## Northville Laboratories Supply Extracts Across U.S.

Standing on a five and one-half acre beautifully landscaped slope on Fairbrook Road is one of Northville's most unique industries, the Northville Laboratories.

Employing about thirty persons in the production of pure vanilla extracts, citrus extracts, chocolates, and ice cream toppings, the firm's president and general manager is Conrad E. Langfield, a pharmaceutical chemist.

Mr. Langfield got his start in pharmaceuticals with the Parke-Davis Co. of Detroit and in the first World War he served in the Surgeon General's office buying pharmaceutical products for the Army. Norman Sarvis of Royal Oak is the office manager and chief chemist is Clayton A. Taintor of Plymouth.

Began some 35 years ago by Mr. Langfield and his father, the late Edward C. Langfield, the Northville Laboratories today is one of the large producers of vanilla. Last year, the Laboratories produced over 160,000 gallons of miscellaneous extracts and 50 tons of vanilla powders.

The Northville Laboratories import vanilla beans from Madagascar, Old Mexico, Java, Tahiti, West Indies, and South America, fruit oils from Italy, California and Brazil, and spice oils from the East Indies. The Lab's products are shipped throughout the United States with salesmen and brokers representing the firm across the nation.

The Northville Laboratories, which was recently extensively remodelled, is credited with having pioneered the revolutionary method of percolating vanilla in order to procure a concentrated product.

Vanilla comes from a flower of the orchid family and the pods or beans as they are called are shipped here in tin boxes. They are carefully selected, chopped, and blended by placing the beans on a block and bringing vertical knives down. This method is preferred to grinding because it does not set up heat which is said to destroy delicate flavoring side-hydes, according to Mr. Langfield.

Next the chopped beans are placed in a large tank which resembles a vacuum percolator. A solvent of pure alcohol and distilled spring water is used and percolation is achieved by a pressure vacuum circulation of the solvent through the chopped beans.

Vanilla concentrates have gained wide favor because of superior flavoring results and economy. Northville Laboratories supplies all requirements of the largest ice cream and bakery industries in Detroit and this metropolitan area.

The Northville Laboratories ranks as one of the six largest vanilla extract producers in the country, and the company is known for the quality of its products because the extracts are percolated in glass-lined tanks and stored in glass-lined containers which protect and age the flavor.

The million dollar wagering mark was passed for the eighth time this week in the most successful meet held in Michigan.

Last week's handle in the American Totalisator machines was \$1,176,478. Cool, threatening weather kept the crowds down most of the week, but a near-capacity crowd turned out Saturday night, and sent \$246,429 through the mutuels. The nightly average for the first 45 nights of the meeting now stands at \$201,721, about 40 per cent ahead of the handle last year.

The State of Michigan continues to profit, gaining \$33,920.41 in taxes, and "breakage" last week.

### Fire Prevention Week October 3-9

With national fire losses approaching a staggering \$750,000,000 annually, the nation has begun its observance of National Fire Prevention Week, October 3 through 9, with fire safety campaigns in thousands of communities to save lives, jobs, and property.

Ten thousand lives are lost in fires each year, and most of them could be saved by community action. President Truman has pointed out in his official Fire Prevention Week proclamation.

\$709,839,000 Losses

A fire destruction in the United States during the 12 months ending June 30, 1948, was \$709,839,000 or nearly 3 1/2 times as great as the devastation caused in any one year by the Louisville blitz on Britain. It was nearly twice as much as the fire loss for the entire year of 1943, and 12 per cent greater than the losses for the previous 12 months ending June 30, 1942.

The National Board of Fire Underwriters emphasizes that these statistics reflect only the direct property losses from fires. Indirect losses are probably three times as great, the National Board estimates. These include fire fighting costs, hospital bills, loss of jobs and production, business failures, reduction in community buying power, and reductions in savings.

600,000 Fires in Buildings  
Fires, attack about 600,000 buildings a year, about 260,000 of them dwellings, 58,000 stores and shops, 48,500 apartments and rooming houses, 31,700 manufacturing plants, 10,200 restaurants and taverns, and 3,600 theatres and amusement places. About 75,000 fires occur annually in motor vehicles.

Effective action by local communities can reverse the upward trend of losses, as has been proved by dozens of campaigns in various cities. The Presidential proclamation asked Chambers of Commerce, Red Cross, and other civic organizations to join with newspapers, radios, and movies in every city, town and village to help reduce the number of fires and to save lives, jobs, and property.

State and local police are working on the case.

A minor accident occurred Saturday night when a car, driven by Cecil Spencer and owned by Ray Rose of Ten Mile Road, South Lyon, ran into the guard rail over the tracks on Griswold Road. The car received minor damage.

An accident occurred at the bend in Randolph Street near Taft Road when Horace Powell of Middle Belt Road, Garden City, driving his own car at an excessive rate of speed, failed to make the turn and hit the bank. The car received extensive damage.

### Northville Downs Granted Extension

The Northville Downs was this week granted an eighteen day extension for the harness racing season and therefore racing will continue at the track nightly, except Sundays, through October 30.

The million dollar wagering mark was passed for the eighth time this week in the most successful meet held in Michigan.

Last week's handle in the American Totalisator machines was \$1,176,478. Cool, threatening weather kept the crowds down most of the week, but a near-capacity crowd turned out Saturday night and sent \$246,429 through the mutuels. The nightly average for the first 45 nights of the meeting now stands at \$201,721, about 40 per cent ahead of the handle last year.

The State of Michigan continues to profit, gaining \$33,920.41 in taxes, and "breakage" last week.

### Fire Prevention Week October 3-9

With national fire losses approaching a staggering \$750,000,000 annually, the nation has begun its observance of National Fire Prevention Week, October 3 through 9, with fire safety campaigns in thousands of communities to save lives, jobs, and property.

Ten thousand lives are lost in fires each year, and most of them could be saved by community action. President Truman has pointed out in his official Fire Prevention Week proclamation.

\$709,839,000 Losses

Fire destruction in the United States during the 12 months ending June 30, 1948, was \$709,839,000 or nearly 3 1/2 times as great as the devastation caused in any one year by the Japanese blitz on Britain. It was nearly twice as much as the fire loss for the entire year of 1943, and 12 per cent greater than the losses for the previous 12 months ending June 30, 1947.

The National Board of Fire Underwriters emphasize that these statistics reflect only the direct property losses from fires. Indirect losses are probably three times as great. The National Board estimates these include fire fighting costs, hospital bills, loss of jobs and production, business failures, reduction in community buying power, and reductions in savings.

600,000 Fires in Buildings  
Fires, attack about 600,000 buildings a year, about 260,000 of them dwellings, 56,000 stores and shops, 48,500 apartments and rooming houses, 31,700 manufacturing plants, 10,200 restaurants and taverns, and 3,600 theatres and amusement places. About 75,000 fires occur annually in motor vehicles.

Effective action by local communities can reverse the upward trend of losses, as has been proved by dozens of campaigns in various cities. The Presidential proclamation asked Chambers of Commerce, Red Cross, and other civic organizations to join with newspapers, radios, and movies in every city, town and village to help reduce the number of fires and to save lives, jobs, and property.

Entrance was made into the Clarence Schwab home on River Street Saturday night and two army rifles, which were the property of the V.F.W., were stolen. Local police and detectives from the Wayne County Sheriff's office are still investigating the cases.

Sunday the Northville Milling and Lumber Co. Yard office on Base Line Road was entered and the safe broken into. Cash, checks, abstracts and titles were taken. Several of the checks, abstracts and titles were located by two members of the Junior Police Force, Bobby Watson and David Hamilton, but the money is still missing. State and local police are working on the case.

A minor accident occurred Saturday night when a car, driven by Cecil Spencer and owned by Ray Rose of Ten Mile Road, South Lyon, ran into the guard rail over the tracks on Griswold Road. The car received minor damage.

An accident occurred at the bend in Randolph Street near Taft Road when Horace Powell of Middle Belt Road, Garden City, driving his own car at an excessive rate of speed, failed to make the turn and hit the bank. The car received extensive damage.

P. T. A.

An executive meeting was held after school Wednesday, September 22 for Salem Union P. T. A. To get the work started for the coming school year a P. T. A. meeting will be held Wednesday evening, September 23 at 8:00.

o'clock in the school house for all in the district to attend. Mrs. Art Dahl is the new refreshment chairman. Discussions were started about Halloween, membership and Room mothers.

There has been a controversy raging in our village which has been likened to civil war, the obvious issue has been concerning zoning and trailer camps, but the issue should be clarified as to the real question. It is whether the village of Northville wants racing within its limits or not.

If racing is to continue it must be allowed to operate within the law and as efficiently as possible. As it is apparent from the clean, well-kept appearance of the race track itself the Riding Club could be expected to operate a trailer camp in the same manner, cleanly and tidily. The question is not whether we have open, year-round trailer camps in the village or in the township, but that the trailers which are necessary to the racing be allowed to be used for decently.

The present Mayor and Council are obviously and honestly interested in the racing business. They are also obviously and honestly interested in the welfare of the village. The racing season brings the benefits of the added business of transients the people employed there, the gifts to the building fund, recreation program and various civic projects. If racing is to be accepted by the people of the village it must necessarily be accompanied by the evils which can only be minimized by control, i.e. the trailers, the traffic nuisance, the noise, and the undesirable.

It is not a question concerning the Driving Club and adjacent property holders alone. It is a question of utmost importance to every person in the village and the township with any sense of civic consciousness. If a business is operating within a village it should certainly be within the rights of the citizens to express their opinion either for or against it.

Those who have long lived in Northville are proud of its unusually beautiful parkway approaches. The present trailer situation has destroyed one of the most beautiful. Northville is a town which has attracted many people as residents who sought it out as an unusually lovely small town. These people bring in the money they earn elsewhere and spend most of it here. The local business people may or may not know whether this year-round business balances the transient trade during the racing season. However, Northville as a noisy, confused little racing town as it has been this summer will certainly fail to attract or hold many of this type of resident. Real estate values are bound to lower from this cause.

Before we face another such confused racing season could not this issue be put before the public for an expressed vote? Then it would be clearly established whether our present Mayor and Council are expressing the will of the majority of the people or of a minority business interest.

Signed,  
Mrs. George R. Bowland.

## New Corn Drying-Storage Method Boosts Value of 1948's Big Crops

How a Quonset is equipped to dry as well as store corn is illustrated in these photos. (Above) Ear corn is loaded into the building through removable roof sheets. (Right) Ears pile around ventilation tunnel. When building is filled, air blown into this tunnel by outside fan circulates between ears and carries moisture out through top-vents.

Corn growers, confronted with lack of facilities for handling their record yield this year, now may obtain newly-developed buildings that increase crop value by drying as well as storing the grain.

The new agricultural development is a Quonset 82x36' adaptation that handles 5,000 bushels of ear corn. Local dealers can erect and equip it to receive corn in a few days' time. Drying is accomplished by forcing air through the corn at the rate of 25,000 cubic feet a minute.

The Quonset is equipped with special bracing, a motor-driven fan and a slatted framework which runs lengthwise through the building's center. Corn piled around the frame forms a tunnel into which air is blown. The air circulates through the corn, absorbs moisture, and escapes through vents at the building's top. The special equipment can be removed easily when the Quonset is desired for other uses.

Another corn-handling unit, the Quonset portable crib feeder, has been developed to eliminate most of the labor in bag production. One 500-bushel filling of the crib will feed approximately 40 pigs from weaning until ready for market.

Inflation is fast catching up with Michigan public utilities. The impact will soon reach the consumer's pocketbook.

Utility rates are going up, if they haven't gone so already.

How much? That depends on the judgment of three men, members of the Michigan Public Service Commission, who serve as referees in behalf of the people to see that consumer and investor alike get a fair deal.

We chatted recently with Stuart B. White of Niles, chairman, and his two commissioners, Schuyler L. Marshall of St. Johns and Henry L. Woolfenden of Detroit. It was a late-summer day, quite hot and humid. All three men had foregone summer vacations, and they were not any too happy about it. The pressure of work was heavy.

"Post-war inflation, added to war-time inflation, has increased expenses of the Michigan Bell Telephone Company 137.5 per cent, the Detroit Edison Company 63.8 per cent, Michigan Consolidated Gas Company 70.6 per cent, and the Consumers Power Company 67.2 per cent," said White, referring to a notebook. (Figures covered 1941 to 1947).

"You can see why these companies are before the state commission with requests for rate increases. As a result, our workload has tripled in 12 months."

"Utilities have a monopoly by state franchise and hence are not self-regulated by competition, as is the case of private business. Because of this fact, they are permitted to earn only enough to pay a reasonable return to investors. They cannot set aside profits to meet the cost of needed improvements and expansion of their plants as private industry does. Utilities are regulated by the legislature and the commission acts as a court. It's our job to look after the public's interest — good service at fair rates."

The Public Service Commission has jurisdiction over five general classes of utilities: Electric power, telephone, gas distribution, railroad and motor transportation, such as buses and trucks.

What the commission does is highly important to the people of Michigan. These utilities touch the lives and reach into the pocketbooks of every citizen. Invested capital of Michigan utilities amounts to more than \$2,000,000,000. The people pay more than \$600,000,000 each year in fees — just about twice what the State of Michigan collects in all forms of taxes.

Nineteen major utility companies filed applications in 1948 for rate adjustments, as inflation kicked up their cost of operation. Collectively, these utilities asked a total of \$40,000,000 additional income.

In addition to the high cost of doing business, utilities are forced by long-established policy to expand their service whenever the public demands more service. Private industry would put off expansion, if prices were out of line. Utilities can't delay installation of telephones, laying of gas mains, generating plants, and so on.

Michigan Bell, for example, is now expanding its telephone service to the tune of \$120,000,000. Consumers and Detroit Edison are borrowing \$100,000,000 each. Detroit Edison stockholders number 44,000 persons — all of which have risked money for investment. This profit incentive makes America tick.

"The financial impact of an interruption in the service of a single utility," related Chairman White, "is well illustrated in the 17-day curtailment of natural gas to a number of Detroit industries in January, 1948."

"Approximately 100,000 workmen lost \$8,700,000 in wages. Unemployment compensation payments totaled \$1,356,880, while the state spent \$150,000 for additional administrative help to process the applications. It is estimated that the grand total was around \$10,800,000 — all because one utility was unable to provide full service to all its customers for only 17 days."

"Members of the commission sense an obligation, as representatives of the people, to do everything possible to assure adequate service by our public utilities. The consequences of our failure to do this would be costly, indeed."

When the commission does announce its findings on pending cases for higher utility rates, you may be sure that these three men — all appointees of Governor Kim Sigler — believe the rates to be the lowest rates consistent with good service.

The history of the utility commission has not been favorable to public interests. The average commissioner has held office for only three years. Salaries have not been always attractive to high-caliber business men. Appointments have been political as a reward for political support in too many instances.

The commission gets little publicity. Yet its work affects every one.

That's the picture of the Michigan Public Service Commission in September, 1948.

Connie VanHorn, who is attending St. Mary's Academy at Monroe, spent the week-end with her parents, the Alvin VanHorn's of Seven Mile Road.

Betty Agarney of Fenbrook Road, formerly of Redford, has been engaged by the Northville Electric shop for general office work.

Parking meters for Main street was one of the chief topics discussed at a special meeting of the Milford village council last Monday night in the municipal building.

Details of an offer to the City of Dearborn of a 200-bed hospital, cost-free to the taxpayers, were made public Tuesday night at a special meeting of the City Council. Chances that the City will accept the offer finally looked good.

Our Lady of Sorrows School of Farmington is for the first time this year being conducted in the new building located on Power Avenue, north of Shiawassee, on a site adjoining that of the church. The school formerly was located on Grand River Avenue.

No course of action was decided on by city commissioners following their Tuesday night meeting with the six man panel of Plymouth businessmen concerning the installation of parking meters in the municipal parking lot. A second meeting with the group has been scheduled for Tuesday, October 5.

Each year the different civic organizations of the community are asked to send representatives to a meeting called in the interest of the Howell community. The work and the Howell community forum. Home owners on Penniman Avenue, Plymouth, have petitioned city officials to reconsider their decision to relocate the new water main on Penniman Avenue.

City commissioners had previously sanctioned the change of the proposed laying of the main in the street, to under the sidewalk, on the recommendation of the consulting engineering firm.

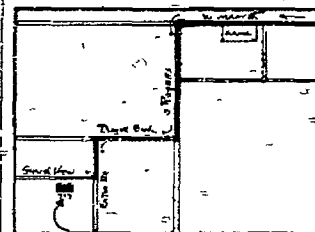

A complete survey of the Maple River drain for a distance of about 20 miles in Gratiot and Clinton county will be started at once by E. S. Brewer and Son of Owosso, as result of a meeting of the drainage board held at Ithaca last Tuesday. The survey is the first concrete step pointing toward the ultimate relief from flood waters in southern Gratiot.

Tentative plans for a program designed to provide recreational facilities for the entire Rochester community were outlined to the village council last Monday night by Jack Patterson, chairman of special committee which is developing the project. According to present plans, the program will encompass the needs for all age groups and will be dedicated as a memorial to the war veterans.

The Fourth annual farmers festival was held last week in South Lyon. Wednesday was children's day when school was dismissed at noon and the children enjoyed the numerous rides at the carnival for half price. The big exhibition tent was set up Sunday and exhibits were set up Wednesday morning. All the exhibits except farm machinery were under the cover of the big tent, which was 270 feet long.

## Rural Tele-news

THE RINGS YOU CAN'T HEAR — Many improvements in telephone service come about so gradually that it's sometimes easy to overlook the results. Take the matter of ringing on rural lines, for example. Ten years ago, nearly every rural-line telephone customer served by Michigan Bell heard the rings of all other parties on the line. Today 87 out of every 100 hear the rings of no more than half the parties on their line.

**METAL MUNCHER**—Squirrels occasionally gnaw holes in the lead sheathing around telephone cables. To prevent damage from moisture reaching the wires through these and other types of punctures, many cables are kept filled with gas. When the gas escapes, lowered pressure sets off an alarm in the telephone central office. Sensitive devices help tell where the break has occurred and a repairman can go out and clear the trouble, in most cases before service is interrupted.

**DIAL DECADE**—Ten years ago only one-tenth of the telephones on Michigan Bell's rural lines were dial. Today, even though the war years temporarily halted the extension of dial service, nearly two-thirds of the rural-line telephones are dial. Michigan Bell's \$13,500,000 5-year postwar rural expansion and improvement program will mean still more rural dial telephones as time goes on.

### Harvest Dance at High School Gym

A Harvest Dance, sponsored by the Northville Parent Teachers Association, will initiate the village social season Friday, October 22 at the local high school gymnasium. Will Petz is chairman and will be assisted by the remaining members of the executive board.

Longie Strasson's Orchestra will entertain the guests and dancing will be from 9:30 to 12:30. Dress is optional.

Projects for the coming year were discussed at the P.T.A. meeting September 23. Chief among these was a scholarship fund to encourage a graduating Northville High School student to go into the teaching profession. A committee is investigating the costs of such a proposal and the group needs support to build up a treasury to make possible such a project and other worthwhile assistance to the student body.

### Huron Valley Club Sponsors Dog Show

The Huron Valley Kennel Club will be hosts to the canine fraternity Sunday, October 31, when they stage their second dog show at the Four Grounds at Ann Arbor. Mrs. J. P. Malley of Northville, president of the club, expects even a larger entry than was on hand for the judging at the very successful show held last spring, when there were representative entries in 46 different breeds.

Carl Johnson, who is the club's secretary states that entry blanks will be in the mail within the next few days.
