PICTURES WHICH APPEAR IN THIS WEEK'S RECORD

Mr. Glenn E. Griffin, is the twenty-one year old son of Mr. and Mrs. Leo Griffin of North Center street, and the husband of the former Lucille Bennett of Plymouth. He is the father of Nelson, aged 2, and Kathleen, 1 month. Glenn entered service in February, 1942 and is now in the Aleutians. He was last home on furlough in April.

Port William McGee is the son of Mr. and Mrs. C. E. Carpenter, street and husband of Virginia McGee, also of Carpenter street. The McGees have three children, Fay, aged 7, Margaret, 6, and Charles, 3. William has lived here all his life and graduated from Northville High school in 1936. He entered service in February, 1945, and trained at Camp Wheeler, Georgia. Recently he was sent to Fort Riley, Kansas for training, and was home on furlough in July. He was last employed at the Independent Furnace Co. of Cady street.

Assigned the USS West Virginia in the Western Pacific, Roy D. Bentley, musician, third class, USNR, 219 West Main street, Northville, fought at Okinawa aboard this venerable man of war, the only battleship which has taken part in every major landing operation in the Pacific in the last months. Bentley was aboard Pearl Harbor by two bombs and at least six torpedoes, the old battleship was resurrected and repaired, then joined the fight against the Japs with a vigor that has won her a reputation as the "one ship task force." In the last year and a half the West Virginia has fired more than 3,000 rounds from her new 16 inch rifles, nearly 30,000 rounds of her secondary armament and more than 200,000 bullets from her automatic weapons, a total of 5,500 tons of ammunition.

Sorry I haven't written but have been rather busy painting our quarters as to make them more like home. I hope this letter finds everything in Northville all ok. I see the new postal mailing rule in the paper so I would like it if you could renege my application in the mail. I have a letter to you in the way of a letter, where the other fellows are and what they are doing. We have been painting for the past week and a half and it has been hot out here. Well I will close for now, again, thanking you for the letters coming. Sincerely yours, Charles Dayton.

I am just dropping you a few lines to let you know that I have a stop sending the Record. I have no more request to return to the States. I also would like to thank you for sending me the Northville Record. I surely enjoyed reading it. I should be in the States by August 15. Thanks lot. Sincerely, Joe Spagnuolo.

Fal East Air Forces Headquarters, Philippines. Included in the first group of Wacs to return to the States under the Army's deployment program is Capt. Irene Modes of 2300 Garfield Road, Northville, with six points to her credit. Critical score for Wacs is 44. In the WAC since August, 1942, Capt. Modes' overseas tour of duty has included Brisbane, Australia; Hollandia, Dutch New Guinea; and the Philippines. One of the first contingent of Wacs to arrive in the Southwest Pacific last May, she was selected for duty with the Air Signal Section, when the PEFAC WAC Detachment was first activated.

An issue of The Record was waiting for me when I got home this noon from trying to hypnotize a suspicious tutor into thinking I had actually studied an assignment. Thanks a lot, Bill, for your inclusion of my name on your list. I want to add my voice to those who so genuinely appreciate your kindness. May your troubles never be more than a shortage of paper.

My spoken Chinese now seems back to better than what it was when I left China. I have an individual tutor (because I am the only one in the school who has a spoken dialect background) and she has been greatly interested in the job. She has been over here only about four years and herself is taking work in the University. Now I'm slowing up on the spoken vocabulary as far as increasing it is concerned, and am studying the written Chinese. I never had time for it when I was in China, but it's as interesting as all get out—completely a lot of meaning. I learn quite a few words picturing each word, but on figuring up, I guess I'll have to ask them to delay the war for me a little bit, as it takes about 7000 words to read a newspaper. (Don't argue with me. Maybe they can read your newspaper with an infinitesimal fraction of that amount, but this is a Chinese newspaper.) Already I know that a man means, the strength of a woman, the beauty of a good female, the goodness of a good female, the goodness of a good female, and the head of a chief.

33 Exhibitors To Show At 4-H Fair Here

Judging of Exhibits Will Be On Friday by Asst. State Club Leader From M.S.C.

The annual Wayne County 4-H Club Fair will be held next Friday at the Fair grounds. Exhibits will be brought into the grounds Thursday and groomed for the judging and showmanship which will take place the following day. Exhibits include 21 cattle, 3 pigs of pigs and rabbits from the Dearborn Rabbit Club under the direction of Keith Forbush.

All judging will be done by Louis Webb, assistant state club leader of Michigan State College. The show is under the direction of Mrs. Ida Williams, Wayne County 4-H agent, and E. I. Becker, County Agricultural Agent.

Silver Star and Oak Leaf Cluster Given In Recognition of Combat Prior to V-E Day

S/Sgt. Wilbert C. Grimm of 311 Main street, Northville, has recently been awarded the Silver Star and Oak Leaf Cluster for his action in combat prior to V-E Day while serving with the 160th Infantry Division. He is a member of the famous Central Postal Directory, 39th Infantry Regiment.

The award recognized the part he played in the division's fighting through France and Germany. During the last November, the 160th Division crossed the river and German planned defenses. Grimm fought to take the elaborately fortified town of Batten, on the Moselle River.

Standing at a major German position at the turn of the road, Grimm and his unit fought through the fortifications to reach the historical objective in the town of Batten. After spending a night in the town, Grimm and his unit fought to take the town of Batten, on the Moselle River.

There were 31 men from Michigan who will be sent to the 3rd Sherman, Ill. Reception Center. One Northville man, S/Sgt. Lewis Bulmon is aboard this troopship.

The "Mighty A's" are once again sailing the Pacific. Our short visit in the States seems like it didn't change much, but here it's just as hot as ever. However, we are a little closer to the completion of the war and that is the important thing.

I would like to thank my many friends who helped make my visit in Northville such a happy one. Frankly, when I first arrived I was a little nervous and not sure of myself, but your friendly smiles and the old familiar scenes made me soon realize I was home. That's a great feeling. I hope all the boys are home soon for good. That new veterans' home will vibrate with excitement.

I am keeping an eye out for Northville boys. I am particularly anxious to assure them everything is alright and unchanged through the war. I know this isn't any fault of the paper, I wouldn't complain at all, only I look forward to the paper and miss it when it doesn't come. Bye for now. Lt. (jg) A. Boelens.

Ration Book 5 To Be Issued In December

Book Will Be About Size of Dollar Bill and Contain Only About Half As Many Stamps

The current paper and fats shortages are both emphasized in the announcement of War Ration Book Five to be distributed in December. E. A. Schmitt, chairman of the Wayne County Salvage Committee, commented today.

The book, smaller than a dollar bill and containing just half as many stamps as the last book issued, uses just half as much paper as Book Four, we are told in an official Washington bulletin.

The Department of the Interior and the War Production Board estimate that supplies of metals and fats earned goods, sugar and shoes all will be in tight supply for some months to come. Book Five, accordingly, has been designed to last from 19 to 25 months if needed.

This 192 stamps in the new book will compare with 34 in Book Four, all be the same size as the stamps now in use, but will not have both a letter and a number. At the current rate of making stamps, good-fives and good-tens stamps will be in short supply.

War Ration Book Five can last from January 1946 through the first quarter of 1947. The book will contain 43 stamps, numbered from 1 through 43, and 50 for use in the new ration program. There will be 43 blue (processed foods) stamps, numbered from 1 through 43, and 50 for use in the new ration program.

The book will also contain 52 stamps, numbered from 44 through 95, and 50 for use in the new ration program. The maximum use of "space" stamps in Book Three and Paper Ration Book Four was 100 stamps.

The last time stamps in Book Four have been used, it was on October 1, 1945. Substitution stamps are now being used in the new ration program. The new Book Five becomes valid.

Rodeo Opens Here on 15th for 5 Days

Saddle Ridge Farm Annual Rodeo Will Bring In Big Program of Thrills. Two Matinees

Win 2nd Place In City Doubles

Mesdames Maltby and Bauer Take Second In Class B Doubles In Detroit City Tournament

Two Northville ladies, Mrs. Doris Maltby of Walnut avenue and Mrs. Maltby of Walnut avenue, took second place in the Class B Doubles at the Detroit City Tournament which was held recently at the Detroit Athletic Club.

Mrs. Maltby also played with Mrs. Maltby in the Class B Doubles at the Detroit Athletic Club. This is the first time that any Northville ladies have won a trophy in a tournament.

Save Tin Cans For Collection

Michigan "housewives" have done a big job for salvage, says a report from the U. S. War Relocation Authority. The report says that the job is still only half done. The need for tin is greater than ever. The war in the Pacific is a costly one, with the loss of planes, tanks, trucks, landing craft and other war materiel in every invasion. That means that the salvage of tin is a very important job.

Old Northville Spring Being Rejuvenated by Rotarians

The process of rejuvenating the Old Northville Spring is in progress. Tuesday evening, a band of rotarians led by Jody Lapham and John Boyce turned in to clean up what some folks called a "stinking mess."

The spring had been plugged with rocks and tennis balls, was taken up and cleaned and a section replaced, a new creek, with iron grating, placed in position to prevent debris getting into the drain, and stepping stones were replaced. The rubbish and broken bottles were raked up, and the place given a general belated spring house cleaning.

A new Auxiliary of the Veterans of Foreign Wars is to be formed in Northville. Mrs. Ethel Gagner of Seven Mile Road, a member of the Wolverine Post in Redford is directing the formation of this new chapter. The first meeting will be held at the C. E. Hall at 8 p. m. August 13, for the purpose of election of officers. An invitation is extended to all ladies who have members of their families in the service overseas. All ladies who are eligible to become members of the Auxiliary are urged to join now and become a charter member.

Mrs. and Mrs. Fred Oliver of Northville are home Sunday. They are home from a tour of the United States, where they have been visiting for several weeks.

Headed Youth for Christ Group

Rev. Lloyd E. Young named Director of Suburban Christian Business Men's Committee

A Suburban Detroit Youth For Christ organization, with Lloyd E. Young named as Director, was organized last night.

Director of the Suburban Detroit Christian Business Men's Committee, Rev. Lloyd E. Young, announced the date for the opening youth rally as Friday, September 14, the place, Farmington, the speaker, Leon Sullivan of Philadelphia. Young people from about thirty churches are expected to participate in the activities of the movement.

Readers will be interested to know that, according to a report given at an international conference of Youth For Christ leaders held at Winona Lake, Indiana, about one-half million young people meet weekly for rallies of this type across the nation.

HOW TO STRETCH CANNING SUGAR

So that no family need be without plenty of home-canned peaches this year, even though sugar is short, Miss Roberta Hershey, nutrition specialist at Michigan State college, stresses that fruit can be canned with little or no sugar, if necessary.

It's a good plan to save part of the sugar supply for peaches, and make it go further by adding some syrup or honey. But if no sugar is available, can them in their own juice.

If some sugar has been reserved, make a syrup of one of the following combinations: 1 cup sugar and 2 1/2 cups water, or 1 cup sugar plus one-half cup honey and 3/4 cups water. Drop peeled and halved peaches in boiling syrup, heat through, but do not cook until soft. Pack the hot peaches loosely in jars and cover with boiling liquid to within one-half inch of the top. The lids may then be adjusted according to the directions of the manufacturers and the jars processed in boiling water for 20 minutes.

The boiling water should be at least two inches over the top of the jars.

If no sugar is available, cook sliced or halved peaches in their own juice or with just enough water to keep them from sticking to the pan. Pack them in jars, cover with boiling juice, and process as if syrup were used.

Peaches canned without sugar may not be quite so tasty, but they will make fine puddings and pie next winter, and the Canning of Fruits and Vegetables may be sweetened when the jars are opened.

County Agent's News Column

E. J. Besemer

Farmers should be preparing plans for their fall labor needs. The boys now placed on farms will be going back to school and their places on the farms will have to be filled by others. The County Agent's office may be able to help this need with men who have a two weeks vacation that they are willing to use by working on farms.

The day may not be too far in the future when farm and home equipment of all kinds may be plentiful again. With this in mind, E. J. Besemer, county agricultural agent, suggests that Wayne county farm families start setting a few purchasing plans down on paper. Have each member of the family make an independent list of the items he or she would like to have. Then in order of importance and not down the reasons in mind, at items such as repairs, equipment, remodeling, extension, control, soil treatment, education and house-
hold furnishings. Combining the lists under two headings—business and home and personal. Enter estimated costs opposite each item. Then at the top show the estimated total funds that will be available by year. A few simple lists will determine the needs of each prospective purchaser. Questions that may be asked are—Is it adapted to the farm? Will it be needed when labor is again plentiful? How many days will the item be used each year? If a business item, will it pay a profit above interest, depreciation and upkeep? If a home or convenience item, should money be used now in the business and the profits used later for the home comforts and conveniences? Adjust the list to come within the money available. Number each item in order of most urgent need as a guide for the order of purchase. This system will provide an organized post-war buying program and will prevent many unwise purchases influenced by salesmen.

Leaf Hoppers Are Cause of Serious Plum Tree Damage

Michigan plum growers, soon may find one of their most pressing problems solved as the result of experimental detective work on the part of J. A. Merrill, college and research horticultural specialist at Michigan State College.

For some time Mr. Merrill has been carrying out experiments to learn what may be causing severe foliage withering and the dwarfing of several varieties of plum trees in the state. So serious has been the affliction that the trees seldom set sufficient fruit to make a paying crop.

Now it seems, as a result of Mr. Merrill's tests, that the common leaf hopper is the troublemaker. The insect, which is a pest of many fruit trees, has been found to be the cause of the damage.

While carrying on fertilization and soil nutrient trials in Allegan county orchards, the college specialist used cloth bags covered with 22-gauge spray netting several branches on each of the trees. He was surprised to note that the leaves remained in excellent condition, while those on other portions of the trees continued the withering process. He concluded that the bags protected the leaves from the leaf hopper.

During the next year of more experiments, Merrill expects to be able to control the pest by the use of a chemical. The Agricultural Experiment Station staff at the college on an expanded basis to verify the conclusions so far reached. Spray formulas that can be recommended for the control of the insects will be worked out.

V. R. Gardner, director of the experiment station, explains that the leaf hopper is by no means a new plum tree insect pest. However, he points out that until now it had not been realized that the insect caused any great damage during normal seasons. Mr. Merrill's experiments seem to indicate, according to Mr. Gardner, that a few hoppers can be very poisonous to the trees.

AMERICAN HEROES

By WOODY COWAN

A SILVER STAR for gallantry in action has been awarded to
Pfc. Julius Aschenbrenner, Pinckney, Mich. Although a member
of a light machine gun section and therefore only armed with a pistol,
Aschenbrenner advanced with several riflemen under heavy fire to
knock out a machine gun position in New Guinea. He helped still
the enemy fire. Men like that must have weapons, food and clothing.
The War Bonds you buy and hold will provide them.

Christian Business Committee Organized

A Suburban Detroit Christian Business Men's Committee was
brought into existence at a meet-
ing of men from six villages held
in the Potomac Inn Friday Aug.
2. The nucleus committee con-
sisting of men from Farmington,
Claremont, Novi, Northville,
Livonia, and Wayne, forty-four
men in all, announced a program
of monthly fellowship meetings
for business men from all denomina-
tions. Three denominations are
represented at present: Baptist,
Methodist, and Pentecostal. The
purpose of the local committee,
which is affiliated with the Chris-
tian Business Men's Committee
International, is to foster activi-
ties in the area which will pro-
mote the cause of evangelistic
Christianity. Its first activity is
the sponsorship of The Suburban
Detroit Youth For Christ Organi-
zation.

The committee was organized
as a result of an earlier meeting
called by the Men's Bible Class
of the Northville Baptist Church,
of which the Reverend Lloyd E.
Young is pastor.

Postwar Machinery Speedspraver

The Speedsprayer consists of a 500 gallon metal tank mounted with a large capacity centrifugal type pump operating at low pressure. The nozzles are spaced uniformly over the distributing head, controlled by a single valve.

The air blast is developed by an airplane type propeller driven by a large six cylinder gasoline engine. The air propeller discharges 125,000 cubic feet of air per minute. This sprayer has proven practical in orchards of 50 acres or more, or as a community project. Manufactured by John Bean, Lansing, Mich.

USE HEAD LETTUCE
FOR FALL GARDENS

By Perry H. Bouzer, Michigan
State College Extension Hor-
ticultural Specialist

Head lettuce can be direct-
seeded as a fall crop, but there
is time left for planting this
season only in the southern part
of the lower peninsula. About
60 days are needed for maturity
from time of planting.
The seed is usually sown in
rows about 24 inches apart and
covered with about one-half inch
of soil. Care must be taken in
cultivation to maintain all pos-
sible moisture and allow the roots
to form over the seed row.
When the plants develop their
fourth leaves, they should be
thinned to stand 18 inches apart
in the row. The thinned plants
may be transplanted to other
rows in the garden to increase
production.
Frequent side dressings of
fertilizer solution, applied after
thinning, will aid in developing
fine heads.

A part of the victory garden
series, prepared by Michigan
State College and the victory
garden section of the Michigan
Office of Civilian Defense.

Where did you get all the
experience? Must have been
learning for him to acquire be-
lievable things.
He must have traveled much and
seen many things.
"Not he has never been much
of a traveler, but he's been mar-
ried for three years to a woman
who could tell any man out with
a full set of experiences inside
of two weeks."

"Oh, dear," said the young
woman with a weary sigh, as she
tossed aside the volume, "I'm so
unhappy."
"What's the trouble?" asked
the young man.
"There isn't a library in this
town where one can get a book
that's unfit to read."

Water for Chickens

In order that fresh water may
be provided for the chickens and
be kept clean, the cover
shown to this
illustration is re-
commended. It may
be used with water
basin or some form
of automatic water
font.

Alfalfa Adds Nitrogen

When alfalfa is fed on the farm
where it is grown and the manure
is returned to the land, there would
be a large gain in nitrogen and the
phosphorus and potassium loss
would be greatly reduced.
At the University of Illinois, it was
observed that when a ton of hay is
sold, 37 pounds of nitrogen obtained
from the air goes with no gain
to the grower, but rather as a gain
to the buyer of the hay. By feeding
the alfalfa and using manure, this
loss is reduced.

Hormone sprays, or pre-harvest
fruit drop inhibitors, containing
parathion, etc., and as the active
ingredient, were used both in
spray and dust form by many apple
and pear growers throughout the
country in 1944.

Add Water to Tires

There are no ill effects from fill-
ing tires completely with a water
solution of calcium chloride. Com-
pletely filled tires have an advan-
tage in that pressure is automatic-
ally increased as the tires are over-
loaded, thus avoiding the usual
necessity for adding more air and
using higher pressures in proportion
to heavier tire loads.
Resistance to bruising and punc-
ture is not affected by the presence
of water in the tire.
