to the Editor

Greetings:

I have arrived in Japan. We landed in Yokohama Friday, April 13, 1951.

Then we took a train about 200 miles north which is about 40 miles west of Sandai.

The weather is just like weather in Michigan.

Living conditions are very poor.

We are surrounded by mountains on which there is plenty of snow.

There really isn't much to say because I haven't had a pass as yet.

I would like to receive the Northville Record again so I may keep up with the doings of home.

I enjoyed it very much at Camp Cooke, but will enjoy it much more here.

Sincerely yours,

STATE BAR RECOMMENDS SWEEPING CHANGES FOR JUDICIAL SYSTEM

A sweeping series of changes in the judicial system of Michigan have been introduced into the legislature upon the recommendation of the State Bar of Michigan according to an announcement made today by Joseph W. Planck, Lansing, President of the State Bar.

"The courts are the cornerstone of our American form of government," Mr. Planck said "and it is vital that we meet the challenge of the times by incorporating in the statutes that govern our courts proper provisions to permit them maximum advantage to carry out the duties with which they are charged."

Recommendations of the State Bar were made following long periods of research by State Bar committees of experts in the judicial system and include:

1. A resolution calling for a constitutional amendment which would provide for the selection of judges on the basis of a plan recommended in every state by the American Bar Association (House Joint Resolution Q). This plan permits selection of judges by the governor upon recommendation of an unbiased committee of citizens and the reelection or rejection of such judges by ballot following an initial preliminary term in office. This system, now in operation in Missouri and California, has already resulted in the selection of more competent and active judges.

2. A supplementary resolution for a constitutional amendment providing for the tenure of office to be increased to eight years from the present six year term (Senate Joint Resolution N).

3. In order to provide for proper replacement of judges when they have become physically incapacitated, Senate Bill 241 has been introduced to provide for a retirement system the cost of which would be met by an increase in the filing fee, from four to six dollars, for litigants in the circuit courts and contribution by the participating judges (Senate Bill 240).

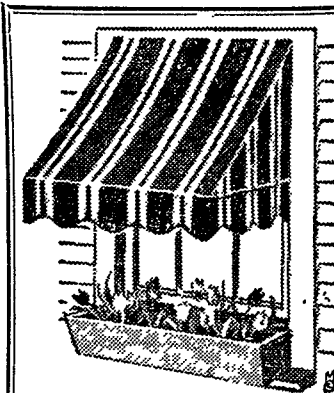

4. Two proposals have been made to provide machinery for administration of the courts. The first is Senate Bill 271 providing for a court administrator who would act in the capacity of an executive secretary of the court system to develop a more efficient means of clearing court calendars and to increase the efficiency of the administration of the court system. Supplementing this is a proposal incorporated in Senate Bill 53 which permits the Supreme Court to take disciplinary action against all judges of courts of record who willfully neglect their duties.

5. A raise in salary for the Supreme Court Justices and Circuit Court Judges has been requested in Senate Bill 304. The present salaries due to inflation are now inadequate to continue to attract to these positions the caliber of men required to make sound decisions. According to Harvey A. Fischer, Detroit, Chairman of the Judicial Selection and Tenure Committee, "The attendant honor of the office cannot be relied upon to place individuals of outstanding ability in office."

6. A plan for county courts (House Bill 491), which would provide for the institution of

county courts in each county of the state at the option of the people of the county, has been introduced. The purpose of this bill is to provide a swifter and more equitable handling of minor cases.

7. Due to the large growth in administrative agencies during the past twenty years, complications have arisen in nearly all agencies which require hearings to be held by them in order to properly protect the interests of Mr. Average Citizen. Senate Bill 257 has been introduced to clarify the procedures of these hearings by including in them certain provisions which have been found by courts to be necessary to safeguard the administration of justice in proceedings of a judicial nature.

Elsewhere in this newspaper, in accordance with state law, you will find a notice of Michigan Bell's intention to ask the Michigan Public Service Commission for a further increase in telephone rates. Included in that notice are details of the new rates proposed.

What would YOU do about telephone rates if you were in our shoes?

Suppose you were managing Michigan Bell. Suppose that your job was to continue supplying the kind of telephone service that Michigan and the nation can depend on in these critical times.

Immediately, you'd run up against these inescapable facts:

- To maintain the quality of service expected by the public, to provide improved service for many thousands of present users, and to meet the needs for new service in growing communities, your Company must continue to expand.
- On top of that, the grim shadow of war demands that telephone service be ample for the giant job of national defense. New communication facilities must be added to handle the vital needs of military establishments, defense projects, and expanding production programs.
- But the millions of dollars to finance this essential expansion and improvement of the telephone system must come from thousands of people who have savings to invest. They'll put their money in the telephone business only if they're assured that the Company's earnings will provide them a reasonable return.
- You'd find that Michigan Bell's earnings—the money left over after expenses are met—are far below the earnings of other businesses. In the postwar period, Michigan Bell averaged only a little over 5 cents on each dollar invested compared with 12 to 16 cents for leading industrial concerns. The Telephone Company must compete with these other concerns in attracting money from investors. And the prospects for present telephone rates to produce adequate earnings from now on are mighty slim.

- You'd realize that previous adjustments in telephone rates haven't caught up with the increases in the Company's cost of providing service. The last rate increase in June, 1950, substantially improved Michigan Bell's earnings. However, a lot has happened since then. Wage increases, made effective last November, have added 5 million dollars a year to operating costs. Taxes, too, have been increased and it seems certain that they will be going even higher. Costs of materials and supplies have hit new highs. And there's no getting away from the simple fact that higher costs mean higher prices.

- As a public utility your rates are regulated by the Michigan Public Service Commission. So, it would be your responsibility to propose—and among the Commission's responsibilities to establish—rates adequate to (a) assure continuation of high-quality service; (b) pay fair wages to telephone employees; and (c) permit earnings that will protect the savings of telephone investors and attract the additional capital needed to do the job.

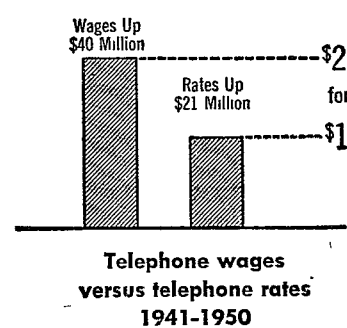

Faced with those facts, what would you do?

Sit back and do nothing . . . stop adding facilities . . . get along as best you can with what you have and let it go at that?

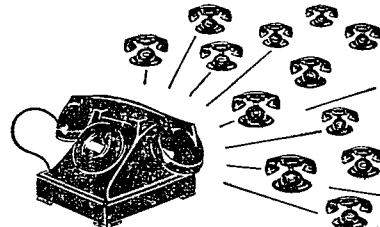

Of course you wouldn't.

Even though you'd rather not ask your customers to pay more for their service, plain horse sense would tell you that you should apply at once for increased rates to make your Company's earnings adequate for the job that has to be done.

And that is what Michigan Bell is planning to do

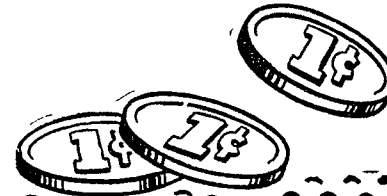

Revenues from increased telephone rates have gone up 21% while the cost of living has gone up 84%.

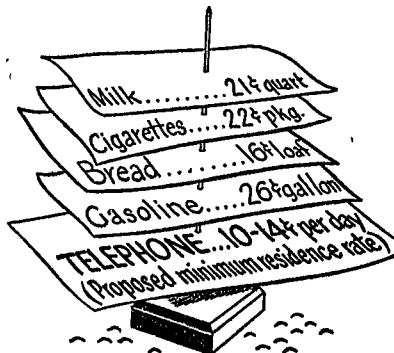

Size of "telephone package" is larger—more telephones can be reached without a toll charge.

Average worker earns enough to pay telephone bill in one-third less time than it took in 1940.

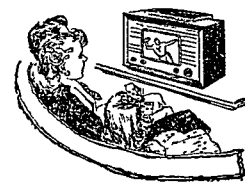

For most residence customers, the increase needed is less than 3c a day.

Telephone service would still be one of the cheapest things in the average family budget.

Stremich-Heath Vows Read at O.L.V. Parish Saturday

A gown of white Chantilly lace and satin was Dorothy Stremich's choice for her marriage Saturday to Duane Heath of Milan.

White snapdragons and gladioli graced the altar at Our Lady of Victory Church where Rev. Lorenzo E. Woods read the double ring service. Mrs. R. Westley sang, "Ave Maria."

Given in marriage by her father, the bride's gown was accented with an illusion neckline edged with seed pearls and full skirt ended in a sweeping train. A pearl trimmed headpiece held her finger-tip veil in place and she carried a bouquet of gladioli and stephanotis.

Dorothy asked her sister-in-law, Mrs. Robert Stremich of Plymouth to be honor matron and bridesmaids were Mrs. Russell Wauty of Milan and Melva Jean Heath of Ann Arbor. Mrs. Stremich was attired in white lace and net over orchid taffeta and Mrs. Wauty and Miss Heath in similar gowns of white lace and net over green taffeta. Their ensembles were complemented with cascade bouquets of pink carnations.

The bride's sister, Betty Lou Stremich was the flower girl and she was attired in yellow marquisette over taffeta. A nosegay of pink carnations and yellow daisies completed her attire.

The bridegroom asked Robert Stremich to serve as best man and the guests were ushered to their seats by Russell Wauty and Arnold Wilson of Milan.

For her daughter's wedding, Mrs. Stremich chose a navy blue dress and Mrs. Heath chose a blue dress. Both mothers pinned pink gladioli corsages to their shoulders.

The Hillside Inn, Plymouth was the scene of the wedding reception and then the young couple left on a trip to Washington, D. C. Upon their return they will be at home in Northville.

Dorothy is the daughter of Mr. and Mrs. Sam Stremich of South Center street. She is a graduate of Northville High school and is employed by Whitman and Barnes, Plymouth.

Her husband is the son of Mr. and Mrs. Ora Heath of Milan and he is employed by the Ford Motor Car Company in Ypsilanti.

Home Ec Leaders Plan May 11 Meeting

Leaders of Home Economics groups in Northville will meet at the Village Library Friday, May 11 from 9:30 a. m. to 3:00 p. m. for the leader meetings with extension leaders on the lesson "Mrs. Consumer Goes To Market."

The first two discussions will be presented by Miss Lucile Ketchum, Extension Specialist in Home Management, Michigan State College, and the other discussions conducted by Miss Emma DuBord, Wayne County Home Demonstration Agent.

Most homemakers have gained knowledge in buying through experience or from their mothers. As a rule they are not label conscious in buying. In many instances they do not know what to look for on labels or what information to ask for in case the label gives them little or none. Because of the many perplexing problems homemakers face when trying to choose the thing for their family and home from the wide selection offered today, women are interested in learning more about the type of information to look for and ask for when making a purchase.

Atom Bomb Film Available for Rental

"The film", according to Miss Rhea Lyon, librarian of Northville Branch Library, "describes methods to be used in preparing attack. The film is not of an hy-the home against possible atomic sterical nature, but lends assurance that if certain practical preventive measures are taken by the householder, some of the dangers of an atomic explosion can be minimized. The film shows the actions taken by a typical family as it goes about preparing for an attack according to procedures previously learned." Miss Lyon stated that if anyone had any questions concerning the reservation and distribution of the film to call at the library, Phone 27.

IODINE in the form of IN-FLAM-GO

A PROVEN WONDER PRODUCT
3 Minutes of Educational Reading

IN-FLAM-GO is iodine with all the poisons and caustics removed. Therefore it can be used in enough quantity to do the good which it has been noted for, without causing irritating and other distressing effects.

Herewith we submit a statement by the Central Laboratories, 312 David Whitney Building, Detroit, Michigan:

IN-FLAM-GO contains no artificial coloring assuming the color from the iodine itself.

Toxicity—NONE.
IN-FLAM-GO after being rubbed on both humans and white rats showed complete absorption, with no irritating or distressing effects. It also showed no discoloration.

A 12% solution was made with standard Iodine and neutral mineral oils which showed no chemical absorption. Some irritation developed and a yellowish appearance of the skin developed.

We found IN-FLAM-GO far superior in absorption quality than any other tested. Signed: J. A. Wolfe, B. S. Ph. D.

Dr. Wm. A. Lane called the world's greatest medical authority on medicine states: "Iodine is an element absolutely necessary for life."

Dr. Carl Ramus, M.D., U. S. Public Health Surgeon, states: "The physiological and chemical reasons for the known effects of Iodine are: (1) that it makes the blood more fluid and (2) it tends to dissolve out masses of abnormal deposits left by certain diseases. The greater fluidity imparted to the blood by Iodine, gives better and quicker circulation through the minute blood vessels supplying all tissues with nutrition, and carrying away waste products which, when there is stagnation in the microscopic vessels, tend to irritate tissues and to leave insoluble deposits in their surfaces."

Because of the absorption quality of IN-FLAM-GO we are able to get results through EXTERNAL APPLICATION.

ARTHRITIS, GOUT, VARICOSE VEINS, HARDENING OF THE ARTERIES, RHEUMATISM, ETC., are all related diseases as they are caused by deposits of insoluble organic matter within the system.

It is generally known that Iodine is of help in the relief of these diseases. In the Great Lakes region we lack Iodine in the soil as well as in our drinking water. For that reason these diseases are more prevalent in this territory.

Iodine is also known as a great healer in cases of infection and a killer of viruses. For that reason IN-FLAM-GO is of great help in INFLAMMATION, TONSILLITIS, BURNS, SCALDS, SORE THROAT, IMPETIGO, RING WORM, ECZEMA, SINUS, SPRAINS, BRUISES, GLAND SWELLING, ETC.

For further information and a list of local and Michigan users that are grateful for having been told about this truly remarkable product, see your druggist—Northville Drug Co. 48

MICHIGAN MIRROR

NON-PARTISAN NEWS LETTER

Michigan Democrats are stunned at the appointment of Blair Moody, Washington news correspondent, by Governor G. Mennen Williams, to fill the late Senator Vandenberg's seat. Most of them had not even heard of the man who for 18 years had paid only occasional visits to his home state.

In his formal statement, Moody said, "We must be strong, as strong as we can make ourselves..." In the same breath he warned against inflation..." impelled by the very process of making ourselves strong."

Republicans remained cautious. Politically he is an unknown quantity. Senator Homer Ferguson said carefully that, he is a personal friend of Moody's but that they often had "differed politically".

And while the McArthur controversy rages up and down the nation, selective service boards are in a tizzy. The draft quotas have been cut—again—the Reds' break through may jump the quotas—again—and now doctors

Speaking before the Military Order of Foreign Wars convention in Lansing, Tyrone Gillespie, security director for the Dow Chemical company, Midland, lashed out, saying "the MacArthur incident... will force the state department and president to announce our global policy, if any"

Civilian defense plans go ahead. Now the civilian defense council battles for bottles for blood. Says director, Brig. Gen. Lester J. Maitland, "we are spending the \$500,000 given us last year to obtain the blood types. It will be a waste of money if we don't have bottles in which to keep the blood." National production of the containers is rapidly being gobbled up.

Meanwhile a regional civilian defense official says of the mock raid on the Soo; "The populace responded to the sirens like veterans of a London blitz. Nowhere was seen signs of panic or indifference." They knew it was coming

The "little Hoover" commission has attacked Michigan's red tape. The body has spoken, if vaguely of a claimed saving of \$114,790 already in the five departments studied.

Michigan Bell Telephone asks a \$22,000,000 rate increase "to meet operating costs". John H. McCarthy of the state public service commission, says: "Michigan Bell earned 6.25 percent on its investment in 1950... highest rate of return for any utility in the state."

Capitol punishment again has been refused in Michigan. For the 20th time since 1846 when the death penalty was abolished, the legislature turned down the proposal.

The Michigan State Library wants its books back—15,000 of them. That number still is out-

standing on loan since the state office building fire February 2.

Retail sales per capita in Michigan have risen to an annual figure of \$964, according to calculations based on final returns of the last census of business covering 1948. Total sales were \$5,950,268,000.

People who went South for the winter really found it. Michigan is a good place to grow peppermint and a small patch can provide many interesting food touches. Michigan State College home economists say the leaves alone are used and tea with peppermint is a favorite drink.

TO MICHIGAN BELL TELEPHONE CUSTOMERS:

Attention to the Michigan Public Service Commission by the Michigan Bell Telephone Company
For Authority to Make Effective Certain Schedules of Rates, Rentals, and Charges

Higher costs inevitably mean higher prices, and the cost of furnishing your telephone service keeps on going up. As the result of wage increases for our employees last November, greater taxes, and the higher costs of services and materials, the rates authorized by the Commission last June are now insufficient to cover our needs. For that reason we shall apply to the Michigan Public Service Commission on May 14, 1951 for authority to apply the proposed rates shown below, and ask the Commission to set a date for a hearing on our request.

EXCHANGE RATES (Excluding Federal Tax)

For rate purposes, exchanges are divided into groups according to the total number of telephones that can be reached without a toll charge. The present grouping is based on the number of telephones in service in each exchange or zone on September 30, 1948. The proposed rates are based on the number of telephones on December 31, 1950.

PRESENT SCHEDULES OF BASIC MONTHLY EXCHANGE RATES

● Group 2 rates, as shown in the following table, now are applicable in NORTHVILLE. When "Extended Area" service is provided to FARMINGTON, PLYMOUTH, SOUTH LYON and WALLED LAKE, Group 4 rates would apply under the present schedule.

Finder Returns Pocketbook
And Gets Watch in Return

BLOOMINGTON, Ind. — Strange things happen to many people. Mrs. Fred Huff, Sr., for instance, was parking her car recently when she found a pocketbook containing \$45 lying beside a parking meter.

She watched the lost-and-found columns and noticed an advertisement by Mrs. Eunice Baugh, saying she had lost her pocketbook.

The two women met and Mrs. Baugh identified her pocketbook.

As she thanked Mrs. Huff, Mrs. Baugh remarked:

"You don't happen to know of anybody who has lost a wrist watch, do you?"

After she missed her billfold, Mrs. Baugh related, she retraced her steps and, nearing the parking meter, discovered a wrist watch.

The surprised Mrs. Huff said she had lost hers, explaining that a link in the watch band was faulty.

"I guess it dropped off when I reached down for the billfold," she added.

The women thanked one another and parted.

Baseball's Hall of Fame

THE COMPLAINT has come in from old-timers, who knew their stars, that certain players must soon be taken into the Big Hall, or be left out for good. There are many names on the list that Bob Quinn has ready for consideration. Many of these will never get in as they lived and played too long ago to be recalled by most of today's voters. But certainly in this list such

Grantland Rice names as Al Harry Simmons and Chief Charles Albert Bender shouldn't be overlooked. Al Simmons' lifetime big-league average was around .334, among the highest in the game. This was over a long period of time. Simmons has known years at .392, .390 and .384, up in Ty Cobb's figures.

Al Simmons was the greatest outfielder Connie Mack ever had on his nine pennant-winning teams. He was a great ballplayer, with a clean personal record.

In the case of Bender, the Chipewewa Chief, he was one of the great pitchers of the game.

Many years ago, before Lefty Grove came along, Connie Mack told me that he would rather have Bender pitch a million-dollar game than any pitcher he had ever had on his team. The Chief was a great competitor. I knew him as far back as 1905, the year he shut out the Giants in a world series game.

Simmons and Bender certainly belong. So does Bill Dickey, one of the game's greatest catchers, coupled with Mickey Cochrane at the top.

Among those still playing who will have to be taken in later are Joe DiMaggio, Stan Musial and Ted Williams. There may be others but these three are certain to get strong support. And what about Hank Greenberg? Or Dizzy Dean?

However, Bob Quinn, now master of the Hall, is worried over many others he believes should be considered before time runs out. There is a definite movement under way to place the name of the late Dr. Hyland of St. Louis on the honorable mention list. Dr. Hyland gave a big part of a fine career to ball-players and he is sure to get stout backing in this line.

A Tough Query

"Why is it," a fan asks, "that we had better hitting with the old and deader ball than we have with the lively or rabbit ball? Check back on this. You'll find that before the livelier ball came in, the game had a long list of 400 hitters. I mean Cobb, Sisler, Hornsby, Jackson, LaJoie, Deleahanty, etc. The last two 400 hitters I recall were Bill Terry and Ted Williams. We haven't had a 400 hitter or even a 390 hitter in years."

The answer to this is fairly simple. When Babe Ruth began to pour his home runs over the outlying fences and walls, practically every young hitter shifted his grip to the end of the bat and took a full cut.

Cobb and most of the other 400 hitters had controlled swings. Cobb's hands were well apart. He was able to keep his bat on the ball. Ruth struck out oftener than any other noted hitter.

"The Babe has changed the game," Cobb said years ago. "Baseball now is a game of power, more than skill. There was no use swinging full against the ball we had. But at least you could place your hits."

More than a few observers used to say that Babe could have passed .400 by shortening his swing, bringing it under better control. But this is something you can't prove. A home run was the only dish Babe cared for. Except on rare occasions he took his full cut. The same is true of Ted Williams, who by hitting to all fields might reach the .400 mark again.

A Heavy Jolt

This recent New York basketball scandal hit all college sports a harder jolt than anyone seems to know. It is generally understood, whether rightly or wrongly, that the New York explosion was only a small part of what was happening over the map.

I have also heard more than a few also wonder if the same thing wasn't happening or could happen in college football. It could easily, if not closely watched.

Football's \$300,000 and \$400,000 gates for single games is far beyond what the earlier educators looked for.

When numberless football players help to run a season's cost up to \$250,000, you get part of the answer. There are more than a few people today who insist that if a college plays to 60,000, 70,000 and 95,000 fans per game, the football player should get his share.

Don't think that many a football player is thinking differently. He's human, too.

Men are so friendly that it seems women should be friendly too.

Case of the Dodgers		
The Brooklyn Dodgers last season were very much of the Red Sox type. They had all that it takes—but they didn't take it.		
I was sitting with Eddie Sawyer, headman of the Phillies and in my book one of baseball's all-time managers. Eddie was picking the Dodgers.		
"How can you beat 'em?" he asked, "with all that man power—everything?"		
"How did you beat 'em last year?" I asked. "They still had a much better ball club."		
"Take it this way," Sawyer said. "Look at the ballplayers I have—the Giants have—the Braves have. How can you beat out a club that has Campanella back of the bat, Hodges on first base, Robinson on second, Reese at short, anybody at third, with Snyder and Furillo in the outfield? Plus such pitchers as Newcombe, Roe, Branca, Hatten, Barney, Banta, Bankhead, Palica—on and on—working in droves? They had everything last year—and they'll have it this year. Who is Musial worried about? Furillo and Snyder. Or Robinson. In my book Hodges is more dangerous than Musial. He was against the Phillies. Much more dangerous."		
The Dodgers have the best cast in baseball with the exception of one overlooked spot, pitching.

Customers' Corner

How accurate can you be?

In some manufacturing businesses, for instance, they have to allow for a slight margin of error.

But when it comes to weighing a customer's purchase or adding up her bill we aren't satisfied to be "almost accurate" at A&P.

Our skilled clerks know that they must give you full weight, full measure and charge the correct price.

That is why we can mark the price plainly on every item as well as on your cash register receipt.

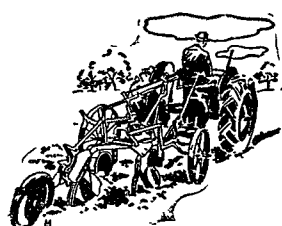

You will help the men and women of A&P maintain their well-earned reputation for accuracy by promptly reporting any time we might be in error. Please write:
