### MICHIGAN MIRROR

**NON-PARTISAN NEWS LETTER**

More public benefits vs. state socialism.

That's the top issue of 1950 for both national and state political campaigns, according to battle lines now being formed at Lansing and Washington.

The 1950 special session of the Michigan legislature confirmed the trend on a state-wide basis. Governor G. Mennen Williams struck a note of the liberal crusader when he assailed Republican legislators for "ignoring" the needs of the people. The legislature turned down his proposed \$112,000,000 program. Instead government spending was cut approximately \$15,000,000.

It is the political thesis of Governor Williams that the Republican party in Michigan is dominated by "special interests", referring obviously to manufacturers and businessmen. In an address before the Michigan CIO convention in Grand Rapids, Williams assailed the legislature for its "do-nothing record". Because legislators refused to levy a stiff tax on corporation profits, Williams concludes that the G. O. P. is subservient to "Big Business" and hence is committed to more consumer taxes.

This stand of the governor — more public benefits to be financed by business — finds an echo in recent utterances of President Harry Truman. The president wound up a whistle-

stop speaking tour, promising to continue his fight for middle income housing, federal aid to education, federal health insurance and an improved farm law.

The cost of all these new public benefits would run into many billions of dollars, all at a time when Federal treasury deficits are mounting. The Republican stand, as expressed by Senator Taft of Ohio, is that the Truman program is straight socialism.

Taft says the Republicans are also interested in promoting health, security and housing of the people, but would support financial aid only where absolutely necessary and where it can be done without a strain on the treasury.

While more public benefits become the Democratic offering, national and state, Republicans will condemn the Truman-Williams program as being financially irresponsible destroying our American freedoms and otherwise opening the door wide to a "hand-out state."

The governor made a dramatic 11th hour appearance before the Legislature on the eve of its recess Saturday, May 20. He appealed to the legislators not to reduce government grants to schools, hospitals, the aged and infirm, and other worthy causes.

The Republican reaction was prompt: "Pure politics".

"If there are dire happenings, it will be because of administrative failures or attempts to make political capital out of discrediting sound planning to avoid huge new taxes," said Speaker Victor A. Knox, Sault Ste. Marie.

Republican legislators point out that appropriations for the new fiscal year start July 1, 1950, and that the legislature will return to Lansing in January, 1951, for the regular session. Legislators insist that no one is going to suffer and that appropriations are adequate to meet normal needs.

The will of the Republican legislators to put a halt to the even-higher trend of government spending was re-inforced May 18 when Auditor General Murl K. Aten compiled a 10-year table of comparative government spending in Michigan.

Education costs, for example, soared from \$55.8 millions in 1939 to \$169.7 millions in 1949; health, \$7.7 to \$12.5 millions; mental, \$13.7 to \$32.5 millions; welfare, \$44.9 to \$94.2 millions; highways, \$54.3 to \$108.9 millions. These figures include grants of federal and state aid. Today 78 per cent of state sales tax revenues are now returned to local units — cities, counties, schools, townships.

President Truman and Governor Williams are confident that the people want more public benefits.

The Republican are equally confident that the people do not want "state socialism." Every dollar of additional government spending must inevitably be paid by the consumer in the form of higher prices they say.

And so 1910 political battle lines are being drawn.

The people must decide at the ballot box next November.

**Kroger's To Offer "Family Fare" at Cost**

A special edition of the U. S. Department of Agriculture's new 96-page cook book "Family Fare", is being printed by the Kroger company for distribution through its stores starting June 5. C. Olaf Talla of the Detroit branch said today. The book, ordinarily obtainable through the U. S. Government Printing Office for 25c, is being offered by Kroger to the customers at a cost of production price 10 cents, Branch manager, Talla added.

The book is prepared and edited by the nation's leading experts in the Bureau of Human Nutrition and Home Economics, and contains recipes and menus designed with an eye on nutrition as well as attractiveness. The Kroger printing is a limited special edition and after the present supply is exhausted no more books will be available through Kroger stores, Talla said.

Tommy Winn, who copped the race-driving honors at Northville Downs last year, is back at the track trying to make it two-in-a-row. Tommy has what many regard as his best stable to date and is racing no less than 16 top candidates. Harold Wellwood, the popular Canadian driving ace, who was just beaten out by Winn, is also at the Northville track with a stable of 15 head and promises to give the home driver another battle.

"Pleased to have seen you" usually means that the party was a flop.

U. S. Fish Hatcheries Give Report for 1949

Millions of fish eggs, fry and fingerlings were produced by U. S. hatcheries in 1949, according to the Branch of Game Fish and Hatcheries of the Fish and Wildlife Service, U. S. Department of the Interior.

Production of fish at Federal fish hatcheries during 1949 for the stocking of public and private waters included more than 55,356,000 eggs, 587,163,000 fry, 106,530,000 fingerlings less than six inches in length and 1,518,000 fish six inches or over in length.

Ninety-five Federal hatcheries were in operation in 42 states. Thirty-four species of fish were propagated, representing more than a dozen of the most important commercial food fishes and practically all of the more valuable game and pan species found in this country.

A marked increase in production in 1949 over the previous year was shown in fingerlings under six inches in length—with 30,000,000 more being produced. This increase is a result of the continued upward trend in the construction of farm ponds for watering livestock, and which are also stocked with pan and game fish for recreational fishing.

**ON CAPITOL HILL**  
NEWS  
and  
COMMENT  
FROM  
CONGRESSMAN  
**GEORGE A. DONDERO**

It may be taken for granted that the forthcoming Congressional campaign will bring out repeated statements from the White House and elsewhere in Democratic ranks that the Republican minority in Congress was able to cut the President's 1951 budget but little. It will be said, also that every item in his budget was justified and that the few reductions actually made will serve only to cripple the services the

people expect from their government.

But the voters should take these statements with a big grain of salt, and should not be fooled by them. The truth is that the Republican minority succeeded in making a drastic over-all cut; so drastic in fact that eventually a substantial reduction in federal taxes may be in order. In any event, the cut engineered by the Republicans will go a long way in reducing the prospective \$5 to \$10 billion deficit next year.

All this, of course, is true so far as concerns action by the House of Representatives on the Omnibus Appropriation Bill, which contained everything except foreign aid and the arming of our allies abroad. At the same time, it now appears probable that the United States Senate will restore little if any of the

money cut out of the budget by the House.

As introduced in the House, the Omnibus Appropriation Bill provided \$27.83 billion in direct appropriations and \$1.8 billion in contract authorizations. It contained also \$14.1 billion in trust funds, permanent appropriations, and loan authorizations, which comprise unavoidable expenditures. Thus the total was \$43.2 billion, a cut by the House Appropriations Committee of \$1.3 billion from the budget request, and a reduction of \$82,014,180 from the 1950 appropriation.

As passed by the House, the Omnibus Appropriation Bill provided direct appropriations of \$27.3 billion and contract authorizations of \$2.1 billion. Together with the unavoidable appropriation items, this made a total of \$43.5 billion, up about \$0.3 billion from the total when the bill was introduced.

But the House of Representatives adopted the so-called Taber-Thomas Amendment, which stipulates that all non-military government departments and agencies shall operate in the 1951 year, which begins July 1, with ten per cent less personnel than was recommended by the President in his budget message. The amendment provides that defense agency personnel shall be cut only two per cent, and medical staffs of the Veterans Administration and the Public Health Service shall be exempted. By this means the Republican minority succeeded in cutting \$600 million from the budget.

Then the House adopted the so-called Jenner Amendment, which provides that during the 1951 year federal agencies shall fill not more than ten per cent of their job vacancies. The budget by this means was cut in effect by \$371 million.

These reductions, totaling \$971 million, plus some other reductions of particular items adopted by the House, brought the overall budget cut to \$1,005,899,946 which is in excess of the \$1 billion reduction the Republicans set out to make in the first place. Statistically it can be shown that Republican amendments were responsible for 99.82 per cent of the over-all cut in the budget.

Since 1850 the per capita national debt of the United States has increased approximately 600 times. The Treasury Department says that in 1850 the per capita debt was \$2.77. As of last February, it was \$1,698.06. Thus every man, woman and child in the United States owes almost \$1700 as his or her share of the national debt.

No matter how well you work on a plan for success, success depends on how well you work.

**Irish Turf Winners To Race at Track**

Since the Irish horse Noor defeated the great Citation last winter, the Irish horsemen have apparently decided that the races are easy "pickins" on this side of the ocean, at least according to Bob Leavitt, general manager of the new Detroit Race Track, Schoolcraft and Middle Belt Roads.

Pat Nugent, of Ringwood Racing Stables, Celbridge, County Kildare, Ireland applied for two stalls at the new plant, was accepted and replied by cable: "Wire received thanks horses leaving here Wednesday 17th by air arriving Detroit Friday early. Pat Nugent."

While the management enthused over the prospect of international rivalry, president E. E. Dale Shaffer, owner of Coldstream Stud and a breeder all of his life, speculated on the following points:

(1) Horses in Ireland run clockwise around a race track instead of counter clockwise as they do in this country.

(2) Horses in Ireland do not use the chute type starting gate prevalent among the thoroughbreds here.

(3) Horses in Ireland run solely on the grass or turf and not on the loose dirt favored here, so naturally none of them have ever had to race with another horse throwing dirt or mud into their faces.

"They're going to have to learn all three of those things before they can put up a really good race," opined Shaffer.

Conjectures followed on what might happen should the two sons of Erin decide to run the wrong way, or balk at the gate the first time out. The American horsemen present refused to worry about the Irish invaders.

At a request from MRA for details, Nugent described the two colts as one three-year-old by Solar Prince, and one four-year-old by Coastal Traffic. Then the horsemen recanted.

Both are famous winners on the Irish turf.

And they remembered Noor beating Citation to the wire at Santa Anita.

## a thought for food --

and food for thought — double talk, again? But, why not? We're really seeing double in our thoughts for this month of June, which belongs so completely to brides and graduates.

Speaking of brides and weddings — one is of very special interest to us here at Black's Catering Service. Our eldest son and his fiancée have set THE date for June ninth — so if we seem quite preoccupied this week, you'll try to understand, won't you? Could be, that we're quite excited at the prospects of a daughter in the family.

In case THE date has been set for someone in your family, you may call Black's Catering, 383, and feel confident that any of the food details will receive our most personal attention.

# Mind if we read your palm?

These long mixed lines show it is hard for this person to keep money.

These lines show riches brought about by one's own efforts.

Loose flesh at the base of the thumb denotes a person who plans carefully.

WE'LL BET that this hand belongs to a person who invests regularly in U. S. Savings Bonds.

It is the hand of a person who plans for the future wisely and well. One who has enrolled in the Payroll Savings Plan where he works—or, if he's not on salary, on the equally convenient, equally profitable Bond-A-Month Plan at his bank.

U. S. Savings Bonds are Government guaranteed to pay you back \$4 for every \$3 you put in—after ten years. There is no surer, wiser investment a man can make today!

Cross your own palm with plenty of silver in years to come. Start saving right away with U. S. Savings Bonds!

Automatic saving is sure saving—

ask HAROLD BLOOM This Question: The Fourth of July is not the time to go vacationing. I know, but this year my vacation falls in that week. So, before I take my whole family and set out in the traffic that always seems to go berserk on that day, how about giving me information on your Auto Medical Payments Insurance? Wouldn't it afford wise protection? On any insurance problem, consult C. HAROLD BLOOM, 108 W. Main Street, Northville, Phone 470.

### Barkley To Speak for 1950 MSC Commencement

Vice-president Alben W. Barkley will address the record-breaking Michigan State College graduating class in Commencement ceremonies June 4 at 2 p. m.

Barkley, the United States senator from Kentucky whom Pres. Truman chose as his running mate in 1948, will speak before the largest class of graduates in the 95-year history of the college.

Degrees will be awarded 4,469 undergraduate and advanced graduates, three honorary degrees will be presented outstanding former students, and five alumni will be given Distinguished Service Awards.

More than 70 percent of the 1950 graduating class are veterans of World War II, according to Registrar Robert S. Linton.

Registrar Linton said 3,903 would receive bachelors' degrees and 566 will have completed requirements for masters' and doctor of philosophy degrees. MSC has only one commencement ceremony each year and this represents the college's total graduates for the 1949-50 year.

Honorary degrees will go to Dr. Max Gardner, professor of plant pathology at the University of California, doctor of science; Major General Donald A. Stroh, retired U. S. Army officer, Washington, D. C., doctor of laws; and John W. Sims, general manager of the Ohio Farm Bureau, Columbus, O., doctor of agriculture.

More than 3,000 Michigan State College alumni gathered for Alumni Day Ceremonies June 3.

### Better Fire Record Reported for State

Michigan has a much better forest fire record so far this year, reports state forest fire chief M. Bergman.

Conservation department records show only 432 fires which have burned over 3,860 acres as compared to the 939 fires which damaged 16,746 acres through last year at this time.

Bergman praises the state's newspapers and radio stations for their efforts in making the citizens more fire conscious in the normally critical spring period.

Green-up time is well advanced in the southern third of the state, he points out, but the danger period still exists upstate.

More than one million dollars of mobile equipment, including either originals or exact replicas of some of the greatest mechanical discoveries that have contributed directly to the building of the American economy, will be used as stage properties for the mammoth "Frontiers of Freedom" historical pageant which will dramatize 270 years of American history and progress in 14 scenes running 63 minutes at the Chicago Fair of 1950 this summer.

Included among the stage properties will be such novelties as an authentic oil derrick gushing simulated oil, a replica of "The Kittyhawk," the Wright Brothers' plane, a century-old Baltimore clipper

ship, a two-deck Erie canal boat, a copy of the first McCormick reaper, the 1829 Tom Thumb and 1831 John Bull railroad trains, modern diesel locomotives, a jet plane, the most modern cotton picking machine, a self-propelled harvester thresher and many others.

"Frontiers of Freedom" will be shown four times daily in a lake front theater seating 6,000, and having the largest outdoor stage in the world. Dedicated to dramatizing American achievements in science, agriculture, commerce and industry, the Chicago Fair of 1950 opens June 24 and runs through Labor Day.

### Wall Paper Can Be Cleaned With Ease

Winter's accumulation of soot and dust on your papered walls probably has caused you some concern about the best way to remove it. Prevention is always best and regular dusting of walls often will prevent excessively soiled paper.

Suggestions for wall paper care are given by Olevia Meyer, extension specialist in home management at Michigan State College. First, to make sure your wallpaper can be cleaned and even washed, choose a washable paper. It will not cost any more than many of the non-washable kind. Remove dust and lint each week by going over the surface with a vacuum cleaner attachment, soft bristol wall brush, lambs wool brush, or a broom covered with a soft clean cloth. The best method is to brush lightly upward. This lifts off the dust, cobwebs and lint rather than rubbing them into the paper causing streaks and heavily soiled areas.

Remove spots as they appear. Pencil marks can be removed by rubbing the mark with an art gum eraser. Wax and gum can be removed by scraping the area with a thin knife blade, then applying carbon tetrachloride or a nonflammable cleaner to a cloth and gently stroking the spot.

Oil or grease can be removed by placing a cloth saturated with a cleaner over the spot and patting gently. Finger marks may be removed by making a paste of cleaning fluid and whitening, or cornstarch. Apply it to the soil and after it has dried, brush it off.

### "PINCHED" FOR GOING TOO SLOW

And it all happened in Chicago as Roy Mosen, owner of "Matilda," reputedly the oldest gas-propelled car still operating in the country, meets Policeman Samuel Scarpella while en route to Chicago Fair of 1950. Built in 1894 at cost of \$15,000, automobile has top speed of 10 m.p.h. It will be a feature of "Frontiers of Freedom" historical pageant at the Fair. With Mosen is Mrs. D. W. Hankins, daughter of one of the car's builders.

The enrollment at the present time is already 100 students over school capacity with as many as 40 to 50 students per room. Two grades in the basement and one grade in a room originally built for a lavatory. Overcrowding threatens loss of State aid and 70 per cent of school operating money comes from the State. Briefly what is involved. 1. Increase millage from 5 to 8 mills for a period of 12 years; 2. Taxpayers only vote on authorization to sell bonds, \$80,000 worth needed, repayment spread over 12 years; 3. When bond is paid, the millage increase is automatically dropped; 4. What will it give us? \$80,000 plus what we have on hand will give us a modern building. It will take care of the present needs and the immediate future.

The William Miller family and the Howard Greer family had a get-together picnic on Decoration Day.

**Cows Infested With Lice Give Poor Milk Output**  
Cows with lice make low performance records, says T. H. Parks, extension entomologist at Ohio state university. Since lice are often abundant on cattle during the winter and spring when the hair is long, he recommends treating the animals for lice as soon as possible.

Either rotenone or DDT is an effective treatment if rotenone is used, two treatments 15 days apart, are necessary. Only one thorough treatment with DDT is required.

Parks states that cattle with lice will not make satisfactory gains in weight, or if being milked, will not maintain a steady milk flow. Symptoms of lice include rough and coarse hair, and, sometimes, large, hairless patches on the neck and body caused by the animal rubbing the irritated area.
