Troop N-1 To Participate In Scouting Exposition

Northville's Boy Scout Troop Number one will have a display at the gigantic Scouting Exposition to be held at Convention Hall in Detroit April 21-23. Their display will consist of a chemistry merit badge, which has been constructed out of plywood. Three chemistry experiments will be performed by the members of the troop, and a display of the chemistry of plastics, loaned through the courtesy of R. Somers of Grace Street will be on exhibition. Dud Canfield is in charge of the exhibition, and the troop is under the leadership of Jerry Miller.

The 38,000 registered members of the Detroit Area Council, Boy Scouts of America, will present through some 5,000 local Scout exhibitors the world's largest and most spectacular show of its kind at Convention Hall. Nearly 300 booths will be on display illustrating and demonstrating many skills, crafts and hobbies, as well as nearly one hundred merit badge subjects of Scouting's pre-occupational guidance program. It will be a show put on by boys who are anxious to 'strut their stuff' for their parents, friends and neighbors.

The whole of Convention Hall will be used, including over 130,000 square feet of floor space, and everything from stoves to technology will be demonstrated by some of the best Troops in this area. Hundreds of Cubs will offer magic and other keen competition to their older Scout Brothers. You will also see a 'salty' Sea Scout land ship, a full-size wind tunnel operated by Air Scouts, and Explorer Scouts saddle their mountain burros in preparation for Philmont (their Rocky Mountain Scout ranch) in New Mexico.

The presentation of authentic Indian dances, by Scouts in gorgeous hand-made tribal costumes, will be well worth the price of admission - fifty cents for adults and twenty-five cents for children. Tickets may be purchased at Convention Hall box offices on the show dates: hours are 7:00 p. m. to 10:00 p. m., Thursday and Friday, April 21-22, and from 2:00 p. m. to 10:00 p. m. on Saturday.

Sandra and Richard Bolton of Wayne spent their Easter vacation with their grandparents, Mr. and Mrs. Donat Bedore of Butler Street. Mrs. Bolton and Sharon arrived later to spend the weekend here.

HON. ROBERT M. TOMS.

Toms, Wayne County Judge, who was one of the chief trial judges at Nuremberg in 1946 and 1947. Green Ridge Nursery Outlet Opens Here

Hundreds of small evergreens, flowering shrubs, trees and perennial flowers as well as rose bushes, fruit trees and small fruits have been moved to the Allen Monument grounds located at Griswold and Main streets where Mrs. Malcolm Allen will operate a cash and carry sales lot.

Improved methods have been adopted this season, according to J. M. Miller. All plants are potted in soil in flexible pots that can be discarded after removing the plants. The danger of root injury is thus eliminated. Another attraction is that the plants do not necessarily have to be transplanted immediately after being purchased but whenever convenient for the gardener without any risk of injury to the plant. Many additional varieties and hundreds of larger sizes are obtainable at the nursery located west of Northville on Napier road.

The **New '49 PONTIAC**

The Most Beautiful Thing on Wheels!

We are, of course, very proud and happy that people everywhere are calling the new Pontiac "the most beautiful thing on wheels." Pontiac is a brilliantly beautiful automobile—as handsome a car as ever rolled over America's streets and highways.

Every line of Pontiac's new Fisher Bodies gives an instant impression of fleet gracefulness.

But Pontiac's real beauty cannot be fully appreciated until you drive the car yourself. For the new Pontiac is beautifully engineered, too—to give you a kind of automobile performance that simply must be experienced in order to be believed.

Pontiac for 1949 offers a totally new kind of ride—a ride as smooth and comfortable as a car can be. And either of Pontiac's famous engines, six- or eight-cylinder, is a sweetheart for power. Remember, too, Pontiac is still the lowest-priced car in the world offering the ease of Hydra-Matic Drive—available on all models at extra cost.

Take a long look at the next new Pontiac you see—then come in and give the car a really thorough examination. That's the way really to appreciate why people are calling Pontiac "the most beautiful thing on wheels."

Vaccinate Dogs; Prevent Rabies

This is the time of year when rabies is spread among dogs. Have your own dog vaccinated.

Rabies in dogs is hydrophobia in humans. While from 14 to 21 daily anti-rabic treatments given immediately after an animal bite will usually prevent hydrophobia in humans, the treatment is unpleasant, and is not always successful. Hydrophobia, once developed, is always fatal in either humans or animals.

Only the enforced vaccination and licensing of all dogs, and the impounding of stray dogs, and the quarantine of all areas infected with rabies can cut the danger to humans and valuable animals.

Under present circumstances, for every rabid dog reported in the state, seven humans who have either been bitten or been in close contact with the infected animal require antirabic treatment. Last year approximately 2000 people had to undergo the painful and costly treatment. One little girl was so severely bitten that she died of the disease in spite of the fact that she was given the anti-rabic treatment.

Not only dogs, but also cows, horses, cats, skunks, squirrels, foxes, and many other animals can have rabies and give it to humans; but vaccination of all dogs will virtually eliminate the danger of hydrophobia. This has been proven in England and in Scandinavian countries where the disease in animals and humans is now virtually unknown.

If a dog seems ill or bites a person, do not kill the dog, but confine him away from all possible contact with humans for ten days. If he does not die in the ten day period he does not have rabies. If he does die, laboratory diagnosis of his brain is still necessary to determine, for sure, whether he had rabies.

Because anti-rabic treatment of people bitten about the head and face must be started immediately after the bite, this examination is of the utmost importance. If the animal had rabies the treatment must be continued for 21 days, and treatment of either bitten or in close contact with the animal must be started if the animal does not have rabies, treatment may be stopped or need not be instituted.

If to protect humans, it is necessary to kill a biting dog, do not shoot him through the head, but club him on the head. This clubbing must be studied to determine whether he is rabid.

If a dog dies under conditions which might indicate rabies, police or health officers should remove his head, properly prepare it and ship it to the Michigan Department of Health or the Pasteur Institute Laboratory in Ann Arbor for analysis.

Hydrophobia, once developed, is always fatal in either humans or animals.

Only the enforced vaccination and licensing of all dogs, and the impounding of stray dogs, and the quarantine of all areas infected with rabies can cut the danger to humans and valuable animals.

Under present circumstances, for every rabid dog reported in the state, seven humans who have either been bitten or been in close contact with the infected animal require antirabic treatment. Last year approximately 2000 people had to undergo the painful and costly treatment. One little girl was so severely bitten that she died of the disease in spite of the fact that she was given the anti-rabic treatment.

Not only dogs, but also cows, horses, cats, skunks, squirrels, foxes, and many other animals can have rabies and give it to humans; but vaccination of all dogs will virtually eliminate the danger of hydrophobia. This has been proven in England and in Scandinavian countries where the disease in animals and humans is now virtually unknown.

If a dog seems ill or bites a person, do not kill the dog, but confine him away from all possible contact with humans for ten days. If he does not die in the ten day period he does not have rabies. If he does die, laboratory diagnosis of his brain is still necessary to determine, for sure, whether he had rabies.

Because anti-rabic treatment of people bitten about the head and face must be started immediately after the bite, this examination is of the utmost importance. If the animal had rabies the treatment must be continued for 21 days, and treatment of either bitten or in close contact with the animal must be started if the animal does not have rabies, treatment may be stopped or need not be instituted.

If to protect humans, it is necessary to kill a biting dog, do not shoot him through the head, but club him on the head. This clubbing must be studied to determine whether he is rabid.

If a dog dies under conditions which might indicate rabies, police or health officers should remove his head, properly prepare it and ship it to the Michigan Department of Health or the Pasteur Institute Laboratory in Ann Arbor for analysis.

MacDonald-Amerman Vows Pledged Saturday Night

Barbara MacDonald, daughter of Mr. and Mrs. Alfred MacDonald, and David Amerman, son of Mr. and Mrs. Russell H. Amerman of West Street, were united in marriage Saturday evening at the Methodist church in the presence of a few close relatives and friends. Rev. William Hughes read the double ring service before an altar flanked with palms, candles and Easter lilies. Mrs. Richard Somers presided at the organ and played the traditional wedding music.

Given in marriage by her father, Barbara wore an ivory slipper satin gown which was fashioned with long sleeves ending in points over the wrists, a high neck with lace collar and matching lace ruffles which extended in a pinafore effect on the bodice. The full skirt ended in a train. Her finger-tip veil of illusion fell from a coronet of venise point-lace and she carried a colonial bouquet of gardenias and stephanotis.

The bride's only attendant was her cousin, Beverly Curtiss of Detroit and she wore a dusty rose satin gown and matching coronet in her hair. She carried a colonial bouquet of roses, blue hyacinth and baby iris.

Best man for the bridegroom was Merritt Meaker, Jr., of West Seven Mile Road, and seating the guests were Merrill MacDonald, brother of the bride, and George Matthews, brother-in-law of the bridegroom from Royal Oak.

The bride's mother was attired in a royal blue crepe dress, black accessories and a corsage of white carnations. Mrs. Amerman wore a powder blue faille dress, pink accessories and her corsage was made up of pink carnations.

A reception immediately following the pledging of the vows was held at the home of the bride with Mrs. Ellis Boughner, Mrs. Eric Anderson and Mrs. Austin Aull of Farmington assisting. The table was decorated with lighted tapers, bouquets of snapdragons and the wedding cake.

The young couple then left on a week's wedding trip to Washington, D. C., travelling by car. For going away, Barbara wore a navy blue dressmaker suit and pink and blue accessories. Upon their return they will temporarily make their home with the bridegroom's parents.

Both the young people are graduates of Northville High school and Barbara is employed as a service representative of Bell Telephone Company. David is a junior at Michigan State Normal College, Ypsanti and is affiliated with Delta Sigma Phi, social fraternity, and Pi Gamma Mu, social science honor society.

Guests were present from Calumet, Detroit, Highland Park, Royal Oak, Jonsville, Gregory, Belleville, Chicago, Ill and Butte, Montana.

NEVER HAS FORD BEEN SO FAR OUT FRONT

Any way you look at it... it's Ford... first, place and show!

Ask the New York Fashion Academy. They judged Ford the "Fashion Car of the Year." Ask your mechanic. He'll tell you no other car in Ford's field offers you a choice of new 100 hp. V-8 or 95 hp. Six engines. Ask any Ford owner. He'll tell you about the new Ford "Feel." He'll rave about the "Feel" of the level "Mid Ship" Ride in Ford's lower center section.

Drive a demonstrator yourself. Feel the "Magic Action" of Ford's King-Size Brakes. No other car in Ford's field has fully self-energizing brakes for 35% easier stops. Feel Ford's "Hydra-Coil" Springs. Feel the solid ride of Ford's "Lifeguard" Body. See how much more you see through Ford's bigger "Picture Windows." You'll agree Ford's never been so far ahead.

There's a **NEW Ford** in your future

The issue of higher taxes vs. economy is headed for a showdown soon in the state legislature. The corporation profits tax is being pushed by Governor G. Mennen Williams as a painless method to raise additional revenue for state government needs and thus to avert a growing deficit. Seventy-eight percent of the state sales tax is earmarked by constitutional amendment to be returned to local governments.

The corporation tax is bottled up, at present, in legislative committees where sentiment is reported to favor governmental economies as an alternate to higher taxes. Republican solons contest the statement of Governor Williams that his election in November was a "mandate" for liberal measures. Most of these call for more tax funds. The April election outcome has stiffened G. O. P. convictions in this direction.

The Michigan Good Roads federation bill is now before the senate taxation committee, headed by Sen. George N. Higgins (R-Ferndale). Motorists would pay \$29,000,000 more in higher gasoline taxes and higher weight taxes. This measure has the backing of road builders, state highway department and many county road commissions. Improvement of highways at stake proponents acclaim Senator Higgins has been quoted as being opposed to new taxes at this time.

If the house concurs in outlawing legalized gambling at horse races in Michigan, \$3,000,000 state revenue will be lost for 1950. This bill was sponsored by 21 senators, backed by the Michigan Council of Churches, a Protestant group. The Senate approved it 22 to 2.

The post-ritual system has been linked to the tangled affairs of the Michigan State Fair grounds. Another effort to untangle the fair program is being made by the Detroit Board of Commerce. A bill has been introduced to create a state fair authority to run the fair and the grounds. It has a limited chance of passage because of political differences between the governor and the legislature. The governor would appoint members of the authority.

At present, the continued elimination of the 21st and 22nd Districts is a subject of suspension of the proposed reappointment of H. C. Frank as the fair's executive.

Several state agencies are advised by some state legislators as an alternative to higher taxes. Senate bill 11 would abolish the tax commission and

create a new board of taxation; senate bill 12 would create a labor department, merging other agencies; senate bill 13 would transfer collection of gasoline tax, diesel fuels tax, vessels fuels tax and aviation gas tax to the revenue department.

Senate bill 14 would abolish the hospital survey and construction offices, transferring duties to the department of administration. Senate bill 15 would eliminate the state safety commission with its \$16,000 budget. Senate bill 16 would create a professional and vocational licensing division within office of secretary of state. Senate bill 17 would abolish the stream control commission, transferring duties to the state health department.

Senate bill 19 would transfer duties of the board of control for vocational education, state tenure commission, state board for libraries, and historical commission, all to the state board of education. The crippled children's commission would be abolished and its duties transferred to the department of health by Senate Bill 20.

Senate bill 21 would abolish the tuberculosis sanatorium commission and transfer its duties to the department of health. The board of tax appeals would be abolished by senate bill 22. Some functions of most of the above agencies would be transferred to other departments, services would be continued and hence at some cost.

The paradox of public benefits and public taxes was neatly presented by representatives of Michigan municipalities who appeared at a legislative hearing recently. They urged the legislature to authorize municipal excise taxes but opposed any public referendum on them. "Taxpayers won't tax themselves to pay for things

Steady Rise of Hospital Births Causes Crowding

During the past ten years, the percentage of Detroit babies born in hospitals increased from less than 69 to nearly 98. Growing concern of parents for the protection and care during childbirth, that only a hospital can ensure has been one of the major factors in the steady rise of hospital births which has added to the already critical overcrowding of many of our hospitals.

The construction of the new 200-bed Oakwood Hospital, on Oakwood Boulevard, will do much to relieve the serious hospital bed shortage in Western Wayne. The new hospital will have a maternity wing staffed by carefully selected and experienced doctors and nurses and will contain every safeguard that modern medical science has made available.

In grandmother's time, having a baby was more dangerous than going into battle. In one town in Scotland, for more than ten years no woman bore a child and lived. Nowadays, however, a woman in the delivery room of a good hospital in Detroit is in little more danger than is a person who has caught cold.

This great change has come about because medical science "they want", city officials complained.

This attitude of trying to get something for nothing is not new, of course. Local governments always favor more state aid and more federal aid, so long as the money appears to be free.

The legislature has a most difficult task to perform. Regardless of what is done, the decision will be unpopular with some blocs and social interests. Higher taxes or economies that really hurt which will it be?

has advanced and because hospitals are available where this science can be practiced with adequate facilities and under the most favorable conditions. In hospital delivery rooms infection is practically unknown because of the aseptic approach to delivery.

Hemorrhage, a fear of mothers of a generation ago, is always a possibility but today the hospital has a blood bank that makes immediate transfusions possible. In addition to these safeguards of life and health, anesthetics and analgesics now eliminate most of the pain of childbirth. Even in the last ten years great advances have been made. Statistics of the Detroit Department of Health show that in 1938 more than 41 infants (under 1 year of age) out of every 1,000 live births died, whereas in 1948 fewer than 32 died. From 1938 through 1948, the maternal death rate per 1,000 decreased from 3.8 to 0.94.

One of the most important devices for reducing the infant death rate is the incubator. Once premature birth meant death for the infant in the great majority of instances. In a modern hospital, caring for the premature baby is routine. The incubator gives him exactly the temperature and amount of oxygen he needs and protects him from infection. Until he is able to take a bottled formula, food is given with a hypodermic needle. The mother may leave the hospital after a brief confinement but the baby is kept in the hospital for weeks or months, until he is big and strong enough for the regimen of a normal baby in the home.

Toward the construction of the new Oakwood Hospital, \$9,000,000 has been allocated by the Greater Detroit Hospital Fund, now in the opening stage of movement to assemble \$19,720,000 toward the construction of four new hospitals, including Oakwood, and the expansion of ten existing hospitals.

What can you do with 70 MILLION DOLLARS in one year?

FOLLOW ME AND I'LL SHOW YOU.

IT TAKES PLENTY OF EQUIPMENT TO GIVE GOOD TELEPHONE SERVICE. IN 1948, MICHIGAN BELL SPENT 70 MILLION DOLLARS TO IMPROVE AND EXPAND SERVICE... \$133 A MINUTE.

GRACIOUS, THAT'S A LOT OF MONEY!

YES, IT IS. AND A CONSTRUCTION PROGRAM LIKE THAT MEANS A LOT OF JOBS AND A LOT OF MONEY SPENT RIGHT HERE IN MICHIGAN.

WHAT DID THE 70 MILLION DOLLARS BUY?

IT PAID FOR 76 NEW TELEPHONE BUILDINGS OR ADDITIONS, GOT 16 MORE UNDER WAY, PUT UP 67,000 Poles, 650,000 MILES OF WIRE. WANT ME TO GO ON?

I'VE HAD ENOUGH. WHAT DID IT MEAN IN THE WAY OF SERVICE?

IT MEANT 148,000 MORE TELEPHONES, NEARLY 8 OUT OF 10 FAMILIES IN MICHIGAN BELL TERRITORY NOW HAVE A TELEPHONE. IT MEANT FASTER AND BETTER SERVICE ON TELEPHONE CALLS.

YOU BET THERE WERE. CALLS HIT A NEW HIGH OF OVER 5,000,000 A DAY. THE AVERAGE CUSTOMER USED THE TELEPHONE MORE THAN 1600 TIMES LAST YEAR.

WE COULDN'T GET ALONG VERY WELL WITHOUT THE TELEPHONE, COULD WE?

RIGHT! GOOD TELEPHONE SERVICE HELPED MAKE MICHIGAN GREAT. IF SERVICE DIDN'T KEEP PACE WITH THE PUBLIC'S DEMANDS, IT WOULD EVENTUALLY TOUCH THE POCKETBOOKS AND LIVES OF ALL MICHIGAN PEOPLE.

IS THERE MORE TO BE DONE?

THESE MUST HAVE BEEN A LOT MORE CALLS IN 1948.

164 MILLION DOLLARS! WHERE DO YOU GET THAT KIND OF MONEY?

MOSTLY FROM INVESTORS, PEOPLE LIKE YOURSELF WHO ARE WILLING TO PUT THEIR SAVINGS IN A GOOD BUSINESS WHERE THEY'LL GET AN ADEQUATE RETURN.

INDEED THERE IS! EVERYONE STILL CAN'T GET THE KIND OF SERVICE HE WANTS, WHEN AND WHERE HE WANTS IT - EVEN THOUGH 164 MILLION DOLLARS HAVE GONE INTO SERVICE IMPROVEMENTS SINCE VJ DAY.

MICHIGAN BELL IS CONFIDENT IT WILL BE ABLE TO KEEP ON WITH ITS IMPROVEMENT AND EXPANSION PROGRAM, KNOWING THAT ITS CUSTOMERS ARE WILLING TO PAY FOR GOOD SERVICE.

WELL, THERE'S ALMOST TWICE AS MUCH MONEY INVESTED IN MICHIGAN BELL NOW AS BEFORE THE WAR. BUT THE RETURN ON THAT MONEY IN 1948 WAS ONLY 3.77% - LOWEST IN 15 YEARS.

WHAT KIND OF RETURN WOULD MY MONEY GET IF IT WAS INVESTED IN MICHIGAN BELL?

THAT'S NOT TOO GOOD, IS IT?

NO, IT ISN'T. THE ONLY WAY MICHIGAN BELL CAN CONTINUE TO GIVE GOOD SERVICE IS TO GET HIGHER RATES THAT'LL KEEP THE BUSINESS SOUND AND PROVIDE A RETURN SUFFICIENT TO ATTRACT INVESTORS' DOLLARS.
