

THE NORTHVILLE RECORD.

VOL. XLIV, No. 52

THE RECORD: NORTHVILLE, MICH., FRIDAY, JULY 21, 1916.

\$1.00 PER YEAR, IN ADVANCE.

KING'S DAUGHTERS' GIFT ACKNOWLEDGED

GRATEFUL LETTER RECEIVED FROM NEW YORK EDITOR.

By the generosity of a comparatively small number of our residents the King's Daughters were enabled to send, through Rev. J. E. Webber, as the result of the union service in the Presbyterian church a few weeks ago, \$27 to the Christian Work fund in New York to be applied on Armenian work. A portion of the letter of acknowledgement follows: "You will be interested in knowing that contributions have been made generously all over the country, but it will take millions more to save the hundreds of thousands of children who are starving in Europe. Ambassador Morgenthau says it would take \$5,000,000 to save Armenia alone. A traveler just returned from Poland saw little children gnawing their own arms because of hunger. Three hundred thousand Polish children are living in the fields with the rabbits and foxes. It would take millions to tide Belgium over till reconstruction begins. If any individuals in your community wish to add to the generous gift of the King's Daughters they can send checks direct to the Starving Children's Fund, 70 Fifth Avenue, New York."

Also, special attention of Sunday schools is being called to the awful conditions existing among Armenian and Syrian children because "a million Christian Armenians have been slain within a year." In connection with this appeal it is asserted that "ten cents will keep a boy or girl alive for a week."

STRIKES AND STRIKERS.

One of the usual results of the strike idea was "strikingly" illustrated locally the other day when a "walkout" was pulled off at the Griffin fruit farm by the boys employed there as cherry pickers. Becoming imbued with the idea that they were not receiving enough pay they refused to work unless a cent more per quart was promised. This being refused, they "held out" by going in a body to another farm to pick pears. After an afternoon of strenuous labor at this occupation, the strikers found that they had earned exactly half as much as they had been making in the same length of time at their former job. Even at that, they fared much better than the rank and file of most bodies of strikers. Whatever may be the ultimate benefit to labor in the aggregate, the working men themselves are always the victims of the strike system.

"PREPAREDNESS" FOR NORTHVILLE.

Word has been received from the Navy department at Washington through Hon. P. H. Kelley, that the gun and pyramid of shells applied for some months ago, to be placed on the school grounds has been secured and will be shipped here as soon as the village council sends instructions to that effect. The outfit is mentioned in the letter to Mr. Kelley from the Assistant Secretary of the Navy as a loan.

DEEP SPRINGS WATER CO. GROWING.

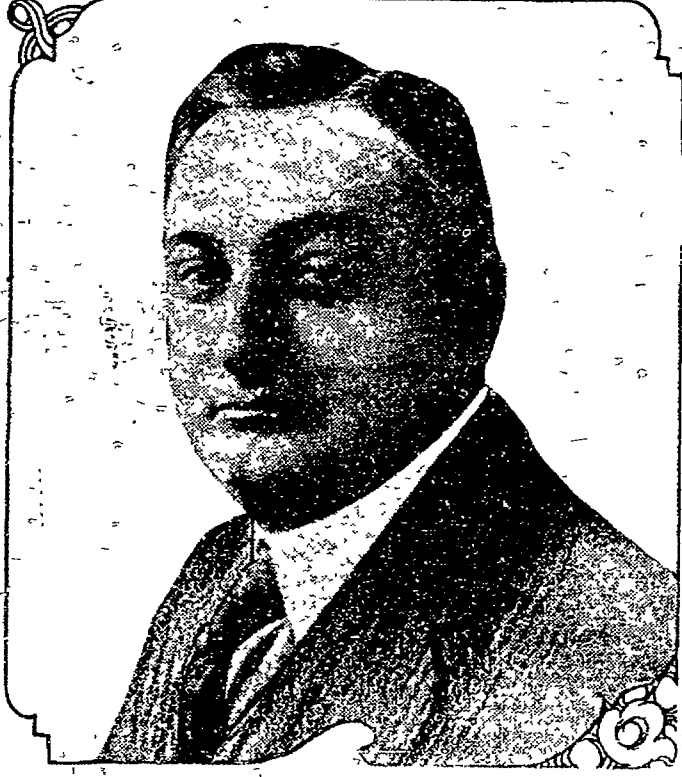

A meeting of the stockholders of the Deep Springs Water Co. was held last Monday for the purpose of enlarging the business. Mr. W. A. Carruthers of Toledo, O., was elected general manager. The officers are, President, George B. Yerkes; treasurer, Patrick B. O'Brien; secretary, Wm. Yerkes of Northville.

The Bryan boys, formerly of this place are also interested in this company, which is putting on the market in Detroit a spring water produced in our town.

MAJESTIC THEATRE, DETROIT.

Frank Keenan and Ena Markey in a play of surprises entitled "The Phantom," is to be the feature film in the varied picture musical program to be offered on the Majestic theater next week. Sunday afternoon. This new play is a comedy and dramatic not less than a love story. It is said to show the two stars in great advantage. Both Mr. Keenan and Miss Markey were prominent in the speaking stage before they had any vehicle so attractively do you at your neighbors. When they are in the RECORD.

Congressman George E. Gorman, Who Will Speak on "Patriotism And Pork" at the Chautauqua

HON. GEORGE E. GORMAN.

UNDER our system of making appropriations for the improvement of rivers and harbors and the erection of public buildings, many abuses have grown up," says Congressman George E. Gorman, who will speak here on "Patriotism and Pork" on the fourth afternoon of the Chautauqua, "and if the system continues these abuses will grow to larger proportions."

The principal cause of the development of the 'pork barrel' is the absence of a budget system, and until such a system is adopted the 'pork barrel' method will continue. Sooner or later we must adopt business methods in appropriating public funds.

Congressman Gorman will cite many instances in his lecture of the squandering of public funds through 'pork barrel' methods—as, for instance, the building of a \$100,000 federal courthouse and postoffice in a little Virginia town of only 2,500 inhabitants, which was provided for in the public buildings bill of 1913. Senator Kern characterized this bill as "the boldest and most audacious raid on the public treasury that has been attempted in recent years."

Mr. Gorman is widely experienced in governmental affairs and has represented one of the Chicago districts in Congress.

Northville Chautauqua July 24 to 28, inclusive.

GEORGE HINMAN DEAD.

George B. Hinman of Billings, Montana, died at his home there last week Friday.

Mr. Hinman was born here and attended the Northville school. At the age of 21 he went to Montana where he has since resided. In 1904 he was united in marriage with Miss Minnie Sump of this place.

In 1908 Mr. Hinman took up a ranch of 150 acres in Lake Park, 30 miles from Billings. He made the required improvements, proved up his claim, and received a deed in 1913.

He had been ill with stomach trouble for several years and in June was forced to go to a hospital for treatment.

His mother, Mrs. Kittie Hinman, and sister, Miss Ruth were visiting relatives here when a telegram was received telling of his critical condition. They left at once but death came before they could reach him.

He leaves a wife and three small sons, besides the parents, two brothers and a sister.

BAND HAVE OUTING.

The Band returned from Lake Orion Sunday night, subdued, and happy. Mr. John Winters, as host, proved a royal entertainer. The keys of the resort were turned over to Mr. Porter as manager of the Band. Cakes, lunches and amusements were open to all the boys.

The Band, under the direction of Prof. Mearthur of Detroit, made a great hit with the management of that popular resort and negotiations are under way for a return engagement on Labor Day.

NOTICE TO AUTOMOBILE DRIVERS.

The attention of automobile drivers is called to the following state law:

Sec. 24. Registration of Chauffeurs. Every person desiring to operate a motor vehicle as a chauffeur shall file in the office of the Secretary of State upon the payment of a registration fee of two dollars, a verified application on a blank to be furnished by the Secretary of State for that purpose containing:

(a). The name and residence address of the applicant and that he is competent to operate a motor vehicle and is over eighteen years of age; Provided, That for all registrations after August first in any registration year a fee of one-half the rate provided in this section shall be paid.

The above law will be strictly enforced in the village of Northville.

BY ORDER COMMON COUNCIL.

ERNEST LYKE, Marshal.

H. H. JONES OF NOVI DIED JULY 16TH.

Hamilton Jones, a life-long and prominent resident of Novi, reached the end of 72 years of life on Saturday, July 16, after an illness of some years' duration. Mr. Jones was born on the farm east of Novi village now owned and occupied by Fred Durfee. Some time over twenty years ago he established a general store at Novi which he conducted until a few years ago. He served as Novi's postmaster under the Cleveland administration.

The funeral services, conducted by Rev. P. A. Brass of Northville, were held from the home Tuesday with burial in the Novi cemetery, Northville. Carriage K. T. carrying out the beautiful service of their order at the grave. Mr. Jones leaves a widow and two sons Judd of North Farmington and Budington, who lives in Oregon.

BLUE RIBBON RACES.

What promises to be the greatest racing in the history of the trotting turf will be seen during the thirty-second Annual Blue Ribbon meeting of the Detroit Driving club at the state fair grounds, July 24 to 29. To insure contests in every mile the racing will be on the three-heat plan, in other words, every heat is a separate race. This will eliminate the laying-up or waiting until the pace-makers are exhausted. The only way a horse can win is to be among the first four in every heat and there will be just three heats to every race.

The Merchants' & Manufacturers' stake of \$10,000 is unusually attractive, for one of the lot has shown 2:03 ability and half a dozen are better than 2:05 trotters, so the record for the stake is certain to be lowered if conditions are favorable.

In the Board of Commerce stake of \$5,000 for 2:06 pacers are at least ten that can pace in 2:04 or better and one that has been in 2:02. Webber's band, the most famous traveling organization in the country, has been engaged for the week.

MALE QUARTET AS ENTERTAINERS.

The crowded streets of our metropolis were entertained by the male quartet last Saturday evening, while the usual band concert was discontinued on account of the engagement at Lake Orion.

When the Tigers Play in Detroit.

Following are the dates for the Tiger ball games in Detroit: July 23, 24, with Chicago; July 25, 26, 27, 28, with Washington.

GARRICK THEATRE, DETROIT.

The idea upon which "The Passing of the Third Floor Back" is based is "It's love that makes the world go around." This is the play which received the greatest number of requests from Mrs. Bonstelle's patrons and will accordingly be offered at the Garrick theatre, Detroit, next week.

The usual Tuesday, Thursday and Saturday matinees will be given.

ANNUAL MEETING.

The Annual Meeting of the Stockholders of the Northville Loan & Building Association, for the election of Directors and the transaction of such other business as may come before the meeting, will be held in Library Rooms, in the Village of Northville, Michigan, Friday evening, July 28, 1916, at 8:00 o'clock sharp.

I. E. VAN ATTA, Secy.

Northville, Mich., July 18, 1916.

NOTICE TO WATER USERS.

Notice is hereby given, that the hours for sprinkling will be limited to one hour—from 6:00 to 7:00 p. m., only. Anyone disobeying this rule will have their water shut off.

BY ORDER WATER BOARD.

Northville, July 19, 1916.

CARD OF THANKS.

We desire to thank our friends and neighbors for all their acts of kindness and sympathy and also for the beautiful floral offerings sent at this time of sorrow and bereavement.

MRS. ELICE JONES AND FAMILY.

CARD OF THANKS.

Mr. and Mrs. Simon and son extend their sincere thanks to their many friends and also to the Ladies' Aid society of the M. E. church for their kindness and floral offerings during their late illness and bereavement.

Special thanks to Rev. J. I. Walker for his comforting words.

MRS. ANNIE SIMON AND SON.

NOTICE TO TAXPAYERS.

The last day for paying village taxes is July 21. After that date 7 per cent will be added.

C. L. BLACKBURN, Village Treasurer.

Wanted, to Rent, For Sale, Etc.

For Rent For Sale, Lost found Wanted notices treated under this head for 1 cent per word.

LOST—Bunch of keys. Under please return to Carl Simpson on 52-1.

LOST—An umbrella between a condenser and Oldenburg's store. Under please leave at the latter place. 52w1p.

FOR SALE OR RENT—Farms. Geo. Gibson. Northville. Phone 130-33 40w1p.

In the Rush of Harvest

THERE'S nothing which makes a man so downright mad as to have twine run uneven. Stopping a binder once on this account is simply a nuisance, but such twine means constant interruptions—a serious matter.

USE PLYMOUTH TWINE

and be rid of such trouble forever. Plymouth is even in size and stronger than other brands. It runs full length, ties more bundles and does not fall down.

Buy the twine that's "always good" and order early. We sell it.

J. A. HUFF, Hardware, Northville

WEALTH

TO SUCCESS

EXTRAVAGANCE

The man with money got rich by Banking the money that some people waste.

IF YOU are extravagant roll this heavy stone out of your pathway to SUCCESS and WEALTH.

One from one leaves NOTHING. If you spend ALL you earn with your labor or in your business you have nothing left. That's arithmetic.

The way to quit throwing money away is to QUIT. The way to begin to put money in our bank and grow rich is to BEGIN.

Begin now and

BANK WITH US. WE PAY 3 PER CENT INTEREST.

NORTHVILLE STATE SAVINGS BANK.

Sugar That's Not Adulterated

PERHAPS you do not realize that the trade tricksters are adept at putting cheapening materials in sugar. Yet such is the case. Powdered starch and finely ground sand are among them. We are careful in our buying to deal with only the wholesalers of known reliability. Granulated, powdered and black white sugar, also brown sugar here. All are 100 per cent sugar.

C. E. RYDER. NORTHVILLE, MICHIGAN.

TOLEDO PUTS EMBARGO ON CHILDREN FROM NEW YORK CITY

In an effort to prevent the introduction of infantile paralysis into the city an embargo has been placed on all children from New York City, because that city is in the grip of an epidemic. All those arriving from the east, who can show residence in Toledo will be kept in quarantine in their home for three days. The others will be turned over to the local board of health, and sent on duty at the quarantine room, which has been established at the union station. They will be kept in the same all children under 16 years of age.

SYMPTOMS AND TREATMENT OF INFANTILE PARALYSIS; STRICT PRECAUTIONS NECESSARY

Symptoms—Infantile paralysis starts with a cold, which usually takes the form of a running nose and frequently sore throat. Often a slight fever and stomach disorders accompany the cold. Ninety per cent of the cases in the New York City epidemic, are children under the school age, but adults are not immune.

The patient will complain of weakness. A slow paralysis will follow affecting at first the arms and legs and possibly one side.

After two weeks the paralyzed parts will begin to waste away, while the stiffness gradually diminishes.

Treatment—The infant a child, is suspected of having the disease a doctor should be called.

The patient should be completely isolated.

The limbs and parts of the body affected should be given absolute rest. Paralyzed arms and legs must be bolstered up with pillows and the weight of clothing kept from them by means of hoops or some such device.

After the paralysis leaves the limbs the most important curative measure is massage and training of muscles affected.

The contagious period lasts 28 days, during which the strictest caution must be observed against spreading the disease.

Only one person in addition to a physician should take care of the child, and the nurse and doctor should wear special garments for sick room attendance.

Never use raw milk, even the best. Pasteurize or boil it. Scum is not caused by heated milk, unless it is the only food. Heating destroys tuberculosis and typhoid germs.

Cause—The cause is microb. bacteria which enter through the nose and throat. Allow no operation on the nose or throat while the epidemic lasts.

The above advice is given by Dr. Abraham Jacobi, of New York, recognized as the greatest authority on infantile paralysis in the United States.

AN IMPROVED WELL BUILT BY AMERICAN TROOPS BELOW BORDER

Improved well near U. S. field headquarters in Mexico.

The American soldier is versatile. There is no obstacle too big for him to overcome. Because of his ability to get himself out of almost any predicament he is having a fairly good time in Mexico. He refuses to drink water from holes and streams, and has dug wells in the desert which supply a superior quality of water.

DEMANDS TURKS WHO CARRIED OFF ALLIED RECORDS BE PUNISHED

WASHINGTON—Vigorous protest has been made by the United States to the Turkish government against the action of the governor-general of Syria in breaking into the French and British consulates at Beirut and carrying off their archives after the American consul-general there had placed the seal of the United States on their doors.

It became known here today that many prominent Syrians recently executed by the Turks were condemned because their names appeared in papers taken from the violated consulates. According to official information, the mere presence of the names in the consular records served as a death warrant without further proof of antagonism to the Turkish government.

WANT BORDER REGIMENTS AT WAR STRENGTH

WASHINGTON—Immediate organization of an extensive national guard recruiting service was authorized today by the war department to bring regiments on border duty up to full war strength of about 160,000 men. With nearly 50,000 regulars on border duty, the government would have 210,000 men or more engaged in protecting the line.

Three officers will be assigned to the recruiting service for each regiment ordered to the front. Each separate battalion, company, battery or other unit will have one officer. The adjutant general of the respective states will supply the names of officers for this duty.

Recruiting has been made necessary by the fact that all draft men and those with dependents to support are to be withdrawn from the guard regiments as rapidly as possible.

WANTED—Ambitious men or women to open a Cleaning, Dyeing and Pressing Shop in every neighborhood. We teach you how. No capital or experience necessary.

Dinner Stories

The kindly dame de compagnie attached to a young ladies' finishing school was about to take two of her pupils to a picture show. They were certain pictures in this collection, mes-

demselles, which I do not wish you to behold, I am served, halting upon the threshold. "But how shall we know which they are, madame?" goggled one of the young ladies. "I myself will point them out to you," replied the worthy dame.

An amusing incident happened at a club in Fall River. A member, having lost his umbrella there, caused the following incident to be put up in the club hall. "The gentleman who lost his umbrella," said the club secretary, "is a very nice fellow, but he is a bit of a duffer. He is a member of the club, and he is a very nice fellow, but he is a bit of a duffer."

The club secretary, who was a very nice fellow, but he is a bit of a duffer. He is a member of the club, and he is a very nice fellow, but he is a bit of a duffer.

Who, sir? "He is a very nice fellow, but he is a bit of a duffer. He is a member of the club, and he is a very nice fellow, but he is a bit of a duffer."

What? "He is a very nice fellow, but he is a bit of a duffer. He is a member of the club, and he is a very nice fellow, but he is a bit of a duffer."

At one time a man of the house was expressing his appreciation of the service in complimentary terms while assuring the minister to put up his team. His little son ran following him, and after saying the minister a minute or two exclaimed:

"Why, papa, you said he was a one-hoss preacher, and he's got two hosses!"

KILLED BY MAN SHE TRIED TO UPLIFT

THEN DERELICT TRIES TO BE SMIRCH CHARACTER OF MISSION WORKER

"WAS A GOOD WOMAN" HE ADMITS

Momentary Return of Impulse to Be generate Career Causes Him to Shoot Friend

Cincinnati, O.—Stolidly and with seemingly unvarying confidence, Mrs. Nannie Beatty strove for ten years to rekindle the flame of self-respect and self-reliance in the breast of Harry B. Toker, and to save his soul. The result of it all was the loss of her life. She was killed by a bullet fired by her husband, who had been driven to the point of insanity by the loss of his mind.

Mrs. Beatty was shot five times and killed by Toker in her parlour in Cincinnati. She was a very nice woman, but she was a bit of a duffer. He is a member of the club, and he is a very nice fellow, but he is a bit of a duffer.

At one time a man of the house was expressing his appreciation of the service in complimentary terms while assuring the minister to put up his team. His little son ran following him, and after saying the minister a minute or two exclaimed:

"Why, papa, you said he was a one-hoss preacher, and he's got two hosses!"

SUNDAY SCHOOL LESSON

Comments by
Rev. Ernest Bourner Allen, D.D.
Pastor of the Washington St.
Congregational Church and the
Marion - Lawrence - Sunday
School, Toledo, Ohio.

LESSON FOR JULY 23, 1916.

Lesson Title: "Paul at Corinth"

Lesson Text: Acts 18:1-22. Memorize vs. 9, 10.

Golden Text: "Be not afraid, but speak and hold not thy peace," Acts 18:9.

I. The Appeal to Business.

Paul was somewhat discouraged over his reception at Athens. Culture there was cold and critical. At Corinth he stayed longer, about a year and a half. We have two valuable letters which he wrote to the church there. In them he talks very plainly to his converts and in one of these letters there is a perfect gem of literature—the apostrophe to Rome.

There is no letter to the church at Athens. We know of no church there. Is culture harder to reach than business? Why? If you were starting out to preach would you rather go to Athens or Corinth, to the university center or to the place of big business, of great factories, of countless trade opportunities?

Religion has a big message to this bustling business world, so eager to "get there," so anxious for men who "make good." There can be no business without honesty, no trade without credit, no barter unless men keep their word. Honesty, faith, reliability—these are fundamental religious essentials. The world would revert to barbarism if religion ceased its restraining guiding work in the hearts of men. Business men want honest clerks, stenographers and secretaries. They must be trained by homes and Sunday schools and churches. These are the institutions whose chief business it is to make reliable character.

II. Ministerial Support.

Paul supported himself by making tents, while he was preaching. We know that he also received gifts from some of his churches and that he was sometimes offered the hospitality of a home. There are folks who think a minister should live that way today. When I began preaching I used to "board around." That was before I was married, of course. Subsequent to that I had to "board around." We have learned, however, that it is better to pay school teachers and preachers a fair salary and give them the privilege of boarding themselves. It increases their self-respect and their efficiency. Only in the most primitive communities does the old custom prevail.

So also do modern preachers at a part of a minister's pay, a high number. I once received six hundred pounds of new maple sugar as a donation. It was nice sugar. It was in addition to my salary, then \$100 per year. My college mate made short shrift of the sugar. He did not pay any bills. It was an expression of generosity. Well, the people of our day are pretty well agreed that a minister should stick to his preaching and pastoral work, and that he should have a living wage.

Is the minister paid a living wage? Yes and No. In some cases he gets a generous salary. In many cases he is not paid on a level with other professional men, or even of common labor. He is made an object of charity and compelled to depend upon barrels and boxes of second-hand clothing for his home equipment. It is fine to send such missionary barrels. When will the churches pay a living salary so that charity will be no longer needed? Does a church fulfill its duty to the ministers at the front by sending them old clothes and second-hand books? Sixty per cent of Congregational pastors receive less than \$1,000 per year. Ministers' salaries have not kept pace with the increased cost of living. A large proportion of ministers in all denominations receive a salary LESS than the wages paid a union brick layer in New York City. No one can claim that ministers as a class are greedy and self-seeking. Is YOUR church paying its pastor a living wage? If not, WHY not?

III. Folks Near the Church.

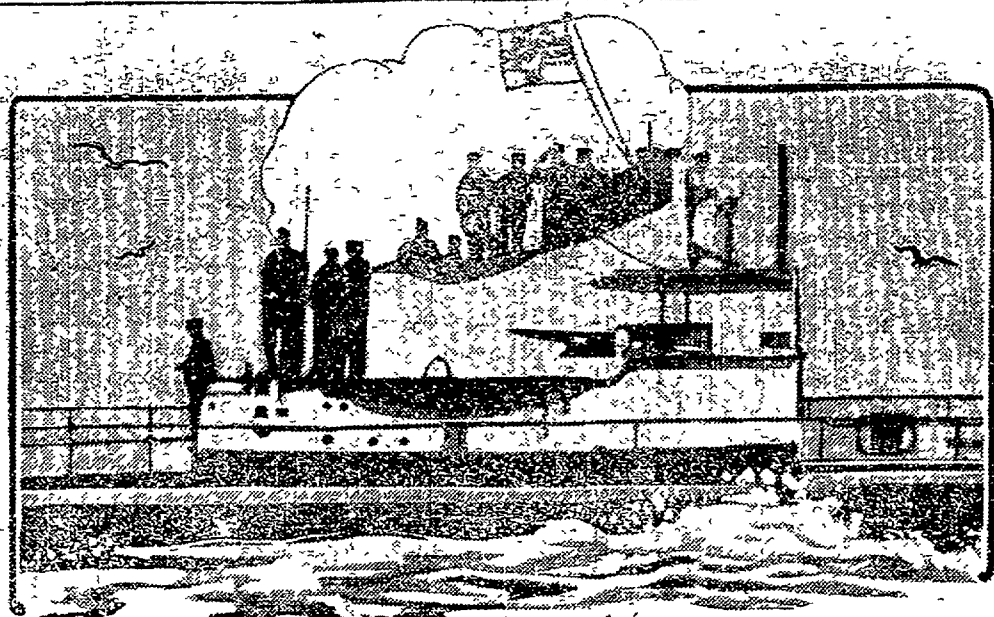

There is a Scotch proverb which says:

"A near the Kirk,
Afar from God."

My experience is that people near the church are not usually the most regular attendants. Paul, Silas and Timothy, so the Record says, went to the house of a man named Titus, "one that worshipped God, whose house joined hard to the synagogue." Evidently he was of a different sort. How is it with you?

And what do you know about the environment of your church? Who are its neighbors, therefore YOUR neighbors? When was the last census

HUGE U-BOAT LINER IS NOT A WARSHIP, SAYS UNCLE SAM

Germany's submarine liner.

The German supersubmarine Deutschland is not a warship, says the U. S. government. That means that more vessels of this type probably will soon visit this country.

GERMAN SUBMARINE CAUSES NEW COMPLICATIONS

WASHINGTON, D. C. (Special)

The arrival in American waters of the giant German submarine liner Deutschland is regarded in official circles here as an epoch-marking event, not only because it foreshadows possible new methods of warfare in the present struggle in Europe, but for the reason that it presents to the United States new problems of defense.

Among the interesting results of the arrival of the liner, which is a converted merchant vessel, is the fact that it is the first of its kind to cross the Atlantic with a cargo of merchandise. The liner is the first of a new class of vessels, which are being built in Germany, and which are being sent to America to compete with the American liners.

With a sufficient number of submarine merchantmen Germany can defeat entirely the British blockade, which has produced a shortage not only of food but of war materials in the United States. The liner is the first of a new class of vessels, which are being built in Germany, and which are being sent to America to compete with the American liners.

How is your church winning its neighborhood? How is your church winning its neighborhood? How is your church winning its neighborhood?

WASHINGTON, D. C. (Special)

By loading the Deutschland for the return voyage with a cargo of war materials Germany will destroy its own argument that the United States has been unneutral because the allies were able and the central powers unable to obtain and safely transport American products.

In arming the submarine great chancier with two small defense guns Germany, also has abandoned the contention that "any armament makes a vessel a ship of war subject to attack without warning." The Deutschland, it is said, has the "gun deck" of the United States and compels the nation to reckon with conditions under which it will be possible for an enemy to dispatch hundreds of great submarines across the Atlantic and Pacific.

If the voyage of the Deutschland sounds the knell of British sea supremacy the United States faces a possible menace to the maintenance of the Monroe doctrine.

Stopping Child Marriages.

The custom of marrying girls when they are mere children of 10 or 12 years is increasing rather than decreasing in Bengal and other parts of India. The resulting racial degeneration is becoming so obvious that laws have been passed in several regions forbidding the marriage of girls under 14.

Household Hints

HOW TO FREEZE DESSERTS

With ice cream freezer, burlap bag, wooden mallet or ax, small saucepan, sufficient ice and coarse salt, the process neither takes much time or money. Crush the ice finely by placing in bag and giving a few blows with mallet or broadside of ax. If there are any coarse pieces, remove them. Place can containing mixture to be frozen in wooden tub cover and adjust top. Turn crank to make sure can is in socket. Allow three level measures of ice to one of salt, and repeat until ice and salt come to top of can, packing solidly, using handles of mallet to force it down. If only small quantity is to be frozen the ice and salt need come only a little higher in the tub than mixture to be frozen. These are found the best proportions of ice and salt to insure fine-grained cream, sherbet or water ice while equal parts of salt and ice are used for freezing trappes.

The mixture increases in bulk during freezing, so the can should never be more than three-fourths full. Overcrowding the can cream will be made coarse grained. Turn the crank slowly and steadily to expose as large surface of mixture as possible to ice and salt. After frozen to a mush, the crank may be turned more rapidly, adding more ice and salt is needed. Never draw off salt water when mixture is frozen, unless there is possibility of its getting into the can, for salt water is what effects freezing; until ice melts, no change will take place. After freezing is accomplished draw off water, remove dasher, and with spoon pick solidly. Put cork in opening of cover, then put on cover. Repeat freezing using four measures of ice to one of salt. Place over top newspapers or piece of garpet; when serving time comes remove can, wipe carefully and place in vessel of cool water; let stand one minute; remove cover and run a knife around edge of cream, invert can on serving dish, and frozen mixture will slip out, should there be any water, passed

over the well lid in serving dish.

Ice Cream Surprise.

Have you ever tried this? It is not a new thing at your next luncheon. Just before serving ice cream make a meringue with whites of 3 eggs and 3 tablespoons of sugar. Turn the ice cream on a tin round sheet of sponge cake on the serving plate, cover it all with the meringue. Do not smooth it. Put the plate on a piece of wood and put it in a quick oven a few minutes to brown slightly. The cream will not melt because the wood and meringue both act as nonconductors of the heat.

Strawberry Recipes.

Strawberry Sauce for Puddings.—To one large tablespoonful of butter beaten to a cream add gradually 1 1/2 cups powdered sugar and the white of 1 egg. Beat till very light and just before serving add 1 pint of mashed strawberries. This is delicious.

Strawberry Sherbet.—To the juice of 1 quart of milk add the juice of 1 lemon. Sweeten to taste.

Delicious Strawberry Mousse.—Milk, vanilla and cream 1 quart of strawberries. Add 1 coffee cup of granulated sugar and mash if necessary. Use 1/2 pint of thick cream and

as much of cold milk beaten stiff, and add to the sweetened berries. Put into a mold with a tight cover and pack in an ice cream bucket, or any pail in 2 parts crushed ice to 1 part rock salt for 2 hours, when it will be ready to serve.

Strawberry Pie.—Make a nice rich pie crust, put over the bottom of a deep pie pan, turned upside down; put 3 or 4 fork holes in the crust to keep from rising up from the pan. Bake and when a nice, light brown, turn into a plate. The crust is then ready to fill. Have ready one quart of fresh strawberries, sweetened to taste; fill the crust with the berries, cover the top of the berries with the whites of 2 eggs and 1/2 cup of confectioners' sugar with 1 tablespoon of extract of vanilla. Set in the oven just long enough to light brown the whites of the eggs.

Strawberry Latitudes.—Whip 1 cup of cream till very stiff and light; add 1 pint of strawberries into small bowl with a silver knife and stir them lightly into the cream. Sift 1 tablespoonful of granulated sugar on top; cup cold water, and when soft place over the steam of a kettle (4) dissolved, add by degrees to cream and berries, stirring and adding 1/2 tablespoonful of powdered sugar. When the mixture is thick and creamy, turn into a well oiled mold and set to cool. Serve with lady fingers and macaroons.

MINERAL PRODUCTION BY

Figures of Survey Indicate Output of Lead and Zinc is Enormous.

Washington.—Preliminary figures compiled by the geological survey indicate that the country's production of lead and zinc ores during the first half of 1916 exceeded that of the same six months period, 1915. The output for 1916 is estimated in a survey statement tonight at 25 to 30 per cent greater than that of the same months last year. Estimates of zinc concentrate output for the first six months of 1916, compared to 280,000 tons during the entire 12 months of 1915. Unsold stocks of zinc concentrates in June were larger than usual, but lead concentrates were in unusual demand with prices almost double the average for 1915.

COAL PRODUCTION SHOWS INCREASE

Washington.—Figures of the United States geological survey show that the output of bituminous coal in the United States during the past six months has been the greatest ever recorded in any half-year period. Estimates by C. E. Leshner, of the survey, based on returns from over 100 railroads originating coal and coal shipments, indicate that the production during this period was 261,000,000 tons, an increase of 35 per cent over the first six months of 1915 and of 5 per cent over the last six months of the same year, and greater by several million tons than the record established in the last half of 1913.

CANAL DEFENSE SAID TO REQUIRE MUCH WIDER ZONE

Panama.—Gen. Clarence, R. Edwards and his staff seem to see in the recent exits of the German fleet from its base at Wilhelmshaven extraordinary facts bearing upon the military problem that will confront a United States fleet that emerges from the Pacific entrance of the canal when there is a powerful enemy fleet of strength waiting near the canal entrance. The opinion of military men is now made up that additional heavy guns must be placed on Taboga Island about 12 miles from the canal exit in order to hold an enemy fleet at a distance beyond which it cannot damage our fleet before it can take battle formation.

For the general information of congress General Edwards has had prepared a memorandum of the report given to him by the army and navy officers of his staff who were appointed to consider the subject of acquiring additional land at the Atlantic and the Pacific entrance, to be used for fortification purposes. More Land Urgently Needed. Following a copy of this memorandum: "In connection with the general proposition for acquiring additional land east and west of the Atlantic entrance of the Panama Canal it may be stated that, beyond any doubt, were the United States engaged at the present time in negotiating for the strip of land heretofore acquired and known as the Canal zone, a much larger amount of territory than the ten-mile wide strip originally acquired would now be insisted upon. Both military and naval officers, and especially those of both services who have been stationed in the canal zone, and in waters adjacent thereto are agreed that the zone should not be less than 30 miles in width, and preferably 40 miles. The present European war has proved that, as in the case of Dunkirk, a town can be subjected to an effective bombardment by artillery, aided by airships, with the hostile guns emplaced at a distance of 22 or 23 miles from their objective. While such distances may be regarded as extreme, and while it does not seem likely that a hostile expeditionary force will succeed in transporting and landing guns of caliber sufficient to bombard the canal from distance as navy officers of his staff who were appointed to consider the subject of acquiring additional land at the Atlantic and the Pacific entrance, to be used for fortification purposes. More Land Urgently Needed. It's Smooth as Silk

A Talcum Powder containing the
least particle of grit or foreign
substance is not a proper powder
to use on baby's tender skin—or
on your own.

Before you accept a toilet pow-
der rub a little on the back of the
hand or on the tender part of the
wrist—you will easily detect the
presence of grit.

Apply this test to NIAL'S
Toilet-Talcum.

you will notice two things—its
perfect smoothness and a deligh-
tful odor. It is a delightful powder
in every way.

Its smoothness combined with
its antiseptic properties leaves the
skin soft and velvety—and free
from irritation.

OBITUARY.

Mrs. Jennie Thayer VanSickle, whose
death was briefly mentioned in last
week's Record, was the daughter of
Hudson and Bershora Thayer, was
born in Plymouth township, Wayne
county, December 14, 1847, and died
Sunday, July 9, 1916, at the age of 72
years. On December 4, 1872, she was
married to George S. VanSickle and
with him came at once to their farm
one mile east of Salem where they
have since resided. To this union
one son, Harry VanSickle, was born,
Sept. 1, 1876, and who departed this
life March 11, 1913. Early in life Mrs.
VanSickle became a member of the
Second Congregational church, of
Salem, and as long as health per-
mitted was an earnest and devoted
worker in all its departments and
especially was she interested in the
Ladies' Gnome society, where she had
worked so faithfully since its organi-
zation and where she endeavored her-
self to all its members by her gentle, help-
ful and kindly manner. Her home and
her church were the great interests of
her life, and to them she gave the last
full measure of devotion. It was in
the home where this life told most of
the beauty of her noble, Christian
character. During her two and one-
half years of illness, and the sad
affliction of sightless eyes, she has
displayed the same sweetness and
patience that characterized her entire
life and endeared her to many. At
four o'clock last Sunday morning, she
passed peacefully into the presence of
Him, whom she had loved and served
so long.

There are left to mourn the loss of
the dear one, the husband, one daugh-
ter, Mrs. Harry VanSickle, a sister,
Miss Caroline Thayer, two brothers,
William U. Thayer of Washington, D.
C., and Judge Rufus H. Thayer of
Albany, N. Y. several nieces and
nephews and friends innumerable.
Day by day we saw you fade,
And gently pass away;
Yet often in our hearts we prayed,
That you might longer stay.

If love and care could death prevent,
Your life would not as yet be spent;
But in his wisdom God could see
That eternal rest was best for thee.

Funeral services were held from the
late home Tuesday afternoon, Rev. M.
Knowles officiating. Burial in Thayer
cemetery.

CARD OF THANKS.

I desire to express my gratitude to
the friends and neighbors who so
kindly and willingly assisted me dur-
ing my recent sad bereavement.
Especially do I thank those who fur-
nished automobiles, those who fur-
nished flowers, the choir and minis-
ter for his comforting words.

Reg. Friday, July 21.

A lady in California sends the fol-
lowing bit of rhyme written by one
who recently came from the Pacific
coast to her old home and suggests
"I think this would look well in the
Record."

There are many other countries
God made them all we know.
But here in dear old Michigan
He made the cowslips grow
And its golden glow reminds us
That He loved us well you know
For He gave us this dear country
Where the golden cowslips glow.
Oh, the meadows, and the woodlands,
And the verdant valleys low,
Where the rain is softly falling
And the bubbling brooklets flow,
Where I hear the robin's singing
From the orchards white as snow,
In my dear old Michigan
Where the apple orchards grow.
—E. M. C.

Features at the
New Alseum Theatre.

Fine program Saturday night. Mrs.
Frank Rose will sing.

On Wednesday, July 26, Mary Pick-
ford in "The Eagles Mate" will be
presented at this theatre. Two
shows Admission 10c.

U. S. MAY REVISE PAPER MONEY.

A serious question that is now con-
fronting the department of the treasury
is making paper money. So prominent
have counterfeiters become in the art
of photographing that they are able
to duplicate almost any bill that is
put out. Since there are about 200,000
different varieties of paper money, it is
a comparatively easy matter for them
to imitate one or more of the differ-
ent styles so closely that the average
person cannot detect the difference
between the genuine and the counterfeit.
Most people believe that the govern-
ment has a secret process for man-
ufacturing the paper on which bank
notes, etc., are printed. If they see the
colored threads in the paper they are
prone to think that the bill is good,
even though other points about it may
look suspicious.

As a matter of fact the process for
making this paper used by the govern-
ment, though supposed to be a secret,
can be imitated. The government pos-
sesses a distinctive process for mak-
ing extra different styles of bills and
unless one is quite familiar with all
the different kinds he is liable to be
taken in. Counterfeiters have learned
to put the colored threads into paper
to make it look almost like that used
by the government so it is no longer
safe to rely altogether on them as a
proof of the genuineness of a bill.

It is also a common trick for coun-
terfeiters to take, say a genuine 10-
dollar bill and "raise" it to a 100-
dollar bill, a 20-dollar bill and "raise"
it to a 200-dollar bill. By means of
the photo-engraving process they
have become exceedingly clever at
doing this. Because of the activity
of these crooks, government secret-
service operatives predict that it will
not be long before paper money in this
country will have to undergo a radical
change.

ORPHEUM THEATRE, DETROIT.

With Miss Lottie Williams as the
headline attraction the Orpheum thea-
tre will offer an exceptional bill of
vaudeville next week starting Monday
afternoon. Miss Williams will be
seen with a supporting cast of three
players in a playlet of "On Stony
Ground." The dialogue is rich in
slang phrases in which Miss Williams
is an expert. It is a musical mixture
of songs, dances and comedy that
burlesques the Shakespearean drama.
Three other acts will also be seen and
there will be Universal and Red
Feather feature films before and after
the vaudeville each day.

CHRISTIAN SCIENCE SOCIETY.

MEAT PRODUCTION AND THE DEMAND

Washington, D.C.—That meat production has not kept pace with the increase in population and that its failure to do so, combined with increased cost of production and diminished purchasing power of the money unit, has contributed to higher prices not only in the United States but all over the world is stated in Part I of the exhaustive report on the meat situation in the preparation of which specialists of the U. S. Department of Agriculture have been engaged for some time. This country, it is said, is participating in a world-wide movement and it is not expected that the situation will undergo any radical change in the immediate future. On the other hand, it is believed that there will be a gradual growth and expansion in the world's production of beef, mutton and pork which may or may not equal the rate of increase of the meat-eating population.

In America this gradual expansion appears to have begun already. Between 1907 and 1913 there was a marked decline in the number of cattle but in the last two years this has not only stopped but has given way to a perceptible increase. The estimated number of farms and ranches on January 1, 1916, 61,441,000, is, however, still much below the corresponding figure for 1907, 72,534,000. With the exception of temporary checks due to losses from hog cholera, there has been in recent years a persistent increase in the production of swine. On January 1, 1916, the number in the country was estimated at 68,000,000 as compared with 58,200,000 in April, 1910. On the other hand, the number of sheep declined during this period from 52,500,000 in 1910 to 49,200,000 in 1916. As the decrease, however, is not sufficient to offset the increase in cattle and swine, it may be said that the total production of meat in the United States is increasing but that this increase is not yet proportionate to the growth in population.

The available supply of meat would be much greater if it were not for the enormous losses caused by disease and exposure. Since 1900 it is estimated that from 1,100,000 to 1,475,000 cattle have died each year from disease and from 600,000 to 1,500,000 from exposure. With sheep, the losses from disease have been about the same, but from exposure much larger. With swine the relative prevalence of hog cholera is perhaps the determining factor in the annual loss. In 1894 this was as low as 2,200,000, but in 1914 it amounted to 7,000,000. If these 7,000,000 hogs had been saved, it is said, they would have produced enough meat to furnish every family in the United States with 40 pounds of pork.

Despite these facts the United States remains the greatest meat producing nation in the world. Approximately twice as much meat is consumed in this country as in Germany before the war and the total normal consumption in Russia, Great Britain and France is less than in Germany. The per capita consumption is also far greater in this country than anywhere else with the exception of Australia and New Zealand.

Our own exports now consist largely of pork and pork products and these are derived to a great extent from corn. In the fiscal years 1914 and 1915 we imported more fresh, chilled and frozen beef and mutton than we exported, and more beef of all descriptions was imported in 1914 than was exported. In this limited respect we have joined the great majority. Practically the whole of the world's export trade in meat is maintained by nine countries—Argentina, Australia, Canada, Denmark, Mexico, under normal conditions, New Zealand, the United States and Uruguay.

WRONG MAN GETS PAPERS

Divorce Summons Intended for Negro Goes to White Wife

Louisville, Ky.—Through an order by Judge Samuel B. Kirby, divorce attorneys must incorporate in the caption of the petition whether the parties to the cases are white or negro. Unless such information is placed on a prominent position the clerk in charge of the suit desk in the office of the Circuit Court will refuse to issue processes in the case.

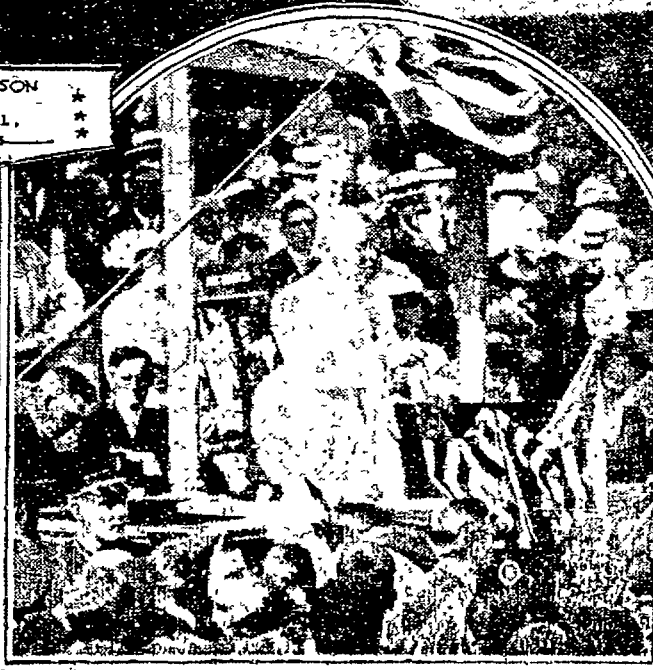

This ruling was brought about through the action of a deputy from the Sheriff's office, in serving a summons in a divorce case on a white woman when it should have been served on a negro woman of the same name. After being served with the notice the woman (whose husband was out of town on business, fearfully told him of the notice that had been served on her. She said that there had never been any trouble between her and her husband and she was unable to account for his action. It was not until a few days later that the situation was cleared up to the satisfaction of the wife.

WHEN THE PRESIDENT DECLARED NATION "MUST BACK PRINCIPLES"

PRESIDENT and MRS. WILSON
ARRIVING AT
INDEPENDENCE HALL.

During his address before the Associated Advertising Clubs of the World at Independence Hall, Philadelphia, the President described himself as in a "fighting mood" and declared that the nation must back principles "at whatever cost." "America," the President said, "must be ready in every point of policy and action to vindicate, at any cost, the principles of liberty, justice and humanity." He insisted on real "America first" and told his hearers that it means nothing unless translated into action.

AMERICA MUST BE READY IN EVERY POINT
OF POLICY AND ACTION

MICHIGAN TROOPS READY FOR MEXICAN DUTY

Camp Ferris, Grayling, Mich.—All preparations have been completed for putting Michigan troops in shape for border duty. If all the units of the Michigan brigade are dispatched to the same place, which seems probable, the artillery, ambulance company, No. 2 and, probably, the cavalry will be the first independent troops to leave here. Special attention has been given these advantages in preparing them for service. It is also probable that the field hospital will go south as soon as half the brigade has gone as this unit, likely, will be needed there more than at Camp Ferris. Ambulance company No. 1, of Detroit, will probably be the last unit to leave.

GIANT FISH TERRORIZES NEW JERSEY COAST

MATAWAN N. J.—A man-eating shark which was stranded far from the Atlantic ocean, swam through Raritan bay and up the Matawan creek, killed a number of bathers and seriously injured others. It is understood that an effort will be made at once by persons identified with the management of Jersey resorts to enlist the aid of Governor Freider in securing state aid to hunt down and destroy the shark or sharks which have caused so many deaths in waters hitherto considered absolutely safe.

COMMON ERROR

The Same Mistake Is Made By Many People.

It's a common error
To plaster the aching back.
To rub with liniments, rheumatic joints.
If the trouble comes from the kidneys.
It's time to use Doan's Kidney Pills.
Here is convincing proof of merit.
Peter Wilhelmson, Benron St., Oak Harbor, Ohio, says: "I had a bad attack of backache and could hardly endure the dull pain across my kidneys. I tried several kidney medicines, but they did me no good. I then got Doan's Kidney Pills. They helped me in every way. I now keep Doan's Kidney Pills on hand and take a few doses now and then, always with good results." Price 50c at all dealers. Don't simply ask for a kidney remedy, get Doan's Kidney Pills, the same that Dr. Williams' Pink Pills for Pale People.

LOCATED MILLION IN GOLD ON FARM

TEXAN BUYS FIREARMS WITH WHICH TO PROTECT GREAT STORE OF BULLION

WAS DIGGING FOR TWENTY YEARS

Tunnels He Is Making, He Says, Follow Lines of These Made to Bury Wealth

Weatherford, Tex.—After five years of tunneling on his farm, near here, Carl Curtis, a carpenter, believes that he is practically in reach of what he confidently expects to be a fabulous fortune in buried gold bullion.

He considers that it is only a matter of days until he will be in possession of the treasure, which he believes is located almost within a few feet. It will total at least \$1,000,000, he thinks, and may open the way to a long hidden mine, capable of yielding untold wealth. So firm is his own conviction that the end of his long search is at hand that he has, gotten some of his friends and neighbors to think along the same way.

Curtis' dream of the hidden gold began nearly a quarter of a century ago, when he was working with a surveying party near the present tunnel site. He noticed a tree, curiously marked with a spike and a cross. Not far away he found two walnut limbs stuck four feet into the ground, and upon digging there, he brought to light a bowie knife scabbard of black leather and the shoulder blade of an animal with the larger end sawed at an exact angle.

Later on a man from Thurber appeared with a map, which he said he had obtained from a Mexican, indicating that Santa Anna, the Mexican General had buried a treasure there. The land had been bought at that time by Curtis' father, and the owner of the map was not permitted to prosecute his search.

They included pictures of a woman lying on her back, a horse's hoof, a mountain and an altar. Once Curtis had this "map" which he kept hidden in the tunnel, leading to his treasure, in the buried gold. Air is supplied by shafts which, Curtis believes, were part of the original excavation, because of the ease with which they were opened.

Curtis has built a stout wooden cage over the opening to his tunnel, and has erected nearby a cabin where he sleeps while at work. His residence is in Weatherford. He employed three men to help him in the work and has armed himself to protect the treasure when it is found.

Ex Postmaster Is Inventor
G. N. Morris of Leavenworth, Kan., formerly postmaster at Lane, in same state, has invented an electric gun designed for coast defense which the United States Government has recently investigated. Mr. Morris at present is connected with the amusement company at Ottawa, Kan.

HOW OUR SOLDIERS SHAVE EACH OTHER ON PERSHING'S LINE

GERMAN SUBMARINE ARRIVES IN U. S. HARBOR

The trip of the super U-boat across the Atlantic and safely into harbor at Baltimore represents a most daring and remarkable feat as the fact that it was on the way was well known and yet the boat managed to elude the hostile warships and reach its destination unchallenged, on July 10.

The big submarine was unarmed when it reached port and carried a huge cargo of dye stuffs and other merchandise.

The commander reports that they left Helgoland on June 23rd and made the trip across in fifteen days.

NEW YORK TO LONDON

In Thirty Hours To Be Slogan of Aircraft Company

New York—New York to London in "30 hours" will be the slogan of the American Aircraft Company, which has been incorporated in Wilmington, Del., with a capitalization of \$5,000,000, to operate a transatlantic air and water passenger and mail service, beginning, if present plans are carried out, next October.

Frank Dupree, who has made more flights across the English Channel than has any other aviator and has made the most sustained flights over the same territory, according to one of the incorporators, will be the President of the new company, which will have upon its directorate several practical aviators.

The hydroaeroplane, which will be manufactured near this city, has been patterned after the lines of the seaplane in so far as an resistance is concerned, and will be propelled by four 300 horse-power motors. It has been estimated that the machine will develop a maximum speed of 150 miles an hour.

The machine will weigh 8,000 pounds, will carry 3,000 pounds of fuel, and will have a lifting capacity of 25,000 pounds.
