Joslin Witnesses Triumph Parade in Germany

Exchanges Hear College
Student Tell of Experi-
ences in Europe

Telling of his experiences in pre-war Germany, and for a period after the declaration of war, John Joslin of Northville and California, spoke most interestingly before the Exchange Club Wednesday.

Landing in Hamburg, he lived in Berlin, and while there witnessed the triumphal return of the German army from Poland. From the vantage point of a tree on Unter den Linden, he watched the goose-stepping victors for five hours, and had a good view of the stand where Hitler and other notables reviewed the victorious legion of the Reich. He was in Orscow, just after it was taken over by the Germans and witnessed the mopping up of the city, and its cleaning the OCC brigades and the Jewish battalions. He worked in an automobile factory and found many German-Americans supervising the production plants. When the privilege of becoming a German citizen or returning, he chose America and home.

Mr. Joslin's interpretation of European history and the developments leading up to the present and last world war was most interesting and informative.

Poppy Day Sale Date Is Scheduled May 25

Poppy Day will be observed in Northville and throughout the nation on May 25, the Saturday before Memorial Day. Mrs. A. C. Carlson, president of the Lloyd H. Green post of the American Legion Auxiliary, announced today.

On that day all Americans will be asked to wear memorial poppies in tribute to the World War dead and to aid the living victims of the war.

The little red memorial flowers will be distributed here by women of the Auxiliary and men of the Legion under the chairmanship of Mrs. Floyd Lanning. All contributions received for the poppies will go to Legion and Auxiliary welfare work for the disabled veterans, their families, and the families of the dead.

"We feel that Poppy Day will have increased meaning to America this year," said Mrs. Lanning, "because renewed warfare in Europe has renewed the memory of those boys of ours who gave their lives over there twenty-two years ago. It is for them that we put on the poppy each year, to show that we still remember and honor their sacrifices. It is the flower which grows where they fell and which now blooms on the coasts of America who appreciate their sacrifice."

1940 Census Nears Completion Here

The 1940 population census for Northville neared completion this week as enumerators were taken from the field and turned in their tabulation books to F. J. McElaney, census director for the Seventeenth Congressional District.

Now, according to census workers, comes the most difficult part of the campaign, the clean-up drive. Mr. McElaney feels there may still be many persons in the city whom the enumerators were unable to reach. In the hope of giving Northville as large a census report as it is entitled to, he is urging everyone who has not been interviewed by a census enumerator to get in touch with the census office at 164 East Lawrence street, Pontiac.

By way of making use of every avenue, the census bureau has made arrangements through the superintendent of schools to contact un-enumerated parents through their children. Each child is being asked to find out whether his or her family has been enumerated, and if not to urge their parents to get in touch with the census takers.

The Oldest Paper in Wayne County Outside the City of Detroit

When you educate a man you educate an individual; when you educate a woman you educate a whole family.—Dr. C. D. McIver.

Sunday, May 12th, has been designated as Mother's Day, and the occasion calls for statewide observance.

How often we turned to mother love in time of stress. Humanity has always found solace in mother love. In times of turbulence, unrest, and uncertainty in both personal and national life, we turn to the influence of mother to strengthen our faith in Almighty God and to restore and reestablish a sanity and soundness of character. Mother always helps to keep our feet on the ground. Today American youths need more mothers who find home, character, and religion the first interest of their lives.

Good nature, coupled with a smile, starts the day off right and wins success.

Let's Clean up the Old Town...

Northville cannot be the biggest town in the world, but, by golly, it can be the cleanest. Being the cleanest won't take a lot of money, but only a pretty large helping of elbow grease and individual effort. We can have our winter's accumulation of ashes hauled away. We can repair our lawns. We can plan to paint the buildings that need painting. Perhaps shrubs and flowers should be planted.

Everyone should appoint himself as a committee of one to help give Northville a thorough cleaning. Take a drive, or better still, take a walk around town and see what can be done to improve the appearance of the village.

Let's look around and see what can be done to make Northville clean. Let's all buckle in and help do the job up brown this spring.

If you don't think Northville is growing count the new business places and enterprises opening here in the last year.

"Religion is a code of life. It lifts men and women into a realization that the spirit is more important than the flesh. It is the well-spring of morality. It is the key to honor and integrity."

"It is the acknowledgment of God and of the dependence of mortals upon Higher Power, which may be ignored, but never can be evaded. It is the hope of humanity here and hereafter"—U. S. Senator Vandenberg.

The other week an enthusiastic citizen of Owosso gave us the once over on Thos. Dewey... and what a song and dance that good gentleman gave in favor of this man Dewey for President. The apostle of Mr. Dewey had all the answers—and we agreed with our friend, very largely—but we still think that a dark horse will carry the banner of the GOPers, and Dewey will be coupled into the train as Vice-president to bring the Romance, alertness, and dynamism to the campaign.

The mention of Dewey reminds us of the comment of Editor Silby of the Springfield Signal.

Thos Dewey gives one the impression that he knows what he's talking about, and means what he says. But he is too honest to be elected. He says "putting people to work is our greatest primary task." And he probably knows full well that there is a large class who will fight any such movement to the last man.

Everybody fears somebody or something. For we are creatures of fear. Too often we meekly bow to it and its twin, worry, when we should be fighting it. And thus despite the fact that if we do fight, we invariably find the fear to be greater than the danger.—Grit.

Visit Your Hospital...

May 12 is Hospital Day. Last year over 800,000 babies were born in hospitals. To put it literally, hospitals are the birth of a nation. Within the memory of many of our readers a broken bone was set by guess work, a thin board and a bandage; now we have a fracture table, an X-ray unit with a fluoroscope plus a technician to take the picture and a specialist to interpret it. Would you trade a good leg for the difference. An anesthetic used to be a small bottle of chloroform and a cloth face mask; now rare and expensive gases are administered by means of machine that costs hundreds of dollars; but lives are saved thereby. Keep away from the hospital as long as it makes sense but go as soon as you are told by your family doctor. This invitation is to visit your local institution on Hospital Day, May 12. Know your hospital, a friend who stands by every hour of every day.

Dickinson Versus VanWagoner Is November Election Issue

"Dickinson versus Van Wagoner" will be the Michigan gubernatorial issue next November, according to best bets today at the state capitol.

Although neither the present governor nor the state highway commissioner have formally tossed their hats into the political ring, observers take it for granted that they will do so at the proper time.

Two recent events are seen as harbingers of Dickinson's nomination for the Republican choice for governor. First, Dr. H. Allen Moyer of Charlotte, personal physician of Governor Dickinson, announced that the governor was fit as a fiddle to make a campaign and, in fact, was in better health now at 81 than he was a year ago, an octogenarian.

Second, 20-year-old former Governor Chase S. Osborn released a 16 page letter in which he expanded upon his previous criticism of Mr. Dickinson, releasing such barbed epithets as "Michigan's chief benefactor," "inflated egoist," and "conscious hypocrite." Osborn concluded with a tart plea for Dickinson to step aside.

Intimates of the governor are smiling. If anything was needed to reduce the governor that he should be again, Osborn's front page state-ment was regarded as removing any doubt. Of course, Dickinson seldom if ever is a candidate. "He merely has been nominated with regularity and has been elected much in the same way."

In the judgment of one Lansing newspaper correspondent, Osborn's heckling attitude is "somewhat of a threat to the peace and harmony of the Republican party."

Joseph H. Creighton, a veteran observer of the capital scene, interviewed a number of the "top notch Republican leaders" and reported that one of them remarked caustically "Why must the old man (in after all)?" This same person informed Creighton that "one strong candidate could defeat Dickinson in the primaries."

Offering these statements was Creighton's personal conclusion that Dickinson probably couldn't be stopped with a baseball bat and that he'd win the Republican primary just as he won seven others running for lieutenant governor.

The latter analysis was prompted by a feeling that Dickinson's leadership in his official cabinet and party leaders generally could not agree among themselves upon a candidate other than Dickinson.

Thus, the administration aspirants for the governorship having largely neutralized each other's chances for the nomination Dickinson is forecast as an easy winner in the September primary. At least, that is the prevailing thought at Lansing today—not prompted by favoritism for one candidate or another, being solely but a cool summary of the political situation as it exists at the moment.

Osborn for Murphy. In connection with the former governor's blast against Dickinson,

it is recalled that Chase Osborn has been noted for his political independence, having been a Bull Moose in the 1912 campaign and as late as two years ago having jumped upon the Democratic handwagon to support Frank Murphy for reelection as governor.

This spring, Osborn remains in the same seat, the only change being that he is against Dickinson instead of the late Governor Fitzgerald and that he favors a Democrat "of the type of Murray D. Van Wagoner" instead of Mr. Murphy.

But the Osborn attitude of political independence is a disturbing sign, to say the least. Whether it represents the viewpoint of a large number of voters is quite another matter which time will reveal in its inevitable way.

If Fitzgerald's election was due more to an anti-Murphy reaction following the outflow strike in 1937 than to a positive action in behalf of Fitzgerald—and such a conclusion has been voiced privately by leading Republicans—then what will be the trend in Michigan next November if Dickinson is the Republican nominee and Van Wagoner is the Democrat's choice?

Party leaders are scanning the skies hopefully for a sign.

The answer will depend to a large degree upon whom the Republicans and Democrats nominate for President For 1940 is a national campaign year—don't forget!

Dewey Movement

More than a year ago two Michigan-born Republicans, Thomas E. Dewey and Arthur Vandenberg, agreed to stay out of each other's home field—Dewey out of Michigan and Vandenberg out of New York.

Regarding Vandenberg as the state's favorite son for the presidential race, the state republican organization has been planning enthusiastically for the Grand Old Man senator, and it is a foregone conclusion that Vandenberg will receive Michigan's support on the first vote at the Philadelphia convention next month.

Howard Lawrence, former state treasurer succeeding Frank D. McKay, launched a Vandenberg boom a year ago. Leslie Butler, personal secretary of the governor, has been active in behalf of the Vandenberg-for-president movement. But when the Michigan senator declined to leave Washington to compete in person with Dewey in western states and the state primary, verdicts showed a definite trend towards the New York racket-busting prosecutor.

For certain Republican leaders began to get nervous.

Melville B. McPherson of Lowell, who was a candidate against former Governor Fitzgerald two years ago and Senator Herman H. Dugan of Owosso, seized upon the opportunity to launch a Dewey movement in Michigan.

Dugan was careful to explain that the Dewey organization is being formed without Mr. Dewey's permission because of the Dewey-Vandenberg agreement.

He said, "His campaign is gathering momentum in Michigan as well as elsewhere and it seems advisable that something be done to organize the sentiment here."

McPherson is chairman of the State Tax Commission. Dugan is in

Our Sales are Swell—and so are the deals your Buick dealer is making!

What to do when the bug bites you!

Buick prices begin at \$895* for Business Coupe (illustrated)

FIGURES show that about one out of every five able-to-purchase new-car buyers really wants a Buick more than any other car.

Not all will buy one.

Too many of them without even getting actual figures will shake their heads and sigh, "Nope! A car that big and handsome must be out of my reach!"

You'll be smarter than that, we know.

When the bug to own a Buick bites you, you'll figure that a car as talked-about as Buick must be looked at first—if you're going to have anything to go on in judging 1940 values.

You'll realize it doesn't cost a cent to find out how one feels under your own hand and what the delivered prices are.

So you'll walk in, please, to the nearest Buick dealer and boldly say:

"Let me have a good look at that car that's showing the rest of 'em what modern style is."

"Let me try out that big straight-eight engine that's electrically balanced after assembly for smoothness to match a wrist watch's works."

"Show me those big soft coil springs you talk about and how they smooth out that rough stretch down the street—and what's the business about recoil-mounted Kne-Action, heaviest frames at the price, five-foot front seat room in SUPER models, and six dozen new 1940 features?"

When you've got the answers through a good-long ride—ask one more question: "How much?"

Current prices start at \$895* for the business coupe, delivered at Flint, Mich. To this add transportation based on rail rates, state and local taxes (if any), and optional equipment and accessories—though there will be few such "extras" you'll need.

That totals up to low delivered prices that are often only a few dimes more a day than on cars in the lowest-price class—so why hesitate or haggle?

When the bug bites you, get the facts—and you'll get a Buick and be happy!

*Prices subject to change without notice.

★ MORE THAN BIG— it's big in the right places!

Inside the car, where bigness really counts, you find a Ford V-8 extra "big for its size." Big by any measure, it's especially so at the important comfort points shown below. Check them now, then come in and try a Ford. It's got a lot of things like this that are just too good to miss!

A Measured from windshield to rear window, a Ford Sedan is 100 1/4 inches... this is longer than in a number of much higher-priced cars today!

B Kneeroom for rear-seat passengers in a Ford is considerably greater than that of any other car in its price class!

C With its compact V-type engine, the Ford is designed to carry rear-seat passengers farther ahead of the rear spring than any other car at this price—toward the center of the car where riding quality is best!

SURPRISING is the word for a 1940 Ford! Surprising because it gives so much you wouldn't expect at its low price. Surprising all-around performance, as proved when it won the big 3700-mile Argentine Grand Prize Road Race. Surprising gas economy, as

proved when it gave most miles per gallon of all standard-equipped cars at its price in the Gilmore-Yosemite Economy Run. Surprising in its big-car ride and room. Surprising in its long, long list of truly fine-car features. Come in today and get to know a Ford V-8!

This year talk "Trade" with your Ford Dealer first!

CHECK EQUIPMENT!... See how much more you get in a Ford at no extra cost!

The Incas did not write. For records, for computations and messages they used knotted cords called quipus. Small cords with knots in them were attached to the main cord. Special trained officers made and deciphered the quipus. The art is no longer known.

Automatic Lime Spreader

Two Clarke County, Iowa, farmers made the above automatic lime spreader. Using the sprockets and shafting of an old manure spreader they rigged up a conveyor belt that operates in a slot at the bottom of the V-shaped lime bin and delivers the lime to the trailer-type lime spreader. They spread thirty acres at two tons to the acre—in about twelve hours. And the man with the shovel just keeps the lime pushed down.

Cloth-Covered Cold Frames

Sketch above shows a very practical and inexpensive type of cloth-covered cold frame in use near the Ohio Experiment Station. The cloth cover is made of heavy muslin—with strong muslin tabs sewed every 12 inches around the edge for tying it down firmly. When this type of cold frame is used early in the spring it is necessary to cover it with straw or other protective material during cold periods.

maintain a sewage line across the Northville Fisheries Station property. This was a WPA project.

The license, by its own terms, was to terminate not later than five years from the date of its issue and the right of the license to terminate the sewage line across the station property was then to cease unless in the meantime Congress should authorize its continued use by the licensee or authorize the conveyance of an easement covering its use.

Hon. E. K. Birlaw, acting secretary of the Interior, issued the following statement when reporting on the bill: "Inasmuch as the sewage system is now in operation and is of material benefit to the United States and greatly facilitates disposal of sewage at the fish cultural station of the Bureau of Fisheries, I urge that the bill be enacted."

EASIEST TIME TO CURE DRAFTS IS WHEN YOU BUILD!

Poor wall joint between window frame and wall causes drafts (see arrows).

Poor fitting window sash allows cold air to leak in causing drafts (see arrows).

A single pane of glass cools warm air quickly. Cool air drops to floor causing drafts.

WATCH THESE THREE PLACES IF YOU WOULD STOP THEM

There is just no excuse for drafts in your new home, because drafts are definitely curable if you will watch just three places—and all three places are around your windows.

First and foremost offender in the making of drafts in your new home is the window frame. Now you've never bought window frames so you don't know anything about them and that is one reason why so many home builders have drafty windows, because they were careless about the window frame that went into their homes. Now, we aren't going to go into detail about window frames. We just want you to remember that the most important thing about a window frame is how it joins the wall. If it makes a permanent leakproof weather-tight joint with the wall—fine and dandy. If it doesn't, you'll have drafts, no end of drafts. How can you make sure about a weather-tight joint? Just specify that the window frames used in your new home have wide blind stop construction. This special construction should be familiar to your contractor.

Proper Fitting Necessary. Next in importance to window frame is the window sash (the part of the window that moves within the frame). Many home builders buy window frames in one place and sash in another with the result that the sash and frame never fit properly in spite of trimming and cutting on the job. And sash that don't fit properly cause drafts, and more drafts. The modern trend is towards what is known as complete window units that are delivered with frame and sash precision fitted to each other at the factory. Many of these window units are even complete with weatherstripping. In any event be sure that the window sash are fitted properly to the window frame and you'll eliminate another big source of drafts.

Glass Cools Air. Now here is the third cause of drafts. It's warm air being quickly cooled against a single pane of glass. The cold air then drops to the floor. This flow of air causes drafts. What's the cure? A double pane of glass. Some windows are made so that this double pane of glass fits on the inside of the window, while the most common is the ordinary storm window which are hung on the outside. Whether your double glass is inside or outside, the result is the same. The glass that is within the heated room is kept warmer by the dead air space between the double panes. Result: Warm air is not cooled so fast; no cool air—no drafts.

COUNCIL

(Continued from page 1)

provision has been made for the increase of the speed limit through that portion of Plymouth avenue between Beal street and the southern village limits be raised from 25 to 40 miles an hour.

Explaining the right turn recommendation, Chief Loomis says, "The rights of pedestrians have not been seriously threatened by motor vehicles making a right turn against a red signal light; if the vehicle is brought to a full stop. In 90 per cent of the cases observed, drivers wishing to make a right turn were obliged to wait for the green signal light, although there was no pedestrian traffic."

Chief Loomis' count of traffic at various points in the village is meat for statistic heads. During an 18-hour period, 6 a. m. to midnight, the following number of motor vehicles crossed these designated points: 211 at north and south on Linden; 63 at Dubair and Linden, 165 at north and south on Rogers; 345 at Dunlap into Rogers; 241 at north and south on Richard Drive; 217 at Thayer boulevard into Orchard Drive; 243 east and west on Thayer; 182 Eaton Drive into Thayer.

During this same count, at the intersection of Main and Wing streets, 1,764 vehicles went east, 1,269 went west, 805 went north, and 298 went south. At the intersection of Dunlap and Wing, 405 vehicles went east, 468 went west, 387 went north, and 432 went south. The

A suitable testimonial was also entered upon the minutes of the meeting.

Announcement was made that silver shooting at the club's eight field one mile west of Plymouth would be under way starting with next Sunday, at 10 a. m. May 12; and every Sunday morning from then on during the good weather of the summer and fall.
