

FORWARD into FORTY-THREE

With Our Men in the Service

NOTE—This column is dedicated to news of men and women
in the Northville community who are in the service.

I will be heading to a new camp within a few days. We have finished our schooling here and will graduate Monday.

The last two weeks of school were the most thrilling and interesting. We were trying and firing machine guns at a target that was towed behind another plane. My last mission I got a chance to fly in a B-17 and fired from the lower ball turret.

I will send you my new address so I still will be able to receive the paper. Until I send my address, better hold up on sending me the paper.

Yours truly,

Fred Robinson

Pvt. Dewart P. Hall is in the station hospital at Camp Maxey, Tex., recuperating from injuries to his back suffered while on maneuvers.

Northville has two Corporal Angels. One is Corp. John Angell located in Redmond, Ore., in the army air base there, and the other is Corp. Glenn Angell, who is at Ft. Lewis, Wash., having recently been transferred there from Camp Crowder, Mo.

Herbert Whipple, the third of the three Whipple brothers to enlist in the Navy is in the Sea Bees and stationed at Camp Perry, Va. Wallace is still listed as missing in action. Fred, who is in the regular Navy, is on his way home on leave, having been away for two years.

C. T. Wheaton who was private first class at Camp Kilmer, N. J., has been promoted to corporal.

James L. Odgers, better known as "Curly," is at Camp Perry, Va., with a rating of fireman, first class.

Russell Vickers, who recently finished his boot training at the Great Lakes Naval Training Station, is now at the naval supply depot at Merriamsville, Pa.

Tom Carrington, Jr., was promoted to rank of captain on Aug. 19, 1943. Captain Carrington is a weather officer with the 10th Air Force in India.

Johnathon Port, formerly of Northville, who has been living in Royal Oak for the past four years, has been inducted into the Army and will report for duty Sept. 11.

Gentlemen:

This is to inform you that my address has been changed from the U.S. Naval Reserve Midshipmen's School, New York, N.Y. It is requested my copy of the Record be forwarded to this new address. The receipt of the Record is very much appreciated as it keeps me in touch with old friends and brings back memories of my boyhood days in Novi.

This vessel to which I have been assigned is a new cruiser and will be my 23rd ship and station that I will have served in and on; it is in its final stage of completion and will be ready for commissioning the 31st of this month. We then expect to make a short "shakedown" cruise to some unnamed port for a final test of machinery, men, guns and equipment prior to assignment to our task force or group. Then the grim business of hunting down our common enemy begins, from this time on the 1300 officers and men begin clicking as one huge machine, hence the reason for a "shake down" cruise, it is very difficult for the layman to visualize the training and constant study necessary in producing and maintaining a well oiled machine in the personnel of a fighting ship. I am not at liberty to tell all I would like to touch but rest assured that the taxpayer's money is not going for naught, there is not the slightest doubt in my mind that our men, ships, guns, food and equipment are the best. I am well aware that there is considerable complaining among our civilians but take it from one who knows if great sacrifices are not made now these rabbles rousing us will really have something about which to complain. I should prefer death to being crushed under the iron heel of Hitlerism or living under the rule of that jeering, slant-eyed, snarling-toothed, yellow-bellied so and so that bombastically refers to himself as "the Son of Heaven."

I am now in my sixteenth year of service; have visited 35 foreign countries, islands and possessions, the 48 states and District of Columbia and know whereof I speak. A great number of the service men of today are married and have families and homes. They are as anxious for the war to end as any of you; they too wish to return to their loved ones and the pursuit of liberty, life and happiness. Great stress is placed on the fact that those at home should write often to their men in the service to keep up their morale. I wonder if the news isn't becoming stale to the men, write more often to keep up the morale on the home front. The morale of

the average service man is higher than that of his civilian relatives and friends; sad but only too true.

I have been appointed Ships Service Officer in this vessel and am in charge of the following: soda fountain, ship's store, barber shop, laundry and tailor shop. These activities perform in much the same manner as like firms in civilian life. Our equipment is of the latest, the barber shop having three chairs; and in the soda fountain we are able to make and store 120 gallons of ice cream. Needless to say this is a very popular place.

Not wishing to consume more of your time I will bring this close. Kindest personal regards to all and especially to my old school buddies in Novi wherever they may be. A H. Novi, why don't you write?

Sincerely,
Charles W. Banks,
APC USN.

Coast Guardsman George Rish, who sometime ago was hospitalized for a badly broken leg suffered while on active duty, is home again, several weeks' sick leave. He is under orders to report back to the hospital for further treatment which will probably take several months.

Charles Dayton was accepted by the Navy last Saturday, Aug. 21, and will leave this Saturday, Aug. 28.

Bill Slater left last Thursday to begin his training in the Navy. Bill was sworn in some weeks ago and has been awaiting his orders. He'll be missed when the call for football practice comes next month.

Ray Belchamp, who is in the Navy, was home over the weekend and on leave from the Naval base at Peru, Ind.

Howard Card has been sworn into the Navy and will leave Saturday, Aug. 28. He has been working at Wolf Market for some time.

Kenneth McFarland wrote the letter which follows to his family from somewhere in Hawaii July 21, 1943.

Dear Folks:

Received your letter, and was very glad to finally hear from you. Sure hope this finds you all well in good old Northville.

I am feeling very fine. I also got a letter from Dr. Steininger at Maybury San, too.

I had a 10-hour pass today and went to town. I had a good time too. We bowed most of the morning, looked the town over, and topped it off with a good T-bone steak. Then in the afternoon we went for a long swim. It was the first time I've been in swimming for sometime and I really enjoyed it. We had to be back in camp at 6 o'clock. I think it was just about the best time I ever had for \$3.00.

Say Dad, I sure hope you had a swell time on your birthday. I was thinking of you, and wish you have a hundred more.

We have a day room right in camp here. All sorts of games, ping-pong, table, radio and phonograph, with plenty of records. So there's plenty of things to occupy our spare time. In fact, we're a lot better here than we had in the states.

Well, I guess I'll call it a night and get on to write often and keep you good word.

Good night and good dreams to all the men, write more often to keep up the morale on the home front. The morale of

Evidence of a tendency to exceed the 35-mile limit resulting in excessive wear on the tires is reported by the Public Roads Administration of the Federal Works Agency.

How to STOP FUSE TROUBLE

It's no fun sitting in the dark, especially because a blown fuse has plunged your house into a black-out. Most just wait and let it happen before it happens by observing few simple precautions.

(1) Frayed lamp cords and extension cords are often responsible for short circuits. Such frayed cords are dangerous. Have them repaired. If they cause trouble. Don't loop cords over a nail. Don't kink cords or tie them in knots. Don't run cord through a door jamb or under rugs. (2) Never put an electric appliance in water. Never poke at the element of your electric toaster (or any other appliance) with a fork or sharp tool, whether turned on or off.

(3) Don't connect too many appliances and extra lamps on one circuit. (4) Be careful not to overload your washer, or feed too many pieces of clothing through the wringer at one time. The same is true of your ironer. (5) Disconnect appliances by pulling on the plug—never jerk out the cord. Do not let cords come in contact with water, grease or acids.

(6) If a faulty lamp or appliance burns out a fuse, disconnect it at once—and don't use again until it has been repaired. The Detroit Edison Company.

Electricity is not rationed. But its production requires coal and railroad transportation. Don't waste it!
