Increase Dairy Farm Payments

Dairy farmers in Wayne County will receive increased dairy production payments beginning July 1 when the summer schedule of rates becomes effective.

These Government payments, designed to encourage production of milk and butterfat, are adjusted quarterly.

The new rates for this county of production in July, August, and September will be 45 cents per hundred weight for milk.

13 cents a pound for butterfat according to Fred C. Ernest, County AAA Chairman. Present rates are 23 cents for milk, and 10 cents for butterfat.

Highest payments during the next 3 months will help offset the extra feed bills when pastures brown off during the summer and more commercial feed and hay have to be fed to keep up milk yield.

Applications for payments on milk and butterfat production during April, May, and June should be filed at the County AAA office as soon as possible after June 30, and not later than August 31. Checks are issued at the time applications are filed.

Bait and Fly Casting Champs Here July 13

A novel event has been worked out for next week's recreation program by R. W. Doeksen, summer recreation manager. On

Friday evening, July 13, the Ford Pond will be the scene of some exhibition bait casting by casting and trick bait casting put on by the Detroit Bait and Fly Club.

Champions from state, mid-western and Great Lakes tournaments will participate. The public is invited to attend this exhibition match.

Last week's recreation softball schedule is as follows: July 9, C.Y.L. vs. Twin Pines; July 10, opening of the N.W. League (7th and 8th grades); July 11, Royal Recreation vs. Petz Service; and July 12, Novi vs. Mayburyian.

WANTED! Servicemen's Pictures

We can use some pictures of servicemen from Northville and community. If parents or friends of these men and women will bring in pictures of servicemen we will be glad to publish them as we have hundreds of others returning the photographs after publication.

## Killed In Auto Crash Monday

Jacob Bierschbach of Eight Mile Road Killed in Crash at Corner of Six Mile and Farmington Roads

Jacch Bierschbach of Eight Mile Road was instantly killed in an automobile collision which occurred at the corner of Farmington and Six Miles Roads early Monday evening, July 2. Mr. Bierschbach was on his way home from the Auto Electric Co. of Dearborn where he was employed as a shop supervisor. He was fifty years old and had recently been married for three days.

The body lay in State at the Casterline Funeral Home until Thursday afternoon when funeral services were held under the auspices of the International Division of Delta, Inc. Bierschbach being born a member of that division during World War I. Burial was made at the Red Arrow Cemetery on Plymouth Road.

Surviving him are his wife, two daughters, Marlene and Mary Lou; four brothers, three sisters, and a son.

This will be a second extension of the Northville Coach Line, which was extended by T. P. Biddle to South Lyon and Novi, and now with the proposed extension, the Northville Coach line will serve a greatly enlarged territory.

**1414 Pints of Blood Donated**

Members of Community Blood Donors Service Make Enviable Record in Three Year Period

A report of the Blood Donors Service of which Mrs. William C. Casterline is chairman shows 1414 pints of blood donated by my people of this community during nine visits of the mobile unit to this village. The first two collectors here were in 1942 and one in 1943, three in 1944 and one in 1945. The largest amount of blood donated was during 1944 when 532 pints were received.

Both the Presbyterian and Methodist church houses were used as stations, boys of the High School aiding in the "setting up," carrying tables, chairs, screens and equipment and placing proper arrangement. Northville members of the various Defense classes, home nursing, nurses aides, canteen, as well as clerical and other workers assisted in the work.

Volunteer assistance together with the staff of the mobile unit made the grand record of 667,561 pints collected from Nov. 24, '41 to May 18, '45, for the Detroit area in which Northville is included.

**Exchange Officers Are Elected for 6 Months' Period**

Officers-elect and now in charge of the Northville Exchange Club are President, Merritt Meeker; First Vice-Pres., Gordon Atchison; 2nd Vice-Pres., Sid Frid; Secretary-Treasurer, W. L. Williams. Committees have not been named as yet.

**Northville Has Quiet Enjoyable July Fourth**

Northville enjoyed the Fourth to the full. Ideal weather contributed much to the day as families picnicked, went to the races, or attended the bingo game, or participated in the Recreation Fourth for the children. No accidents were reported locally.

At Ford Field about 150 boys and girls under the leadership of the recreational committee held a field day and ball game.

Boys and girls and free ice cream kept the group busy until nearly six o'clock.

A huge crowd filled the Northville Downs to capacity but regulations were not available for either attendance or mutual totals, a near record was predicted while the early week record fell to a crowd Tuesday night as well as mutual totals.

At the Veterans Memorial Hall, the basement and first floor was crowded as about 250 people received awards for good fortune with numbers and kernels of corn. The Legion is continuing these games each Friday night for the benefit of the building fund.

**Michigan Bell Makes \$1,794,853 Tax Payment**

A check for \$1,794,853 was turned over this week by the Michigan Bell Telephone Company to Louis M. Nims, state commissioner of revenue, as its semi-annual property tax payment, remitted by the Constitution for the Primary School Fund.

The company's state tax this year is \$1,794,853, the same amount as last year.

Trotting Meet Ends 24 Days of Racing Here

Mutuel Record Established Saturday When Record Attendance Tops \$1,000

The most successful trotting meet ever held in Michigan came to an end Wednesday night after 24 nights of racing. Not only were attendance and mutuel records topped right and left, particularly the last four nights of the meetings, but the track record of 2,056 set by Darby Direct, the chestnut gelding owned by Chester A. Fauder of Chester, O., who won the Michigan Pacific Derby after a lapse of 12 years from a fast a field of horses that ever raced over a half-mile track.

A mutual record was established last Saturday night with a handle of \$82,000 only to drop on Tuesday and Wednesday nights. The attendance record of \$37,540 set Saturday was not broken but a record crowd of 6,000 for a Monday night saw the opening card this week and bet \$76,000 through the windows.

Another record was made when Miss Janice M. won the second cash Monday night at odds of 337-69 to help pay a season's mark of \$832,10 in the daily doable.

Manager Sam Weidrick, the Detroit sports promoter who turned from boxing and baseball to harness racing a year ago to place Michigan back on the map, announced Monday night that the Fall meet would open on Sept. 22.

**Novi Adopts Zoning Law**

**Township Board Okays Ordinance at Meeting Held Monday Evening**

The Township Board of Novi, in session Monday evening, adopted a zoning ordinance for the township. The ordinance was prepared and maps drawn by G. G. Phillips of Northville.

The text of the ordinance will be published in it's entirety in next week's issue of the Novi Record.

**Bond Sales to Continue Here**

**Scouts to Conduct Drive for Quota Up to July 7; Enjoy Bond Movie**

The free Bond Show given Thursday eve, June 23, thru the courtesy of Harry Lusk of the Penniman-Allen Theatre drew a goodly sized crowd and helped the bond sales in fine fashion.

Diamond Horse Shoe in technician was the movie feature, with Betty Grable and Dick Haymes in gorgeous spectacle with beautiful costumes, good music and an interesting plot.

The show was planned as an aid to the Scouts of N-1 Troop led by Harold Parmenter who took over active sales work when school ended. Scouts and leaders marched to the stage and put on a regular Scout flag ceremony.

Cider then told of some of his experiences during his service in the Navy. Al Porritt who acted as master of ceremonies interviewed Cpl. Clarence Holman, a prisoner of the Germans for a long period concerning his experiences both as a prisoner and a soldier in training camp. Both stressed the need of bond buying.

The Northville barber stop quartet, scheduled as a feature of the evening, could not appear since one of their numbers had been called to duty. However, Mr. Porritt was fortunate in securing the services of The Four Shorties, a group of Detroit men who have appeared in U.S.O. shows all over the state.

Costumed as barbers and wearing the traditional mistletoe, the quartet made a big hit with the audience singing some ten selections in all.

Two Scouts, Ken Farrell and Dick Gussell, were on duty at the wheel.

"About the turn of the century High Island was the home of Ottawa and Chippewa Indians. The related tribes lived in long cabins along the small bay at the northern end. The harbor is not a good one but it does offer shelter under favorable winds.

The two islands off the beaten path of modern tourists have much in common as to their history.

Today, the Irish Catholic fisher-folk dominate St. James, the former Mormon colony. And today the House of David settlement on High Island is slowly decaying into the sandy soil, its wooden buildings standing gaunt like silent sentinels to remind the visitor of the hustling activity 25 to 35 years ago.

From the captain's cabin of the conservation patrol boat No. 7, we had our first view of the small island, about two miles wide and four miles in length, as we rounded the northern coast of Beaver Island on a circular route back to Charlevoix.

Erwin Beffy, first mate, was at the wheel.

This amendment was approved by a vote of 372 to 3, with Rep. Dondero voting with the majority.

Reasonable Profit

Rep. Bates of Massachusetts then offered an amendment to the effect that "no maximum prices shall be established or maintained on products resulting from the processing of cattle and calves, lambs and sheep, and hogs, the processing of each

species being separately considered, which taken together, do not allow for a reasonable margin of profit to the processing industry as a group on each such species." This amendment was approved 249 to 123; Rep. Dondero voted for it; all Michigan Democrats, except Rep. Dingell, voted against it.

Rep. Dingell, of Michigan, who was aspired against the Bates amendment, voted in opposition. In fact, no Michigan Democrat voted for any of the OPA amendments.

Curb on OPA Rule

Rep. Andressen of Minnesota followed with a proposal that no regulation, order, directive or injunction shall be issued or made, or any other action taken

including directives for distribution or price schedules, with respect to any agricultural product, including livestock, or

## The American Legion Digest

This column is edited and paid for by the Lloyd H. Green Post No. 147 American Legion of Northville for the information of the men in the service. Questions from Servicemen will be welcomed and answered in this column.

**YOU NAME IT: THE LEGION** ruling that men in the service who were past 42 could be discharged if they applied had the old "Re-read" (they called it) charged that they applied had him "Pappy" in the outfit because "Pappy" figured he had also served in that with three years in his World War. He was a member of the Legion and a lot of com in the thatch and a little inclination from younger men for ed to punch around his mid-life jobs that might be open to him. He had done enough and was going home. The new him. He had done enough and

had better go home to his family and his American Legion post.

Pappy had done quite a bit of gun-bearing about his Legion post. It was apparent that he thought it was all right, for he had not only sounded off about the good times he had had, but was also recommending to his younger friends in the service who were fighting them that they sign up with the Legion when they got home. Yes, Pappy had enjoyed the Legion. He had worked hard and played harder. He had held a number of Legion offices and knew something about the state and national picture as well as what was home town posts had been doing. Maybe that was the reason he had the answers when the following conversation took place between him and one of the youngers who asked Pappy:

"Suppose I join—What Then?"

"All right, suppose I do join The American Legion post in

meeting so I can hear the same wimpy guys beat their guns again about the same things." "I don't suppose Joe you'll ever be able to dodge speeches at Legion meeting," admitted Pappy. "If there ever was a place where the boys love to exercise their voices, a Legion post meeting is that place. But the water's fine and no one is barred. So you can get up on amateur acting. Home I talent shows for the latter. In your own home, legs and sound of with the rest of them. That's your privilege."

"I'm not the type to be bored for any initiation ceremony, for instance, by doing a job than being about it."

"Okay, Joe, you'd still be in the right company. If the Legion is carrying out of its program something that suits you, then I've been fooling myself for about 25 years, and having fun while was being fooled. Why, the list of Legion activities that facts and figures engage in longer than the list of those that Scranton correspondence school says who need help from some who know how to go about it, and the Legion will train you in that field, you know."

"It almost the same field is the employment committee which seeks jobs for veterans. I'll just as happy if I never have

anything more to do with a Legion again as long as I live. So how about shipping from Service to specific to be specific, right down you asked me," says Pappy, warming to the subject. "But I really ought to ask you to name your own specialty, then bear down on how the Legion has an outlet for that. Anyhow, let's start off with the alphabet. First letter is 'A' and that suggests aviation—aeronautics—airplanes—airships—

"We've an aeronautics commission in the Legion. If you are interested in the present and future of aviation in the United States, make it known and you'll probably wind up on the post aviation committee. Chances are you'll find yourself up to your ears in the subject. Five years ago we used to encourage model airplane building and held contests for the community's kids. We'll probably be doing it again for the youngsters who wanted to fly, and weren't old enough to get signed up for the Air Force by Uncle Whiskers."

**Is It Sports?** "Other sports? How about baseball? The Legion has had a junior baseball program for years, and has graduated a lot of kid players into the professional game—a good many into the major leagues. And with a lot of baseball playing members fresh from the service in this war, there is no reason why there won't be a lot of adult baseball players by Legion post teams, with competition against other teams in their class."

"The same thing goes for basketball, football, tennis, and swimming, or at least of the competitive sports. I ran remeetings with the F. B. I. Work with the Legion-sponsored foot ball, O. T. C., and the F. C. Club, teams were among the best in the country for baseball and other sports."

"Just Joe—if you play any kind of an instrument, you're set for life. I don't suppose any organization ever had so many bands, orchestras, and drum units in operation at one time as The American Legion. If you ever lived in a convention city you'll remember them. Good ones, too; the nation's best! And you've got to realize that for every one band or corps that goes to a convention, there were 10 or 20, maybe, back home—doing their stuff in local parades, park concerts, and at community gatherings—but who, for some reason or other, weren't able to make the cut and money to go to a convention."

"Sing? The Legion's glee clubs and choruses were, among the best—and the future is bright for them again."

"Hup! Two-Three-Four!" "Like to drill?" (Don't throw that!) There are a lot of fellows

who do—and you might have been one—I didn't know. Well, a smart drill team is a lot of fun and a swell decoration for any occasion. We've had some of the best, including the famous Legion Zouaves that went to Europe and did their stuff in many a capital city."

"To your time. But if there is any preference you have, there'll be a place among Legion activities where you'll fit like a diamond ring on a pretty girl's finger—and you'll decide it just as well."

"You'll be going home your

honorable discharge in hand, why don't you look into what the home town post of The American Legion has to offer you in interesting activities? If they haven't started the particular activity you are looking for, it will probably be because they haven't had a well-qualified member like you to head it up and you'll get a chance to start it and help run it the way you ought to do. I'm almost as certain you will like being a member of The American Legion as I am that the Legion will like

"Suppose we make a date for a get-together at some Legion convention after the war, and check up on it. Meantime, I've got a date at a separation cen-

ter another one with the missus at home, and next Tuesday night I'll be down at the Legion post with the rest of the gang."

"So long, Joe! And don't forget I've never given you a bum bill yet; I've heard you admit that. And this is the right dope."

A broken street light wastes precious war materials needed at the front.

Recognizing the importance of street lights to the safety of busy Americans, the Boy Scouts in your community are on the lookout for broken and burned-out lamps. By reporting to the Edison Company or to the police, the scouts are calling our mobile patrols to the scene hours ahead of routine inspection. This is another example of the important services scouts are rendering in time of war—for street lights prevent crime and protect the movement of workers, troops and military supplies. Help your Boy Scouts in every way possible.

HERBERT LETCHFIELD

Last week's Record noted the death of Herbert Letchfield of South Lyon at Sessions hospital June 27, and the funeral services which took place Friday at South Lyon.

Herbert Letchfield was born to Francis and Emma Letchfield in Croxton, Eng., Oct. 12, 1883. The family came to the United States when he was an infant of eight months, settling in Ann Arbor. A few years later they moved to the vicinity of South Lyon where the deceased spent the remainder of his life.

Mr. Letchfield was employed as a clerk in the Circuit Court Commission office in Detroit for twenty

years and many of his business

associates came out for the funeral services, the offices being closed for the day, honoring his memory.

A WAR?**

AS SOON as we can, we'll bring to bear on the Japs all the additional might we've been using against Germany.

What will it cost, this Moving Day of War?

Estimate it in these terms: The job of moving millions of men from one front to another. Thousands of ships to carry the supplies of battle. Swarms of new-type aircraft to blast the path into enemy territory.

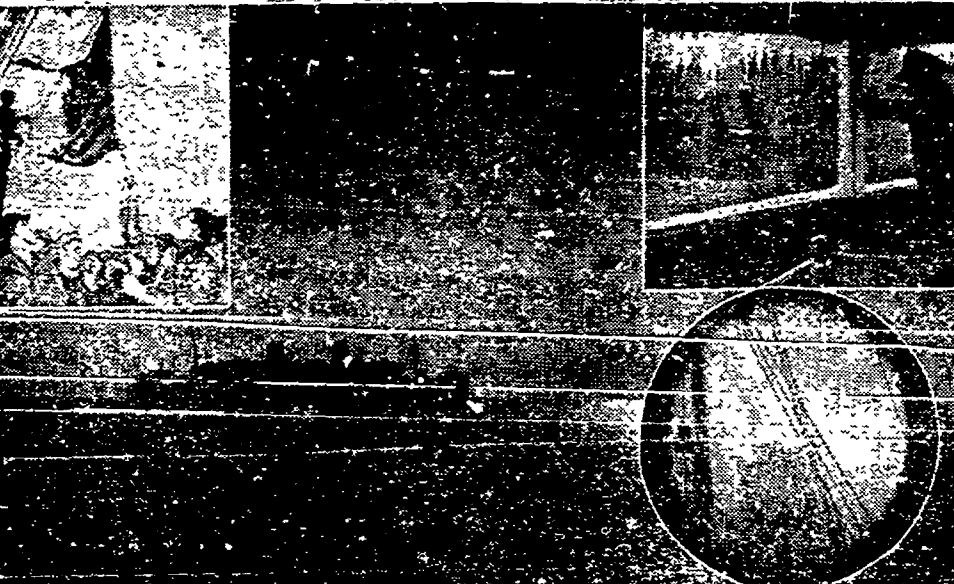

You can get an idea of the cost from the fact that Uncle Sam needs 7 billions from us in the mighty seventh War Loan now!

The Seventh War Loan will call for the greatest bond buying we have ever done.

If you have an income—whether from work, land or capital—you have a quota in the 7th War Loan.

**Children Warned of Hazards of Fallen Wires During Storms**

The authenticity of these historic details is vouches for by the eminent Detroit Dr. Milo M. Quaife.

Captain Allers, who was a young man on Beaver Island when King Ben frequently visited High Island, told us how the pretty wife protested against the king's rule that a bride must wait seven years to reside with her husband. She finally fled from High Island.

The men at the settlement were suspicious of visitors, Captain Allers added. They would not let us get out of their sight."

Today, High Island is deserted but of land at the northern rim of Lake Michigan. The wood buildings are slowly decaying. Like King Ben, who died in 1927, High Island has had its day of glory.

Michigan Bell's total tax bill for 1944 was about \$15,400,000. An increase of about \$1,500,000 over 1943 taxes. Operating taxes amounted in \$14.05 per average telephone in service, or 2½ cents for every dollar of operating revenue.

Most Wires Are NOT Insulated

"But I thought all electric wires were insulated," is an oft-heard remark.

Electric wires are weather-proofed. But they are not insulated as the cord on your iron or toaster is insulated. That would not be practical because of the extreme conditions they face—exposed to rain and snow and ice, to heat and cold which would break down ordinary insulation.

Every effort is made by the electric company to buy the best equipment in the world for reasons of safety and reliability. An enormous amount of engineering and research has gone into the development of wire with high tensile strength to resist ice coating strain caused by high winds, etc. The same is true of insulators to prevent leakage of poles, guy wires, braces and all the other equipment used in bringing electric service to your home.

Wires on top of a pole where they belong—are SAFE. Electric wires are necessary for your convenience and comfort: When storm and lightning strike, and wires occasionally fall, the situation should be met like any other emergency—with care and caution.

The department says that experimental laboratory investigations by their chemists indicate that from 30 to 50 gallons of liquid motor fuel can be obtained from a ton of corn cobs or cottonseed hulls and that about half of this is in the form of ethyl alcohol.

Experiments have advanced to the semi-works stage at the D. of A. northern regional research laboratory at Peoria, Ill., and results are so promising that the work is to be enlarged so that it may be evaluated on a semi-commercial scale.

Mr. and Mrs. R. E. Geraety have received a letter from their son, Pfc. John, stating he was in a hospital having been wounded while in front line combat in France. John had seen forty days duty at the front before he was injured. He also took part in the heavy fighting on Leyte some time ago.

It has been quite some time since I last read the Record and thought I would write to you and find out if you could send it to me as I really miss it. If you can, send me all the copies of June as I haven't gotten any of them. I really miss that paper.

Well, I guess it won't be too long before I may see my brother over here if I have good luck. Haven't met any Northville boys as yet but hope to soon. I really hope things are going along good in the home town. I guess some of the home town boys will be getting out of the Army on the point system. But it will be quite some time before I get out, I guess. I thought I liked it or not. And I did and got along a heck of a lot better. **Independence Hall****Reduce Size of Cobs By Increasing Grain****Proper Fertilization Produces Better Corn**

How corn growers can avoid "shortchanging" themselves on grain yields by reducing the amount of cobs per bushel through soil improvement practices was described by E. J. Snider of the Illinois college of agriculture.

Professor Snider cited tests at the college's experimental field near Ewing, Ill., to show that the proportion of grain to cobs is increased when corn is grown on fertilized land. Since cobs have little or no feed value and are so low in plant nutrients that they have virtually no use in manure, the fertilized corn advantages of soil improvement are obvious.

At the Ewing field, U. S. Hybrid No. 13 was grown in land treated with limestone, phosphorus and potassium and in which nitrogen-fixing legumes had been plowed under.

Snider reported. The same hybrid was planted on untreated land and at harvest the results were compared. The corn grown unfertilized was 15 bushels of cobs per bushel of ear corn weighing 70 pounds. The hybrid grown on untreated land contained 10 bushels of cobs per bushel of ear corn weighing 70 pounds. The hybrid grown on fertilized land contained 13 bushels of cobs per bushel of ear corn.

"This means that each 100 bushels of corn grown on unfertilized land contained 350 pounds more cobs than 100 bushels of the same hybrid grown on treated land," Snider said.

"On that basis, a farmer who doesn't treat, shortchanges himself by 5 bushels of grain in each 100 bushels of corn produced. Moreover, when he buys ear corn grown on this type of land, he is subject to the same shortchanging process. The extra poundage of cobs must be hauled out of the field and out of the crib era into the feeders."

The above is a direct appeal from the officials appointed by the Commander-in-Chief of our country calling on the farmers of America to grow the sugar that this nation so vitally needs.

From Farm Crop Waste

While there has been talk and experimentation for several years about obtaining several by-products from corn stalks and other farm waste, the United States Department of Agriculture now comes out with a full-blown program for extracting liquid motor fuel from corn cobs, peanut shells, sawdust, cut twigs, cottonseed hulls and burs and sugar.
