WANT TO BE AN ANGEL?

IF I'D CHECKED MY DRIVING, AND CHECKED MY CAR, I WOULDN'T BE PLUNKING THIS STREAM-LINED GUITAR!

In 1945 28,500 persons became "stream-lined guitar plunkers" because of automobile accidents. The toll will be much greater in 1946 unless motorists pledge themselves to drive safely in safe cars. On May 15, the police of the United States and Canada, under the sponsorship of the International Association of Chiefs of Police, launched their Traffic Safety Check Program. They urge the driving public to cooperate by living up to the police slogan, "Check your Driving—Check your Car—Check Accidents."

Volunteer Donors May Get in Touch with Mrs. W. E. Forney to Help "Save a Neighbor's Life"

Northville residents are urged to cooperate with the Red Cross program which is being promoted to build up a blood bank for use in medical emergencies in this area.

Volunteer donors may get in touch with Mrs. Wm. Forney, local chairman of the Red Cross Blood Bank, who will call headquarters in Detroit for appointment for giving blood. The blood bank hours are: Mondays, Tuesdays and Wednesdays from 2 p. m. to 7 p. m.; Thursdays and Fridays from 10 a. m. to 3 p. m. and one Saturday a month from 10 a. m. to 3 p. m.

The slogan of the current drive is "Save A Neighbor's Life."

It has been some months since the mobile Blood Bank last visited Northville but the local work has not been discontinued. Mrs. Forney reports a number of instances where blood has been supplied to sick villagers from the area Bank. She also states that several Northville folks have been donating blood to the Bank, which is then typed and tested before the emergency drive to necessitate its use.

Cottage Inn is Host to J-Hoppers

Responds to Request of Village Parents Requesting Special Service for Mid-night Eats

At the request of a number of Northville parents the Cottage Inn stayed open last Friday night to accommodate the couples who attended the annual J-Hop at the High School. Some twenty couples enjoyed their snack and 2 a. m. eats at the Cottage Inn.

It appears that a number of village parents were not enthused by the thought of having the boys and girls driving to Detroit and near by places after the Hop for late eats that usually follows, and this group of parents requested Mr. and Mrs. Baxstessor to provide this service for the couples.

Thanks to the management, the dancing set were able to have the whole place to themselves. Lunches served at small tables by candlelight, furnished a fine way for the young people to wind up the evening without having to go out of town. All reported a fine feed and a good time. Parents and couples both want to thank Mr. and Mrs. Baxstessor for their splendid cooperation.

New Church-Scout Award Announced

The Boy Scouts of America maintains that no boy can grow into the best kind of citizenship without recognizing his obligation to God.

This opening statement introduced the theme of Dr. Ray O. Wyland's address to Protestant clergy at a luncheon meeting Friday noon, April 26 at the Wardell Sheraton Hotel, Detroit. All Protestant clergy of the Detroit Area Council were invited as luncheon guests of the Scout Executive Board.

At this meeting Dr. Wyland, National Scout Director of Relationships, presented for the first time information about the new Church-Scout award, the "God and Country Cross." This new award, similar to some already in use by other major denominations, is available to any registered Scout of Protestant faith who fulfills certain duties to his own church and has the approval of his own Pastor. Some of the minimum requirements to be met by the candidate for the "God and Country Cross" are:

Regular attendance at Sunday School;
Regular Bible reading and personal prayer;
Know something of his own local church history;
Name the Books of the New Testament;
Render a specified number of hours of personal service to his church;

Show evidence of Christian character and conduct.

The new award, a red cross on a white shield attached to a blue ribbon and bronze bar pin, is worn over the left breast pocket at the left of the Eagle Scout Badge. When the Eagle Scout Badge is not worn the Church Cross is centered about the flap of the left breast pocket.

The Golden Text (James 4:8) is "Draw nigh to God, and He will draw nigh to you. Cleanse your hands, ye sinners; and purify your hearts, ye double minded."
Among the Bible citations is this passage (Proverbs 13:12, 21): "Good understanding is a gift: but the way of transgression is hard. Evil pursuit sinners; but to the righteous good shall be repayed."

GRAHAM - CRAWFORD—Madeline Graham, daughter of Mr. and Mrs. Frank Graham of Lake street, became the bride of Robert Crawford of Lynchburg, Ohio in an impressive candle-light service Saturday evening at 8 o'clock. Rev. Lloyd H. Young officiated at the double ring ceremony which was read before an altar decorated with palms and baskets of white snapdragons and carnations in the First Baptist church.

Mrs. Young presided at the organ and Jean Ford, a former classmate of the bride, sang "I

Love You Truly." "Because" and "Oh Promise Me." Lohegrin's wedding march was played as the bride advanced up the aisle.

Madeline, who was given in marriage by her father, wore a white satin and net gown, the long sleeves ending in points over the hands. Her fingertip veil was held in place by a lace-cap, blossomed trimmed. She carried an arm bouquet of white roses.

The maid-of-honor, Patricia McChintock, wore a pink gown and carried an arm bouquet of pink and red snapdragons and carnations. The two bridesmaids

Canadian gold mine promoters are mailing sales literature to Michigan residents from Toronto, peddling stock with luring talk of future profits. The U. S. securities and exchange commission, to which this activity has been a headache, estimates that the Canadian promoters are selling at least \$1,000,000 worth of this stock each week to gullible U. S. citizens. The old rule still is good: Investigate before you invest!

John Beukema, secretary of the Michigan Chamber of Commerce, tells a yarn of Florida peewee war. The Beukemas spent the month of March at Fort Lauderdale. "The owner of a small resort hotel was approached by a real estate agent who said he had a client seeking a hotel property for investment," said Beukema. "Just put a price on your property," insisted the real estate agent. "I want my client to think I am doing something for him."

And so the hotel owner set a price of \$175,000 — just 100 grand more than it was worth. The buyer offered \$135,000, and the deal was closed. Two weeks later the buyer re-sold the same property for a half-million — and no doubt the latest owner hopes to turn it in again at a further profit.

Refugee money from Europe is partly responsible, according to Beukema, for the Florida resort boom.

Michigan's number one problem, according to the Michigan United Conservation Clubs, is pollution of streams. Unless Michigan and other states act to put an end to the industrial practice of dumping chemical wastes into streams and require cities to install sewage disposal plants, the problem is likely to

provoke Congressional action. Silt from farms and sewage from cities along the Saginaw river are gradually filling up Saginaw Bay. The Consumers Power Company recently reported eight feet of waste on top of a gas pipe in the bay. A diver was sent home, and a dredge was hired instead.

Although he may have lacked legal powers to do it, Governor Harry P. Kelly successfully averted a strike of employees of a leading utility in Michigan. He did it by notifying labor leaders the state would act to enforce the 30-day cooling-off requirement in the state mediation law.

Worth thinking about: Minnesota's state labor act, which has a similar cooling off period along with fact finding, effected a 70 per cent decrease in the first six years of the law compared with the previous three-year average.

Sportsmen in the Oscoda-Alcona and Isosceles area predict that federal foresters will lose their jobs because of negligence which resulted in the loss of approximately 22,000 acres of good timber in April forest fires.

Last fall the foresters set fire to piles of sawdust which had accumulated from mobile cutting of timber and hence constituted a fire hazard. The winter's snow failed to check the smoldering embers in several piles, however, and a stiff April breeze fanned the sparks into forest fires that ravaged an area of around 50,000 acres. The Mack lake ranger station was destroyed. As a matter of fact, the sudden conflagration caught the foresters by surprise. Their own fire-fighting equipment was lost.

If a sportsman left a camp fire burning in the forest, he would be denounced as a fool. Yet this was exactly what the federal foresters did when they permitted the sawdust piles to smolder all winter long.

One million acres of Michigan land have gone out of agricultural use in the last five years. In 1940 Michigan rated first in lumber production, today, Oregon holds the lead. A recent survey of Michigan homes disclosed that 20 percent were built either entirely or partially of lumber. Michigan State College is the first educational institution to undertake an extension service for resort owners. The program is being undertaken in cooperation with the Michigan Tourist Council.

If the Upper Peninsula's reserves of low-grade ore can be utilized through electrostatic flotation or magnetic method — an accomplishment yet to be achieved — the economic future of this northland would be greatly brightened. It would open the way to a new industry in the Lake Superior region — the smelting of iron ore close to the mines. Mining is usually becoming more difficult and more costly in the Upper Peninsula, as shafts sink deeper and labor costs rise under union pressure.

Michigan is second only to Florida in recent development of airports and landing fields, according to Bruce Anderson, chairman of the state advisory committee on aviation. At the beginning of the war Michigan had 124 airports and fields, during the war, 72 more fields were built and put into operation.

There is no sportsman who will ever fly from the south to the north in Michigan without experiencing a great thrill when looking down on the great resources that nature has given us," says Anderson.

Twenty-two per cent of all crimes in Michigan during 1944 were committed by youngsters.

who had not reached their 21st birthday. These teen-age kids were responsible for 35 per cent of all robberies; 51 per cent of burglaries; 35 per cent of larcenies; 63 per cent of automobile thefts.

Representatives of 17 leading trucking companies operating in Michigan told members of the public service commission recently that they paid \$1.05 for every \$1 of revenue received during the third quarter, 1945. Union teamsters have been demanding a contract clause that a company refuse to haul "unfair" freight as defined by the union.

Northville's Yesterdays

ONE YEAR AGO:
The Methodist Church is receiving a new coat of paint on the exterior.

Mrs. Mary Fredmore celebrated her eighty-fifth birthday. Patz Bros. are pouring concrete for their new salesroom and service station across from the Spring on Northville Road.

Mother and Daughter banquet planned for May 11 at Presbyterian Church house.

Clothing collection climbs to 6 tons.

FIVE YEARS AGO:
300 pupils will take part in the rural school music festival to be given May 7 at the Training School.

Literary will-hold open house Tuesday, May 6.

Two residential landmarks in the village are torn down, the Rowland house on Center street next to the Post Office and the house across from the Village Hall.

TEN YEARS AGO:
Northville mourns the loss of what was probably its oldest and most honored Model T Ford. A. M. Whitehead, local plumber, bought this car, a two door sedan, from Dayton B. Bunn 23 years ago — and this week sold it to Edward E. Edwards of Alpena.

Cletus J. Batt, 31, grinder at the Ford Motor company, crashed into a tree and was instantly killed two miles east of New Hudson Saturday.

Charles Perrin, a senior at the Michigan State college, will be secretary-general of the much anticipated assembly of the League of Nations held on the campus, attended by delegates from 20 nations.

FIFTEEN YEARS AGO:
It was the 25th wedding anniversary of their parents, Mr. and Mrs. Nelson C. Schrader, Mr. Roy Schrader and Mrs. Ruth Schrader, were hosts to 20 friends Saturday evening.

Northville's budget for 1931, which calls for a \$3,000 reduction over last year's, has been approved.

THIRTY-FIVE YEARS AGO:
O. S. Harger, P. B. Barley and Abe Piper have greatly improved the appearance of their property on North Center street by having a cement curbing built.

Through the efforts of L. L. Brooks, B. A. Northrop, Matt Green and others, the race course grounds have seven needed stables and a new railing along the north side of the track. Most every man in town donated a post this week to be planted along the race course to which will be strung a good wire fence to keep people off the track while the horses are running.

Cass Benton is entitled to the blue ribbon for the biggest crop of maple syrup in Wayne county this spring. From his 10-acre bush near Northville, he got 180 gallons, or nearly six barrels.

"Your glasses," she said, "have made a great difference in your appearance."

"Do you think so?" he asked.

"Yes. You look so intelligent with them on."

Maid—No, ma'am, Mrs. Hughes is out.

Visitor—How fortunate! When I saw her peeping through the curtains as I came up the walk I was afraid she would be in.

"After all," said the optimist, "you must admit that this is the best world you have ever been in."

"Yes," replied the pessimist, "but, hang it, my wife is the best wife I've ever had; and that's not saying much for her."

RUS DON'T LIKE U. S. A.
WASHINGTON. — Inside reason why the Russians are pulling wires to have the capital of the United Nations moved back to sleepy Geneva is that American public opinion has been too powerful a champion of the smaller nations.

So the Russians have been working behind the scenes to coral votes in favor of the Geneva transfer and can count on Yugoslavia, Czechoslovakia, Poland and France. However, they can't count on the British, who once favored a European capital, but are now 100 per cent sold that American opinion is one of their best allies.

The Russians also can't count on the Latin Americans. In the old days, Pan-American diplomats loved rolling in Paris most of the time and turning up in Geneva a few days of the week. Today, however, Paris is one of the most uncomfortable places in the world. Geneva is short of food, and New York is far more pleasurable.

The Russians, who originally favored an American city as the U. N. capital, now consider this a serious mistake. They dislike the fact that American newspapers publish columns and columns of front-page news on every move made by the Russians, and they figure that American newsmen at Geneva would sit idly by in the Swiss cafes drinking beer, or spend week-ends in the Swiss Alps.

In Europe, they also believe, a photographer or newspaper would have the energy to trail Ambassador Gromyko on his famous and circuitous trip around New York City when he almost stopped in at the Security Council meeting, but didn't.

If the Iranian question had been discussed at Geneva, instead of

CHAMP NEWSBOY ... Believed to be the best trained monkey in the United States, "Kip," a chimpanzee from Danla, Florida, played the role of newsboy at a Miami street corner. Sales soared that day.

New York, the Russians figure, it never would have attracted so much attention and the Soviet would have come off with a complete victory.

NO ARMY RACE PREJUDICE
A Negro, former master sergeant in the army, Marion F. Green, testified before General Doolittle's "caste system" board the other day, that there was little evidence of racial prejudices and discrimination in the army. When General Doolittle inquired about this, Sergeant Green replied:

"Colored soldiers found some resentment against them when they first joined the army, but this was quickly ironed out after a few months of training. In February, 1941, we had some fights and riots while I was stationed at Camp Livingston, Louisiana. However, by the time we finished training, everybody was getting along fine. I encountered no racial bias whatever overseas."

The ex-G.I. also suggested that saluting of officers be optional when enlisted men are off duty and off the post, to which Lt. Gen. Troy Middleton, now an executive of Louisiana State University, countered: "Wouldn't optional saluting such as you propose tend to tear down discipline?"

"Not necessarily, general," replied Green. "If a man does something to merit respect he will get that respect whether he is a civilian or an army officer."

POWER AND NYLON LOBBIES

Many congressmen will vote against dynamic Speaker Sam Rayburn in a secret committee session, but don't have the nerve to stand up and oppose him on the floor of the house. Very soon, however, Democrats who have fallen for the beguiling promises of the giant power lobby are going to face the latter test.

Sam Rayburn really has fire in his eye when he talks about the power lobby. And today that lobby ranks with the real estate buttonholers as one of the most potent on Capitol Hill, has even gone to the extent of dangling nylons before the wives of congressmen in order to win votes against the government's southwest power authority in Texas, Oklahoma, Arkansas and southern Missouri.

The question at issue is whether the government can construct its own electric lines to distribute electric power from the Denison dam on the Texas-Oklahoma border and the Norfolk, Ark. dam. Without such power lines, the government merely generates the power but can't sell it. The power lobby wants to prevent this sale.

So far, the power lobby's technique has been successful with the appropriations subcommittee, which knifed the construction of the distributing lines. Cong. Ben Jensen of Iowa, Henry Dworshak of Idaho, Robert Jones of Ohio, and W. F. Norrell of Arkansas were the gentlemen reported to have fallen for the wiles of the lobby.

However, when the bill comes out on the floor of congress, Sam Rayburn, together with the dean of congress, Adolph Sabath of Illinois, plans to stage a real battle.

SLIGHTLY MIXED UP

A young bride asked her husband to copy off a radio recipe she wanted. He did his best, but got two stations at once, one of which was broadcasting the morning exercises and the other the recipe. This is what he took down:

"Hands on hips, place one cup of flour on the shoulders, raise knees and depress toes and mix thoroughly in one-half cup of milk. Repeat six times. Inhale quickly one-half teaspoonful of baking powder, lower the legs and mash two hard-boiled eggs in a sieve. Exhale, breathe naturally and sit into a bowl."

"Attention! Lie flat on the floor and roll the white of an egg backward and forward until it comes to a boil. In ten minutes remove from the fire and rub smartly with a rough towel, breathe naturally, dress in warm flannels and serve with fish soup."

"Why do you call him a monumental liar?"

"He makes a living by carving epitaphs on tombstones."

UNDER THE STREETS ...100,000 HORSES

From one Detroit Edison power plant there stretches underground for seven and one-half miles into the heart of industrial Detroit a seven-inch steel pipe. In this pipe, around a cable made up of three copper wires the size of your thumb, nitrogen gas is compressed at 200 pounds per square inch. Through this cable, night and day, flows 100,000 horsepower.

It is the only instance where the total output of one generator is carried in a single high-voltage cable to a center of electrical use miles away.

There is nothing else like it in the world.

The pipe protects the cable from outside damage. The gas pressure keeps the 120,000 volts from destroying the cable insulation. So rugged and reliable is this transmission system that no alternate stand-by cable facilities are necessary. The loss of power over the seven-and-one-half-mile course is less than one per cent.

Construction of this cable was a job of Detroit Edison pioneering. It is known in the industry as the "SMD" cable because, particularly, it was an accomplishment that is credited to Samuel M. Dean, chief engineer of the system.

It was another Edison FIRST brought about by constant devotion to the task of giving Edison customers dependable electric service at low cost.

May 1st Was Child Health Day

May 1 was Child Health Day throughout the nation and the local schools observed the important date by holding pre-school clinics on both May 1 and 2. The purpose of the Northville clinic was to call attention to both the physical and mental development of children who will soon enter kindergarten.

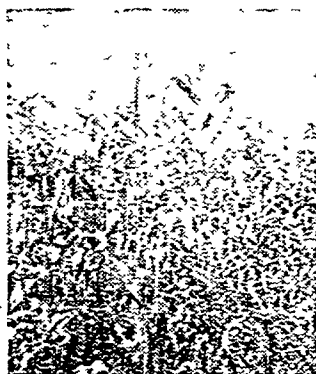

Miss Grace Follock, Miss Ruth Keapp, RN and E. V. Ellison had charge of the two day session.

Nitrogen Lack Shows In Farm Crop Colors

Pale Green Often Means Low Protein Content

The culprit responsible for the pale green color and spindly growth of many pastures and fields of grain last spring was lack of nitrogen, according to W. H. Pierre, head of the agronomy department at Iowa State college.

Corn shows nitrogen application.

And nitrogen deficiency was also to blame for the "firing" or drying up of the lower leaves of corn in many other midwestern fields, Dr. Pierre asserted.

"Nitrogen is the plant food element that gives crops their normal, dark-green color and their fresh appearance," he declared. "Without enough nitrogen, plants become pale green and spindly. In corn when nitrogen hunger develops about mid-summer, the older or lower leaves of the plant turn yellow near the midrib and may gradually die."

"Farmers sometimes mistake nitrogen-hunger signs in corn for drought injury. Where small grains and grasses are concerned, a lack of nitrogen not only results in pale-green color but later maturity and lower yields."

"One of the other serious effects of nitrogen deficiency is a low protein content in crops. For proteins cannot be formed without nitrogen. This has an adverse effect in meat and dairy cattle raising, for low protein crops have a low feeding value."

Dr. Pierre pointed out that there are three ways in which nitrogen can be added to the soil so that crop needs can be met. One is through the growth of legumes, another is through the use of manures and crop residues and the third is through the use of fertilizers containing nitro-

Heavy Frosts Peril Fruit Crop

Last Sunday morning local farmers reported 1/2 inch of ice on water pails left outside. It is feared that the frost did considerable damage to the fruit in this area. If the annual frost days of middle May bring frosts it is feared that the entire crop will be lost, state local fruit men.

"I am a descendant of a hundred earls," he said.

"Goodness!" replied the heiress who had just consented to be his "and yet you claim that your mother was a respectable woman."
