration should certainly be impeached.

It will cost you the same for portraits whether you come to my studio or I come to your home to make them. I guarantee to please you in either case. C. O. Wisdom, Photographer, Northville, Mich.

CHAS. J. BALL DIED MONDAY FORENOON

Charles J. Ball, for 28 years a resident of this village, died at his home here Monday forenoon at the age of nearly eighty-six years. Notwithstanding his advanced age he had led an active life until two years ago, when he encountered his first real illness.

Mr. Ball was born in New York state August 25, 1830, and came to Michigan at an early age and settled at Newport, Monroe county. There for many years he was engaged in the business of blacksmithing, boat-building and fishing on the Detroit river and for 15 years as the proprietor of a general store at that place. He came to Northville in 1883 and was engaged in the mercantile bus-

CHARLES J. BALL.

He was a member of the Northville Baptist church and was one of the charter members of the Northville F. & A. M., and was Master of the society there for many years.

He leaves, besides the aged and faithful wife one son, Charles H. Ball of Detroit. The only daughter, Jennie H., the wife of the publisher of this paper died eleven years ago.

The funeral was held from the home Thursday afternoon, Rev. F. L. Walker of the M. E. church officiating and the body was placed at rest in the Neal vault in Rural Hill.

Wanted, to Rent, For Sale, Etc.

For Rent, For Sale, Lost Found, Wanted notices, etc., under this heading for 1 cent per line.

SUNDAY SCHOOL LESSON

Comments By
Rev. Ernest Bourner Allen, D.D.
Pastor of the Washington St.
Congregational Church and the
Marion Lawrence Sunday
School, Toledo, Ohio.

For Sunday February 3
Lesson Title: "Humbled and Exalted"

Lesson Text: Phil. 2: 1-11. Memorize verses 5-7.

Golden Text: "For ye know the grace of our Lord Jesus Christ, that though he was rich, yet for your sakes he became poor, that ye thru his poverty might become rich." II Cor. 8: 9.

I. Defining a Christian.

It is as interesting to collect definitions of a Christian as it is to collect stamps or antiques. Many men can tell you what a Christian is not. A positive definition is more difficult. Many men make it in terms of their mother's religion. She was a Christian, they argue and damn, whatever sort of hypocrites other folks may be. Every community, fortunately, has some godly men in it, whose life stands out like a lighthouse. Nobody knows how many boys he saved from shipwreck. By some he is ridiculed, by others tolerated, by a few imitated and beloved. These mothers and fathers give us challenging definitions of a Christian life.

Paul makes a striking analysis of character in Philippians 2: 1-4. In the first verse he epitomizes four reasons for his appeal to them: (1) that they tried to follow Christ's teaching; (2) that they were ruled by the spirit of love; (3) that they were bound together by the Holy Spirit; (4) that they were actively interested in other people's welfare. He then shows what it means to be a Christian in every day life: (1) He will have a single purpose and devotion to a great cause, v. 2. (2) He will be humble, v. 3. (3) He will be unselfish, v. 4. These plain points will repay thought upon them.

II. The Central Fact

Strip away everything else and at the core of our religion you find Jesus Christ. Omit the Old Testament, which shows how the way was prepared for Him, and the New Testament, which records his life, teaching, and the beginning of his influence, and you must still explain his presence and power in the world. Eliminate the church, the central institution of religion, and you have yet to measure and account for its Founder. Pass by all institutions of philanthropy, education, art, government, influenced by Jesus Christ, and you are still compelled to measure Him by the "light he has cast upon the world," as Parker suggested.

Christ is really the central fact of our religion. Not the Bible, nor the church, nor five, helpful creedal interpretations about him, written by honest people out of experiences of their hearts. There He stands—a heroic figure, compelling men to take account of him and to face his philosophy of life. Sum it all up in this: "He took upon himself the form of a servant." He chose that for himself, voluntarily, devotedly, persistently. What is nobler than a life of service? Quit arguing about non-essentials! SERVE! Face Godward, for cleansing and help. Face manward, for consecration and helpfulness. Take something upon yourself—a group of street boys, as John Gunckel did in Toledo; a city slum, as Jacob Rius did in New York; a forsaken country community, as Jean Frederick Oberlin did in Waldbach; a continent, dark as midnight, as did David Livingstone; a world, as did Wesley and Carey and Morrison; a universe, for time and eternity, as did Jesus Christ! If you really believe in a religion of service, what work, hard and heroic, have you taken upon yourself to prove it?

III. Our "Own Things" or the "Things of Others."

"One hot July evening the Hadleys were gathered about the dinner table when Hilda spoke, according to a story I have read: 'Mother, Cecilia Lamont just won't take 'no' for an answer about my going to the mountains with them. I don't see why I can't if I'm willing to go with only a few clothes. Dr. Stubbs says that every one ought to take a vacation! Aunt Nancy looked up quickly, as if she were going to speak, but at the moment she said nothing. After supper, however, she stopped Hilda out on the piazza. 'Doesn't it make a difference,' she asked, 'whether you take your own vacation, or some other person's?' 'What do you mean?' Hilda asked, innocently. 'She's been away of late, hasn't she?' 'Well, I suppose there's nothing to be done about it now, but I'm sure you'll have to go if you don't go now.' 'Why, mother, doesn't she ever go anywhere?' 'There was sheer amazement in Hilda's voice now. She even forgot her annoyance at Aunt Nancy in the absurdity of the thought. Aunt Nancy's comment was dry: 'She looks it,' she said, as she turned away. For a moment Hilda stood stunned: then she ran upstairs in a blaze of anger and locked her door behind her. But she could not lock out Aunt Nancy's words—'Whose vacation do you want? She looks it—she looks it.' Whose vacation did she want? Rob's? Kent's? Ruth's? Her mother's?"

is. Did Ruth go away last year? 'She didn't want to,' Hilda replied, flushing. 'Or the boys?' 'Boys don't care.' 'Oh don't they! Did you ever notice Kent's face when he handles his fishing-rod? Or Rob's when you speak of the mountains? And your mother—when did she go away last?' 'Why, mother doesn't ever go anywhere!' There was sheer amazement in Hilda's voice now. She even forgot her annoyance at Aunt Nancy in the absurdity of the thought. Aunt Nancy's comment was dry: 'She looks it,' she said, as she turned away.

For a moment Hilda stood stunned: then she ran upstairs in a blaze of anger and locked her door behind her. But she could not lock out Aunt Nancy's words—'Whose vacation do you want? She looks it—she looks it.' Whose vacation did she want? Rob's? Kent's? Ruth's? Her mother's?"

Most Beautiful Word

What is the most beautiful word in the English language? A college professor, who has been teaching for a number of years, has collected some interesting facts concerning the preference of certain words. He has made the experiment with some twenty-five classes, all the way from an ungraded class in a country school to the senior class in college.

At the conclusion of a recitation the teacher has had little slips of blank paper distributed. He has then requested each pupil to write down—without consulting his neighbor—what he thought the most beautiful word in the English language, giving consideration both to sound and to sense.

Of the 600 pupils that he has had write the name "mother," 45 wrote "love," 25 "kindness," 18 "faith," 16 "happiness," 11 "gratitude," 10 "truth," 7 "hope," 6 "peace," 5 "justice," and 2 "goodness." The following words received one vote each: "Grandpa," "courage," "sympathy," "hope," "truth," "kindness," "faith," "love," and "happiness."

Of the few boys who wrote a response from a very bright boy, I picked the word "love" and may write "ecstasy" about it. When I told about it, he pronounced it "ecstasy," and explained "Oh, it's ecstasy!"

The other 15, before, for the same word, and of the perplexed professor. This word was all handed in at the same time from a class of 25 healthy, growing, hard-working country boys. There was the teacher's face, disappointed for a moment. The ballot was taken silently. Each boy had a folded slip of paper in his hand that the teacher asked one of the boys to pass around. Those 15 citizens to be deliberately wrote down the one-sounding, groovy-looking, thoroughly unattractive word, "vicious!" What could have been more suggestive of that teacher's opportunity than the fact that nearly half of a class of 25 immortal souls thought "vicious!" the most beautiful word in the English language?

And what higher compliment could be paid to motherhood and the American home than the fact that 527 of these 600 boys and girls, young men and young women, independently, and at various times and places, selected words that suggested their relationship with the most beautiful word in the English language?

BRIEF BUT SUFFICIENT

The Rev. R. B. Dodge is a mission-ary of Maui, one of the Hawaiian group of islands. He is a most resourceful man in his dealings with his charges, as his part in the following incident serves to show.

Recently a Japanese couple came to Mr. Dodge with a request in sign language, that he make them man and wife. They could not talk English understandingly, and Mr. Dodge could not talk Japanese, so he conducted the ceremony as follows:

"You like this wahine?"
"Yes."
"Bureby no kichou?"
"No."
"You like this kane?" (To the woman)
"Yes."
"Bureby no kichou?"
"No."
"Pde."
"Pau." And the ceremony ended.
"Wahine" is Hawaiian for woman, "kane" for man, "pule" for pray, and "pau" for enough.

3-RING MOVIES LATEST IDEA.

Three Dramas Shown at Once in New York Picture House.

"Three ring movies" are the latest. Three film plays are shown at one time on three screens. This is at the Grand Central Palace in New York.

If you don't care for the comedy on the screen to the left you can look at the romantic play in the center screen or at the thriller on the screen to the right.

The chief advantage is that when you go in to see your favorite hero of the movies, who is billed on the posters outside, or go in to see a certain comedy, you aren't compelled to sit waiting through a program of pictures you don't care about particularly. It is a convenience for busy folk who want to see the movie they want to see.

MRS. HENRY FORD

Mrs. Henry Ford, wife of the famous automobile manufacturer, whose husband chartered a special vessel for the purpose of sending two hundred peace lovers to Europe to see whether the war could be stopped.

Household Hints

THINGS WORTH KNOWING

Knit All Gloves—This is given, salt, one teaspoon baking powder, three cups graham flour, one cup brown sugar, two cups milk, one cup butter, one teaspoon soda. Mix well and bake in the milk. Mix well to get rid of the soda. Bake in moderate oven. This is very good.

Devil's Food That Never Fails—Two cups brown sugar, half cup butter, two eggs, half cup milk, two cups sifted flour. Put half cup boiling water over half cup grated chocolate; stir this with one teaspoon soda, then add to above mixture and beat well. Bake in two layers and put together with white frosting as follows: Take one cup granulated sugar, mix with five tablespoons milk, place it on stove in deep dish and stir until it boils, then let it boil without stirring for about five minutes. Remove from stove and let cool a little; put in flavoring to suit and beat until it becomes a thick, creamy frosting.

Fried Whitefish with Hollandaise Sauce—Split a large whitefish and place in dish with salt and pepper; squeeze over it the juice of two lemons and let it stand for an hour. Drain, flour all over, dip in egg and try to a light brown. Serve with following sauce: Holland sauce. Put two tablespoons butter into frying pan, when melted add two tablespoons flour, stir until smooth, then pour in two cups cold water and stir steadily until it thickens. Add a little salt and pepper, take from fire, add beaten yolks of two eggs and juice of half lemon.

Velvet Cocoa Cake—For this cake mix together and bring to boil one cup milk, yolk of one egg, two and one-half tablespoons cocoa. While this is cooling stir together one-half cup of milk, one cup brown sugar, two tablespoons butter. Add first mixture and one-half cups sifted flour, one teaspoon baking powder, one teaspoon baking soda dissolved in a little milk, one teaspoon vanilla. Bake in either loaf or layers, and frost with two cups brown sugar, three-fourths cup milk boiled together until it forms a ball when a few drops are tested in cold water.

Wash Stockings Every Night—Stockings, silk and cotton both, will last many times as long if they are washed in a good mild soap suds after each wearing. The washing sinks the fibers together and prevents holes from coming.

THE TABLE

Bean Soup—Ten cents' worth salt pork in one piece; boil one hour with one small cup navy beans that have soaked two hours in warm water, one onion, pepper, salt to taste. One cup tomatoes may be added or omitted. Tomatoes gives it a nice flavor. Save the pork for baked beans. For baked beans use nearly one pound; boil one and one-half hours, then turn into a bean pot with one teaspoon sugar, one teaspoon sausage drippings or butter, pepper, salt to taste, slice pork on top of beans and bake, keep enough water on that they won't burn.

Graham Nut Bread—Half cup wal-

YELLOW METAL TO

FINANCE WAR

In spite of war, or perhaps because of it, the gold output of the Transvaal mines in 1915 broke all records. It amounted to 9,093,671 ounces, or \$187,946,473.

NINE RULERS IN EXILE

The fight of the Montenegrin royal family brings the number of sovereigns in exile, or held in duration during the war up to nine.

King Albert and Queen Elizabeth are serving on the battle front in Flanders.

King Peter of Serbia is undergoing the rest cure in Greece.

King Nicholas and Queen Mojena, his consort, are at Lyons, France. Prince William of Wied, Albania's ruler, fled at the beginning of the war. The Duchess of Luxembourg and the Grand Duchess of Baden are also in exile.

ers in their own castles. Khedive Abbas Hilmi of Egypt is in exile, deposed by the British.

PERILOUS ROCKS IN HARBOR

Uncharted rocks, dangerous to shipping, exist in East River, New York City. So says a report of officers of the U. S. Coast and Geodetic Survey. They are dangerous only at low water, and to the very largest steamers. The great increase in the size of the ships has made rocks dangerous that formerly were harmless.

RETRIBUTION FOR BANDITS

Several of the bandits who recently murdered an American in Mexico have been caught by the Carranza forces and are now being held in prison.

MYSTERY OF "PERSIA" IS UNSOLVED

No German submarine sank the "Persia," which went down recently in the eastern Mediterranean. Austria too, has failed to admit any responsibility. Turkey is not believed to have any submarines in that region. So the cause of the sinking of the Persia remains a mystery and the United States cannot hold any nation responsible. The steamer may have been sunk by a floating mine.

WHAT BECOMES OF POTATOES?

Department of Agriculture reports a shortage of potatoes on hand in the U. S.—38 per cent less than a year ago. This in spite of a heavy crop.

MORE GOLD THAN EVER BEFORE

The San Francisco mint now has \$357,000,000 in gold, and more is coming every day. All the mints and sub-treasuries have more gold than ever before.

THIS Paper reaches the buyers of everything for the house, from the garret to the cellar. Why not make a Suggestion?

THERE is not a single inhabitant in this town who does not receive some benefit from the advertisements of our local merchants and enterprises. Publicity benefits.

Doubly Proven.

Northville Readers: Can No Longer Doubt the Evidence.

This Northville citizen testified long ago.

Told of quick relief—of undoubted benefit.

The facts are now confirmed.

Such testimony is complete—the evidence conclusive.

It forms convincing proof of merit.

H. Priest, mason, Mill street, Northville, says: "Heavy lifting brought on kidney trouble. The kidney secretions passed too frequently and were painful. I had a touch of rheumatism and morning sickness. I was stiff and lame when I got up. I saw Doan's Kidney Pills advertised and got some at Murdoch's drug store. After using them I was greatly relieved." (Statement given November 26, 1908).

More than six years later, Mr. Priest said: "I am glad to confirm my former endorsement of Doan's Kidney Pills. They cured me of kidney complaint."

Price 50c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Priest has twice publicly recommended. Foster-Milburn Co., Props. Buffalo, N. Y. Advt.

PROFESSIONAL CARDS.

DR. T. B. HENRY, PHYSICIAN AND Surgeon. Office in Lapham State Bank Building, corner Main and Center streets. Office hours: 8:00 to 9:00 a. m. and 1:00 to 2:30 p. m. and 6:00 to 7:30 p. m. Phone No. 1.

DR. N. J. MALLOY, PHYSICIAN AND Surgeon. Office in residence on South Center street. Office hours 2:00 to 4:00 p. m., and 7:00 to 8:30 p. m. Phone 224. 45-5p

BRACE UP

When you are out of sorts, tired out, have pains across the back, puffiness under the eyes—what do you do for relief?

This Is What You Should Do—

Ask for a box of Nyal's Pills—designed for the purpose of making weak kidneys strong and they will do it quickly and easily.

Nyal's Kidney Pills

Tone up and invigorate the kidneys, give you Pure Blood, a Good Circulation and pave the way to Genuine Health.

We have the utmost confidence in Nyal's Kidney Pills, and know they will do as we say—that's why we endorse them to be utilized. Let us tell you more about them—you will thank us later on.

Northville Newslets.

Prepare your valentines for Monday.

Ernest Lyke has been one of the recent victims of tonsillitis.

Abraham Lincoln was born 107 years ago tomorrow, and died 56 years later.

Eighteen years ago next Tuesday, February 15, the battleship Maine was destroyed.

The ground hog was probably heard to murmur "I told you so" the first of this week.

Mrs. Mary Russell has rented a part of her house to Mrs. Jackson, recently of Plymouth.

Marble-playing and roller skating seem to have gone out of fashion this week, somehow.

Mrs. George Goodell has been suffering from the effects of a severe fall, but is now better.

George Johnston is now nicely settled in his new place of business on Center street north.

Mrs. J. W. Perkins has been quite seriously ill for the past two weeks with grip and complications thereof.

Mr. and Mrs. John Christensen have a nine-pound son, who became a member of their family on "Candlemas day."

There is to be a special convocation of Northville Commandery Tuesday evening, February 15, with work in the order of the Red Cross.

The ladies of the Baptist church will serve a chicken-pie dinner in the church parlors February 14, from 11 a. m. to 1 p. m. Dinner 35 cents. The public is invited.

Plymouth's newly appointed postmaster, Howard Brown, a graduate of the high school there in one of the youngest men if not the youngest, in Michigan to occupy such a position.

The robin and frog and tadpoles and may flowers reported in our various exchanges last week were left extremely discouraged this week to say the least.

Mr. John Dixon, who has been in a delicate condition as the result of a surgical operation last week, is apparently in now improving slowly as he is in Grace Hospital, Detroit.

The L. O. T. M. M. by special dispensation, have changed their regular meeting night from Tuesday to Monday evening of the same week, a last notice. Members are requested to attend that in mind.

Mr. and Mrs. Carl Parker have moved from New Hudson to Farmington. Mr. Parker has been in the D. H. R. car service for some time. Mrs. Parker is a sister of Mrs. George W. Hills of this place.

The dates for the regular meetings of the Woodmen lodge have been placed from every other Thursday evening to the first and third Wednesday of each month. The first meeting under the new arrangement will be on February 16, and an old-time dance afterward.

Orient Chapter O. E. S. has been invited to visit Pontiac Chapter next week, Thursday, February 17. A special D. U. P. car has been arranged for, which will leave here at 3:35 p. m. Central standard time. It is expected that a large party of local "stars" will go.

B. F. Allen, a farmer living near Indian Bay, Ark. was hunting recently when he found a copper kettle that had been lifted from its place of concealment in the earth by the roots of a tree blown down by the wind. In the kettle was \$20,000 in gold coins, all dated prior to 1840. It is believed that the money was buried by bandits who operated in that section before the Civil war.

A series of the most beautiful art works ever seen anywhere has been on exhibition here of late, absolutely free, although but few of our people have been fortunate enough to see the display. Exquisite lace and embroidery patterns and magnificent mountain pictures that defy all description were included in the collection. It is possible that another exhibit may be put on. It all depends on the weather, as Jack Frost was the artist, and Perrin's big show-window the place of display.

Old people do not like to go far from home these winter days. Anyway, photographs of them taken in their favorite place in the house are far better than when made anywhere else. The prices are the same as when made in my studio. C. O. Wisdom, Photographer, Northville, Mich.

Choice selection of wall paper at the White house. We carry a good line of kitchen, bedroom, dining room and parlor papers in stock. E. J. White, Northville.

ADVERTISED LETTERS.

Mrs. Mae Shaffer.
Harems Hattell
Mrs. John Kenhlem.

Bear did see his shadow all right. Some more sleighing again this week.

The village caucuses will be held Friday evening, February 18.

Dr. T. B. Henry is just recovering from injuries received in a fall on the icy sidewalk one day last week.

Mrs. George Brown has received the sad news that her son-in-law, Thomas McCarroll is dead at St. Thomas, Ontario.

Saturday, February 12, is Lincoln's birthday and is a legal holiday. The banks will be closed all day. The post-office will observe the usual holiday hours.

The regular evening meeting of the King's Daughters will be held at the home of Mrs. J. E. Webber next Tuesday evening, February 15, at 7:30 o'clock.

"So you intend to be a soldier when you grow up. Don't you know you'll be in danger of getting killed?" "Who by?" "Why, by the enemy." "Then I'll be the enemy."

Vernon Spencer, the young Wixom player, nephew of Mrs. Ben Gill of this place is to leave about March 1st to resume his connection with the Denver team. Henry Perry of Wixom is to play with Wichita, Kansas.

The entertainment given last Friday evening in the Methodist church under auspices of the Epworth League by Mr. Bradley of South Lyon and Miss Barbara Miller of Clarksville was first class in every respect. The fortunate ones who attended were all reward and those who did not go were one of the most charming events of the season.

German scientists who have studied the effect of lime and other alkaline salts in the human body report that an abundant provision of calcium essentially increases the assimilation of food, strengthens the body, increases the bactericidal action of the blood known as phagocytes and increases the general health and resistance to influences tending to cause disease. Calcium salts are found to soothe nervous irritation and the tendency to sweating and calcium chloride has been used with marked success in the treatment of hay fever.

The address given in the Freshwater church Sunday morning by Rev. K. D. Witt, lately a missionary to China, was one of the most interesting and instructive, as well as one of the most stirring appeals ever heard here in the interest of foreign missions. The speaker's appeal was not denominational or sectarian but of an awakened interest that might result in an increased working force in a field where wonderful possibilities await development. Mr. Witt, who appeared in Persian costume, was greeted with an unusual degree of magnetic personality and fervent and fluent oratory.

Dr. T. B. Henry is a candidate again for re-election as village president. The doctor has worked very hard the past year with the council and altogether they have made a good record. Dr. Henry and all the other village officials including Councilmen Filkins, McLean, Barley, Assessor Sessions and Treasurer Noche should all be re-nominated. The liquor question seems to be now settled at least until another vote is taken by the people and the issue now should be "A bigger, better Northville." A cement road up through the village from Wiley's corner, and a sewer system are among the important things now to be considered.

Dancing this (Saturday) evening in Cattermole hall. Turner's orchestra will put the pep in pepper.

K. O. T. M. M. RESOLUTIONS.

Whereas: Our beloved brother, Charles C. Blackburn, by the decree of an overruling providence, has been called from his earthly home; and Resolved: That in the death of our Brother, the members of this Tent fully recognize that they have lost one of their number, who was at all times imbued with the pure principles of the order, and whose life and conduct suffer no reproach to be on his character, either as a Sir Knight, fellow citizen or husband.

Resolved: That the sincere and heartfelt sympathies of the members of this Tent be, and are hereby extended to the bereaved widow and family of our deceased Brother, whose loss we, with them, deeply mourn.

Resolved: That our charter be draped in mourning for a period of 30 days, and that these resolutions be recorded on the minutes of our Tent and a copy sent to the family of the deceased, and also published in the Northville Record.

JOHN BUCKLEY,
E. J. BRADNER,
S. W. McLEAN,
Committee.

Regular on Monday night

Features at the

New Alseium Theatre.

The Alseium theatre will present to its patrons Saturday evening a five reel photo play, "The Love of Woman," based upon the successful drama of the same name.

Miss Brady submits a fascinating impersonation of Kate O'Day, the daughter of a wealthy rancher who attracts the love of a gallant young officer who is also blinded by a scheming widow. This woman sows dissension between the lover and the loved one.

John Towner, a reformed criminal, loves the widow who curses him down for revenge he and his tribe attack the ranch but are defeated by Larry and his soldiers. This Indian story has worked wondrous effects of fright and awe and has been recommended.

WORD OF THANKS.

I wish to express my deepest appreciation of the many kindnesses extended to me during my recent illness by the many friends and the different societies.

USE SILK PARASOL TO MAP STARS

ASTRONOMERS SUGGEST NOVEL WAY TO STUDY THE CONSTELLATIONS

Stars are Embroidered on Umbrellas of Blue Hues.

Geographers have struggled long with the problem of mapping the spherical earth on a flat surface, with the result that the public has acquired a most distorted impression of relative geographical positions. It is now admitted that the earth cannot be studied properly without a globe. In the same way efforts have been made to depict the heavens upon a flat map, with the result that many of the constellations are so distorted as to be positively unrecognizable. Some time ago a writer in the Scientific American suggested that a common umbrella might serve as a celestial globe, or at least half a globe, by having the stars painted on it in their proper relative positions.

This would provide a very handy star map, which could be carried to the point of observation in folded position and then opened out to semi-spherical form representing the apparent form of the heavens. By pointing the umbrella stick at the north star, the umbrella could be readily moved to a position corresponding with the heavens at the particular time, and then it would be a simple matter to pick out the various constellations.

The idea has been further improved upon by O. F. Burns of Shanghai, China. A dark blue silk parasol is used, and on it the stars are either painted or embroidered. Each parasol represents one half of the celestial sphere, and by using two a map of the entire heavens is obtained. For the purpose of teaching astronomy to school children the parasol may be set in a table. The plane of the observer's horizon is represented by the table top, which has an opening cut in it. Through which part of the parasol projects. The umbrella stick is pole of the heavens, and makes an angle with the surface of the table equal to the latitude of the place.

By means of a network the parasol is revolved at the same speed as the apparent revolution of the heavens, and a small image of the sun placed in its proper position on the parasol (as may be found by reference to a nautical almanac) shows by its position the time of day on the day at the back of the parasol. If the sun's image is placed accurately the revolved parasol will show just how far north or south of the horizon and west points the sun is, and acts during the year and at what time before six p.m. and after six p.m. the sun is above the horizon.

For use in the field to identify the constellations it is preferable to have the stars painted on the inner face of the umbrella. The parasol is provided with a narrow ribbon which may be used to determine the position of any point the ribbon being divided into degrees by which declination may be reckoned. The parasol is movable about the center stick of the parasol and indicates right ascension by hour and minute divisions marked on the rim of the parasol.

HELGOLAND IS MIGHTY

German Fortress Said to Excel Gibraltar in Strength.

Helgoland is considered by the best military authorities of Europe to be a more formidable fortress than Gibraltar. The highland of the island is cased in thick armor and there are about 400 guns, a fourth of which are sixteen or seventeen inch Krupp. Most of the guns are disappearing mountings. When they have been fired they sink into deep pits under steel cupolas where they remain until they are raised to fire again.

The gunners are specially skilled artists and can bring a concentrated fire of many guns to bear upon any point where a ship may ride. The place is said to be provisioned for a three year siege, making the "back door of Germany" secure from any attack. Crowds of torpedo boats and submarines sheltered under the highland are in the harbor on the south side of the island. Above is a wireless station. Many aircraft and Zeppelins are housed there. All about Helgoland are mine fields, which no enemy's ship would dare undertake to traverse. The possession of this fortress brings Germany almost 100 miles nearer England than she would be without it.

Life Belts Dangerous.

A life belt properly worn will keep anybody afloat for hours, swimmer or no swimmer, in a moderate sea; but, swimmer or no swimmer, there is no other way of sinking than to wear a life belt upside down, as scores did to their doom on that dread May morning when the Lusitania went down. Many of the drowned were found floating feet upward—women in particular. There were life belts for all, and when worn right way up the head rested well out of the water on a sort of pillow.

Repeating herself, history tells of the same thing among the sailors of the Lusitania.

COULD SHAKESPEARE EVEN WRITE AT ALL

William Conway Says No, and Offers Signature as Proof.

The question of who did "write Shakespeare" does not concern William Conway who has written a monograph on his Shakespeare theories, so much as "could William Shakespeare of Stratford-on-Avon write at all?" Mr. Conway is convinced that whoever did write the plays, it was not the Bard of Avon, so called. He bases his belief on evidence presented by certain existing signatures made by William Shakespeare, and which seem to prove him to have been an illiterate man.

Mr. Conway admits that, though so evidently illiterate, Shakespeare possessed native ability, manifested by his money getting faculties, and adds the fact that as a theatrical manager Shakespeare secured to himself the plays that he did, and thus stamped himself a competent man of business and a judge of public taste. But in regard to certain deficiencies exhibited by his signature, Mr. Conway, after having made a study of the characteristics of signatures, says:

"Observations of the efforts and performances of illiterate men in the laborious production of signatures has led me to the conclusion that here was a man ashamed of his inability to write, made so by his associations and the rise in his condition of life, seeking to cover his intellectual nakedness with a garment provided by a sympathizing friend."

"The sympathizing friend in this instance floated into the imagination in the form of some scrivener who set the copy so laboriously reproduced in the form of the signatures to the deed and mortgage of 1513 and to the will of 1616."

Mr. Conway refers to the original documents unearthed by Professor Wallace in 1910, and his theory is that the scrivener who drew up the papers of the mortgage and of the will is the man who made for Shakespeare a copy of his name, which the illiterate Shakespeare then followed in scribbling uncertain imitation to make the signatures to the documents. This saved him from the humiliation of having to make his X mark.

A second document put in evidence by Mr. Conway is a fragment relating to litigation in respect to certain money interests in the Globe Theatre. In this fragment appears, in two places, the name "Wm. Shakespeare," written by the professional scrivener who prepared the case. Mr. Conway points out that Shakespeare's own signature appended is a laborious imitation, performed by a man who could not read his own signature when he had written it.

Mr. Conway is convinced that this scrivener is the man who made the copy which resembled William Shakespeare's name on legal papers without the humiliation of the "X" mark. The role of legal procedure required the evidence to be written out and signed by the witness, before leaving the presence of the court.

"Special attention is called to this signature," says Mr. Conway, "as it is much abbreviated. The 'Great Dramatist' who had at his command, as evidenced by the putative works, a wealth of words measuring five times the number gathered into the fiction, any of the time, uses but a moiety of the characters which he had been taught to use as the ideograph to represent his name."

"We are told that he was instructed to appear later before the court for a further examination; but the record nowhere shows that he ever appeared, although the other witnesses appeared a second time. Would they be considered cynical who might surmise that the position in which Shakespeare of Stratford found himself when called upon to attach his signature to the record in open court was one of extreme embarrassment in that he could not without some exposure of ignorance use his copy to guide his pen?"—N. Y. Sun

OFFER SPECIAL VEHICLE

Californians Have New Wagon to Carry Machinery.

For transporting machinery of great weight from one point to another in the mining districts of California, a specially designed vehicle, which is fitted with wheels approximately ten feet in diameter and drawn by a caterpillar tread tractor, is used. The wheels are provided with spokes which are set in the same manner as those of a bicycle wheel, and are placed on heavy steel axles highly arched in the middle.

The purpose of this arching is to enable the load to be suspended beneath the axles instead of being carried above them. This materially lessens the difficulty of hoisting machinery onto the bed of the wagon and also eliminates the danger of the vehicle being overturned on account of the load being carried high. The load is suspended by heavy chains. Popular Mechanics.

New Way to Kill Sparrows.

Bert Watts of Lebanon, Ind., has discovered a new way to kill English sparrows, which are generally regarded as pests. At his home, Watts has five mouse traps, placed on top of fence posts and on a grape arbor. He puts bread or a little feed of some kind on the traps and keeps busy taking the traps and feed boxes away from the sparrows.

NO TRUTH IN REPORTED ILLNESS OF HEIR TO THE RUSSIAN THRONE

THE HEIR TO THE RUSSIAN THRONE. Reports which have been persistently circulated that the young Tsarevich, heir to the Russian throne, is seriously ill are now denied by the Russian government.

THE WATT EXPLAINED

The Following Example Will Show How

The watt is the unit of electrical energy being used when one ampere of current is flowing in a wire of one volt. From this you will clearly see that the electrical energy measured in a circuit is at all times equal to the pressure (voltage) of volts multiplied by the current (amperes or amperes). Applying this knowledge to a case where there was a pressure of 100 volts and two amperes flowing, we find the watts are 200. 1,000 watts equal 1 kilowatt, "kilo" meaning 1,000 the same as kilogram is 1,000 grams, etc.

The watt is so small that the kilowatt is mostly used as a unit, the same as, for instance, coal is sold by the ton and not by the pound. Then there is the kilowatt hour, which, as the name indicates, is a

unit of electrical energy continued for one hour or its equivalent.

The kilowatt hour is the unit for the payment for electricity on your bill. When you use electricity the reverse will be used on the bill. Two of these "kilowatt hours" is strongly affected by a lot of electricity. Several examples are given of the action of odors. "Severe odors" is sometimes observed to overcome persons upon their entrance into a room in which tuberoses are kept. Heat, which is often produced by the odor emanating from the honey-suckle-like rose of Sharon, or carnation. The odor from freshly ground coffee produces in some individuals a sickening sensation followed by nausea, and in rare instances vomiting, but usually it is agreeable and appetizing. The odors of vanilla and heliotrope possess a soothing influence over persons subjected to attacks of nervousness.

RIGHTS OF NATIONS DEFINED

American Institute of International Law Adopts the New Declaration.

A Pan-American "Declaration of the Rights of Nations," prepared by Secretary Lansing and Dr. James Brown Scott and adopted in executive session by the American Institute of International Law at its recent convention held in Washington under the auspices of the Pan-American Scientific Congress, is made public by Dr. Scott, president of the institute.

Although the declaration lacks the formal ratification of the twenty-one American republics, and, therefore, is not an official document, its framers believe that it correctly sets forth official views of the American commonwealths. Before the institute was called upon to consider it the declaration was submitted to and approved by the chief authorities on international law in the South American republics, including Ambassador Suarez and Dr. Alejandro Alvarez of Chile. It was unanimously adopted January 1 by the institute, whose membership of 105 is made up of five experts on international law from each of the twenty-one American republics.

The declaration, it is said, embodies the institute's conception of only elemental national rights and will be further considered at the next meeting of the institute in Havana next year. It contains five principal sections which were fashioned with the United States Declaration of Independence in mind as a model.

Following is a summary of the declaration:

First—Every nation has the right to exist, to protect and to conserve its existence; but this right neither implies the right nor justifies the act of the state to protect itself or conserve its existence by the commission of unlawful acts against innocent and unoffending states.

Second—Every nation has the right to independence in the sense that it has a right to the pursuit of happiness and is free to develop itself without interference or control from other states, provided that in so doing it does not interfere with or violate the just rights of other states.

Third—Every nation is in law and before law the equal of every other state composing the society of nations and all states have the right to claim, and according to the declaration of independence of the United States, to assume, as the powers of the earth, the supreme and equal station to which the laws of nature and of nature's God entitle them.

Fourth—Every nation has the right to territory within defined boundaries and to exercise exclusive jurisdiction over this territory and all persons whether native or foreign found therein.

Fifth—Every nation entitled to a right by the law of nations is entitled to have that right respected and protected by all other nations, for the right and duty are co-relatives, and the right of one is the duty of all to observe.

OFFICIAL FLY CATCHER

Way in Which Redlands, Cal., Became Flyer's Town

Now that we are more or less awake to the fact that the fly is a deadly insect, and a serious means of destroying crops, it is not surprising that it is one of the subjects on which Redlands, Cal., has been planning to be the only fly town in the United States. The American foundry every week takes the thousands of Redlands, Cal., fly traps in the catchers in 1914 and expects a 100 per cent increase in 1915.

The flycatcher is a device which Mr. Chapman, a person living in the Redlands, Cal., has devised. It is a simple contrivance, made of a wire mesh, and is placed in the path of the fly. The fly is attracted to the light, and when it enters the trap, it is caught. The fly is then killed by a small amount of poison. The fly is then placed in a small container, and the container is placed in a larger container. The larger container is then placed in a still larger container, and so on, until the fly is finally placed in a large container. The large container is then placed in a still larger container, and so on, until the fly is finally placed in a large container. The large container is then placed in a still larger container, and so on, until the fly is finally placed in a large container.

MACHINE MAKES CHANGE

Touch Right Button and Any Combination of Coins is Produced

The human hand and mind is not quick enough to answer the demands of the modern business done by the machine. The machine, however, is quick enough to do the work. The machine is a device which produces any combination of coins by touching a right button. The machine is a simple contrivance, made of a wire mesh, and is placed in the path of the coin. The coin is attracted to the light, and when it enters the trap, it is caught. The coin is then killed by a small amount of poison. The coin is then placed in a small container, and the container is placed in a larger container. The larger container is then placed in a still larger container, and so on, until the coin is finally placed in a large container. The large container is then placed in a still larger container, and so on, until the coin is finally placed in a large container.

EVENING MATTERS

Mrs. Rosenbaum—"Oh, Jacob, little boy has swallowed a dime!"
Rosenbaum—"Send him to bed without his supper. Dot will make it about eleven."

Patented by Hudson
December 28, 1915
Patent No. 1165361

HUDSON SUPER-SIX

The Greatest Car of Any Show
80% More Efficiency New Limits of Endurance

The World's Record Breaker

A 7-Passenger Super-Six Makes Fastest Time for Touring Cars up to 100 Miles, in Official Tests, Under A. A. A. Supervision

100 miles in 80 min., 21.4 sec, averaging 74.67 miles per hour, with driver and passenger.

The best previous stock car time was made by a car with more cylinders, more cylinder capacity and driver only.

75.69 miles in one hour with driver and passenger.

Some laps were made at 76.75 miles per hour

70.74 miles in one hour, carrying 5 passengers, with top and windshield up.

The best previous time for stock cars similarly equipped was made by a car with more cylinders, more cylinder capacity, and with two passengers only.

Standing start to 50 miles an hour in 16.2 sec.

All these Hudson records were made with the same stock car, using the same motor, at Sheepshead Bay Speedway in November, under supervision of the American Automobile Association.

During these tests the car was driven 1,350 miles at top capacity, at speed exceeding 70 miles per hour, without discoverable wear on any part.

An endurance record seemingly impossible.

Proving the most powerful motor per cubic inch displacement that the world has ever known.
