Tires...
What folks want is tires—they don't care if they are made from the product of the field, mine, or well, as long as tires are made that will give at least temporary mileage relief. Many folks hope it can be made from the product of the field and be grown on the marginal land of farms and be replenishable.

The charge that oil companies have deliberately blocked the production of artificial rubber for mercenary reasons is an example of political buck-passing of the worst type.

One of the largest oil companies recently stated categorically that it "supports and will fight for just one program for the production of synthetic rubber. That is, whatever program the government adopts to give our nation the most rubber in the shortest time, from any raw material whatsoever, and with the least possible drain on vital construction materials." That is the policy of the industry generally.

What has delayed the synthetic rubber program is inexcusable political maulkinding. Bureau after bureau has stuck its finger into the pie. The public has been fed one conflicting opinion after another. Only recently has any order come out of the chaos—and only recently has any real start toward solving the problem been made.

Whether synthetic rubber can best be made from petroleum, grain, alcohol or anything else is a chemical problem, not a political problem. The oil industry, like the rest of the country, wants results. Its interest, like the interest of all of us, lies in getting tires in the shortest possible time, irrespective of the process used to manufacture them.

Saboteurs strike in the dark

We are entering upon that time for which we have waited impatiently, a time in which we carry the offensive to our enemies. We do not have our energy by the throat yet—but we have come to grips with him. The fight is under way.

From now on we at home must redouble our effort in the tasks assigned to us. Every brave war-fighting man alike is uplifted and supported by the united efforts of all of us.

The mechanism of the home front is a complex mechanism. Materials, production, distribution, the system of rationing and of controlling prices, the salvage program—all of these, and much else, combine to make the cogs and gears and wheels keep our war effort rolling.

You may be tired of hearing about salvage and rationing, you may be weary of collecting scrap—but we cannot win our fight on the world's far-flung fronts without full cooperation on all phases of the war program laid down for us. Only if each one of us does his part will we have enough—barely enough—for our needs.

At this moment, when our troops are fighting, we cannot tolerate any attempts to dodge restrictions. Most of us accept the deprivations cheerfully. The person who tries to dodge the rationing regulations, who tries to beat price and rent control, who thinks it smart to get illegally materials reserved for the armed forces—that person is as surely a saboteur as though he had been landed on our coast from a Nazi sub.

Here's news for housewives: The Office of Price Administration has announced that during the 16-week period beginning August 23 and ending Oct. 31, ration stamp No. 8 will be good for five pounds of sugar. That is more sugar than has been assigned to any previous ration stamp, but it is a longer ration period too.

The Boy Scouts are distributing leaflets explaining price control to 25,000,000 homes throughout the country. WPA has started a program to reclaim millions of gallons of chemical solvents and oils. These products are critically needed by our war machine and are being wasted now. . . . and the Department of Interior is making it possible to harvest yucca from public lands. . . . Yucca, which grows wild and abundantly throughout the Southwest is a domestic substitute for the hemp and jute fibers we used to get from the Far East. . . . It can be used to make rope and twine, burlap and materials used in mattresses and in upholstery.

* * * * *

Salem, Milford, Walled Lake, South Lyon, and Plymouth all have rationing boards. Northville and Livonia people still must go to Plymouth. Here's hoping we can have one in Northville.

Many children are suffering from defective eyesight. Faulty vision is a common cause of:

1. Slowings in Reading.
2. Inaccuracy in Reading.
3. Low Comprehension.
4. Failure to Remember.
5. Wandering Attention.

Other indications of eye-strain in children of school age:

1. Squinting.
2. Irritability.
3. Bad Posture.
4. Strained Facial Expressions.

Have their eyes examined before school starts.

"TRAILER VAGABOND"

By WARREN RAYLEY

WEST BEND, IOWA
GROTTO OF THE REDEMPTION

The heart is very often moulded better through the eye than through the ear.

On March 10th, 1928, in this little town of West Bend, Iowa, a Minister or the Gospel began one of the greatest construction jobs of its kind ever attempted in the Christian world.

Today, after a little over 14 years the work still continues.

Already it has entailed a journey of over 120,000 miles to every state in the United States as well as some foreign countries to gather material to be used in its construction.

Already although it is only half completed, it has attracted over 2 million visitors from all parts of the world.

When completed "The Grotto of the Redemption" will rank with Taj Mahal in India as one of the seven wonders of the modern world. Taj Mahal was built for the love of a woman. The "Grotto" is being built for the love of Christ.

To understand this great work now under construction by the Rev. P. M. Dobberstein here at West Bend, one must first understand the full meaning of the word "Grotto." The word is Italian and in a broad sense means "an open mouth cavern." Primarily they are found in the mountains in France. Their interiors are wrought with beautiful formations formed by nature through millions of years.

Grotto's and religion, because closely associated back in the middle ages. Shepherds used them for worship when distance and duty
