

## N. H. S. Beats Plymouth Again

Northville came out on the long end of a 31-27 score Friday night to qualify for the finals.

The opening tipoff went to Plymouth who promptly sank the first basket of the game. The entire first quarter was a hard fought, give and take struggle which ended with Northville on top 6-5.

In the second quarter, Northville began a slow gain which was nearly upset just after the automatic time out, when the Rocks came within one point of the Mustangs' score. The Mustangs sank a field goal to lead by a score of 14-11 at the end of the quarter.

The second half tipoff went to Northville but Northville recovered the ball to sink the first basket of the second half. This proved to be the spark needed to touch off a scoring streak which gave the Mustangs a fairly comfortable lead for the quarter. The quarter ended Northville 23 Plymouth 13.

Although the Mustangs were outscored in the fourth quarter their previous high scoring helped them maintain the lead and win the game, the score: Northville 31, Plymouth 27—H.L.—N.H.S. Mustang.

## Cubs Present Orchid at Meet

Through the efforts of the Cubs of Den No. 4 of the V.F.W. sponsored Northville Pack, Mrs. A. C. Carlson of 210 Fairbrook was awarded the Good Neighbor orchid by Tom Breneman on his radio broadcast, "Breakfast in Hollywood." The orchid was flown to Northville Monday and presented to Mrs. Carlson by Jim Clark, Den Chief of Den No. 4, at the Pack meeting at the Presbyterian Church, Tuesday evening, during the skit put on by the Den.

The presentation skit was planned by Mrs. Lois Donoghue, Den Mother, and her Den, as a summer scene in which the boys took a crack at the Hollywood broadcast where a prize is given the funniest hat, and an orchid given a good neighbor. In planning the work the Den Mothers were rated highly as good neighbors but with five of them and only one orchid, the boys chose Mrs. Carlson, and convinced Mrs. Breneman, with the help of their Den Mothers, that an orchid was amply justified for her splendid work with the Northville Dens, both before the war and in the more recent activities that rate Northville Packs as are high in the country.

The comedy actived Monday, and the announcement was made Wednesday over the nationwide broadcast.

The program presented at the Pack meeting offered the seasons of the year in review. Spring was directed by Florence Russell and her Den, Summer by Mrs. Donoghue's Den, which included the radio presentation, and Fall by Mrs. Clark's Den. A special Autumn, with the boys going back to school in a glorified mood. Winter was shown and presented in a real life snowball battle by Mrs. May's Den.

Advancement award were won by the following boys and presented to them by their parents: Wolf Ridge, Billie Powers, Ernie Larson, Nelson Locke, Ronald H. Lee, Larry Guts, Bear Badger, Larry Guts, Wolf Gold, Homer Arrow, Ernie Larson, Wolf Silver, Honor Arroy, Ernie Larson, John Penke, Lion Badger, James Lapham, Bear Gold Arrow, Donald Elliott, Cliffo D. Elliott.

It is interesting to know that the arrangements for the orchid etc. were made by one of the original Den Mothers, Mrs. Henry Wick, who now has one son in the service, who was in her Den eight years ago. All during the war Mrs. Wick heard from her former Cubs.

The big 12-inch cigar was given to Norman Rice and his uncle, Pete Ely.

## To Vote on Liquor by Glass

Following the legal requirements of filing petitions with the proper number of names, the Northville Township Board has authorized the question of sale of spurious liquors on the premises to be voted upon at the Spring election.

The ballot is printed and will be submitted to the qualified voters for approval or disapproval. It reads as follows: "Shall the sale of spirits in addition to beer and wine be permitted for consumption on the premises within the Township of Northville under the provisions of the law governing same."

Since the township board, by resolution, banned the sale of spirits in addition to beer and wine on the township in 1937, all sales of liquors have been confined to the Village of Northville, and this is the first time the matter has been brought up in a vote.

The question now comes up by virtue of petitions circulated by Mr. Campbell of the Seven Mile Road, who desires the privilege of the sale of liquor on a parcel of land situated on a parcel of land on the Seven Mile Road.

The question will be voted at the Spring election to be held Monday, April 7, 1947.

Northville's final game of this season was played before a huge crowd at basketball fans.

The opening tipoff went to Farmington but Northville secured the first point on a free throw. When the quarter ended although the Mustangs had fought hard the Falcons were on the long end of an 11-8 score.

In the first half of the second quarter the Mustangs outscored the Falcons 5-2 to make the score 13-13 at the automatic time out. Even though the Mustangs had begun a fast offensive they were unable to maintain a hard enough drive and at the end of the half the Falcons had moved into the lead 16-14.

The second half was a pitched battle in which neither team scored more than eight points. The opening tipoff went to Farmington but Northville again made the first basket. As the quarter ended the teams were again tied, 18-18.

The fourth quarter opened with the roars for both teams screaming for points and praying that the opposing team wouldn't score. At the automatic time out the score stood Northville 18 Farmington 20 after four minutes of hard grinding offense and defense. In the last half of the quarter the Mustangs again tied up the score, 22-22, but they didn't have enough time after a successful free throw by a Falcon, to work the ball down the court for another basket. The game score: Farmington 23, Northville 22—H.L.—NHS Mustang.

**Receives Letter from Poland**

Many letters of gratitude and thanks have reached Northville from Poland in the past months. These letters were written by people who received clothing sent to them by Northville folks, in this case Miss Alta Powers and Miss Eleanor Peltz. Miss Powers and Miss Peltz have been sending boxes to Poland for many months, collecting, packing and addressing the boxes themselves. They tell us that there is a real service to be rendered these folks who have suffered so much and that there is a particular need

for clothing and shoes as is evidenced by excerpts from these letters. This letter was from a family in Biaty Boc. "Our house was burned in a battle between the Germans and Russians and we were left only in what we were dressed. My husband served in the Polish Army and in 1945 his right leg was shattered and he was in the hospital 14 months. He can only walk with a cane. Dear friends we would beg you if you would have any shoes or bed covers you will be so good to send them to us, because it would be a big help, you can't imagine how we were glad to know that in U.S.A. there are persons who want to help us in our hard times here."

Another letter clearly indicates the desperation experienced by the survivors who are trying to keep their families together. Micholna Kukuta of Rzeszow is one of these. She says, in her letter translated from the Polish, "My folks and me, 3 younger sisters and 2 little brothers, we had to run away to a strange place where we know nobody. I am the only one to work. I work days and evenings, I mend my brother's and sister's clothes. My father died 2 months ago after being ill for 2 years and my mother is very weak. I have no one to ask for help. Good God, help me to obtain some addresses to help me. Most we need is clothing and shoes. I finish my letter I take too much of your dear time. Madam, I will be waiting. . . ."

The Red Cross furnishes names of needy people in Poland or any other country and the need is great—save your old clothes and discarded bedding and get in touch with the Red Cross.

"Landsakes,  
It's Past Seven!"

GRANDMA RILEY wasn't fooling either. "Past seven" was bedtime when Grandma was a girl. She was tired and tomorrow would be another hard day. She'd be up at 5:30 and busy every minute. Bread had to be baked and the wood stove had started smoking again. Then there were kerosene lamps to be filled—wicks trimmed and chimneys polished. And the oblong copper tubs had to be filled with clothes and steaming soap... then hand scrubbed and put through the wooden wringer. Beating and sunning the rugs was another job that just had to be done. It had been put off too long already.

Today Grandma really would have lived the life of Riley! Just a flip of the switch brings light into darkened rooms... automatically launders and dries our clothes... vacuum cleans the rugs. It preserves our food and cooks our meals without fuss or bother. Yes, all of us are using more and more electricity these days and doing more jobs more easily and for less money than doing them any other way.

### First Aid for Wounds

In giving first aid care in cases of severe wounds which are later to receive medical treatment, do not use soap and water, for, as has been said, this cannot be done under the conditions in which this first aid is usually carried out without introducing germs with the water itself. If the physician later washes the wound, he will do so in the dispensary under aseptic conditions, and this is medical treatment, not first aid. It must not be forgotten that first aid is not the same as medical cure, and no matter how well versed one may be in first aid, he should not assume the responsibilities of the physician.

### Water Power

### Council Proceedings

A regular meeting of the Village Commission was held at the Village Hall Monday Eve. March 3rd, 1947.

Present: Pres. Doren, Comm. Schoutz, Locke, Stubenvoll and El.

Absent: Comm. Frid.

Minutes of last regular meeting read and approved.

Communication was read from the Wayne Co. Road Comm. regarding the proposed extension of Seven-Mile Road westerly from Northville Road to Edw. Hines Parkway Drive, in which it was stated that this work might be started in 1948 if the Village would share the expense on a fifty-fifty basis. The expense to the Village would be approximately \$50,000.00, which could be paid over a period of five years without interest. This letter was tabled for future consideration.

Motion was made by Locke, supported by Schoutz, that the firm of Ickman, Johnson & Hoffman, Ann Arbor, Mich., be employed to audit the village books for the fiscal year ending Feb. 28, 1947. Carried.

### Anti-Frost Machine Will Save Orchards

Michigan Machine Will  
Raise Temperature

By W. J. DRYDEN

A new machine designed to protect farm crops, particularly semi-tropical orchard crops, has been perfected at Michigan State college.

The machine heats the plant and soil by means of an oil burning heater costing about \$125, which sends out infra-red heat waves. Cost of operation is about 75 cents an hour.

Severe frost damage has occurred in many fruit-growing areas and young trees have been severely affected. The new machine, shown in illustration, should prevent much of the loss.

The cause of frost damage is well known. Heat, which is stored up in the soil and plants during the day, is rapidly radiated into the atmosphere on still, cloudless nights. Lower layers of the atmosphere become chilled and air sloping ground, the chilled air, increasing in density, moves to the lowest situation. For this reason the new invention will prove of real value to orchard operators in many sections of the country.

**Rid Farm of Wild  
Garlic With 2, 4-D**

It will take only about 100 gallons of 2, 4-D spray mixture to rid the average acre of wild garlic. Winter has proven an ideal time. It will aid in eradication, if the application can be made when the land is free of snow.

By spraying the mixture in the winter all the germinated wild

garlic plants will be killed and if the 2, 4-D is sprayed again in the spring for two months, it will have permanent effect. Some spots may require a second application.

Many cities and road districts apply the 2, 4-D to kill weeds, grass, roads, parks and public land. It is suggested that you have your own value of the weed killer.

**Indoor Hopper**

For best results one foot of mass hopper space should be provided for each five hens. In case of small flocks it might be advisable to increase the space. With this type of hopper, daily filling usually is advisable. The V-shaped hopper should not be over-filled.

**Electric Water Heater**

Pieces of metal tubes such as down spout, if closed water tight on one end, make satisfactory water heaters. Light bulbs are inserted into sand for retaining the heat. The tube stands in the water pool.

### Vets Housing Rights in Force

The compliance and enforcement program, designed to assure that veterans may buy or rent living quarters at no more than legal ceilings, will be continued for the more than 700,000 housing units started under the Veterans' Emergency Housing Program, according to the Office of Price Administration and the Housing Expediter.

The new housing regulations do not affect dwelling units started under authorizations approved before December 24, 1946. Owners of these units are still bound by the maximum sales price and rentals set by the Federal Housing Administration. Veterans rate first priority to buy or sell and veterans also are bound by the regulations. If a veteran resells, he must offer the dwelling to other veterans at no more than the established ceiling price.

Buildings must continue to post placards showing that the property is being reserved for veterans, and owners are still required to file with their GPA Area Rent Office two copies of the sales report. These requirements affect only dwellings that were built under HH priorities.

**Need Much Space**

Cucumbers require so much space and produce such a small amount of food per unit area of land they generally are not grown in the smaller gardens. They are not only frost-sensitive, but require warm weather for good development. They are especially susceptible to various insects and diseases, so that frequent sprayings or dustings are necessary.

## Preview of next week's disaster

Maybe it won't be a tornado killing and maiming men and women—and children.

Maybe it will be the devastation of a flood. Or the destruction of a hurricane, or a fire. Or the sweeping scourge of an epidemic.

But one thing can be foreseen in the disaster that will strike every week of the year somewhere in our nation—

Your Red Cross will be on the job!

In this year of peace, as in war, your American

Red Cross stands ready to supply those in need with emergency hospital care, food, shelter, clothing, and rehabilitation. All this and more to stricken human beings—regardless of race, creed or color.

It's what you're giving for—when you give to your Red Cross.

## News Notes from Base Line School

By

Phyllis Becker and Terry Gates

Miss Moore, our Bible teacher was here on Feb. 20. She told a nice story about David.

Mr. Wheelock, the visiting teacher, called on us on Feb. 22. Most all of the children are back to school now after having colds and chicken pox.

The fourth, sixth, seventh, and eighth grades are making maps of the United States, Europe, Asia and the world.

The windows were done this month by Terry and Cynthia Gates and Phyllis Becker. Robert Visnyak made the calendar and Joe and Zola Visnyak put the border on the blackboards.

All of us have been sewing on sewing cards.

The kindergarten is having a contest on who can read and write the best. So far, Billie Farkas is ahead.

Janet and Janice Robertson went with their parents to visit their grandmother in Battle Creek.

Terry Gates made a poster to go with his reading. The children have been having snowball fights and having lots of fun.

**Hiding in a Ruksha**  
In Shanghai, a ruksha costs between \$17 and \$40; those rented to the public cost about \$20, and on each a small tax is paid to the municipality. Some privately owned rukshas have been equipped with American balloon tires, stung chrome wheel spokes, and lacquered bodies and have had artists' coats of arms painted on their sides. Before the war an American could ride in a public ruksha for a week on what it would cost him an entire day to ride a day in the United States.

## Soon Time to Spray Apple Trees

Dormant sprays will soon be applied to apple trees. According to Extension Bulletin 151, "Dormant oils are used to control red winter scale insects and pear psylla. A 3 percent oil solution is usually used."

The bulletin gives some precautions to observe. Complete the application to both sides of the tree before spraying the opposite side on different days. It results in excess oil deposit and probable injury.

Do not spray oil when rain or snow is likely to follow quickly, or when temperature is below 40 F. or is likely to drop to the freezing point before the spray has thoroughly dried.

## Mustangs Honored at Assembly

Principal C. E. Pierce called a special assembly Monday morning to honor the N.H.S. Mustangs who performed such a fine basketball season this year. Mr. Pierce expressed his gratitude of the fine sportsmanship shown by the boys, and Coach Doeksen said a few words about the pleasure of working with such a fine group.

The members of the teams were called to the stage of the assembly hall so that fellow students might give them an applauding thanks. Members of the first team were Bob German, Bob Campbell, Dene Nitzel, Mac Pierce, Dave Pottinger, Sheldon Williams, Leon Rose and Chuck Freydl. Special mention was made of Nitzel, Williams and Freydl, who played their last season of basketball this year, as they are members of the Senior class.

Members of the second team were also called to the front and they were as follows: Small, Krenkow, Doren, Branch, Porter, Stephens, Coolman, Kazarian, Stalker, Newton, Poulos, Stovall, Robinson, Atwood, Gellner, and Cansfield.

The cheerleaders were then called to give the final cheer of this season. Credit should also go to J. Tuck, R. Hauger, J. Freydl, S. Smith, W. McKinney, M. Lancy, D. Porritt and D. Blackett, for their earnest cheerleading throughout the season.

## Young People at Youth Rally

On last Sunday afternoon about 20 members of the Northville Youth Fellowship attended a District Youth Rally at the Ann Arbor Methodist Church. The purpose of the Rally was to select a winner from seven young people who participated in a contest of public speaking -- held in the Ann Arbor District. This winning person would then become eligible for a future National Contest.

The gathering, 200 in all, opened with fun and fellowship singing, capably directed by a student member of the University of Michigan. The worship service, led by various young people, followed the lighter period of fellowship.

The seven contestants spoke on the following themes: 1. Methadism in India; 2. History of World Service; 3. Christ in Education; 4. Labor Program of the Methodist Church; 5. What is World Service? 6. Now is the Time; 7. The Faith That Triumphs. The speaker who delivered the last message was the winning contestant.

Our young people were interested in this phase of youth work around young people of their own age. Rev. W. Leslie Williams was one of the three judges for the event.

Servant: Did you shave this morning, Jones?  
Packer: Yes, sir.  
Servant: Well, next time stand a bit closer to the razor.

Tumbel: "What are you doing with that red lantern?"  
Dumbbell: "I just found it. Some foolish person left it beside a hole in the road."

Mother: "Willie, the canary has gone!"  
Willie: "But mummy, it was there just now when I was trying to clean its cage with the vacuum cleaner."

## Oakland County Has New Type Milk Testing Program

A new type of milk testing program will be sponsored by the Oakland County Extension service to serve farmers in the South Lyon, Northville, Farmington, Wixom and Milford areas.

This new type of organization known as owner-sampler testing will be made available to farmers on a cooperative basis. Much interest has been evidenced by farmers in this area in milk testing work that would provide them with records on individual cows in their dairy herds.

E. W. Alechin, Assistant County Agricultural Agent explains that the new testing program, although unofficial, as far as com-

pleted records is concerned would be invaluable to herd owners in selecting females for breeding purposes in their herds. Mr. Alechin says that under the new system the owner will take samples of milk once a month from each cow and keep their own weight records. The milk would be picked up by a tester who would take the samples to a central laboratory where the test would be run and monthly butterfat production compiled and returned to the farmer.

The program is designed to bring a testing service to those farmers who are interested in building up more efficient production in their herds by careful selection of cows from which they wish to keep heifer calves.

The new system will have an advantage in that it would enable

farmers who wish to improve their dairy herds for official dairy herd improvement testing later on.

"Was the baby sent down from Heaven, Mama?"  
"Yes, dear."

"They like to have it nice and quiet up there, don't they?"

Father: "When I was a boy, I thought nothing of a ten-mile walk."  
Son: "Well, I don't think much of it myself."

"The only thing a girl can count on nowadays is her fingers."

"Darling, the maid has burned the eggs. Would you be satisfied with a couple of kisses for breakfast?"  
George: "Sure, send her in."
