Connors, New Racing Secretary

William C. Connors of Chicago, one of America's most highly regarded young authorities on harness racing, today was appointed race secretary for Northville Downs 1948 meeting, scheduled for 60 nights from Aug. 2 through Oct. 9, by H. B. Dennison, president-general manager of the flood-lighted half-mile plant here.

Connors, who served as assistant race secretary here in 1946 and '47, is currently acting as secretary at Maywood Park, Chicago, having assumed that post this season after two years as assistant.

A war veteran, now 33 years old, the Chicagoan has been closely associated with the harness sport since his early boyhood when his father owned and raced standardbreds. In World War II, the new Northville secretary served first as a tank driver in Africa, then was moved to the Pacific theater where he rose to the rank of captain with an infantry unit that saw heavy fighting on Saipan and Okinawa. Though wounded in the Okinawa action, Connors remained in the Pacific and served with the occupation forces in Japan.

In 1946, working with Secretary John W. Dailey here, he helped draw the condition book which produced one of the most spectacular meetings in the history of the sport — 39 nights in which there were five dead heats, 83 other races, settled in photo finishes by margins of less than half a length, and the only instance in American pari-mutuel records when two consecutive dead heats forced a four-way payoff in the daily double.

In addition to his duties as secretary, Connors frequently has served as public address system announcer, calling the races for the spectators. In this work he is one of the few men in the sport who does not use field glasses to spot the horses, relying instead on his ability to tell every entrant by his style and gait.

Connors' appointment today fills the Northville post left open when Dailey resigned last winter to become race secretary for the Columbus, O., Trotting Association, the Marion, O., Matinee Club and other raceways in the Buckeye state.

"At a recent meeting, the University Committee on Cooperation with Educational Institutions gave careful consideration to reports and other information concerning your school.

"This year, as during other years, the committee wishes to consider accreditation a continuous arrangement. In order, however, that we may have close contacts with schools, provision is made for periodic visits by University representatives after a period of one, two, or three years, and schools are classified accordingly.

The Secretary was asked to inform you that, by vote of the committee, your school has been designated as a three-year school, with the expiration of this period effective June 30, 1951.

Very truly yours, George E. Carothers, Secretary, University Committee on Cooperation with Educational Institutions."

MAYBE it's old fashioned — but Mom is back on her famed pedestal

This year's affectionate Mother's Day cards are strictly on the sentimental side. No more kidding verses and "career girl" illustrations.

Instead, the cards are blooming with palaces and roses like an old garden wall. Heavy ribbons, lace borders, and sparkling rhinestones create an air of elegance and luxury. Several of the greetings strike a religious note, containing prayers for Mother's continued happiness. Old-fashioned domestic scenes (like Mother for nostalgic little journeys into the happy past of fathers, wives, sons, and even mothers in law!)

Main Street Paving Discussed

With President Con. Langfield in the chair, the Village Commission regular session Monday evening pondered insurance matters, recreation summer program, heard reports from the Chief of Police and Village Treasurer, reviewed bids for curb and paving in Bealtown, electric pump and connections and discussed the proposals of the Wayne County Road Commission to asphalt pave Main Street.

A complaint of a citizen about conditions in and about the cemetery was discussed, also school children playing in the old cemetery.

The insurance of the Village was set in amount and proportion under agreement.

Wilson Funk presented the summer recreation program with Hal Helmer in charge, assisted by Miss Decker and Miss Helen Canfield.

The stirring, gutter-and paving in Bealtown bids were received and referred to the Public Works Department for analysis and report made to a special meeting Friday night. The same action was taken relative to the bids for the new electric pump.

The Wayne County Road Commission offered estimates on paving Main Street; the Village being requested to pay one half. Estimates ran from a total of \$12,220 from Church to Wing, to \$28,491.00 from Griswold to Rogers. The conversation of the President with the Road Commission regarding the Seven Mile Cut-off was held.

Scarlet Fever In The Village

A Scarlet Fever outbreak may occur in Plymouth and Northville. Dr. David Littlejohn, Director of the Wayne County Health Department today issued the following warning:

"Scarlet fever and strep infections have recently appeared in Plymouth and Northville. During the last ten days there has been reported five cases of scarlet fever in Plymouth City, two in Plymouth Township and one in Northville. For each case of reported scarlet fever where there is a present and a physician has been called, there are probably quite a few other cases or persons with a 'strep throat'. Scarlet fever with a rash and strep throat with or without a rash are actually all one and the same disease. An exposure to a case of strep throat, either severe or mild, may result in a severe case which will be called scarlet because it has a rash. Any person with a sore throat should do everything possible to avoid exposing others. Any sore throat could be a strep infection."

The Michigan Department of Health regulations require a minimum of 2 weeks isolation for all cases of scarlet fever. Also isolation until recovery is required for all cases of streptococcal sore throat.

The cooperation of the public is needed to control the spread of 'strep' infections."

Mr. Eaton opposed the reorganization and worked for the Northville appropriation, and the school equalization.

News and Comment from Congress
George A. Dondero

STREAM POLLUTION AND PUBLIC HEALTH: The Public Works Committee of the House of Representatives has approved and reported a revised version of the Senate measure on stream pollution control. George A. Dondero, chairman of the committee, says:

"The purpose of the bill is to provide a reasonable approach to a very difficult problem and one which is not easy to solve. The pollution of our inland lakes and waterways has become a national problem affecting public health and involving the destruction of fish and wild life.

"Our modern way of living has increased the danger to the health of our people. Oils and greases from millions of garages, together with domestic sewage and industrial waste, discharged into our rivers and lakes, make it necessary to remedy this menace and require legislation to cope with the situation."

Congressman Dondero further says: "The revised House Committee Bill authorizes \$14 million for the first five years of the program, of which \$100 million would be used to control pollution of interstate streams; \$5 million would go as a grant to states and local subdivisions to prepare pollution control plans. Of this \$4 million would be used for buildings and the remainder for research and loans."

FACTS IN THE CONDON CASE Congressman George A. Dondero commenting on the case of Dr. E. U. Condon said:

"This affair goes deeper than a mere difference between the Legislative and Executive branches of the government. We are confronted upon a costly program to prevent the spread of Communism abroad and yet here at home we are faced with a condition which paralyses status abroad. In the present's defiance of Congressional authority, the rule of the executive branch of the people."

"Communism, Foreign or National Socialism, as the situation is summarized in one word: Status. And Status exists when the executive branch of the government becomes greater than the elected representative of the people. If the President can defy Congress in the Condon case which relates to our national security, then we are on our way to totalitarianism which we condemn in European countries."

"Let us remember that Congress and the country would never have known of General

Meyers, Gerhart Eister, of Hanns Eister, if Congress had not had access to their files; it could expose them."

"Congress has publicly charged that Dr. Condon is one of the weakest links in our atomic security. In justice to Dr. Condon and the nation, all evidence should be made known. Why not? What has the Administration to hide by refusing to let the FBI letter on Dr. Condon be made public?"

"Dr. Condon says Congress is retarding science by its attack on him. Was J. Edgar Hoover of the FBI retarding science when he wrote a three and a half page letter to the Secretary of Commerce, warning him about Condon's association and record? Was General Leslie Groves, director of the atomic bomb project, retarding science when he had Dr. Condon taken off a Soviet-bound plane in 1945 and refused to permit him to go to Russia as he desired, notwithstanding authorization of the trip by the State Department?"

"Our government is charged with the security of the people and its institutions. We are engaged in a world struggle, not with guns, because the Communists don't fight that way — just yet! They merely employ the strategy of getting a few men in the government, and take over an entire country without firing a shot. Are we next?"

Look who gets squeezed!

Union leaders representing less than one-tenth of railroad employees reject recommendations of President's Emergency board—refuse to negotiate except on their own terms—threaten to paralyze nation by strike!

THE LEADERS of three railroad unions, representing less than one-tenth of all railroad employees, have called a railroad strike that would paralyze the nation.

These leaders refuse to accept a 15½ cents an hour wage increase retroactive to November 1, 1947. This increase was recommended by an impartial Emergency Board appointed by President Truman.

This increase of 15½ cents already has been accepted by the 19 other railroad unions. But the Brotherhood of Locomotive Engineers and Firemen, and the Switchmen's Union of North America won't accept what more than 90% of all railroad employees have accepted. They have called a strike to get more!

Unions refuse rules discussion
Certain rules changes demanded by these union leaders—which would increase wages still further—were recommended by the Board. But the union leaders want more—they demand that the railroads put into effect ALL the changes they asked for, including those the Board felt should be denied.

On top of this, they insist that certain rules changes proposed by the railroads be withdrawn—in spite of the fact that the Board recommended them! These union leaders have refused to negotiate except upon these arbitrary terms.

Greater wage increase not justified
Engineers and firemen are among the highest paid of all employees in America, as figures in the box show. This strike threat doesn't justify giving a greater increase than other railroad workers received.

Emergency Boards are a means provided by the Railway Labor Act in the public interest to avoid strikes. The President's Board,

In contrast, this small group of railroad union leaders are attempting to flout the intent and spirit of the Railway Labor Act, and dictate their own terms.

They have dictated a paralyzing railroad strike.

You will be the victim!

How long will the American public stand for the undemocratic, arbitrary, and abusive use of the right to strike and the disregard of the obligation to provide transportation? How long can the American people permit a few dictatorial union leaders to defy the processes provided for peaceful settlement of disputes?

Force seldom produces settlements that are either fair or lasting. Moreover, a point is often reached when personal interests must be held subordinate to the greater public welfare. That is why the railroads have accepted the Emergency Board recommendations. That is also why the leaders of these three unions should reconsider their decision to call a paralyzing strike.

Compare these wages with what you make!

Here is a comparison of average annual earnings of engineers and fireman for 1939 (pre-war) and 1947 (also shown is what 1947 earnings would have been if the 15½ cents per hour increase, offered by the railroads and rejected by the union leaders, had been in effect throughout the entire year 1947.		1939 Average Annual Earnings	1947 Average Annual Earnings	1947 Average Annual Earnings with Wage Increase Recommended by President's Board

LYNCH-SCHILINSKI

Elizabeth Schilinski, daughter of Mr. and Mrs. Joseph Schilinski of Six Mile Road, was united in marriage with Edward Lynch at Our Lady of Good Counsel Church at Plymouth Saturday morning at 10:30 a. m. Rev. William Mooney of that church and Rev. E. L. Woods of Northville officiated at the double ring ceremony. The altar was decorated with bouquets of mixed spring flowers and candles.

The bride, who advanced down the aisle on the arm of her father, wore a colonial styled white satin gown with long sleeves and train. Her finger-ring veil fell from a tulle of pearls. She carried a bouquet of gardenias and orchids.

A sister, Lottie Schilinski, attended as maid of honor. She wore an orchid gown similar in style to the bride's and carried a bouquet of orchid roses, snapdragons and carnations.

Frances Wooten of Northville and Idef Gurnes of Plymouth were the bridesmaids.

Both girls wore nile green gowns and carried bouquets of pink roses, carnations and sweetpeas. A short veil caught to a crown adorned each attendant's head.

**Flies Resistant to DDT
Developed by Scientists**

A strain of DDT-resistant house-
flies, requiring nearly twice as
much of the chemical to kill them
as ordinary flies, has been devel-
oped by the USDA. The possible fu-
ture development of DDT-resistant
houseflies in nature is of consid-
erable importance to public health.
The problem depends somewhat on
how long it may take for wild flies
to develop such resistance. This
would complicate control.

**Invasion of Insects
By Air Poses Threat
Pests, Plant Diseases
Survive Shorter Trips**

Danger of invasion by undesirable
alien insects grows apace in every
agricultural country of the world as
air transport, which is accounting
for an ever increasing share of traf-
fic, cuts the time of travel between
them from days to hours, and as
airplanes take over a larger share
of traffic.

Pests that might not withstand a
long sea voyage may survive the

sects, costing large agricultural
losses.

shorter air ride in good shape.
Reaching new lands where condi-
tions favor their development they
soon may build up a strong colony
that could become as costly as the
Hessian fly, the European corn
borer, the Japanese beetle, the cod-
ling moth or the cotton boll weevil.

The department of agriculture is
charged with this country's defenses
against the entry of dangerous for-
eign insects and plant diseases.
Even toys have been found to be
carriers.

Farmers must be sure that all
mail and express from foreign coun-
tries have been inspected and passed
free of any insects or diseases be-
fore being permitted on their land.

been developing in the last ten or
fifteen years because of the fact that
stallions are suitable for all types
of farm work.

The breed has shown superior
temperament, strength and resistance
to disease, and while light in weight
has proven an excellent draft horse.
It is exceptionally strong, tame and
docile.

**Sexing of Baby Chicks
Proves Difficult Task**

Chick sexing is difficult to learn,
and in order to become proficient it
is necessary to receive expert in-
struction and to have considerable
practice and experience with thou-
sands of chickens.

Reliable authorities have stated
that a student must sex at least 500-
000 cockerels before the male genital
eminent can be accurately recog-
nized. The expert sexer appears to
be endowed with a natural ability
to recognize and classify the various
types of genital eminence to be
found in chickens, but accuracy is
obtained only by regular practice,
investigation of errors and a liking
for the job.

**Fertilizer Won't Solve
Entire Farm Problem**

Many farmers are inclined to use
fertilizer as a crutch by attempting
to make it substitute for good soil
management.

Vital as fertilizer is, it cannot do
the entire job. It must be backed
up by other practices that add or-
ganic matter, build soil structure and
boost crop yields.

**New Insecticides Are
Non-Toxic to Bees**

One serious cause of bee poison-
ing has been that bees have taken
dusts containing arsenic and have
stored this poison in combination
with pollen in the hives. Arsenic
remains permanently poisonous but
newer insecticidal dusts and sprays,
such as DDT, DN and D.D.D., are
less dangerous to beneficial insects
as the toxic effects will break down
gradually.

The Girl Scout Leaders Training Week-end will be held Friday, Saturday and Sunday, May 14, 15 and 16 at the Cedar Lake Area Camp. All leaders and assistant leaders are invited. There is a small registration charge and all leaders planning to attend are asked to call Mrs. William Wilkie at 1347 not later than today, Friday. It is possible to attend one day or the full three-day session. A list of the equipment needed may also be obtained from Mrs. Wilkie.

Mrs. Schoof's Troop
The meeting was called to order. The roll was called. The girls are going to get Sally Wagenschutz a scarf and some other toy. They are going to give it to her tomorrow. The girls are going to sell tickets for the Travel-Tashon Show. They were each given four and the ones that are not sold by Wednesday or Thursday must be turned in. The Mother's Day Tea program was discussed. There will be a variety of things to hear such as singing, saying poems and some will play the piano. Four mothers are going to make cookies for the tea and Mrs. Schoof is going to furnish the tea and lemon. The girls played a couple of games. We sang taps and then the meeting was dismissed.

GIRL SCOUT TROOP NO. 6

Our meeting this week was taken up with the Mothers Day Tea which was very nice. As our Mothers arrived we met them and presented them with little basket favors we had made of blue felt which were filled with violets. A short program was given by the girls and then each girl introduced her mother and escorted her to the tea table; which was presided over by Mrs. L. C. Stewart. Our table was beautifully decorated with silver appointments, candleabra and flowers but the main decoration was a cake, inscribed with "Girl Scout Troop No. 6" and the girl Scout crest, which was given to us with the compliments of Hiversen Bakery. Special guests at the tea were our sponsors, the members of Weyan Guild. They also received basket favors.

SPECIAL NOTICE There will be no hike to Novi this Saturday. The Novi Troop leader, Mrs. Jennings, is in quarantine with her son who has Scarlet Fever.
