These two women played the principal roles in establishing a special day to honor the motherhood of the nation. The first dedication of such a day was made in 1887 by Mary Towles Sassen (right), titled school teacher of Henderson, Ky. It was Miss Ann M. Jarvis of Philadelphia who in 1914 prevailed upon congress and President Woodrow Wilson to set aside the second Sunday in May as a national holiday - Mother's Day. Fourteen years ago Miss Jarvis began to advocate the abolition of the observance due to over-commercialism.

## Lay-Offs May Get Old Age Benefits

Due to the increased number of lay-offs many workers living in Northville and the surrounding area may be able to collect Social Security benefits as well as unemployment compensation.

According to Harry Baltuck, manager of the Social Security Administration field office at 12065 Wyoming, corner of Grand River, anyone 65 or over, who is unemployed as a result of a lay-off, or for any other reason, may be eligible for these payments. Social Security benefits are payable for each calendar month that the worker is not employed, or earning less than \$15.00 a month at a job under Social Security.

Because many workers lose benefits for failure to file on time Mr. Baltuck suggests that they contact his office without further delay. An application must be filed in order for payments to be made. Residents of this area who meet the age requirement and are not working now should call at, write or phone the Social Security office at 12065 Wyoming for further information and assistance. The phone number is TE 4-4750.

A representative from this office is at the Plymouth Post Office at 1:00 p.m. on the second and Thursday of each month. ## PTA Discusses Building Plans

The Northville Parent Teachers Association met Thursday, April 28 at 8:00 in the high school auditorium. Primary business of the meeting was the election of officers for the next year.

The following were unanimously elected: George Kois, president; Mrs. Walter Couss, vice president; Donald Severance, secretary and Harry Sedán, treasurer.

Mrs. George Weiss reported for the scholarship committee. They plan to announce the selection of a pupil from several candidates for the May meeting. Also on the agenda for the May meeting is the installation of officers.

Mrs. Harold House, present president, urged the P. T. A. to attend the annual meeting of the Board of Education to be held the second week in June. She also expressed special thanks to Mrs. Paul Beard, Mrs. Eldon Biely, co-chairman, and all committee members who aided in the success of the Patrol Boys Banquet held March 21.

Following the business meeting R. H. Amerman, E. V. Ellison and George Stalker explained the needs of the present school housing and the proposed plan of the Board of Education to meet those needs. Mr. Amerman pointed out the overflow of pupils was so great that in another year even the present temporary housing in the homes on Main Street will be inadequate. He also pointed out that tuition pupils in the elementary school are not the cause of the overcrowding since they are spread rather evenly throughout the grades with the result that each grade has a few which, if eliminated, would not make an appreciable difference in the need for classroom space.

The grade building has a special library, music room or auditorium, which is available for a school education, which is becoming a major factor in modern education.

Mr. Ellison introduced the proposed plan for in addition to the grade building which will include 9 formal classrooms which will make it possible for each grade to have three classrooms, a necessity in the near future. Also included in the plans are other kindergarten room, various offices, storage space, cafeteria facilities, health rooms, teachers room, sanitary facilities, library and music room.

The cost of the building, according to Mr. Stalker, is an estimate still since plans are not entirely complete.

However, a fair estimate is \$1,000 a square foot or approximately \$600,000.00.

This estimate makes the cost to the taxpayers a raise of two and one half mills in the tax rate over a twenty year period. The Board of Education has a very small bonded indebtedness still outstanding amounting to \$125,000.00. Should the bonds be for less than twenty years the millage would be higher.

A lively question period followed in which members of the P. T. A. and others of the community entered. The meeting was adjourned at 10:15 for refreshments served by the third grade mothers.

## Exchange Donates Amplifying Set

The Northville Exchange Club recently gave the Recreation Committee an amplification system which will be used for all community events.

The portable set which was bought at cost through the Northville Electric Shop consists of two twelve inch speakers and power pack along with a Webster record player which will play both regular and long records. Two microphones, a talking and a dancing microphone are included in the set and its frequency modulation is so designed that it will "pick-up" all FM radio programs.

## Taft-Hartley Act Discussed by Royal Oak Congressman

At the request of the Chairman of the Committee on Ways and Means of the House of Representatives, Hon. Robert L. Doughton (D-N. C.), former President Herbert Hoover was asked for a statement on the program to expand the Social Security program. He warned against any increase in taxes for the purpose, asserting that the nation's economy is "up to the limit of endurance under this (its) load." Mr. Hoover stated the program should be put on a pay-as-you-go basis; that the reserve fund is being used for general purposes and is not available for benefit payments; despite all claims to the contrary. He further stated "It should be no more difficult to calculate for a year ahead the amount of payroll taxes required to meet the outgo than any other taxes." Mr. Hoover approved provision to expand the coverage of old age and survivors insurance program but said benefit payments should be increased only to "provide more adequate study of the social security program should be made."

If the Administration's program were enacted into law, additional taxes would be imposed to the tune of from fifteen to twenty billion dollars per year. Payroll taxes would be upped about fifteen per cent. Congressman George A. Dondero believes that "Mr. Hoover's suggestion for an

adequate study of the whole program should be made in order to arrive at a workable and equitable program that the taxpayers can afford to pay for."

**Repeal of Taft-Hartley Act**

Congressman George A. Dondero, discussing legislation for the repeal of the Taft-Hartley Act, said: "About two years ago the people demanded relief from strikes and the loss of work, which had dissipated their savings and occasioned the loss of sixteen million man-days of labor and wages. As a result, the Taft-Hartley Act was made a law."

During the campaign last fall, the measure was under attack by the CIO and the A. F. of L. A measure is now before the House to repeal the Act which reduced strikes 97% and the loss of work by 61%. Let us examine some of its provisions. For example, there is no provision covering the matter of union security, no provision of contractual liability, and no provision with regard to the problem of organization of labor.

"Whether we are for or against the measure, all will recognize that there should be some provision in the law making both unions and management responsible for their contracts. All of the above-mentioned provisions have been in effect for a year and a half and, for the most part, they have not been effectively criticized by the opponents of the legislation. I agree with Congressman Nixon of Pennsylvania that they should be considered pro and con, hence they should be in the bill before the House."

"Another provision which has clearly been in the interest of union members is the proper handling of welfare funds, the requirement that union officials make financial reports to their members, the prevention of unauthorized use of union funds for political purposes, the provision that union dues shall not be checked off except where members expressly authorize it. These provisions have not been found harmful during the past year and a half. They should, therefore, be continued in the law for the good of the unions and their members."

"A Member of Congress, although elected by some particular district, should legislate and vote for what he believes to be for the best interest of the nation as a whole. No special group or interest should motivate the decision he makes. I shall vote for what I believe to be the common good of all in order to advance the welfare of all. With this rule before me, I shall fulfill by obligations to the people of my district and the nation."

The Constitution of the United States went into effect the first Wednesday of March, 1789.

"When I get through at Lansing, I trust no one will say, 'Williams slept here'."

G. Mennen Williams, Michigan's youthful governor and Democratic protégé of former Governor Frank Murphy, tossed off the words crisply.

The newspaper editors laughed heartily. The governor was appearing at their traditional "State of Michigan Press-Conference" to answer written questions. The moderator, Senator Don VanderWerp of Fremont, had previously introduced State Treasurer D. Hale Brake with a humorous reference to Brake's boyhood days in Newaygo County. Fremont could well put up a monument, "Hale Brake Slept Here," said VanderWerp. "All this happened in January, 1949."

The state legislature has two weeks left before adjournment May 20.

Many weeks have gone by since Governor Williams presented his program of social reform. He had proposed public housing, liberal workmen's compensation benefits and extension of medical care and disability payments. "Injured workers should be allowed medical care as long as necessary."

Unemployment benefits should be increased and coverage should be extended to all employers and employees (now limited to eight or more). Also, far employment practice law modeled after the New York statute.

More state aid for higher education and for vocational education. Old age assistance benefits should be increased from \$50 to \$80 monthly maximum. Michigan Farm produce would be offered to consumers with a "Michigan Seal of Quality" supported by strict grading and marketing research.

Stream pollution laws would be tightened, and money provided for the state institution might eliminate pollution of public waters.

To finance all this and to bridge the growing gap in the treasury caused by a new diversion Governor Williams proposed a tax on corporate profits. He contended Michigan's present tax system was "sucking the consumer."

What does Governor Williams think now - four months after his inauguration - about all this? At a luncheon of the Detroit 12, a group he named the "legislative club" for shelling much of his program. We are like a bunch of crows flapping over the carcass of the past when we ought to be eagles soaring to meet new horizons," he declared. Michigan's state government was "10 years behind the times."

The state's labor legislation, he said, was inadequate. The legislature, controlled by the Republican party was obstructing progress. And so on.

There was a strong note of frustration in Governor Williams' words. If he had once hoped to accomplish these reforms through bi-partisan action, now he was in doubt.

Prior to the spring election, Governor Williams had urged the voters to make a clear-cut choice between the Republican record of "inaction" and the Democratic path to social justice. The April verdict, a whopping victory for the G. O. P., was a "disappointment" to Williams. He continued to insist that his November victory was a popular mandate for his spending program.

In the meanwhile, Republican leaders are seeking to transform parts of Williams' proposals into G. O. P. accomplishments, while avoiding imposition of new or

higher taxes for state needs. Economy and revenue adjustments would plug the major part of the deficit.

If the state incurs a deficit - as seems inevitable in view of the 78 per cent ear-marking of state sales tax revenue - Governor Williams is likely to blame the legislature for it.

Does Williams hope to win re-election in 1950 by taking a cue from President Truman's successful attacks on the 80th "do-nothing" Congress?

Kim Sigler criticized the 1947-1948 legislature for blocking his program of centralized streamlining of state government. In 1949 Governor Williams is also critical. His reference to "a bunch of crows" reveals his impatience.

In a few weeks the legislature's record will be written. We intend to review the results in this column.

There is no closed book and line fishing season on yellow perch, whitefish and white bass at the Great Lakes and connecting waters, non-trout streams, and lakes other than trout lakes north of highway M-46.

A four-year old perch is about 7 1/2 inches in length, a five-year old near 8 1/2 inches and a six-year-old averages 9 1/2 inches.

A giant musk-maw trout nearly 20 years of age died at a state fish hatchery in California. The 35-inch fish was hatched from an egg brought from the state of Minnesota according to the California fish and game division.

Mirror Lake, in the Porcupine mountains of the upper peninsula, is one of the least accessible waters in the state. By land, the easiest means of access is a four-and-a-half-mile long foot trail which begins at the western extremity of highway M-107.

## Cleanliness Most Important Factor At Hospitals

In the operating room of one of Greater Detroit's modern hospitals a surgeon approaches the table to begin his work. His cap, gown and mask—as well as those of his assistants and nurses—have been sterilized by steam under high pressure. All bandages, pads, gauze, and rubber gloves also have been sterilized in the pressure chambers. The instruments to be used, including scalpels, forceps and clamps, were likewise sterilized before the operation started.

Such aseptic procedures are now routine hospital practice and as a result, the risk of infection in surgery has been all but eliminated. The proper sterilizing of all supplies and equipment is one of the important functions of the central sterile supply department in a modern hospital. This all-important department will be conveniently located in the new 200-bed Oakwood Hospital, to be built on Oakwood Blvd. and

The science of cleanliness is more highly developed in the hospital than anywhere else. In fact, no place frequented by human beings is as clean, as the strictest sense of that term, as are the operating and delivery rooms of a modern hospital.

In a hospital it is not enough for a metal object to be smooth and bright, or a towel to be snow white to be considered clean, because surgeons know that deadly germs can live on a thing which looks clean. Ordinary washing is only the beginning of the cleansing process in a hospital.

After an object looks clean, it is put in a large drum called an autoclave and there given a steam bath at a temperature up

to 254 degrees Fahrenheit. No living organism can long survive such heat. When the autoclave is opened, everything in it is clean in the scientific sense of the term.

However articles must remain clean until they are used. They are removed from the autoclave with sterilized forceps and are placed in sterile containers where no germs can reach them. All this work is necessary to assure, for instance, that the scalpel does not carry germs into the wound during the operation.

It also is necessary to guard against the possibility that germs will drift into the wound by air. For this reason no one is permitted in an operating room until he puts on a sterile gown over his street clothes, and covers his head with a cap and his mouth with a mask.

Because hospitals have made a science of cleanliness, the day is past when, as was the case a century ago, a patient might go to a hospital to have one disease treated, only to contract another and perhaps a worse disease. Once it was dangerous even to visit a hospital. Now a big, well-equipped hospital is the safest and cleanest place in the community.

Toward the construction of the new Oakwood Hospital, \$3,000,000 has been allocated by the Greater Detroit Hospital Fund which is now beginning a program to raise \$19,720,000 to help build four new hospitals, including Oakwood, and expand ten existing hospitals in this metropolis.

## Spring Fetes, Spells of Riot Mark May Day

May Day is observed in so many different ways in so many different lands that there are no universal traditions governing its observance. Unlike universally celebrated festivals such as Christmas, May Day observances have taken many and varied forms over the years, each country observing the day in a different manner.

May is a month of metamorphosis, motion, revolution, production; and May Day seems to symbolize them all. Uprisings on the first day of May have, at times, made May Day a synonym for trouble.

Ann Arbor Drama Season Resumed

The excitement created by the announcement of the re-opening of the Ann Arbor Drama Season and by succeeding announcement of plays and actors engaged for the Season, was increased Sunday as the first company of actors arrived for rehearsals of "Ah, Wilderness!" which opens May 9 and "plays through May 14 at the Lydia Mendelssohn Theatre in Ann Arbor.

Sunday night, May 1, the actors were met in Detroit by Director Valentine Windt and members of his staff. Among those arriving were the Truex family—Ernest Truex, his wife, Sylvia Field, and their son, Barry; Frieda Altman, Mary Jackson, Henry Garrard, Jennifer Haward, Jon Dawson, and Stage Manager for the Season, Joseph Leon. Vaughn Taylor and Truman Smith, the remaining

two members of the professional company for the first play, are arriving on Monday. Mr. Taylor was unable to leave with the rest of the company due to a previous television commitment in New York Sunday night.

The actors all expressed great pleasure over their reception, which, with its battery of newspaper cameramen, attracted considerable attention. All of the company anticipate an enjoyable engagement in Ann Arbor, for the Ann Arbor Drama Season is a much sought-after engagement. It has an enviable reputation built up by players who have appeared with it formerly, and an appearance there, besides being a pleasant experience, is considered to be of tremendous professional value.

Actors will start arriving soon for the succeeding weeks' shows, "Twelfth Night" which will play May 17 through May 21, "Night Must Fall" May 24 through May 28, "As You Desire Me" May 31 through June 4, and "The Heir-ess" June 7 through June 11.

In Ann Arbor, work has been under way for several weeks in organization, designing and building of scenery and costumes, and ticket sales.

Although the Season Ticket sales have been heavy, good seats are still available and may be purchased at the Box Office of the Lydia Mendelssohn Theatre. The single seat sale begins May 5 at the Box Office.

Farm Buying Power Still Shows Gains

Increase Well Above Cost of Living Rate

The current drop in living costs has given the average city wage-earner approximately the same buying power today that he enjoyed in June, 1946, final month of OPA.

Though the farmer's buying power has edged off with the drop in food prices it is bumping against government price supports, and still shows a gain that is well over double the increase in the cost of living, according to a chart study of our ten-year-old war boom, made by the family economics bureau of Northwestern National Life Insurance company.

Ten years ago last winter you could buy a new four-door sedan for \$825, sirloin steak was 39 cents a pound, milk averaged 12 1/2 cents a quart, and you could build a five-room modern house for around \$3,000—but we had 10 million unemployed. Then European rearmament orders sparked our recovery

The above chart plots the course of the 10-year war boom. In January, 1939, America had 10 million unemployed and 44 million at work. Annual net income per farm was \$702. Industrial wages averaged \$24 a week, an annual rate of 1.248.

from a nine-year-old depression, the study recalls.

After an even 10 years of recovery, boom, inflation, and tapering off, the score stands as follows: Net annual income per farm 300 per cent higher—it was \$702 in 1939, reached \$2,915 in 1948, and had sagged to an annual rate of \$2,999 by January, 1949. Weekly industrial wages up 130 per cent—from \$24 in January of '39 to approximately \$55 in January of '49. Living costs 71 per cent higher than 10 years ago, after nearly a four point drop in the last few months. Finally, about twice as many unemployed as a normal "best" as occur late call it.

Wage rates show a gain of 20 and a half per cent since June, 1946, while the cost of living index now stands just 28 per cent higher than in that final month of OPA. The actual living cost increase has been somewhat less than 28 per cent, the study says, since the government at index naturally makes no allowance for over-calling prices which were general in the latter months of OPA, thus the wage-earner's paycheck of today buys him as much or slightly more than his paycheck of June, 1946, the study finds.

Percentage increases in worker paychecks do not reflect sharp additional gains made in so-called "fringe" payments during the past decade such as more vacations, holidays, sick-leave, pension programs, etc., the study points out.

Poultry House Cleaner

A superior poultry house cleaning method has now been found—cleaning with a high-pressure sprayer. As shown here, the high-pressure spray actually pulverizes the dirt and droppings and blasts them away. Food Machinery and Chemical Corporation developed the sprayer that is doing the cleaning. It is said to do a better and cheaper cleaning job, faster and easier.

Hormones May Limit Frost Damage in Time

American apple growers, usually hard hit financially by late spring frosts will soon be able to avoid that obstacle. A combination of tracers (radioactive atoms) and hormones may make it possible to keep apple buds closed until the cold season has passed—thus saving the industry millions of dollars lost annually through damaged fruit. A spray would be used to cover fruit and prevent freezes.
