Four Children Bitten by Dogs

During the last week four school children have been bitten by dogs on the village, and two dogs have been destroyed by Dr. Cavell because of rabies.

The dog problem is definitely serious in this area. Stray dogs and dogs allowed to run loose by residents are definitely a hazard and according to law are under quarantine. Owners of dogs are reminded that they are responsible and must keep dogs on leash or prevented from running at large. Under the new law dogs taken by police will be destroyed or released only when owner has paid legal costs and promised to keep the dog tied. Do you want some child bitten by a dog? No, then do your part by keeping your dog confined.

Dog Quarantine. Under strict order from Dr. V. G. Chabut, Village Health Commissioner all dogs in the area are placed under strict quarantine effective immediately. ALL DOGS must be MUZZLED. Unmuzzled dogs will be picked up and impounded in the Village Dog pound subject to the release requirements imposed by law.

National Guard Seeking Recruits

The Michigan National Guard is seeking recruits. To enlist in the National Guard men must be between the ages of 17 and 35 without restrictions to prior service. Men over the age of 35 must have had prior service in the National Guard, Regular Army, U. S. Army, Navy or Marine Corps. They must pass a physical examination similar to the Regular Army examination. Citizenship or declaration of intention of becoming a citizen is required. The term of enlistment is three years.

Veterans have option of one or three years and may be enlisted in the grade held when discharged if vacancy in that grade exists. Others enlist as privates. One-day's regular army pay for each drill night is given. All uniforms and equipment are issued and replaced as they become worn.

National Guard units train for two hours, one night each week, and attend a 15-day field training period in the summer at Camp Grayling National Guardsmen receive training and instruction in many fields including radio, telephone operation and maintenance, automobile mechanics, cooking, drafting, clerking, airplane mechanics and other useful trades. Regular Army technical schools are open to guardsmen.

In the new National Guard a man may rise as high as his ability and ambition will take him. National Guardsmen are eligible to attend Army Officer Candidate Schools and special appointments to the United States Military Academy at West Point may be made.

The National Guard offers good fellowship and the Armory is a center of social activities for members and their friends.

National Guardsmen are given an incentive without cost for any injury incurred during armory training or any injury or disease contracted during the field training period. Discharge is available prior to the end of enlistment if school, business or family hardships make it impossible for them to attend meetings.

Cooking Potatoes
The state experiment station has announced that potatoes of the measure saucepan (until 2 1/2 minutes) held 83 per cent of their original vitamin C. In contrast, potatoes cooked in an ordinary pot held only 75 per cent of the vitamin on the average, and as little as 60 per cent.

Termites and Pecans
Termites usually live in dead wood and most people associate them with wood destruction. However, pecan nursery stock and small trees sometimes are killed by the feeding of termites in the roots. The tree may have its taproot or its branches tunneled until only a shell or the bark remains.

STOIANOFF - HANCOCK

The wedding of Marjorie Hancock, daughter of Mr. and Mrs. Guy Hancock of Plymouth, and Robert Stoianoff, son of Mr. and Mrs. Peter Stoianoff of Northville, took place at the home of the bride's parents Saturday evening at 7:30 p.m. Rev. Alfred Maas of Ann Arbor performed the single ring ceremony before the immediate families. Bouquets of white stock decorated the house for the occasion.

The bride wore a dusty rose dress with a shoulder corsage of white roses and matching flowers in her hair. Her only attendant was her sister, Mrs. Cleve Halstead of Plymouth. Mrs. Halstead wore a dress of light blue and her corsage consisted of pink roses, matching those worn in her hair.

Don Stevens of Northville attended the bridegroom.

Mrs. Hancock chose a navy blue and white print for the wedding and Mrs. Stoianoff was dressed in navy blue. Each mother wore a corsage of American Beauty roses.

About one hundred guests came from Grand Haven, Ypsilanti, Detroit, Northville and Plymouth to attend the reception which immediately followed the ceremony at the Hancock home. A large three-tiered wedding cake, which was cut by the newlyweds, and candles decorated the main table.

The young couple are making their home on Center street. The new Mrs. Stoianoff graduated from Northville High School with the class of '47 and is employed at Gussell's Drug Store. The bridegroom is also a graduate of N.H.S. and served with the Infantry for two years. He is now employed at Miller's Garage.

Trellises entwined with streamers of various pastel shades were placed along the sides of the hall and large orchids adorned the baskets at each end of the hall. Various shades of purple were prominent among the decorations.

A picket fence enclosed the orchestra and large sparkling letters spelled out the theme on one wall while on the other a large picture contained the figures of a dancing couple and words of the familiar song.

Refreshments were served throughout the evening by Ann Beckel and Peggy Price. The pretty decorations combined with the many colored formal worn by the ladies created a colorful spectacle for the nearly one hundred spectators watching from the balcony.

Signed: MARY ALEXANDER,
Village Clerk.

Only three decades ago Dr. Ralph Mills, a medical missionary, sent a package of lespedeza seed from Korea to the U. S. department of agriculture. Department specialists planted the seed at the experimental farm across the Potomac river from Washington. In a few years there was enough seed to plant lespedeza at several state experiment stations.

The imported crop fitted well on the poor, slightly acid soils unfit for such crops as alfalfa and soon was being grown widely in the East Central states as a seed and pasture crop. Now its use is becoming more widespread, particularly in areas of low fertility land.

The U. S. crop of Korean lespedeza, developed directly from the single package, now is valued at more than 200 million dollars a year. Value of the seed crop amounts to 20 million dollars. The hay crop makes up another 100 million dollars of value. Although value of the pasture crop is difficult to estimate, specialists contend that it amounts to at least 100 million dollars. These figures do not take into account the profitable use of millions of acres of low fertility land made possible by introduction of the new legume crop.

Rabbit and Chicken Raising Is Profitable
To offset high meat prices, home production of rabbits and chickens can be carried on very economically, making the family at least partially independent of commercial sources.

Raising of rabbits and chickens at home has a big advantage in the economical use of feeds, because such animals mature more quickly and at a lower feed cost per pound of gain in weight.

Oil Consumption
Americans consume 120 gallons of oil products per person each year. Britons use 42 gallons and the people of all other nations average 14 gallons.

Modern Dairy Buildings Will Boost Efficiency

Increased efficiency has entered the dairy industry with more widespread use of milking rooms and milk houses.

The ideal location for a milk house is attached to the milking room or barn in most areas, sanitary requirements permit construction under the same roof.

Adjacent construction permits the dairyman to coordinate feeding, caring for the cows, milking them and handling the milk into an efficient system.

Miles of walking are saved annually when the milk house is adjacent to the milking room or barn, figures compiled by Cornell university show.

CONSUMERS POWER COMPANY

When the "ghost walks" on State of Michigan paydays, 144 employees find themselves in the peculiarly blessed position of getting bigger paychecks than any of the following elected state officials:

Secretary of state, auditor general, attorney general, state treasurer, state highway commissioner and state superintendent of public instruction.

Each official, elected by the voters, receives \$7,500-a-year compensation from the State Treasury.

It's like having a factory foreman getting more wages than the president of the company, the boss himself. Yes, 144 employees are better paid by the State of Michigan than are the heads of state government.

How did this Alice-in-Wonderland, topsy-turvy situation develop?

And how about the governor? You may add:

Here's the story, as we find it. When the present state constitution was adopted nearly 40 years ago, salaries of state officials and legislators were defined and limited. Here is section 21, still unchanged:

"The governor and attorney general shall each receive an annual salary of \$5,000. The secretary of state, state treasurer, commissioner of state land office and auditor general shall each receive an annual salary of \$2,500. They shall receive no fees or perquisites whatever for the performance of any duties connected with the offices. It shall not be competent for the legislature to increase the salaries herein provided."

Section 22 added in 1940, authorizes a civil service commission to set salaries of all classified employees. Except as heads of departments and not more than two unclassified positions in each department.

The civil service commission has set salaries for the governor and attorney general at \$12,500 a year, for the secretary of state, state treasurer, commissioner of state land office and auditor general at \$7,500 a year, and for the other state officials at \$5,000 a year.

The constitution of state officials other than the governor and lieutenant governor has been increased a \$7,500 a year by a legislative enactment making them a member of the state administrative board. The secretary of state, for example, has a constitutional salary of \$2,500 and \$5,000 additional pay as a member of the "ad" board.

Yet, two employees of the secretary of state's office are better paid than the secretary of state. Nine subordinate employees of the highway department get more money than the highway commissioner, their boss. And 2 subordinate employees of the attorney general are better paid than the attorney general!

The governor of Michigan draws \$17,500 from the state treasury. This compensation is as follows. His constitutional salary,

**He's a Rat**

What is the most destructive animal in the world?
No—it's not a puppy or a small boy.

The common Norway or brown rat has absolutely no competition when it comes to the ability to destroy. Annually, rats alone destroy about

4 per cent of the total grain and cereal crop in the United States, figures compiled by extension-service entomologists indicate. As if its destructive abilities were not enough, the rat is most to carriers or is itself a carrier of bubonic plague, typhus and other diseases which are deadly to man.

Few farms are entirely free of rats, although rat populations can be reduced quickly. Cleaning up the premises, rat proofing, cutting off food supply, poisoning and trapping are major points in an effective rat control program. But, once the control measures begin to show results, there can be no relaxing. Rat control is a permanent, year-around program. A few days of poisoning will have only a temporary effect on the rat population.

Reading Preferences

Librarians report a great demand for travel books. South American countries usually are high on the list of desired places to visit. While war fiction has practically untouched shelves, historical fiction is widely read, both old and recent titles. Novels concerned with race and social problems are much in demand. Movies, as always, bring a flood of requests for the book which has been filmed.

READING PUBLIC . . . That presidential ring is getting so crowded with hats that it would not be surprising if some potential nominees started throwing their chapeaux out of it. This is one man's conception of how puzzled the public is.

\$5,000, a legislative-set salary as member of the state administration board, \$2,500, and a flat \$10,000 expense account for which no accounting is required or given.

Among the amendments currently considered by the legislature at Lansing is one to remove constitutional salary limitations of both state officials and state legislators. The State Supreme court has ruled that the legislature is forbidden by the constitution from paying themselves expense money. This decision puts the governor's expense account in obvious legal jeopardy.

Is a \$7,500 salary adequate for state elective officials?

This question appears to us to be linked directly to the illegal situation, now existing, whereby 144 state employees get higher wages than their bosses. Why should salaries of state officials be limited by the constitution, while salaries of their subordinate employees are not?

Eventually, this state salary mess must be straightened out. We doubt if any farmer would be happy if the hired hand got more wages than he did. State officials are in the same fix. Michigan public service now calls for financial sacrifice. Such officials would be far better off to take a civil service appointment carrying no responsibility and no campaign obligation.

Airplane Spraying

Airplane spraying requires out 12 to 15 gallons of spray solution for 100 feet of water, per acre. It takes 4 to 10 feet above ground to get a cover of spray equal to the width of the wing tips, and up to 100 feet per hour. The equipment is such that the pilot can operate it from

TAKE a clear day—a Dynaflow* Buick—and a mind open to new experiences.

Turn the key in the lock—press down the gas treadle—and set this mighty Fireball straight-eight purring. Now:

Flick the selector lever till the pointer indicates "D"—that's for driving. Feed a little gas—and see what happens.

Smoothly, you slip away from the curb. Silently you build up momentum. Effortlessly you cruise at whatever pace your treadle toe selects.

Look! you say. A stop light! What do I do?

Nothing special. Let up on the gas. Apply the foot brake as you need it.

That all? Won't the engine stall? Don't I shift?

That's all. Your engine won't stall. You don't shift. Just sit there till the coast is clear. Then step on it. Step hard and you're off like a rabbit. Step lightly, and you ease smoothly away.

What's happening? you want to know. What's doing the shifting? Some mechanical hand under the floor boards?

Not in this car, sir. Oil does it all—spinning oil. Oil whirling to give you starting surge—power build-up—efficient cruising—engine braking effect on hills.

Oil that does everything the usual low, second and high gears do—without any gearshifting on your part—and without the slightest break in your stride except when you want it.

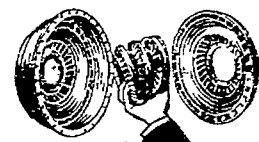

Say no more! I'm sold! Where do I sign up?

There's only one place. Only Buick has Dynaflow Drive, and no other American car has anything like it. With or without a car to trade, better see your Buick dealer first minute you can.

**What's Different About
DYNAFLOW DRIVE*?**

To cut efficient new pump (left below), Buick engineers have added a true oil ring (right) and an ingenious new supercharging assembly (in hand) which produce a "large" bogging action in starting and accelerating. The result is the first device on any American passenger car which employs liquid to fill the chamber of both the clutch and the usual low, second and high gears. The clutch pedal is unimpeded and a simple control gives you manual select on power ranges and direction.

Doris Maltby rolled 602 for 3 games Monday night. 600 was rolled here about 6 years ago by Olga Taylor who was a teammate at that time of Doris, bowling on Schrader's team. Doris Maltby's 602, has entitled her to be a member of the 600 club, that has been organized in the past

year by the W.I.B.C. Bowling Congress.

On May 1, E. I. Besemer, Wayne County Agricultural Agent, will assume his duties directing the Veteran's On-The-Farm Training Program in Charlevoix County. This program is conducted through the State Department of Public Instruction and the Charlevoix Public Schools. Besemer will have two or three assistants to help with the instructional program. In 1936 Besemer took over the position of Wayne County Agricultural Agent directing Michigan State College Extension work in the county. He has earned ten year awards in both the Vocational agriculture and extension fields. The Besemer family will remain in Belleville until housing arrangements can be completed.
