PAINT IN THE FALL!

7 GOOD REASONS WHY

- The early fall months are the best in the year for painting. Keep the following good reasons WHY in mind. And by all means, use Sherwin-Williams two-coat job to insure long wear and satisfaction.
1. Wood on frame buildings, is thoroughly dried out. Other structural type buildings, masonry stucco and concrete, drier than in the spring.
 2. Gives paint chance to harden during winter, when infra-red and ultra-violet rays are less powerful.
 3. Fewer gnats, bugs, etc., in the fall.
 4. There is practically no deterioration to newly painted surfaces during winter.
 5. Gives added protection to surface when most needed.
 6. Less variation of temperature during the process of painting, insuring uniform drying of paint coats.
 7. Gutters and downspouts and roofs can all be looked over and made ready for spring; often saving costly repairs and plaster and interior decoration.
- SUMMING UP . . . Paint in the fall! Get a better paint job . . . a longer wearing job . . . and save money. Building looks good when more of the structure is visible than at other periods of the year, unhidden by foliage.

Many of Michigan's 629,000 men and women in the military services are coming home soon, now at a low tide pace of only 10,000 monthly—to a Pandora's box of problems.

It's a new world, promised for so long, and with it a bewildering and confusing flood of new ideas.

Just as atomic energy is being hailed as the "greatest invention of all times," to quote the words of a University of Chicago scientist in the current issue of Survey Graphic, so some American leaders insist we are at the threshold of near Utopia itself. William Green, president of the American Federation of Labor, employed

the phrase "new industrial revolution" in his Labor Day address this month. The implications are obvious.

A number of years ago Dr. Lloyd Douglas, the one-time Ann Arbor minister who attained fame as an author, pointed out that the history of civilization has been the graph of a series of plateaus or levels. He said we have been striving for centuries to free ourselves from the necessity of physical work and we have just about accomplished it to our own surprise, thanks to technological miracles of science.

Our latest ascent to a new plateau is sharp and difficult, he said. We must adjust ourselves to the surge upward or fall by the wayside.

There are historians who maintain that our current problems are the by-products of this new climb upward, and the words they use to describe it are "social revolution." Certainly the staggering cost and waste of modern war, which has weakened England as never before, are major factors in the current swing there from private enterprise to state socialism.

The veterans once they have made their own adjustments into civilian life, will face the immediate choice of a continuation of the American free, competitive system which has been responsible for the highest living standards in the world today or a fling at state socialism with its Utopian hope of a full dinner pail, individual security, better health, and better everything else, all at the bounty of the government and thus at the expense of everyone, rich and poor.

There is some logic to the argument that the cost of modern war, such as the \$70 billions which have been piled on top of American national indebtedness, may inevitably push the nation into state socialism.

The private enterprise system, faced with such a challenge, is on trial as never before.

What will the veterans do? The decision will be fateful.

The Michigan veteran will come home to an agriculture which has experienced war-time inflation of land prices.

More farm land changed hands in Michigan in 1943 than in any previous year on record. In fact many farms have been sold at prices higher than their long-time earning power justifies. Prices last year were 45 per cent higher than in 1939. The spiral continues upward.

Veterans will return to a highly mechanized agriculture in which one good tractor now does the work of three teams of horses. The same machine, or perhaps one adapted for small acreage, will enable the veteran to escape the insecurity of the city and to possess a small suburban farm where he can attain some degree of independence from the rise and fall of employment.

Large housing and road construction programs, "victory" garden experience, new popularity of frozen food lockers—these are additional factors which will accelerate the trend from city to country.

The service industries in Michigan—such as transportation, retailing, resorts, professions, marketing and local government—offer opportunities to veterans.

In 1940 the service industries formed 47.2 per cent of the total income as compared with 39.2 per cent in 1920. Economists maintain that if this country is to have a higher and higher standard of living after the war, the movement into the service occupations should be encouraged. Certainly factories alone can't be responsible for full employment. The big bad industrialist, much booted around by labor agitators, affects less than one-third of the nation's total economy.

Service industries now dominate both manufacturing and agriculture as the greatest single factor in American life today. To illustrate it: Michigan's resort business is second only to industry in annual dollar income. Like agriculture, it is a service industry.

There's no reconversion needed for service industries unless it is HUMAN reconversion, the psychological need for sane thinking about our new problems.

Finally, just as the veteran must solve the problem of individual security, so he must solve the problem of national security.

The atomic bomb, plus jet-propelled planes, plus V-1 and V-2 robot bombs, have shattered illusions of geographic security and locality from world-troubles. Such is the thesis of Senator Vandenberg's appeal for American participation in the United Nations Council.

The end of the war, opening floodgates for release of wartime responsibilities and restrictions, has already prompted politicians to advocate abandonment of American responsibilities in Europe and the Far Pacific. "Let the French, British and Chinese do it!" is the cry. "Bring our boys home!" When the boys do come home, and we're all for it, they will still face the problem of securing peace for their children. What do they do a better job than the veterans of World War I did—and didn't do—and we served overseas in that party. Pandora's box of human ills fades into inconsequence when you analyze some of the problems which will greet the Michigan veteran in 1945 and 1946. So give them a helping hand. And hang onto your hat while we try the next curve in the post-war roller coaster that is just ahead.

NOW THAT THE WAR IS OVER...

TELEPHONE manufacturers are reconverting to civilian production as fast as they can. Michigan Bell already has launched its \$120,000,000 five-year post-war program of expansion and improvement. We will step it up as rapidly as sufficient equipment and trained manpower become available.

Between a third and a half of the 125,000 families now waiting for service can be cared for as soon as enough telephone instruments are produced—a matter of months.

To fill the majority of orders, however, instruments alone won't do the job. Thousands

of miles of wire and cable will have to be produced and placed—central offices enlarged—many new ones built. Central office equipment will have to be manufactured and connected into the system. Much of this is slow, painstaking hand-work.

So, many of those now waiting will not have service for a long time. It may take nearly two years before telephones can be installed generally without delay.

If you are waiting, we appreciate your patience. We promise to provide you with service just as quickly as possible.

"I'm making homes out of houses"

ADVANTAGES OF THE
ELECTRIC RANGE

Clean, controlled heat expresses quickly the advantages of an electric range. The surface burners have several heat units from "simmer" to "high" that provide just the right heat for whatever dish is being cooked. The heat comes directly to the bottom of the utensil and as clean as sunlight. In the oven, a control regulates the heat to an exact temperature and maintains it. An electric timer can be provided to turn off the current at a pre-set time, thus letting the housewife forget all about the oven. The broiler grills meats to a perfect turn, and the deep well cooker is ideal for long, slow cooking, such as soups, cereals or stews.

"It's a pleasure for a dealer to furnish a house with an all-electric kitchen—for it makes the house into a home. The electric kitchen cuts down the housewife's time in the kitchen... and gives a thrill to the work she does there. The electric range gives uniform results... provides automatic operation, cutting down the amount of attention necessary. Electric cookery is the modern way... convenient... clean... reliable. People have come to feel about it the way they do about electric refrigeration—that it is the only way. The electric dishwasher, too, has proved itself in thousands of homes as a time and labor saver. I've sold many and never had one returned. They normally save the housewife a total of about a day's work every month. People are not so familiar with the operation of the garbage disposal unit in the sink drain. The convenience of throwing waste right into the sink and washing it away cannot be appreciated until used. And the modern housewife also gets the multiple assistance of all the smaller electric helpers—mixer, juicer, percolator, toaster and others. I can't think of any investment that goes farther toward making a house a real home than an electric kitchen."

Electric kitchen equipment is not generally available for sale now. Some is being manufactured and distributed. It will be to your advantage to have your name on your electrical dealer's list, so that you will be able to get it at the earliest possible time.

Gotro-Asbarno Rites Read At Rectory

The rectory of Our Lady of Victory Parish was the scene Sunday afternoon of the marriage of Norma Gotro, Marine private, daughter of Mr. and Mrs. John Gotro of Yerkes avenue, to T. Sgt. Louis Asbarno, son of Mr. and Mrs. John Asbarno of Stockton, California. Rev. Lorenzo E. Wood read the double ring ceremony. The bride wore a white satin

gown fashioned with a lace bodice and ending in a train. Her finger tip veil was held in place by a half of orange blossoms and she carried a bouquet of white roses and baby chrysanthemums. Her only attendant was her sister, Mrs. Kenneth Cook, of Twelve Mile Road, who wore a pink chiffon gown and carried a bouquet of deep pink roses. Kenneth Cook was the groom's best man.

The bride's mother wore a green wool suit, with a corsage of yellow roses and chrysanthemums.

A dinner for forty guests from Detroit, Ohio and Northville was held that evening and later a reception for the many friends of the bride was given at her parental home on Yerkes avenue.

T. Sgt. Louis Asbarno and Mrs. Asbarno left for a short trip to New York state where they planned to stop at New York City to visit the bride's brother, Allan, a Coastguardsman, and also see Niagara Falls. The young couple will return to the village to visit the bride's parents before they return to Santa Ana, California where both will report October 12 at the Marine training base there.

Mrs. Asbarno graduated from Northville High school in 1942 and has served in the Marines for the past 16 months. The bride and groom met at El Tora where both are stationed.

Mrs. Charles Meisner of Plymouth road was greatly surprised to return to her home last Wednesday eve to find it taken over by thirty members of the Ladies Aid of the Lutheran church. The occasion was the birthday of Mrs. Meisner. The evening was spent playing cards and bunco. Diem-Markham Vows Pledged

Lois Diem, daughter of Mrs. L. Diem of Franklin Road, and the late Mr. Diem, and Horace Markham, son of Horace Markham of Cady street and the late Mrs. Markham, were united in marriage last Saturday evening at the Baptist Church, Rev. A. K. MacRae, read the double ring

candlelight service before an altar flanked with ferns and white gladioli. Bethel Shull acted as the organ and Miriam Shull sang, "I Love You Truly."

The bride was given in marriage by her brother-in-law, Radcliffe Weir. She wore a white net gown ending in a train and her finger tip veil was held in place with orange blossoms. The bride's bouquet was fashioned of white roses and baby breath.

Mrs. Charles Meisner of Plymouth road was greatly surprised to return to her home last Wednesday eve to find it taken over by thirty members of the Ladies Aid of the Lutheran church. The occasion was the birthday of Mrs. Meisner. The evening was spent playing cards and bunco. Two birthday cakes were served with the litchie and Mrs. Meisner was presented with a gold cross and chain. Rev. Rossow made a short talk.

Flower girls were the bride's nieces, Ida and Elizabeth Weir. The best man was P. H. Robert. The bridesmaids were Fred Castleman, Leonard Beasley, Alfred Eschardt and Harry Sommers.

For her daughter's wedding, Mrs. Diem wore a brown dress with a corsage of pink carnations. Immediately following the ceremony, a reception for about one hundred guests was held in the church parlors. Assisting at the reception were Mrs. Doris Loefer, Jeannette Berlew and Mrs. Phillips.

Mr. and Mrs. Markham went up north for a brief honeymoon; for going away the bride chose a blue dress with black accessories. They are now at home on Hathaway Avenue, Lonsdale Township.

Mrs. Markham graduated from Northville High school in 1935 and has been employed at the Embury Plant and at the C. F. Smith store. Mr. Markham has been employed for the past fifteen years at the Dunn Steel Works at Plymouth.

Alfalfa Meal Valuable

Alfalfa meal has been found of high value as a source of the water-soluble vitamins in hog feeding. A supplement of 10 to 12 per cent alfalfa meal in a basal diet to sows in the gestation and lactation period resulted in 82.5 per cent of their pigs reaching weaning stage. This trial showed superior results when compared with ground yellow corn, soybean meal, tankage, fish meal tankage and dried corn distillers' solubles.

Postwar harvesting will be taken care of by self-propelled harvesters. The self-propelled feature on this machine designed by the Minneapolis-Moline Power Implement company, makes possible the harvest of all crops at lower cost. Unusual engineering development makes the feature adaptable in harvesting all types of grain including rice.

Veterans' SERVICE BUREAU

EDITOR'S NOTE: This newspaper through special arrangement with the Washington Bureau of Western Newspaper Union at 1616 Eye Street, N. W., Washington, D. C., is able to bring readers this weekly column on problems of the veteran and his family. Questions may be addressed to the above Bureau and they will be answered in a subsequent issue. If possible, questions should be made direct by mail, but only in the column which will appear in this newspaper regularly.

Veterans Bill of Rights

It is virtually certain that this session of the congress will liberalize many provisions of the G. I. Bill of Rights, particularly since President Truman and the Veterans administration have now given added impetus to needed clarification and liberalization.

In his message to the congress, the President urged that prompt consideration be given for more liberal hospitalization and veterans care, more vocational training under the vocational rehabilitation act and to education and training under the servicemen's readjustment act (G. I. bill). The President further urged more specific language for re-employment of veterans under the selective service act, so there can be no doubt about the right of a veteran to get back his old job should he desire it.

The Veterans administration itself will take the lead and spearhead the fight for these clarifying and liberalizing amendments and the administration will have the backing of such organizations as the American Bar association, the American Institute of Banking, the American Legion and the Veterans of Foreign Wars.

At this time 22,349 veterans, out of more than two million demobilized thus far, are taking advantage of the education features of the bill of rights. Some of the proposed amendments would include "adequate subsistence and travel allowances for veterans taking intensive refresher courses away from home, permit instruction by correspondence, particularly from approved educational institutions which have not hitherto conducted correspondence courses."

Questions and Answers

Q.—My husband was given an honorable medical discharge March 5, 1943. At that time he did not receive a discharge button. Where can he obtain one? Mrs. R. P., Marshalltown, Iowa.

A.—At any army separation center, probably at your local draft board, or one may be purchased at almost any army store.

Q.—Has an army officer the right to cut off the allotment to his wife and child without any reason? Has he no obligation to meet concerning his family? Wife, Stillacoom, Wash.

A.—Yes, he has the right to discontinue his allotment. He has the same obligations concerning his family as any other husband.

Q.—I am making an application for a one-ton truck. I have a farm of 260 acres and need a truck very much. I am an honorably discharged soldier, with two years service. I would like to get a government-owned truck if possible. J. F., Schenectady, N. Y.

A.—If you are referring to a surplus war property truck, would suggest that you contact your local AAA county committee or your county agent for information where these surplus trucks are available from a bona fide dealer in your community. You are entitled to an A-1 priority without red tape if there are surplus war trucks for sale at any of your local dealers.

Q.—I want to know if a man that has been in the navy 16 months, is 26 years old and has a wife and two children, will get a discharge soon? Wife, Vida, Okla.

A.—Not necessarily. The navy man will be subject to the discharge system of rating adopted by the navy.

Q.—I am a World War I veteran and have a job. Will I have to give up my job for a veteran of World War II? Does a veteran of World War I have as much right as a World War II veteran? W. L., Mora, Minn.

A.—If you are holding a job now which was given up by a veteran of this war, then the honorably discharged veteran of World War II has a right to that job back under the provisions of the selective service act. A veteran of World War I has all the rights of a citizen of the U. S. A. and as much right as a veteran of this war except for the express benefits enacted for veterans of World War II.

Q.—A serviceman owed his father some money before he entered the service. Then the father became suddenly ill and was unable to work. The serviceman then provided the father a family allowance from the government. Should the serviceman get credit on what he owed his father for the amount his government sent? Reader, Hayden, Colo.

A.—That question obviously is a matter for private settlement between the serviceman and his father.

After he had tasted the sweetness of her honeyed lips, he drew back and asked: "Have you ever kissed a hero?" "No," she earnestly replied, "never!"

After he had gone away despondent, it occurred to her that she had said the wrong thing, for he, too, had been in the war.

They were standing at the base of the Washington monument. "Can you tell me," one of them asked, "What was the most remarkable thing about the Father of his country?" "His memory," "What do you mean, his memory?" "Well, they've built this monument to his memory, haven't they?"

Just a thank you note for the Northville Record and all the good will it is bringing us fellows who haven't been fortunate enough to have our discharge as yet.

Pfc. Bruce Turnbull.

S/Sgt. Nagel Poesta, son of Mr. and Mrs. Walter Poesta of Merriman Court, Farmington reached home last Tuesday for a short furlough. He reports back October 13 to Deming, New Mex-

ico to wait for a discharge. Nagel graduated from Northville High school in 1943.

If your serviceman's picture has not appeared in the Record, bring it in and we will gladly publish it. Also, if you have already brought one in, be sure to call for it. We may have one of yours that you have forgotten. Drop in the office soon and ask for yours; we will be glad to return same.

College Buys Skeleton
 20,000-year-old mastodon skeleton, discovered in a marsh on the farm of Dale Keith, near Plainville, Allegan county, has been purchased by Michigan State college for its museum. The bones were uncovered by workmen digging a drainage ditch and are believed to be in a good state of preservation. Prof. Joseph W. Stuck, director of the museum, is directing the work of exhuming the skeleton of the elephant like, prehistoric beast.

22 Servicemen Receive Discharges On Point-System

Many of the boys from this community have received discharges from the various branches of the Armed Forces on the point system. Others are awaiting their discharge at the numerous separation centers throughout the country and many are still serving in the armed forces.

Fat Salvage is Still Important

It's just as important for the housewife to save fats now as it was during the war, stresses Miss Roberta Hershey, extension nutritionist of Michigan State college and head of rural fat salvage activities.

"There is a peacetime battle of supply yet to be won in the nation's kitchens, because the country is still alarmingly short of fats and oils," Miss Hershey declared. "The manufacture of many peacetime products for which we are waiting depend on the amount of fat available. By-products of fats and oils make soap, synthetic rubber, grease, lubricating oils, and thousands of other everyday necessities."

Housewives can hasten the return of housekeeping supplies to have run short during the war years, by keeping kitchen scraps and turning them in to meat markets. Cash and red points are still paid for every pound.

It is expected to be some time before the South Pacific can be brought back in production and before work is and shipping are available.

President Proclaims National Newspaper Week Oct. 1-8, 1945

President's Proclamation.
 National Newspaper Week has a deeper significance in this year of victory than through the war years now happily ended.

In this hour of exultation we should dedicate ourselves anew to the perpetuation of one of our cherished heritages—freedom of the press.

It is with a sense of genuine pride that I can emphasize to all American editors and publishers and bring to the attention of Americans everywhere one singular triumph of our war experience. That is that the American free press through the stress of the most horrible of all wars withstood subversive and open attack and operated under a voluntary code of censorship.

Ours then is the plain duty, as we face the grave days ahead, to work without ceasing to make a free press the true torch of world peace.

(s) Harry Truman.

King In New Post

Tom H. King, head of the police administration department and director of the placement service at Michigan State college, has been named director of the Servicemen's Institute and counselor for men. He will continue in this capacity until other arrangements are made for filling the vacancy caused by the resignation of Dr. Fred T. Mitchell, who becomes president of Mississippi State college October 1.

Veterans at MSC

Approximately 300 veterans of World War I will be enrolled as new students at Michigan State college this fall. In addition, many of the more than 300 ex-servicemen enrolled during the past year will be back to continue their studies.
