## BOARD OF COMMERCE TO GET NEW FACTORY

AMERICAN LADY CORSET FACTORY SEEMS ASSURED TO LOCATE HERE.

SHAFER OPERA HOUSE TO BE REMODELED WHEN THE DETROITERS DECIDE TO COME.

The committee in charge from the board of commerce met again Monday with Supt. Stark of the American Lady Corset company of Detroit relative to that company's establishment of a branch factory here. Everything seems assured now if the help desired, one hundred or more is available. A canvass will soon be made as to employees, mostly women, who will command wages from \$12 up to start with and who in time may earn as high as \$24 a week.

The Shafer Opera House is to be leased for a term of years and remodeled for the factory work.

It would seem that that enough help should be easily available in Northville and vicinity inasmuch as a considerable number of Northville people, both men and women, have for some time been working at factory work in other towns. It would certainly be better for them to work in our own village, not only as a matter of convenience but saving in expense, since daily fare, even for a short distance makes a large yearly or even monthly difference in wages. Better wages and no fare ought to be a sufficient inducement to provide help in plenty.

## YERKES FAMILY REUNION.

Friends to the number of fifty gathered at the pleasant home of Mr. and Mrs. C. C. Yerkes last Friday, and enjoyed a very delightful reunion of the Yerkes family. A picnic dinner and social greetings and visits occupied the daylight hours and a fireworks display that would have done credit to any Fourth of July celebration anywhere, was a feature of the evening. The guests from out of town were Mr. and Mrs. Geo. B. Yerkes and son Robert, Mr. and Mrs. Ralph Dusenbury and two sons Arthur Power and family, Detroit; Mr. and Mrs. Josiah Emery and son, Pontiac; Mr. and Mrs. John Blackwood, Cleveland; Miss Edith Frost, Boston, Mass.; Mr. and Mrs. Charles Baker and son, Philly; Battle Creek; and Mrs. Charles Woodgrift and daughters, Leona and Gladys, of Detroit, who are spending the summer in this vicinity.

## ANOTHER NORTHVILLE MAN AUTO THEFT VICTIM

While M. E. Atchison of this village was eating his dinner Wednesday, in Detroit, his new Ford touring car, which was parked in Park place, disappeared. In the course of his efforts to lodge a complaint—which involved a series of trips from one place to another and interviews with official after official—Mr. Atchison was "consoled" by the information that \$25,000 worth of cars were stolen in the city that same day, 19 cars made up the report for the previous day. If Detroit doesn't find a way to put a check on this constant carnival of car stealing, the people will have to demand that the city be put under military surveillance by the state government—and it would need a considerable standing army, at that.

## "EIGHTY-FOUR YEARS YOUNG."

Mrs. Jane Sessions celebrated her eighty-fourth birthday anniversary by giving a delightful party to a number of her relatives and friends at her home on High street last Wednesday evening. A splendid dinner was served to a crowd of people in every way qualified to show their appreciation of the fact that a few were a "trifle over zealous in letting" Aunt Jane know that her good things were appreciated. The climax was reached when the lights were turned out and the beautiful birthday cake was brought in ablaze with its eighty-five candles which the hostess was able to extinguish with four vigorous puffs. A pleasant social evening followed after which the guests departed sincerely wishing "many happy returns." Those present were Mrs. Sessions' son Charles, and her sister Mrs. Laura McRobert, Mr. and Mrs. D. P. Yerkes, son Donald and daughters Margaret and Ruth; Mr. and Mrs. J. R. Trufant and daughter Laura; Mr. and Mrs. E. V. Belles and son Donald, and Mr. W. E. Scott.

## BIG REAL ESTATE DEAL.

By all odds the biggest real estate deal ever pulled off in this section was that of this week when M. N. Johnson sold his 160 acre Starkweather farm southwest of town to C. H. Young of this place and his brother, S. A. Young of Detroit. The price was upwards of \$40,000 and includes all of Mr. Johnson's personal farm property, his teams, herd of fine Holsteins and all the crops. In fact all that Jack moved off the farm with yesterday was his auto and a pair of overalls.

The farm is one of the best ones in the United States and is very desirably located. S. A. Young of Detroit is a well known manufacturer being at the head of the Young Product Co., manufacturers of auto parts. The other brother, C. H. Young, is the owner of the Hart farm opposite the Starkweather farm, and proposes with the two to make a regular western style of agricultural and stock ranch. The deal was negotiated through the Lovewell Farm agency.

## NORTHVILLE CHAUTAUQUA.

The dates for Northville's 1919 Chautauqua have been fixed for August 7 to 11, inclusive. A splendid program is promised, and if our boosters boost as they are learning to boost for, other good things that are coming our way now days, this year's chautauqua will be the most successful yet. The officers and committees are as follows: Pres. T. R. Carriagton; Vice Pres. Charles Van Valkenburg, Sec. Charles Dolph, Treas. E. H. Lapham. Committees: Grounds—George M. Henry, Ch. C. L. Dubuar, Wm. Scadden, C. S. Filkins and P. R. Alexander. Advertising—C. L. Blackburn, C. F. Murphy, N. I. Colf, W. T. Fitzgerald, and T. E. Murdoch.

Tickets—Ray Van Valkenburg, Mrs. E. Cobb, H. Ray Bogart, Mrs. E. A. Kohler, E. A. Wheeler, Mrs. Harry B. Clark, Harry Bogart, Ella Power and Mrs. C. F. Murphy.

## BALL GAME SATURDAY.

As noted in last week's Record, the Howell Sluggers will be on hand this coming Saturday afternoon to "do up" or be done up by the Northville Independents. All base ball fans take notice and on hand. A "twilight" return game is to be played next week Saturday evening at Howell, at 6:30 o'clock. These games will be interesting. Don't miss the home game, anyway.

## GRADING FOR NEW CEMENT ROAD BEING RUSHED.

The grading for the new cement highway on the U. S. Fishery road is progressing fine these days and the men are as far down as the Richardson farms. The new steam digger is doing rushing business and the steam shovel men have got a hustling organization now at work and things are moving very effectively. This week the engineers have made a survey of Main Street.

## BAND CONCERT SUNDAY AFTERNOON.

The Northville band will give a concert Sunday, July 13, from 2 to 4:30 p. m. in Oakwood Park on Cady street. Seats will be arranged for the ladies. This will be the first Sunday concert this summer, and a rare treat may be looked for.

## FAIR NOTES.

It is quite within the possibilities that an exhibition drill by the Detroit mounted police will be one of the attractions at our fair this year. As these drills have been made an annual feature of the Michigan State Fair, it will be "some stunt" if Northville gets them. If the management succeeds in the attempt it will be through the efforts of Assistant Commissioner of Police, George A. Walters, a former Northville boy, with a warm spot in his heart for "the old home town."

N. A. Clapp will have charge again this year of the Agricultural section. This was one of the greatest successes of the fair last year, even the State fair people commenting enthusiastically upon the quality and quantity of the display. Mr. Clapp is already at work on his preliminary plans and confidently expects to make his department even better yet this coming fall.

One of the big drawing cards for the fair is the fact that Robert Pointer of Dearborn, who is one of the most prominent stockbreeders in the United States, is to have an exhibit. Mr. Pointer is the owner of the world-famous Holstein herd leader, Rag Apple the Great, for which he paid \$125,000 last spring.

The South Lyon Herald predicts a record-breaking attendance at the Northville Wayne county fair this year, and especially commends the idea of having Saturday as one of the days, giving the opinion that that will be the most popular day.

The Wayne County Farm Bureau is to have an educational, agricultural exhibit at the fair and will also show the progress that has been made by the boys and girls' clubs.

It is already demonstrated that more room will be necessary for exhibits this year than ever before. Entries are already being listed.

Speed Superintendent Marvin Sloan says that there will be some big races at the coming Northville Fair.

## BOARD OF COMMERCE NOTES.

One new factory seems assured and another one is in view. President Huff is making things hum.

W. J. Fitzgerald, as chairman, and A. D. Hall, A. C. Balden and F. W. Simmons are appointed on the municipal committee.

Here's a hot item from the Dearborn Press: Mr. and Mrs. E. J. Owen of Saginaw spent Friday Saturday and Sunday with Mr. Owen's parents, Mr. and Mrs. T. J. Owen.

A former Northville boy, Lieut. Paul Penfold of the overseas aviation service, who was reported missing several months ago, was listed recently as "killed in action."

When the new aerial passenger route across the Atlantic gets to doing regular business, it will only cost you \$240 for a ticket—and possibly funeral expenses if the body is recovered.

The report that came to Northville last week of the death of Anna Hoar was a false one. The little girl is well, and has not even been sick, we are informed on the best of authority.

Farmington Ladies' Literary Club will present the name of one of its members, Miss Esther Boynton as a candidate for member of the school board at the school meeting next Monday.

One of the men whom Deputy Perrin helped escort to Marquette last week was the driver of the car that waited outside the Redford bank when the cashier, Mr. Houghton, was killed by burglars some time ago.

John Haggerty of Farmington has been appointed a member of the State Highway Advisory Board the final authority on the expending of the money for road improvement under the 50 million dollar bond act recently passed.

After publishing the Birmingham Eccentric for half a century, Whitehead and Mitchell have sold the paper. These veterans will be much missed from the country newspaper fraternity but it will probably be a relief to them to get free after serving so long a "sentence."

Six protestant churches of Pontiac are holding a 12 weeks' series of open-air Sunday evening union services, which began last Sunday night. The meetings are held in the street in front of the Congregational church and the 1,000 chairs provided were entirely too few to seat the congregation, and double that number are to be arranged next Sunday.

The second excursion and picnic of the Presbyterian Sunday school to Bob-Lo park came off Monday as scheduled and was a great success. Ideal weather, no accidents and a good attendance helped to make an occasion unanimously pronounced one of the most enjoyable "ever." A number of ex-Northville folks from Detroit joined the picnic, adding greatly to the pleasure of the day. The auto ride over the fine cement road, the beautiful boat ride and the many attractions at the island make up a combination of pleasure that would render even a pessimist happy.

The historic training stables at the Starkweather stock farm race track were destroyed by fire the night of July 4th, cause of the blaze unexplained. The loss is estimated at about \$1,200, only partly covered by insurance.

Mrs. Winnifred Coleman is suffering with a broken ankle at the home of her sister, Mrs. Geo. Alexander, the result of a fall when about to board a car for Plymouth, where she has been employed at the telephone exchange for several months past.

Library patrons are earnestly requested to remember that the evening hours are from 6:30 to 8:30. The librarians are often delayed to a time much later than this by late comers. As they work for the public without pay they should surely be permitted to close in time for their Saturday night errands.

If any "dignity" was found lying around loose in Northville Monday it was probably the supply left behind by the folks who went on the Presbyterian picnic excursion to Bob-Lo. Anyway, there wasn't any noticeable amount taken along by most of 'em. Even "representative citizens" for got theirs.

And now the bugologist experts have discovered that the grasshoppers in some sections of Michigan have their own peculiar brand of "cooties," and that said insects will eventually prove fatal to the hoppers. Why not try these microscopic cooties on the celebrated cootie family of war re-novox? That could surely be termed just retribution.

As Mr. and Mrs. Albert Teshka, accompanied by Mr. and Mrs. Warren VanDyne, were driving into Plymouth Sunday morning, a big touring car collided with Mr. Teshka's Ford. Of the four occupants of the latter machine Mrs. VanDyne was the only one seriously hurt, receiving severe injuries to her wrist and shoulder. Mr. VanDyne was somewhat lamed and the Teshka's fortunately very little. Mr. Teshka's car, which he had just bought, was badly wrecked.

As has several times been noted in the Record, many complaints are made by residents interested in civic improvements, concerning the unsightly as well as dangerous condition of the vacant property, owned by the Catholic society, at the corner of Dunlap and Center streets. Situated as it is in the heart of town and yet paying no taxes, it is anything but a beauty spot, and with its open cellar is unsafe as well. If not improved or sold before long condemnation proceedings for park purposes may be instituted, it is said.

NEW ROAD PETITION.

A largely signed petition has been received by the county road commissioners for the cementing of the "Center road" from Grand River at the tea-mile road westward to the Northville-Plymouth road at Phoenix. The distance is 13 miles and the road passes through Bell Branch and Livonia Center.

# How Jerusalem Wails

Wailing Wall of the Jews.

"T-E-K-E-O-O—T-e-k-e-o-o," the notes ring out, poignant, pitiful; "T-e-k-e-o-o." Once, again it resounds in the hoary rifts of the "wailing wall," remnant of Hebrew glory, symbol of Hebrew fall. Piercing, clear, it heralds a mighty surge of grief. For from the gloom of a hundred souls a cry is wrung, uncanny in the smiling canals, writes Marian Weinstein to the Chicago Daily News. The Jews of Jerusalem have come to mourn, to pray. They have brought to their Father the sting of their newest affliction, the fresh page in their long tragedy—the slaughter of their brethren in free Galicia.

The bearded elders in their faded caftans bend and sway over their huge tomes. Their earlocks brush the yellowing leaves of prayer. Apart on the cobbled street sit shawled women, sear, fleshless, resting their quivering forms against a native hut. Their younger sisters, old-young women, press the temple run. Now they fondle the stones and now they clutch them in despair, choking dry sobs. Beyond, a girl is weeping. She has lived through a Russian pogrom. There is a toll in the wall. For a moment the mass of motley headgear—skull caps, turbans, fezzes—ceases to sway. But only for a moment. And now the little Talmud-Torah boys come from their schools, tiny replicas, with their side curls and long coats, of their elders. They file in under their rabbis' eye, a look of awe on their pale faces.

All United in Mourning. Jerusalem has forgotten its squabbles. In this hour of prayer and mourning before their Maker all Jews are brothers. "A dolo, a dolo," a wretched bundle of rebs whimpers through the crowd. Between two sputtering candles against the wall a khaki-clad soldier from the Jewish battalion pauses to read the call to this prayer that was posted for days in the streets of the Holy City, in Hebrew and in Yiddish.

"Terrible reports come to us, one after the other, from Galicia. Enemies of Israel shed Jewish blood like water. Hundreds of Jewish victims have been murdered amid all sorts of atrocities. Countless innocents, men, women and children, our people's most pious souls, have fallen. In Lemberg alone 108, butchered and burned, were buried in one grave. Scores of scrolls of the law have been destroyed, and such outrages were committed as in the day of the destruction of the temple. All our brethren in Galicia are in deadly terror."

"Our elders, therefore, have met and decided that the whole community—men, women and children—should assemble Tuesday at 8 o'clock, Arabic time, at the temple ruin to read the psalms and blow the shophar that the Lord above may take pity upon our brethren."

"Brahm! Ibrahim!" A shrill cry strikes the air. From the roof of her stone hut a swarthy Arab woman calls her son, who has somehow been caught in the wailing, swaying multitude. "Brahm!"

At the Wailing Place. The Jewish soldier rescues the reluctant Ibrahim just as a score of British Tommies appear in the wake of a Moslem guide.

"Here you have the Jews' wailing wall," he recites in a sing-song. "The upper stones were built in the time of the Romans, but the lower blocks belonged to Solomon's temple. Here the Jews come every Friday to wail."

The Jewish soldier has recognized a fellow Jew in an American Red Cross doctor, standing thoughtfully at the edge of the praying crowd.

"From what part of the States are you?" he whispers eagerly. "I'm from Philly. I thought you might be, too."

Down the stony steps leading to the wailing place new figures are ever hurrying, scurrying. The Talmud Torah children are leaving with their rabbi. The weeping girl leans against the Arab hut now, her eyes half closed, her lips trembling. The old-young women still cling to the wall as if the God whose ear they seek were in its very stones.

"A dolo, a dolo." The beggar renews her quest. The sun sinks lower and lower, but still they come, old and young, the Jews of Jerusalem. The praying forms never weary. Ever their cry rings above the noise of the city, a centuries old cry.

## DIDN'T LET STOMACH KNOW

Simple Manner in Which a Struggling Pittsburgher Acquired a Competence.

A Pittsburgh man, by thrift and economy, acquired a competence from a most humble beginning, but until he related his experience to his friends in the bank where he did business they were unable to discover the real secret of his success. Here is his story, according to the Pittsburgh Dispatch: He started to work on the South side at \$8 per week and was soon advanced to \$10 and later to \$12. When he was marked up to \$14 he got married, beginning double team life in two rooms in one of the alleys right to Carson street. His boss thought so well of his marriage he added \$2 more per week to his income. He bought a small lot in the alley, put up a little house and ere long was living free of rent. Then he annexed a lot, erected another house, and found himself a landlord. Another legacy of \$2 a week was his good fortune and at last followed prosperity that enabled him to live without daily toil. "Well," said the president of the bank, "you have not told these tellers and young fellows in the bank the real secret of your success, as you confided it privately to me," and, laughing, the man said: "Oh, yes, I know what you mean. Well, boys, I told you I started at \$8 per week and, believe me, no matter how often I was advanced in wages, I never let my stomach know that I was on any other than \$8 weekly allowance." This explained his comfortable bank balance. Moral: Go thou and do likewise. "Own a home."

Cultured Hindus. In Bengal there are about seventy millions of people, and they boast of perhaps the best culture in India at the present time. The language as a written language is only fifty years old. Though for over a thousand years it has been a dialect, there is in Indian history unfortunately no trace of Bengal having been an important literary tongue. The language has borrowed its alphabet, grammar and vocabulary. There are numerous Persian, Arabic and English words incorporated in it, and the wonder of it is that, instead of having been degraded into some vulgar form like pidgin English, Bengal has become the most literary, scientific and perhaps the most philosophic of modern Indian languages.

Workmen Marooned High in Air. A violent windstorm recently swept across Great Salt Lake, and overland into Ogden, which it coated with a thin layer of salt. Buildings, pedestrians, sidewalks and automobiles were all "salted" impartially. The only real damage done, however, was in the destruction of a 200-foot scaffold around a concrete grain elevator. Six unfortunate workmen, who were on top of a finished part of the elevator, 160 feet in the air, at the time of the collapse, were completely marooned until rescued with extension ladders by the local fire department. Popular Mechanics Magazine.

Personal Illustration. The master of a Glasgow school was presiding over the reading lessons of the third standard when the child whose turn it was to read came across the word "hireling."

"What is a hireling?" asked the teacher. The boy thought for a moment or two, and then replied, "I don't know." The question was next propounded to the entire class, with a like result. The master then explained the meaning of the word as lucidly as he could, and, at the conclusion of his explanation, repeated the question. "Please, sir," replied the boy addressed, "you're a hireling; you're paid to teach us."

## It Is the Easiest Thing in the World to Invest in War Savings Stamps

BY THE WIFE OF A FORMER U. S. ATTORNEY GENERAL

If anyone is not accumulating a stock of War Savings stamps surely that person is not acquainted with all the advantages that W. S. S. hold for their owner.

Without exception every person knows something he wishes to have which takes a sum of money he cannot well afford to spend. In the case of adults it is often a trip they would like to take, the purchase of a piano, a collection of books, or some special educational course, or it may be funds for some philanthropic project. In the case of youth it is more often the opportunity to go to college or train for a favorite career; but whether the dream is of pleasure or advancement or altruism, the United States government has found a way to make it come true, by giving everyone a chance to invest every spare bit of change at interest.

No one thinks of running to a savings institution with an extra quarter, nor would he stop to invest a dollar gained unexpectedly by purchasing some article a little cheaper than anticipated, but it is the easiest thing in the world to buy a Thrift stamp with the quarter, or four or them with the extra dollar, right at the store where the purchase was made, for Thrift stamps are sold at all banks and post offices and almost every large store, factory and office in the country. And when sixteen Thrift stamps have been acquired they can be exchanged for a War Savings stamp which bears over 4 per cent interest. Thus a little pile of money is accumulated without a person feeling that he is denying himself anything. For a little over \$800 (to take the maximum purchase allowed) collected and loaned to the government in this way, five years from now the government will return a thousand dollars.

Besides this high rate of interest it must not be forgotten that government securities offer an absolutely safe investment.

As I said above, one has only to know War Savings stamps to buy them. They are the safest, the most convenient and most profitable investment in the country for savings and they afford an opportunity for patriotic action.

## Don't Derna by Faint Praise, but Jump In and Make Ideals Realities

EDITORIAL IN "CARRY ON," Reconstruction Magazine

Efforts have been made to tell every wounded soldier, either in France, on the transport bringing him home, or upon his arrival in this country about the plans of his government to care him as far as is humanly possible, and then retrain him for a new occupation if this is necessary. Pamphlets by the million have been distributed telling these men of their rights, first in the hospitals; then under the federal board of vocational education act and finally the provisions made for their compensation.

In spite of these efforts many of these disabled men are still skeptical; still think that the government plans to cheat them out of their pensions; that since they have become permanently disabled fighting for their country this country is simply going to throw them on the scrap heap.

These views are due to an insidious propaganda which consciously or otherwise has been spread abroad.

A one-armed soldier who had just returned from overseas and was in the Greenhut hospital in New York stepped into a drug store while out walking.

"Where's your artificial arm?" asked the druggist. "Haven't got it yet from the government," replied the soldier. "No, and you never will. That's all bunk about Uncle Sam giving you a new arm; you better go and buy an Easifit arm for yourself."

Three disabled soldiers were talking the other day. One of them said: "I rode downtown with a man today in his auto. This fellow said there was so much red tape in Washington that us disabled guys wouldn't ever get any pensions. He also said we were fools to believe all that 'bull' about being retrained for new jobs. Guess he was right. I'm going to get my discharge and go home and try to find a job before they're all gone."

Every patriotic citizen should stamp out such propaganda just as thoroughly as they did the Hun propaganda during the war. The gigantic task which confronted certain departments of the government may have slowed them up in the beginning, but every agency entrusted with this work is now hitting its stride. Our disabled soldiers will be re-educated, will be furnished with the necessary appliances when they are ready for the same, and will be retrained and placed in profitable employment.

It is your government and you have a part in this great work. Don't darna by faint praise but jump in and help make these high ideals realities.

## Chicago Is Only One of Many; Every Big City Has Thousands of Offenders

By LENA McCAULEY, Editorial Writer

Recently thousands of armfuls of purple phlox were carried away. The uprooted plants, withered and torn, scattered the roads for miles where motorists had thrown them away because they had faded, and the floors of railway cars were littered with dead violets, crabapple bloom and phlox.

The savage instinct for grabbing thousands of phlox, trilliums and frail flowers of spring is kindred to the same passion that devastated Belgium. It is destructive. The Friends of Our Native Landscape, the Wild Flower Preservation society, the Audubon society, the Prairie club, Geographic society, Nature club, many teachers in schools and flower lovers everywhere are trying to educate children to enjoy flowers and birds and not to destroy them.

## BULL SHOULD ALWAYS BE SUPERIOR TO MOST CAREFULLY SELECTED COW IN HERD

A Well-Bred Cow—The Dam.

(Prepared by the United States Department of Agriculture.)

In all bull-association work the influence of heredity is recognized. Since like tends to beget like in production as well as in appearance, there is little danger that the pure-bred bull whose ancestors for several generations have been first-class individuals will inherit or transmit the qualities of some inferior distant ancestor. If he is also well formed, strong and healthy, he will almost certainly increase out of all proportion to his cost the income from the first generation of a scrub or low-grade herd. In fact the time may come when it will be possible to eliminate all bulls except those whose dams are in the advanced registry. If the best bulls were used to their full capacity in pure-bred herds, and if only good pure-bred bulls were used in the ordinary dairy herds, the income from the dairy business could be vastly increased. It is possible, all bulls used should be from advanced-registry dams with a butterfat record of not less than 400 pounds. The dams should be from high-producing ancestors. The bull should always be superior to the best cows in the herd, and all cows should be well bred and carefully selected.

### Improvements Due to Sire.

Few organizations have been in operation long enough for the producing daughters of an association bull to be compared with their dams. The following figures, however, received from an association at New Windsor, Md., show the improvement due to the sire and the average butterfat production of daughters of association bulls compared with that of their dams:

	Pat average (pounds).
Bull No. 1:	
7 daughters .....	279.5
7 dams .....	208.3
Increase .....	62.2
Bull No. 2:	
7 daughters .....	231.8
7 dams .....	226.4
Increase .....	55.2
Bull No. 3:	
2 daughters .....	338.5
2 dams .....	294.0
Increase .....	115.5

Fourteen out of sixteen daughters exceeded their dams, the average increase of the daughters over dams is be-

ing 80 per cent. The increase of the daughters of the good bulls mentioned above occurred with remarkable regularity. On the other hand, a poor bull decreases the production of his daughters.

Note the following results of using a scrub bull:

The dam produced ..... 145 pounds of fat  
The daughters of the bull ..... 123 pounds of fat  
The granddaughter of the bull produced ..... 89 pounds of fat

It is only when the lifetime production records of all his daughters are compared with those of their dams that the full value of the bull's services to one generation can be known. In addition his influence on the herd will be noticeable for many generations. This illustrates the great value of a good bull. The damage done by an inferior bull may be equally great. No other argument should be necessary in urging that every association be particular in selecting bulls.

### Real Value of Bull.

All pure-bred bulls are not equally valuable. The daughters of some are inferior to their dams, while the daughters of others greatly excel their dams. The only way one may know the real value of the bull is to compare the production records of his daughters with those of their dams. It takes at least three years from the time the bull is put into service to obtain some of this information, and very often the farmer has disposed of the bull a year or more before the end of that time. When he finds that the bull has improved the herd, his search for the bull may end in the stockyard or with the butcher. It is seldom that such a bull is found again. If he still lives and is being used, it may be at a considerable distance from the original owner. Since the two do not meet, the second user has no means of knowing the worth of the bull. Thus many valuable bulls have been lost and inferior ones used instead. In the bull association this cannot happen, for all the bulls are kept in the association until thoroughly tried. The poor ones are then sent to the block and the good ones kept and judiciously used to their full capacity to the end of their usefulness, which may be 12 or 15 years. This advantage alone is enough to repay all the trouble and expense of forming an association.

A Well-Bred Bull—The Sire.

## MORE RYE BEING PRODUCED

Greatest Increase Seen in 1917 and 1918—Farmers Becoming More Familiar With Crop.

(Prepared by the United States Department of Agriculture.)

More acres and more bushels of rye were harvested in 1918 than in any previous year in the history of the United States.

From 1849 to 1909 rye production in the United States was practically stationary. From 1909 to 1918 the production was almost tripled, the greatest increase coming in 1917 and 1918.

Five years ago there was approximately 1 acre of rye for each 21 acres of wheat in the United States. In 1918 there was approximately 1 acre of rye for each 10 acres of wheat.

The 1918 rye crop was more than 78,000,000 bushels.

The world production of rye amounts to about one and two-thirds billion bushels, somewhat less than half the annual wheat production.

The United States department of agriculture thinks it probable, now that farmers are becoming familiar with the crop and its advantages, that rye will have a permanently larger place in American agriculture, and that from an agricultural point of view there should be a further considerable increase in production.

## STUDY UP CHOLERA ERE IT GETS IN YOUR HERD

(Prepared by the United States Department of Agriculture.)

The United States department of agriculture and the state agricultural colleges have done a vast amount of work in learning how to prevent and control hog cholera. From these two sources you can get information on how to prevent this disease. You can have them for the asking. Your county agent and your local veterinarian can also advise you. Ask the United States department of agriculture for Farmers' Bulletin 834, Prevention and Treatment of Hog Cholera.

## LIVE STOCK NOTES

More colts should be raised on farms.

More hogs and more meat for home use should have attention during the early summer.

Horses require from five to fifteen gallons of water a day, depending on the water and their work.

## Save the Babies

**INFANT MORTALITY** is something frightful. We can hardly realize that of all the children born in civilized countries, twenty-two per cent., or nearly one-quarter, die before they reach one year; thirty-seven per cent., or more than one-third, before they are five, and one-half before they are fifteen!  
We do not hesitate to say that a timely use of Castoria would save many of these precious lives. Neither do we hesitate to say that many of these infant deaths are occasioned by the use of narcotic preparations. Drops, tinctures and soothing syrups sold for children's complaints contain more or less opium or morphine. They are, in considerable quantities, deadly poisons. In any quantity, they stupefy, retard circulation and lead to congestions, sickness, death. There can be no danger in the use of Castoria if it bears the signature of Chas. H. Fletcher as it contains no opiates or narcotics of any kind.  
Genuine Castoria always bears the signature of *Chas. H. Fletcher*.

**From the Middle of the Pack.**  
He was a well-dressed and intelligent man, somewhat crowding Father Time, but he didn't know a single thing about buying tickets. For he said to the young fellow in the box office, in the loud voice of one accustomed to calling across the open:  
"Give me a couple out of the middle of the pack, son. I'm taking my city cousin to the theater tonight and she told me to be sure and get seats in the center."

**Farmer's Prosperous.**  
In sharp contrast with the condition in industrial and commercial centers, Japanese farmers show wonderful prosperity. This, according to Genaro Shimura, president of the Hypothec bank of Japan, is because of the high price of rice and cocoons.

**Frenchman on Princeton Staff.**  
Lieut. Louis Cons, who was delivered by the French government as tutor in French to the family of the former German emperor before the war, has been appointed assistant professor of French in Princeton university. After the outbreak of the war Lieutenant Cons was assigned to the intelligence department of the French army. At one time he was a member of the faculty at Bryn Mawr college.

**His New Excuse.**  
Mrs. Flatbush—Where have you been till this late hour?  
Mr. Flatbush—To the lecture, as I told you before I went.  
"But you wouldn't be at a lecture as late as this?"  
"Oh, yes, I would. You see, the lecturer stuttered."

## "Meats in Storage"

Every working day of the year 75,000,000 pounds of meat are required to supply home and export needs—and only 10 per cent of this is exported.

These facts must be kept in mind when considering the U. S. Bureau of Markets report that on June 1, 1919, there were 1,348,000,000 pounds of meats in cold storage. If the meat in storage was placed on the market it would only be 20 days' supply.

This meat is not artificially withheld from trade channels to maintain or advance prices.

Meats in storage consist of—

- 65 per cent (approximate) hams, bacon, etc., in process of curing. It takes 30 to 90 days in pickle or salt to complete the process.
- 10 per cent is frozen pork that is to be cured later in the year.
- 6 per cent is lard. This is only four-fifths of a pound per capita, and much of it will have to go to supply European needs.
- 19 per cent is frozen beef and lamb, part of which is owned by the Government and was intended chiefly for over-seas shipment. If this were all diverted to domestic trade channels, it would be only 1½ lbs. per capita—a 3 days' supply.

From this it will be seen that "meats in storage" represent merely unfinished goods in process of curing and the working supply necessary to assure the consumer a steady flow of finished product.

### To Remove Fruit Stains.

When fruit stains are fresh pour boiling water steadily through them and they will usually disappear. If the water is hard, borax or ammonia in a small quantity should be added to the water.

Fruit and wine stains, if dry, should be soaked in cold water, like tea stains. Then stretch the stained fabric over a basin, rub with common salt and pour boiling water through the stain. Or it can be rubbed with lemon, instead of using boiling water. Repeat, if necessary, and if all is not removed let the rest wear out. Some fruit and wine stains, especially those of apple and pear, and some claret, are very difficult to remove. If they are boiled gently (after soaking) in some strong borax and water, well rinsed, then hung out in the sunshine, or better, left hanging out during a frosty night, the stains will disappear. The articles should be dripping wet when hung out.

### To Remove Grass Stains.

Grass stains will yield to the cologne application, though a thorough bath in alcohol is, perhaps, more certain. Kerosene is another liquid that may be applied successfully to grass stains, while some recommend covering the spots with a paste made from cream of tartar and water.

This should not be used in the case of colored goods, as the color is likely to disappear.

### To Remove Coffee Stains.

Coffee spots should be soaked in cold water until they disappear, changing the water as often as it becomes much discolored.

The stains from chocolate are not so easy to remove. Soak in lukewarm water, which is to be renewed as occasion requires.

Stains from an acid will usually disappear under a bath of alcohol.

### FASHION HINTS.

If out of candles melt some paraffin, pour into small, greased egg cups, first placing a piece of grocers' twine in same; also save all drippings from candles and do the same.

Keep small wire sifter near kitchen sink to use for sifting ashes for scouring if out of scouring soap.

Fit a piece of enamel cloth into tray of gas stove, thereby saving work, easier to clean.

If cellar is dark have two panels removed and glass put in place of wooden panels.

### This Summer's Colors.

Navy blue is expected to be the reigning color for summer, but there will also be a strong liking for sand, gray and the lighter blues. Rose is another color that will be used by smartly dressed women. Also, there will be canary, buttercup, apple green and orchid; giving plentiful choice.

## Summer Suits Must Look Cool

Suits for summer wear, as a first requirement for good style, must look cool. Many of them accomplish this fine beginning and achieve a happy ending by being actually cool; they are made of loosely woven, lightweight silk or fiber fabrics that are the least burdensome of hot weather suitings as well as the most fashionable. Besides these there are those unfailing pongees and mohairs with advantages of their own to recommend them, and linen is still "in the running." But in the race for preference with women of fashion these long-familiar fabrics have been outdistanced by the newer weaves.

In the two suits shown in the picture the one at the left is typical of the style that leads for suits made of light jersey, silk and silk fiber suitings. Straight hanging coats and skirts less narrow than those made of the usual wool clothes are the rule in these suits. The sweater coat is the model followed in nearly all of them, to be worn with or without vests. Vests for midsummer, made of organdy and other sheer cottons, often in combination with narrow laces, take the place of vests of heavier fabrics that have had such sweeping popularity. The cool, three-quarter length sleeve is a feature of this suit, and it is shown with a satin vest having a leaf and lattice design embroidered in gray and silver. There is a narrow sash across the front of the suit; the ends finished with small flower-like ornaments made of silver ribbon.

The suit at the right is a conventional tailored model of white cloth with brown line stripes which may be in brown, blue, green or black. The coat, while not a straight-line model, is cut on easy but trim lines. This,

with the lace-trimmed organdy over collar, gives the suit a refreshing, crisp style, borne out by ivory buttons. Slit pockets are set in at each side under the over-lapped seams of the shaped panel at the front of the coat. With a properly cool-looking hat and white footwear, summer heat becomes merely a state of mind, in a costume that looks so convincingly cool. Its wearer will be a joy to behold on the warmest day.

*Julia Bottomley*

### Marked Use of Ribbon.

Marked popularity of ribbons as millinery trimmings, especially on walking hats, is one of the season's developments. One idea of decoration that has taken hold strongly of late shows the use of ribbon in two-tier arrangements. Loops of this material stand out from the base of the crown, one flat on the brim and the other a few inches above it. This trimming is placed either at the side or front. In some cases, loops of ribbon are attached to the top of the crown, extending toward the front of the hat. An airplane bow of ten-inch ribbons is shown on the crown of a small sailor, the novelty of this arrangement lying principally in the width of the material used.

### Unusual Colors.

Blue and orchid is a color combination much in evidence this season, especially for evening and semievening gowns.

### Quilting is Used.

Quilting appears occasionally in tulle dresses.

**INERT MATERIAL IN COAL**  
Percentage of Ash and Slate Reaches Total in Tons That Few Would Believe.

A suggestion has been made by one of the large anthracite coal operators that they be permitted to increase the percentage of impurities in the coal by 2 per cent more than the present standard. This means that 1,500,000 additional tons of slate would be sent to market. To transport this increased amount of impurities to market would require about 40,000 railroad cars, necessitating from two to ten weeks for its delivery. The bureau of mines has estimated that the coal mined in the United States, in 1917, had an increase of 5 per cent, as an average, in the amount of ash, taken for the whole country. Also, that this increase in ash content meant an additional loss of 17½ per cent in the efficiency of the power plant. Furthermore, in some of the mining districts there was a much higher increase in ash than is indicated by this average. As we mined and shipped 544,000,000 tons of coal in 1917, some 27,000,000 tons of this amount were inert material.—Chicago Journal.

### Suitable After All.

This young Frenchman had learned his English in France and found that it was often quite different from that used in the United States. After he had been over here a little more than a month his host asked him to substitute in his place at his card club. And he accepted.

When he entered the clubroom he tried as usual to make a speech which would be both complimentary and explanatory. "Ladies and gentlemen," he began, "I come not as a regular but as—"

The word "substitute" would not come to his memory. He knew that "volunteer" was not the suitable one. "I come not as a regular, but as a— and then came one—as a cavalier," he finished blandly.

Yes, Thelma, there would be fewer divorces in this vale of tears if there were more good cooks.

Nobody gets mad these days if people forget to shut the door.

There is more Catarrh in this section of the country than all other diseases put together, and for years it was supposed to be incurable. Doctors prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Catarrh is a local disease, greatly influenced by constitutional conditions and therefore requires constitutional treatment. Hall's Catarrh Medicine, manufactured by F. J. Cheney & Co., Toledo, Ohio, is a constitutional remedy, is taken internally and acts thru the Blood on the Mucous Surfaces of the System. One Hundred Dollars reward is offered for any case that Hall's Catarrh Medicine fails to cure. Send for circulars and testimonials.

so much better. "I simply will not have mother cooking in this heat," declared Susan.

"I shall become of the sweet family if I stop," declared Susan, looking at the mother who was appearing around the table with a dinner to-night.

"Where did you learn the trick?"

"I learned it from a girl who replied, 'I cannot eat cake those spicy little things, biting into sandwich, 'are the flavor and ginger-'

## It's Drawing Near To Chautauqua Time!

Hon. Frank B. Willis  
who Lectures on  
"Perils and  
Problems"If you are wise you'll plan right now to put away all thoughts of  
work and worry during Chautauqua time.For from every standpoint this year's program presents the most  
compelling attractions ever offered this community.There is, for instance, the masterly and matchless oratory of Ex-  
Governor Willis of Ohio, that champion of the truer Nationalism  
who will lecture on "Perils and Problems" of the present day.And Governor Willis is but one of a series of tremendously power-  
ful lecturers featured during Chautauqua week.James S. Knox will lecture on "Community Efficiency." George  
P. Bible will tell of "New Fads and Fancies" and Mother Lake will  
pled with her hearers to give greater consideration to "The Divine  
Rights of the Child."From the standpoint of entertainment, there will be no dull mo-  
ments. Musical treats from Scotland and Hawaii, dainty costumed  
concerts by the Mozart Orchestral Ladies, the presentation of "Just  
Plain Judy" and other stories, spoken songs and cartoons with  
Hettie Jane Dunaway taking all the parts—and a smashing series  
of concerts by Victor's Columbian Band—these are among the mental  
relaxations of the week.
