## Tells of Conditions in Greece After Visit to Homeland

John Poulos of Thayer Boulevard, who recently returned from a trip to Greece, says that he was happy to be able to visit his former home, but was also glad to get back to Northville.

Living conditions in Greece are much worse than can be imagined, Poulos said. Before he went on his three-month visit, Poulos received letters from friends and relatives describing the hardships endured by the Greek people, but, he said, he could scarcely believe the accounts until he saw for himself that they were true.

Poulos, proprietor of the Northville Restaurant, West Main street, said that food is more plentiful in Greece now than it was during the war, but it is so expensive, most families cannot afford to buy much. The average laboring man, Poulos said, earns the equivalent of \$2.00 a day, and food prices are approximately the same as they are here. Most persons, he said, eat only two meals daily.

However, Poulos said, the food situation is better than it was during the war, when many persons had no bread for weeks at a time, and a great number depended largely on dandelion greens and olive oil for subsistence.

Poulos spent most of his time in Diacopto, a village near Athens. He visited a brother and sister, and other relatives. His mother and father are deceased, and a second brother, who was a priest, was killed by the Nazis in 1943, Poulos said.

Clothing is extremely scarce in Greece, and what clothing is available costs so much, Poulos stated, that few can buy it. He said that the men in Diacopto go to church in poorer clothes than laborers in America wear to work. Everyone wears patched shoes, and many, especially children, go barefooted.

Poulos said that the Greek people depend largely on American aid for clothing and other necessities. He said that increasing numbers of automobiles are seen in large Grecian cities now. Most of the cars are shipped there by American producers. Household goods, such as electrical appliances, cannot be procured. In fact, Poulos said, except for those living in large cities, few families have their homes wired for electricity, because it is too expensive.

Poulos left for Greece April 18 and returned to Northville July 25. He sailed to Greece, the trip taking 17 days, and flew back to the United States in 41 hours. Poulos came to this country 31 years ago and had not been back to Greece until this year.

## Crowd Increases At The Downs

Following the first million dollar pari-mutuel week of the season at the Northville Downs last week, it was obvious that the half-mile suburban oval was on its way to its greatest racing meet-in history. Over \$1,030,000 passed through the pari-mutuel windows last week indicating the popularity of harness racing under the lights.

The state of Michigan under the new license fee stands to gain considerably more than it did last year with its \$50. per night fee. Under the revision, the state now gets 2 per cent of the handle each night plus half of the breakage.

In the first two weeks of operation here at Northville, the state received a little over \$54,000, showing its considerable gain from the track.

One of the most exciting events at the track this month will be the Michigan Pacing Derby August 29 which will bring into the field some of the best horses in the land. Out to get the \$5,000 purse, will be Dr. Stanton, the Cinderella horse, Jimmy Creed, who has broken two track records this past week, Prince Yakima, Merry England, and Miss Ruby, who nosed out Dr. Stanton last Saturday night. These pacers all have turned in good times, and the Derby promises to be a good race which might lead to setting a new track record.

## V-J DAY

THURSDAY, AUGUST 14th

... REMEMBER!

Two years have passed . . . and time has dimmed the memory of blood and tears, of prison camps, and casualty lists. It is not pleasant to think about these things again. But we have an obligation to remember. For there are those among us who can never forget the nightmare of horror that is war. Today, they turn to us and ask, "What have you done with our Victory? Have you made the most of these years of peace . . . the momentous opportunity, given to you?" On this anniversary of V-J Day, we may well ponder what our answer shall be.

## Bank Declares August Dividend

The Depositors State Bank, on August 1, 1947 paid a dividend of 75 cents per share to holders of common stock. The dividend was declared by the Board of Directors on July 3, 1947 out of earnings for the six month period ending June 30, 1947, and was paid to stockholders of record July 15, 1947.

The total resources of the bank as of June 30, 1947 amounted to \$3,822,237.39. At the same time last year, the total assets amounted to \$3,744,112.95. United States government obligations direct, and guaranteed for the last fiscal year are in the amount of \$1,466,126.47. For the fiscal year ending June 1948, this figure was \$2,048,227.46.

Total deposits for the fiscal year 1945-46 were \$3,525,374.76. For the year 1946-47, commercial deposits, savings deposits, common stock, surplus, and undivided profits amounted to \$3,881,237.82.

Early this year, a proposal was approved by the Depositors State Bank to reconstruct the capital structure by paying off \$50,000 preferred stock, \$40,000 of which was held by the Reconstruction Finance Corporation. To accomplish this, the bank issued 3000 shares of new common stock worth \$60,000, sold entirely to local individuals. In this way, the bank's capital stock was increased from \$90,000 to \$150,000.

The officers of the Depositors State Bank are John A. Moore, president; E. S. Beard, vice president; Charles H. Walker, vice president; A. Russell Clarke, cashier, and Leona Parmalee, assistant cashier. Directors are E. S. Beard, G. Carmi Banton, E. M. Bogart, John A. Boyce, Harry B. Clark, A. Russell Clarke, L. C. Stewart, R. M. ## Telephone Rates in Area Explained

The Michigan Bell Telephone Company today revealed that it will petition the Michigan Public Service Commission the latter part of August for a \$10,400,000 annual increase in rates.

J. R. Saxton, manager for the company, said the proposed rate increase would be applied to every exchange in Michigan Bell territory and virtually every type of service in order that "the increased costs of doing business be shared by all telephone users."

While asking for a rate increase, the company will propose a new type of extended-area service that will permit users to call nearby exchanges "with the same community of interest" without paying toll charges, Saxton said. Under the proposal, residence users could place calls to Farmington, Plymouth, South Lyon, and Walled Lake without the levy of a toll charge. Likewise, residence users in those communities could call Northville without paying such additional charge.

Because extended-area calling privileges are not proposed for business users in Detroit suburban areas, the extended-area for Northville business users would be more limited than for residence users. Extended-area calling privileges for business users here would not prevail on calls between Northville and the Detroit suburban zone of Farmington.

Pointing out the new service would open up an entirely new opportunity for telephone users of this community, Saxton said the proposal recognizes the war and postwar trend toward commuting between nearby communities.

## SWIMMING STOPPED

**CIVIL AND SPANISH-AMERICAN WAR VETERANS AND THEIR CHILDREN:** Congress very recently passed legislation (H.R. 3561) increasing by twenty per cent pensions to veterans of the Civil and Spanish-American Wars and their children. The estimated cost will be \$29 million a year.  
**TERMINAL LEAVE BONDS:** Another piece of legislation of interest to the veterans was the passage of a measure to allow the veterans of World War II to cash their terminal leave bonds after September 1, 1947. Approximately \$12 billion worth of bonds are outstanding. The deadline for filing claims was extended one year to September 1, 1948. The redemption of the bonds will reduce the public debt by an equivalent amount, and at the same time make the money available to the veterans at once.  
**HOUSING:** The Senate approved President Truman's Reorganization Plan No. 3, by a vote of 47 to 43, thereby making it a law. It was rejected by the House earlier in the session. The plan sets up a super bureau known as the Housing and Home Finance Agency, to which will be transferred nearly all the government's permanent and emergency housing activities. It will preside over the Home Loan Bank Board, the HOLC, and Federal Home Loan Bank; the FHA; the Public Housing Administration, and a few other temporary agencies.  
**AVIATION COUNCIL:** In the last days of the session, Congress sent to the President for his signature a measure creating a ten-member Congressional Aviation Policy Board to study and encourage the development of a national aviation policy. The Board will be composed of five members of each House and is to study the whole field of national aviation.  
**JUSTIFICATION FOR CUT IN APPROPRIATIONS:** The record shows that Congress was justified in cutting appropriation for the Army, when one takes a look at its extravagance in erecting flagpoles, one in Hawaii costing \$3500; in Puerto Rico, \$5000; and the same type pole, in Alaska, \$7050. It's a lot of money to put up a flagpole in any climate.  
**G. I. TRAINING:** General Bradley, Veterans' Administrator, reports that 1,200,000 former servicemen and servicewomen are now in colleges with their expenses being paid under the G. I. Bill of Rights. The estimated cost of the program is \$12 billion.  
**1943-47 AGRICULTURAL YEARBOOKS:** Congressman George A. Dondero reports that he still has available for distribution copies of the 1943-47 Agricultural Yearbook. This book is essentially a publication for farmers. If you can use it, drop him a card at his Royal Oak, Michigan, office.

## Don Hoyt found it cheaper to store 'em than feed 'em!

An electric motor operates this walk-in frozen food locker on Mr. Hoyt's farm in St. Clair County. It helps him adjust his farm operation to the ups and downs of the market for his turkeys, chickens and other poultry.

A lot of Don Hoyt's poultry used to live for months eating the money right out of his pocket. If the market wasn't favorable when they were ready, he'd have to keep on feeding them till it improved.

One day the Edison Farm Service Advisor gave him the facts on farm freezers. Between them, they worked out the cost of keeping dressed poultry in electric-powered frozen food storage as against the cost of feeding live birds... and he quickly installed a freezer. (He has two today.)

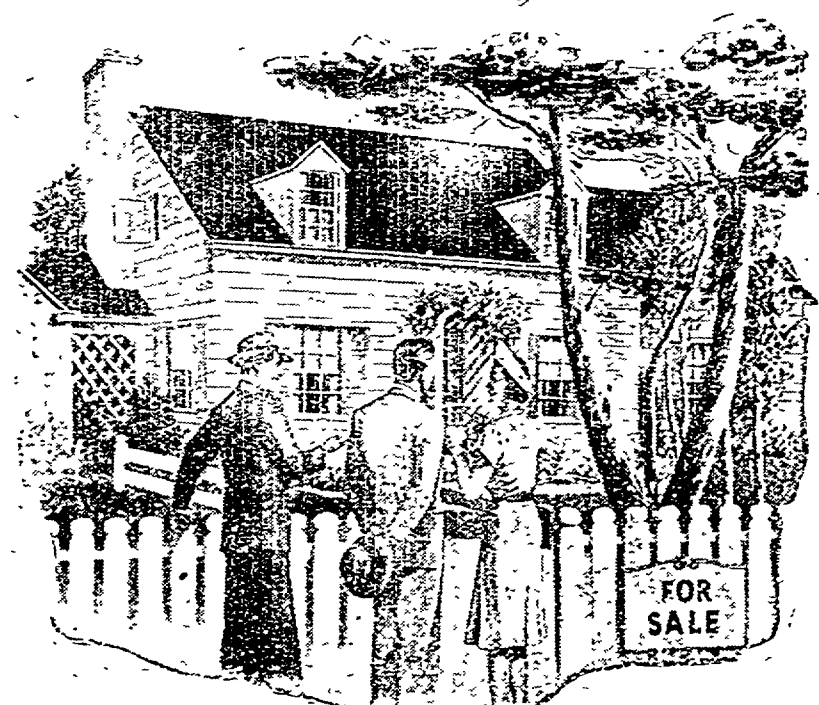

Now he dresses and freezes his poultry when they reach the right size and sells them the year round when the price is right. His records show, he says, that "it costs a lot less to store 'em than to keep on feeding 'em!"

Mr. Hoyt and thousands of other Michigan farmers are using electricity for more and more jobs all the time. It saves time and money, cuts work, and helps increase the yield of fields and livestock. They find that electricity provides what farm production needs: dependable electric service that a farmer can count on... and low-price service that he can use profitably.

Weddings Highlight Social Events of Past Week

**LYON - TOBIN**  
Lois Marion Lyon of Cady street, daughter of Harold Lyon of Bay City, and Albert J. Tobin, son of Mrs. Lulu Tobin of Chubb Road were quietly married at a pretty wedding Saturday evening at the home of the bride's grandmother, Mrs. W. F. Lyon of Cady street. Rev. William Hughes performed the double ring ceremony at 7 o'clock. The house was decorated with palms and bouquets of white gladioli.  
For her wedding the bride chose a white gabardine suit with white accessories. Her corsage consisted of white roses and gladioli buds.  
Her only attendant was Mrs. Fred Eddy of Bay City, a former schoolmate and close friend. She wore a pink suit with white accessories. Her corsage contained pink carnations and gladioli.  
Serving as best man was Edwin A. Sheldon of Mount Clemens.  
A reception for about thirty relatives and close friends immediately followed the ceremony. Refreshments were served from a table covered with a lace tablecloth and decorated with white tapers in crystal holders, luscious berry leaves and gardenias. The newlyweds cut a two tiered cake before their guests. Mrs. Edgar Lyon of Wyandotte, an aunt of the bride, presided at the silver service.  
Following the reception the young couple left on a week's trip to an unknown destination. Upon their return they will make their home in a house which they recently constructed on Chubb Road.  
The new Mrs. Tobin is a graduate of a high school in Bay City. After graduating she moved to Northville to make her home with her grandmother, Mrs. W. F. Lyon on Cady street. She was employed for some time in the office of Dr. R. M. Atchinson and now is employed by the Main Street Bakery.  
The bridegroom graduated from Northville High School with the class of '45 and soon after began service with the Merchant Marine Corps. He received his discharge from that branch last March.  
He recently completed a summer course at Michigan State College and will return in September for more schooling.  
Guests were present for the wedding from Cleveland, Chicago, Texas, Wyandotte, Flint, Detroit, Bay City, Paw Paw, Plymouth and Northville.

**Ownership Change**  
The number of farms changing ownership in New York annually has averaged not far from 69 per 1,000 farms during recent years.

**Standing Requires Energy**  
Fourteen per cent more energy is required for standing than for sitting.

THE OLD AND THE NEW

Troopers Gerard Wrocklage, left, and Gordon Grinwiz, right, show the difference between the old and new summer uniforms of the Michigan State Police. The new outfit, worn for the first time this week, is designed for the comfort of the troopers without sacrificing the distinctive appearance of a uniform. One marked change is the elimination of puttees, which were reminiscent of the days when all patrol work was done on motorcycles, such as shown in the mural in the background. Only cars are now used on patrol, and the puttees, which are warm and bind on the legs, are particularly uncomfortable when behind the wheel.

**Speaking of Averages**  
The average cow eats 100 pounds of food daily to produce from 20 to 25 pounds of milk. An average American family owns 3 beds. The average American uses 25 pounds of soap a year. The average bee hive produces 17 pounds of honey annually. The average housewife washes 6 tons of dishes a year.

**April-Fools**  
Although April 1 appears to have been observed in ancient Britain as a general festival, it was probably not until the beginning of the 18th century that the making of April-fools became a common custom. In Scotland, the custom was known as "humming the gowk," (the cuckoo) and April-fools were "April-gowks."

Thomas E. Gross, hospital apprentice, second class, USN, son of Mr. and Mrs. Charles Gross, formerly of Nine Mile Rd., now of Washington Courthouse, Ohio, has been graduated from the Hospital Corps School at the Naval Training Center, Great Lakes, Ill. **Too Much Soda**  
Experienced cooks have long known that too much soda yellows biscuits and makes chocolate cake reddish in color. It also affects the flavor of both these foods.

**Contouring Reduces Soil and Water Loss**

**Reclaim Waste Land by Half-Moon Shape Fence**

By C. W. GEE

Pioneers who settled Ohio and laid out their fence lines along the true points of the compass would have been shocked by a land transaction which recently took place in Logan county, Morgan Connor deliberately added 1.37 acres to his farm near Bellefontaine, Ohio, in order to make his fence lines crooked.

Having adopted many soil conservation practices recommended by

the U. S. soil conservation service, among which were contouring, his yield had been increased. By this method he reduced water run-off and cut soil loss to the minimum.

A fence had been erected on a 32-acre tract along the north side of the Connor farm. The fence ran according to the compass. When Wiley Connor returned from the military forces, father and son decided to reclaim several acres of waste land, which included an old barn lot near the north line and bisected by a small ditch.

Unable to plant the land to berries on the contour because of the straight fence line, the two moved the fence. Now their line fence follows a half-moon shape which would have aroused the horror of the early Ohio settlers. Connor, however, is not concerned with guiding his life and farming activities by the compass. He is concerned with saving his top soil. Two diversion ditches have been constructed and six acres of trees planted.

**KNOW YOUR BREED** Minnesota No. 1 By W. J. DRYDEN

Minnesota No. 1 is not a hybrid hog. It is a new strain more highly bred than most existing breeds. A cross of the Danish Landrace and

Typical Minnesota No. 1 and 2 cross barrow.

The Tamworth, matings were first made in 1936 at the University of Minnesota.

The new breed is long bodied and short legged, with a full ham, light shoulder and a light strong bone. The ears are rather large but thin and of good quality. The breeders have been selected upon the basis of performance, i.e., fertility, survival, rate of growth, economy of gains and body conformation. A new breed, Minnesota No. 2, also is being perfected at Minnesota.

A blushing young woman handed the telephone clerk a telegram containing only a name, address and one word, "Yes."

Wishing to be helpful, the clerk said, "You know, you can send 10 words for the same price."

"I know I can," she replied, "but don't you think I'd look too eager if I said it 10 times?"

munities for employment, trade, and recreation.

The need for liberalizing calling privileges between exchanges with the same community of interest has been evidenced by numerous requests for enlarging exchange boundaries and petitions from many organizations asking that service to the large centers be included in local service charges," Saxton said. "They also have been substantiated by statewide studies of the use by car customers of short-haul toll service to nearby communities. It is indicated that telephone users generally are willing to pay higher exchange rates in return for a wider calling area."

The company is proposing a reclassification of outstate exchange area into 8 groups, depending upon the number of main-station telephones (exclusive of extensions) in the extended-calling area. Those groups range from calling areas with

800 or fewer main telephones to those with 50,001 to 100,000 main stations. The present classification of 7 groups does not apply to extended calling areas and embraces exchanges with only 10,000 or fewer main telephones.

Saxton pointed out that, under the new proposal, the Northville residence calling area would be in a classification with those of 6,001 to 12,000 main stations, the extended area here having 9,350 main telephones. In the same classification are such extended areas as will be associated with the New Haven, Carleton, Monroe, Romeo, and Holland exchanges.

Under the company's proposal, monthly residence rates here would be increased as follows:

Individual-line flat-rate service, from present rate of \$2 to proposed new rate of \$3.25; 2-party-line flat-rate, from \$1.85 to \$2.75; 4-party-line flat-rate, from \$1.60 to \$2.25, and rural-line residence service, from \$1.50 to \$2.25.

Proposed increases for business services are: Individual-line flat-rate, from \$2.88 to \$6 a month; 2-party flat-rate, from \$2.30 to \$5; and rural-line business service, from \$2.25 to \$3.75 a month. The basic rate for private branch exchange trunk service would be increased to 150 per cent of the monthly charge for individual line flat-rate business service compared with the present rate which is 120 per cent of such charge.

Saxton emphasized that the company will seek to clear-up rate inequities as between communities of comparable telephone development. He pointed out that a Commission order of 1942, while dissolving such inequities in exchanges where charges were above the levels fixed in the rate schedule at the time, made no increase in exchanges where rates were below such levels. Northville users, he added, have been paying rates for years that are on the low side when the telephone development and calling opportunity within the exchange are taken into consideration.

Of the \$10,400,000 rate increase sought by the company, \$3,051,000 would apply in upward local service rate adjustments outstate; \$2,655,000 in Detroit; \$408,000 in Detroit-suburban exchanges; \$2,902,000 in increased charges for long distance calls within the state; and an increase of \$1,384,000 in miscellaneous service items such as switching and equipment charges.

Proposed changes in the intrastate long distance rate schedule are: 1. An increase of 5 cents over present charges for distances between 10 and 112 miles. 2. Reduction in the initial calling period (before overtime charges) from the present 5 minutes to 3 minutes for distances from 11 to 30 miles on which charges range from 15 to 25 cents a message. 3. An increase in overtime charges from the present 1/3 of the initial period rate. 4. Revision of the discount on night and Sunday rates from the present 35 per cent to 20 per cent under the day rates. 5. Increase in the minimum differential in person-to-person rates over station-to-station charges from the present 35 per cent to 40 per cent.

Saxton said the company, in asking for increases in long distance rates, realized that the Commission several years ago ordered intrastate rates of that time to conform to interstate levels for comparable distances. He pointed out, however, that there is now a differential on intrastate rates in most other states in the recognition that the long

distance service within the state should contribute more of its share in meeting the overall costs of providing telephone service.

"By applying an increase to intrastate rates," he emphasized, "the proposed charges for local exchange service can be kept at a lower level than otherwise would be necessary. It would seem desirable to apply such an increase in order that all classes of service share in the increased costs of doing business."

Saxton said the new rates "are no higher than necessary to provide good service to all who want it. The increases are necessary to permit the company to catch up with rising costs of doing business. In general, telephone rates of today are the same as in 1937, or even lower, although the cost of almost everything used in providing telephone service has risen sharply."

"Wage costs are now four times what they were 10 years ago with postwar wage adjustments alone boosting such costs by \$11,000,000 a year. Taxes have more than doubled since 1937. The extent to which the cost of materials and supplies has advanced is indicated, in part, by an increase in our 5-year postwar construction program from an original estimate of \$150,000,000 to a present outlook of \$220,000,000."

Revenues, of course, have gone up too—in fact 2 1/2 times the amount in 1937. But the total of all our costs has trebled in the same period. As a result, Michigan Bell's return on investment has slipped more than a third under the level of 10 years ago.

"The return on investment today is on a dangerous downward trend. This trend must be arrested and reversed so that the company will continue to be a sound financial institution, able to attract the additional money that is needed from investors for expanding and improving the service."
