Styling of the 1950 Ford Custom Deluxe Ford sedan includes features which add to the performance, economy, safety, comfort and appearance of the new cars. With improved quality as the keynote, the 1950 Fords introduce a new treatment of the grille and parking lights, a colorful new crest — the first in Ford history — a new ornamental rear deck handle and lock, new instrument knobs, new and larger horn ring, foam rubber front seats with non-sag seat springs and a complete new line of interior trim fabrics. In addition the powerful Ford V-8 and 6-cylinder engines have been improved to give Ford the quietest and smoothest running engines ever produced by the Ford Motor Company.

1950 Ford Car Makes Its Debut

The 1950 Ford line of passenger cars, with scores of improvements, was made public today by the Ford Division of Ford Motor Company.

The progress that has been made in performance, economy, safety, comfort and appearance will again mark the 1950 Ford as "the car of the year," according to L. D. Grisco, vice-president and general manager, Ford Division.

The new Fords will be on display in the showrooms of 6,400 Ford dealers throughout the nation starting tomorrow (November 18).

All improvements in the 1950 Fords have been geared to offer even greater quality than was offered in the high quality 1949 Ford cars.

The new features embody improvements throughout the entire car—in the engine, the body, the seats, doors, frame, trunk, fabric, instrument panel, brakes, floors and elsewhere.

The '50 Fords will be offered in two lines—the Custom Deluxe and the lower-priced De Luxe series. A full range of body styles will be available, including station wagons and convertibles. Ford will continue to offer the choice of two engines—the 100-horsepower V-8 and the 95-horsepower Six.

Styling of the 1950 car, although not radically changed because of the wide public acceptance of the modern design of the Fords, nevertheless includes several distinctive features to enrich the appearance.

A colorful new crest, derived from a authentic coat of arms dating back to 17th century England, appears on the front of the hood and center of the trunk lid. This is the first crest that has ever appeared on Ford cars.

Michigan Mirror

Low-Prize News Letter

The present day craze of economic security for the individual, as typified by the \$100 month pension plan granted recently by the Ford Motor Company of Dearborn, appears to be bringing further economic insecurity to employers of small business firms.

"Little business" is watching the outcome of the United States Steel Corporation-CIO tag-off over who is to pay for pensions and insurance.

Already the Bethlehem Steel Corporation has signed a contract whereby its 89,000 employees will be eligible for noncontributory pensions of a minimum of \$100 a month after 25 years of service. This will cost the company 12 1/2 cents an hour per employee. As it stands, insurance for the company and its employees will cost 2 1/2 cents an hour each in the cost.

What will other Michigan automobile firms do? A reporter of the New York Times, writing of Ford from Flint, states: "It is generally agreed that the pension plan adopted by Ford will have to be adopted by other companies."

The first of such retirement money, if paid largely by the employer, will put new costs up in the automobile. All costs must be paid by the consumer—at all.

It is interesting to note that the Ford-Bethlehem contract for pensions includes federal social security benefits. These are financed equally by the employer and employee. If the Ford-Bethlehem idea becomes a general pattern for "big business", it is easy to see that the inevitable effect will be to encourage action by Congress to have more retirement benefits financed by social security and thus, in part, by the worker.

Whereas many industrial leaders have been traditionally cool to the principle of federal social security, as contrasted to privately-financed social security with or without employee contributions, there is now a good chance that many of these persons will favor increased federal benefits. Such action would reduce the gap between security benefits and \$100 a month. It would have the indirect effect of saving money for the employer.

If "big business" lines up for pensions and social insurance benefits, what will "little business" do about it?

The Detroit Free Press commented editorially the other day: "With new demands, added to high wage scales and tremendous tax obligations, it will not be surprising if many small firms

either are forced out of business or into mergers—a tendency toward bigness against which the Truman administration screams."

What affects small firms affect many, many Americans.

Last year (1948) about 35 percent of all workers were employed by companies having five or less employees. Almost two-thirds worked for firms of less than 300 employees.

The "compulsory contribution" (the government's phrase for payroll tax) would go from 1 to 1 1/2 percent on January 1, 1950; 2 percent by 1951; 2 1/2 percent by 1952, and finally up to 3 1/2 percent by 1970. Washington observers agree that the Senate is "certain" to act favorably in 1950 (an election year) on upward revision of social security benefits, now admittedly out of balance with today's inflated dollar.

The coming economic squeeze on "little business" illustrates why many thoughtful business men are genuinely concerned over the present steady drift toward the welfare state. If farmers are guaranteed fair prices for their crops, if workers are guaranteed economic security from cradle to grave, what will be the final outcome?

And if to oppose such new Utopian protection for the masses is to qualify a critic for the odious label of a "reactionary", then the business man may arrive at the philosophical fatalism recently expressed in "Trends", a journal of the National Association of Manufacturers:

"There has never in past history been any large state that controlled its citizens as completely as they are controlled in the Soviet Republic or even in modern England."

"It may be that the present tendencies toward centralization are too strong to be resisted until they have led to disaster, and that, as happened in the fifth century, the whole system must break down with all the inevitable results of anarchy and poverty before human beings can again acquire that degree of personal freedom without which life loses its savor."

State socialism and inflation go hand in hand.

It is high time that every American re-appraise the ultimate price of the inevitable outcome. Disaster for the nation and loss of freedom for the individual.

At one time or another in history, men have made footwear out of wood, pey, metal, textiles, straw, paper, rubber, raw skins—usually when there was not enough genuine leather for shoes and uppers.

Magazine Praises Michigan Roads

Michigan is thrice praised in an article on U.S. highways in the recently published November issue of Fortune magazine, points out Harry T. Ward, President of the Michigan Good Roads Federation.

The comprehensive account of the nation's highway problem, entitled "Enter the Road Builders," comes to the following conclusion:

"Better roads mean lower fuel and rubber consumption, and less money in car maintenance. They mean fewer accidents and lower insurance costs. Some motorists are now spending three or four times as much per mile for insurance as they do for the truck they drive on. In the long run, bad roads are the most expensive kind."

The article praises Michigan for its advanced research and planning practices; it points out that the design on the seven year

old Willow Run Expressway is still as modern as anything on the drawing boards.

The Michigan Good Roads Federation report, "HIGHWAY NEEDS IN MICHIGAN," is quoted early in the article as follows:

"What good is a car if it has to be nursed through traffic jams... If the cost of insuring it against damage goes sky-high? If we must risk life and limb to drive... If its convenience is stifled by outmoded streets and roads?" From the state that manufactures 80 per cent of America's automobiles, that was strong talk.

Farm Animals
Vitamin A deficiency may lead to blindness in farm animals.

Did you get your 49 pounds of oranges, 25 of fresh apples, 20 of bananas and 7 pounds of peaches last year? Federal economists say that total consumption indicated that each person ate those amounts.

World's Biggest Bell
The Soviet Union, which likes to "do things in a big way" will probably never call attention to the fact that it owns the biggest bell in the world. This bell, the "Tsar Kolokol" located in Moscow, was a flop because an 11-ton piece broke off before it was ever rung.

Magazine Praises Michigan Roads

Michigan is "thrice" praised in an article on U.S. highways in the recently published November issue of Fortune magazine, points out Harry T. Ward, President of the Michigan Good Roads Federation.

The comprehensive account of the nation's highway problem, entitled "Enter the Road Builders," comes to the following conclusion:

"Better roads mean lower fuel and 'rubber' consumption, and less money in car maintenance. They mean fewer accidents and lower insurance costs. Some motorists are now spending three or four times as much per mile for insurance as they do for the truck they drive on in the long run, bad roads are the most expensive kind."

The article praises Michigan for its advanced research and planning practices; it points out that the design on the seven year

old Willow Run Expressway is still as modern as anything on the drawing boards.

The Michigan Good Roads Federation report, HIGHWAY NEEDS IN MICHIGAN, is quoted early in the article as follows: "What good is a car if it has to be nursed through traffic jams... If the cost of insuring it against damage goes sky-high? If we must risk life and limb to drive... If its convenience is stifled by outmoded streets and roads? From the state that manufactures 20 per cent of America's automobiles, that was strong talk."

Farm Animals
Vitamin A deficiency may lead to blindness in farm animals.

Did you get your 40 pounds of oranges, 25 of fresh apples, 20 of bananas and 7 pounds of peaches last year? Federal economists

say that total consumption indicated that each person ate those amounts.

World's Biggest Bell
The Soviet Union which likes to "do things in a big way" will probably never call attention to the fact that it owns the biggest bell in the world. This bell, the "Tsar Kolokol," located in Moscow, was a top because an 11-ton piece broke off before it was ever rung.

Customers' Corner
Why will food prices go up, if the anti-trust lawyers win their suit to put A & P out of business? Here is just one of a number of reasons: We manufacture many of the quality foods we sell in our stores, such as Borden's Red Circle and Eight O'Clock coffees, Ann Page foods, White House milk, and many others. Because this saves us money we are able to pass along these savings to our customers in the form of lower prices. The anti-trust lawyers have asked the court to order us to get rid of our manufacturing facilities, which would put an end to all these savings. Make no mistake about it. If the anti-trust lawyers succeed in putting A & P out of business you will find your food bill is higher.

tioned to be abandoned and discontinued,
but it is desirable to maintain thereon
a public utility easement for the use
and benefit of the public;
NOW, THEREFORE, BE IT RESOLVED,
that the 20-foot public alley lying
between Lots 2108 to 2110, both

igan, as recorded in Liber 22 of Plats,
on Page 41, Wayne County Records,
being in all 0.037 acre of alley, be and
hereby is hereby abandoned and dis-

sons, firms or corporations owning or

for the purpose of installing, maintain-
ing, or operating any or said public
utilities.
BE IT FURTHER RESOLVED, that
this Board believes it to be to the best
interests of the public that said alley
so abandoned and discontinued should
be absolutely abandoned and discontinued
as a public highway, reserving there-
in the easement as set forth.
The motion was supported by Com-
missioner O'Brien, and carried by the
following vote:
Aye: Commissioners O'Brien and Wil-
son; Nays: None.

**Set Plans For 1950
Farm Week At MSC**
January 30 to February 3 are
the dates set for the annual
Michigan State College Farmers
Week program. At this time, the
East Lansing college plays host
to more than 35,000 farm and
urban people who are interested
in new developments in agricul-
ture, home economics and re-
lated fields.
E. L. Anthony, dean of the
school of agriculture, is chairman
of the general committee and has
numerous special committees
working out the program for the
big event.
Special entertainment is being
planned in addition to the educa-
tional exhibits and meetings.

**U-M Limits Holiday
To Thanksgiving Day**
Thanksgiving Day will be ob-
served as a holiday at the Uni-
versity of Michigan, but classes
will be resumed on Friday, No-
vember 25.
Three weeks later, on Friday,
December 18, classes will be
suspended for the Christmas holi-
days. The campus will remain
relatively quiet until the students
return on Tuesday, January 3.

**U-M Pres. Deplores
Higher Fees Trend**
The trend toward higher fees
in state supported educational
institutions was branded as "un-
American" by Dr. Alexander G.
Ruthven, President of the Uni-
versity of Michigan.
He made the charge in an
address opening the 32nd annual
meeting of the University Press
Club of Michigan. (Thursday,
November 9).
"Our country will always need
all of the trained minds that can
be produced, and ability of mind
is neither directly nor indirectly
related to the financial standing
of the individual," Dr. Ruthven
asserted. "There is no right and
no wrong side of the tracks so
far as state-supported higher
education is concerned."
He pointed out that the trend
to higher fees "must lead to a
more rigid restriction of the ad-
vantages of higher education to
the privileged groups, and will
just as certainly lead to federal
subsidies and federal controls."
Dr. Ruthven said the Uni-
versity in 1929 expected its students
to provide 20 per cent of its
operating costs whereas the per-
centage is now approximately 40
per cent.
"The simple fact is that the
preparation of youth for citizen-
ship in a developing democracy
should be accepted as a public
responsibility not only in the pre-
college years but also at the col-
lege level," Dr. Ruthven asserted.
Ideally, state institutions of
higher learning should not charge
fees to instate students, he said.
If it is necessary to compromise,
he contended, the fees charged
should be low enough to permit
qualified students to go to col-
lege without undue sacrifice.
The University president de-
clared it is quite proper to make
a distinction between in-state
and out-state students in respect
to fees. He asserted it is a right
for a qualified in-state student
to be admitted to publicly sup-
ported schools in his state where-
as it is a privilege for the out-
state student.
While declaring that the Uni-
versity fees for Michigan students
are too high, he said he did not
regard the charges made to non-
residents as too high. In fact, he
believes these charges to non-
residents could be increased but
only with due regard to possible
effects on the composition of the
student body.

Judge Frank A. Picard, of Saginaw, who was recently named Michigan State Chairman of the 1950 March of Dimes, is his third year as head of the fund raising appeal in the state. The March of Dimes is conducted each January by the National Foundation for Infantile Paralysis to finance the fight against polio. Because of costs of this year's epidemic, worst in U. S. history, the organization must depend heavily on generous support of the March of Dimes for sufficient money to carry on its program of service to victims of the disease. Carbon Monoxide Dangers Are Cited

Get carbon monoxide conscious before you become carbon monoxide unconscious, the Michigan Department of Health counselled today.

Last fall and winter, 42 Michigan people—27 men and boys and 15 women and girls—were accidentally and unnecessarily killed by carbon monoxide fumes in their cars, in their homes, in their garages or in tourist cabins.

Carbon monoxide is a colorless, tasteless and odorless gas. It cannot be seen, smelled or tasted, and it does not irritate the eyes, nose or throat. It has about the same density as air and readily mixes with air. It is caused by incomplete combustion of carbon compounds such as gasoline, fuel oil, heating gas, or coal.

When you sit in a parked car with its motor running, when you drive long distances in a completely closed car, when you fail to check the flues of your tourist cabin heater, gas burner or the water heater in your basement, when you warm up your car in a closed garage, when you furnace "smokes" or when you turn your damper too tight after putting fuel on for the night, you are in danger of becoming carbon monoxide unconscious—dead.

Do not sit in a parked car with the motor running unless a window is open. Just 8 parts of carbon monoxide to 10,000 parts of air during a two hour period can kill you. You may just snooze and unless someone wakes you soon you may sleep forever.

Drive with a window open. If you begin to feel drowsy, if your head starts to ache, if you feel dizzy or ill, stop the car and get out of it at once. Only 2 parts of carbon monoxide to 10,000 parts of air on a three-hour drive can put you to sleep, wreck your car and send you and others to the hospital.

Open the garage doors before you warm up your motor.

Remember that when your furnace "smokes," carbon monoxide is escaping into your house. Remember, too, that there can be carbon monoxide in quantities sufficient to kill you and your sleeping family when there is no smoke or smell. Check your furnace for leaky pipes, worn and corroded parts, rusted out combustion chambers which let smoke and gas into the hot air system, clogged chimneys and poor dampers. Be sure the damper is not too tightly closed when you bank the furnace for the night or when you refuel.

A bird's nest or autumn leaves can cost you your life when they clog the vent on the gas heater in the tourist cabin you occupy or the vent on your gas or oil water heater. Be sure that vents are clean, intact and open.

Open all the doors of a house, cabin or car thought to have carbon monoxide contaminated air. If a person is overcome, take him into fresh air, wrap him in blankets to keep him warm and give him artificial respiration until a physician and an inhalator or respirator arrive.

Roughly, one-fourth of the area of the U. S. is commercial forest land.

Mustangs Trample South Lyon, 32-6, In Final Game of Football Season

The Northville Mustangs rang down the grid curtain with a bang last Friday night, scoring in every quarter to smother the South Lyon Lions, 32-6.

The game saw the Mustangs bounce back to the same kind of peak form they possessed when they downed Center Line, 18-13, at mid-season. Running from the modified "T" formation they have used all year, the Northville eleven gained 513 yards on the ground and 37 yards in the air while the Lions were held to 87 on the ground and 23 via the aerial route.

Chuck Stephens took the ball up the middle to score from the five yard line in the first quarter. Dick Gray then dashed 13 yards for the second tally on the fourth play after the Mustangs regained possession of the ball. Both extra point attempts failed.

South Lyon scored almost immediately after the second quarter opened. The Lions recovered a Northville fumble on the 23-yard line and right half Phillips passed to Hook in the end zone on a pass play which developed from a fake line buck.

Gray tallied again in the second quarter, taking a pitchout to the left and weaving seven yards to pay dirt. Bob Cole's kick from placement was good.

The Mustangs threatened again shortly before the half ended. With the ball on the 10-yard line, Pullen carried for four yards on a quarterback sneak. Stephens was stopped at the line of scrimmage. Clancy Ely picked up two yards and Pullen was stopped a yard short of the goal. The Lions took over and immediately punted.

Bob Sutton kicked off to South Lyon to open the second half but the Lions lost five yards in three tries and punted the ball going out of bounds on the fifty.

On the second play in that series, Gray and the right side of the Mustang line chased the ball carrier back to the 17.

On the first play after NHS took over on the 16, Chuck Dickinson, after being slowed down behind the line of scrimmage by a tackler, streaked down the right sideline behind perfect blocking to score. The 64-yard sprint was the longest in any Northville game this year.

The Mustang passing attack clicked better than it has any time this year, with three of eight passes completed and one intercepted. Tom Shrike completed three out of five to account for the total yardage gained by Northville in the air. He had one pass intercepted. South Lyon completed one out of eight.

Much of the Mustang success originated at the line of scrimmage. NHS workhorses in the line charged low and fast, opening wide holes for Gray, Dickinson, Shrike, Stephens, Pullen, Ely and Heaton. Once in the clear, the backs twisted and rammed for long gains.

High team-spirit and coordination of efforts were evident, enabling ball-carriers and blockers to utilize each other for the maximum effect.

DEWEY KETNER
saw action at the tackle posts in most games this year.

Gasoline Taxes
Motorists paid more than 13 billion dollars in taxes to states on gasoline and motor fuel consumed last year.

Turkey Poults
Outbreaks of arsenic poisoning have occurred in turkey poults turned out on ranges unevenly spread with grasshopper bait.

Catalytic Cracking
One of the longest strides ever taken to conserve vital petroleum was catalytic cracking. It splits out three gallons for every one refined before, hence wastes less of each barrel drilled. A triumph of chemical engineering, requiring labyrinthine equipment such as this, the technique yields higher octane gasoline in the bargain.

Junior High Gridders To Play Friday Night

Two teams composed of boys from the seventh and eighth grades will play a football game tomorrow night at 7:30 under the lights at Ford Field. The teams will be mixed with boys from the two grades on both teams.

The Northville Junior Police will play a preliminary game at 7 p. m.

Over forty boys have practiced every afternoon this week in preparation for the game. Al Jones is coach of one squad and Dick Kay is tutoring the other. The two coaches are assisted by Mustangs Def. Black, Norm Rodamsky, Chuck Stephens and Tom Sutton. Uniforms were issued last Saturday.

Parents and football fans are encouraged to attend the game and support the youthful athletes.

Cubs To Sponsor White Cloth Drive

(Continued from Front Page)

nearest Detroit Edison Company branch office. Edison officials will see that branch collections are delivered to the Cancer Society Headquarters, John R. and Hancock Avenues. When a similar project was held over a year ago, many Cub Leaders delivered their collections direct to the Society Headquarters where opportunity was given to see how cancer pads and dressings were made and to visit the interesting research laboratories sponsored by the Society.

The Drive is in the nature of a Cub Scout-Christmas Good Turn, as Cancer officials are in urgent need of all old white cloth materials. According to Mrs. R. L. Stinson, Salvage Committee Chairman, all kinds of cotton goods can be used. Silk, rayon, wool, and other materials are not wanted. Cotton sheets, pillow slips, table cloths, napkins, curtains, and blankets are very valuable. Men's old white or colored cotton shirts are quite acceptable as these are made into "Johnny Jackets."

Doctors are asked to see that their materials are clean and usable. The need is great, and the Cubs have agreed to help. We know they'll do their part in their usual enthusiastic manner!

The knitting machine was invented by a man who became angry at his sweetheart because she paid more attention to her knitting than to him.

ITS QUIET WHISPERS QUALITY

It's the quiet of new super-fitted pistons, new "hushed" timing gear, new fan designed for better cooling at slower, quieter speeds. And what power! There's a full 100 horsepower wrapped up in this V-8 design that makes you master of any road. It delivers more power than any other car anywhere near Ford's low price and sells for less than most convenient "sixes" and Ford offers a Six, too—an advanced Six with 95 horsepower.

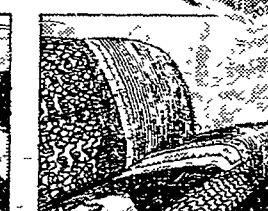

NEW "HUSHED" RIDE

Ford's famous "Mid Ship" Ride is now so quiet you can talk in whispers while traveling at highway speeds. So smooth (with its great team of "Hydra-Coil" and "Para-Flex" Springs) that it virtually erases every bump.

But see it for yourself.
Drive it so you can feel and hear the difference.
And price it and see how much less it costs than any other really fine car.
