### "Activated Shell Premium is the most powerful gasoline your car can use!

Activation makes the difference

Shell splits molecules: Shell scienrists take the finest available crude—activate the molecules by splitting them and rearranging the atoms according to Shell's formula for a perfectly balanced gasoline. The result—Shell Premium, the most powerful gasoline your car can use !

YES, many of today's engines have been stepped-up. they call for more powerful gasoline! Now Shell gives you the most powerful gasoline your car can use—Shell Premium—it's "activated.'
No other fuel can top its power in your car!

This is made possible by Shell's own, specially produced power components and by Shell's own blending methods!

Actually, Shell splits molecules to get more power for today's more powerful engines So you

get a gasoline that's "activated" 3 ways! i. Activated for knockless power!

2. Activated for fast "getoway." 3. Activated for full mileage.

Your foot on the throttle controls the silken luxury of Dynaflow Drivet-surging, slowing, even halting completely with never a need for clutch work or lever shifting.

Is the breeze a bit strong? A finger-touch runs up the door windows.

Is the seat just right? Another control corrects it as easily.

\$ Standard on ROADMASTER, optional at extra cost on SUFER models.
